The said Body Corporate shall consist of one Chancellor, one Vice-Chancellor and such number of ex-officio and other Fellows as the Governor-General of India in Council hath already appointed, or shall from time to time, by any order published in the *Calcutta Gazette*, hereafter appoint; and the Chancellor, Vice-Chancellor, and Fellows for the time being shall constitute the Senate of the said University. Provided that if any person being Chancellor, Vice-Chancellor, or Fellows of the said University, shall leave India without the intention of returning thereto, his office shall thereupon become vacant.

IV. The Governor-General of India for the time being shall be the Chancellor of the said University, and the first Chancellor shall be the Right Honourable Charles John Viscount Canning.

V. The first Vice-Chancellor of the said University shall be Sir James William Colville, Knight. The office of Vice-Chancellor shall be held for two years only; and the Vice-Chancellor hereinbefore nominated shall go out of office on the first day of January 1859. Whenever a vacancy shall occur in the office of Vice-Chancellor of the said University by death, resignation, departure from India, effluxion of time, or otherwise, the Governor-General of India in Council shall, by notification in the *Calcutta Gazette*, nominate a fit and proper person, being one of the Fellows of the said University, to be Vice-Chancellor in the room of the person occasioning such

vacancy. Provided that on any vacancy in the said office which shall occur by effluxion of time, the Governor-General of India in Council shall have power to re-appoint the Vice-Chancellor herein before nominated or any future Vice-Chancellor to such office.

VI. The Lieutenant-Governors of Bengal and the North-Western Provinces, the Chief Justice of the Supreme

Court of Judicature at Fort William in Bengal or of any Court of Judicature hereafter to be constituted to or in which the powers of the said Supreme Court may be transferred or vested, the Bishop of Calcutta, and the Members of the Supreme Council of India, all for the time being, shall be ex-officio Fellows of the said University. The whole number of the Fellows of the said University, exclusive of the Chancellor and Vice-Chancellor for the time being, shall never be less than thirty; and whenever the number of the said Fellows, exclusive as aforesaid, shall by death, resignation, departure from India, or otherwise, be reduced below thirty, the Governor-General of India in Council shall forthwith, by notification in the *Calcutta Gazette*, nominate so many fit and proper persons to be Fellows of the said University as, with the then Fellows of the said University, shall make the number of such Fellows, exclusive as aforesaid, thirty. But nothing herein contained shall prevent the Governor-General of India in Council from nominating more than thirty persons to be Fellows of the said University if he shall see fit.

VII. The Governor-General of India in Council may cancel the appointment of any person already appointed, or hereafter to be appointed a Fellow of the University, and as soon as such order is notified in the *Gazette*, the person so appointed shall cease to be a Fellow.

VIII. The Chancellor, Vice-Chancellor, and Fellows for the time being shall have the entire management of and superintendence over the affairs, concerns, and property of the said University; and in all cases unprovided for by this Act, it shall be lawful for the Chancellor, Vice-Chancellor, and Fellows to act in such manner as shall appear to them best calculated to promote the purposes intended by the said University.

The said Chancellor, Vice-Chancellor, and Fellows shall have full power from time to time to make and alter any bye-laws and regulations (so as the same be not repugnant to law, or to the general objects and provisions of this Act) touching the examination for Degrees and the granting of the same; and touching the examination for Honours and the granting of marks of Honour for a higher proficiency in the different branches of Literature, Science, and Art; and touching the qualifications of the candidates for Degrees and the previous course of instruction to be followed by them, and the preliminary examinations to be submitted to by them; and touching the mode and time of convening the meetings of the Chancellor, Vice-Chancellor, and Fellows; and, in general, touching all other matters whatever regarding the said University. And all such bye-laws and regulations, when reduced into writing, and after the common seal of the said University shall have been affixed thereto, shall be binding upon all persons, members of the said University, and all candidates, for Degrees to be conferred by the same, provided such bye-laws and regulations shall have been first submitted to and shall have received the approval of the Governor-General of India in Council.

IX. All questions which shall come before the Chancellor, Vice-Chancellor, and Fellows, shall be decided at a meeting of the Senate by the majority of the Members present; and the Chairman at any such meeting shall have a vote, and, in case of an equality of votes, a second or casting vote. No question shall be decided at any meeting, unless the Chancellor, or Vice-Chancellor, and five Fellows, or, in the absence of the Chancellor, and Vice-Chancellor, unless six Fellows at the least, shall be present at the time of the decision. At every meeting of the Senate, the Chancellor, or in his absence the Vice-Chancellor, shall preside as Chairman; and, in the absence of both, a Chairman shall be chosen by the Fellows present, of the major part of them.

X. The said Chancellor, Vice-Chancellor, and Fellows for the time being shall have full power from time to time to appoint, and, as they shall see occasion, to remove all Examiners, Officers, and servants of the said University.

XI. The said Chancellor, Vice-Chancellor, and Fellows, shall have power after examination, to confer the several Degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, and Master of Civil Engineering; they shall also have power, after examination, to confer upon the candidates for the said several Degrees marks of honour for a high degree of proficiency in the different branches of Literature, Science, and Art, according to rules to be determined by the bye-laws to be from time to time made by them under the power in that behalf given to them by this Act.

XII. Except by special order of the Senate, no person shall be admitted as a candidate for the Degree of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, or Master of Civil Engineering, unless he shall present to the said Chancellor, Vice-Chancellor, and Fellows, a certificate, from one of the Institutions authorized in that behalf by the Governor-General of India in Council, to the effect that he has completed the course of instruction prescribed by the Chancellor, Vice-Chancellor, and Fellows of the said University, in the bye-laws to be made by them under the power in that behalf given by this Act.

XIII. The said Chancellor, Vice-Chancellor, and Fellows shall cause an examination for Degrees to be held at least once in every year; on every such examination, the candidates shall be examined either by Examiners appointed for the purpose from among the Fellows by the said Chancellor, Vice-Chancellor, and Fellows, or by other Examiners so to be appointed; and on every such examination, the candidates, whether candidates for an ordinary Degree or for a Degree with honours, shall be examined on as many subjects and in such manner as the said Chancellor, Vice-Chancellor, and Fellows shall appoint.

XIV. At the conclusion of every examination of the candidates, the Examiners shall declare the name of every candidate whom they shall have deemed entitled to any of the said Degrees, and his proficiency in relation to other candidates; and also the honours which he may have gained in respect of his proficiency in that department of knowledge

- in which he is about to graduate; and he shall receive from the said Chancellor a certificate, under the seal of the University of Calcutta and signed by the said Chancellor or Vice-Chancellor, in which the particulars so stated shall be declared.

XV. The said Chancellor, Vice-Chancellor, and Fellows shall have power to charge such reasonable fees for the Degrees to be conferred by them, and upon admission into the said University, and for continuance therein, as they, with the approbation of the Governor-General of India in Council shall from time to time see fit to impose. Such fees shall be carried to one General Fee Fund for the payment of expenses of the said University, under the directions and regulations of the Governor-General of India in Council, to whom the accounts of income and expenditure of the said University shall once in every year be submitted for such examination and audit as the said Governor-General of India in Council may direct.

ACT NO. XLVII OF 1860.

Passed on the 6th October 1860.

An Act for giving to the Universities of Calcutta, Madras, and Bombay the power of conferring Degrees in addition to those mentioned in Acts II, XXII, and XXVII of 1857.

WHEREAS it is expedient to give to the Universities of Calcutta, Madras, and Bombay established under Acts II, XXII, and XXVII of 1857, the power of conferring Degrees other than the Degrees in that Act expressly provided for; It is enacted as follows:—

I. It shall be competent to the Chancellor, Vice-Chancellor, and Fellows of the Universities of Calcutta, Madras, or Bombay respectively to confer such Degrees, and to grant such Diplomas or Licences in respect of Degrees, as the said Chancellor, Vice-Chancellor, and Fellows of any such University shall have appointed or shall appoint by any bye-laws or regulations made and passed or to be made or passed by them in the manner provided in the said Acts and submitted to and approved by the Governor-General in Council as far as regards the

University of Calcutta, or by the Governor in Council of Madras or Bombay as regards the Universities of Madras and Bombay respectively.

II. All the provisions contained in the said Acts II, XXII, and XXVII of 1857 with respect to the Degrees therein mentioned, and to the examinations for those Degrees shall apply to any Degrees which may be conferred under this Act and to the examinations for such Degrees.

ACT NO. I OF 1884.

Passed on the 4th January, 1884.

An Act to amend the Law relating to the granting of honorary degrees by the Universities of Calcutta, Madras and Bombay.

WHEREAS it is expedient to amend the law relating to the granting of honorary degrees, and to give to the Universities at Calcutta, Madras and Bombay the power of granting the degree of Doctor in the Faculty of Law to persons who have not undergone a previous examination; and whereas the Executive Government of each of the said Universities is, by bye-laws made under the Acts establishing the same, vested in a Syndicate consisting of the Vice-Chancellor and certain of the Fellows.

It is hereby enacted as follows :—

1. Act No. XXI of 1875 (*an Act to authorise the Repeal of Act XXI of University at Calcutta to grant honorary degrees*) is repealed.

2. If the Vice-Chancellor and not less than two-thirds of the other members of the Syndicate of any of the Universities at Calcutta, Madras and Bombay recommend that an honorary degree be conferred on any person, on the ground that he is, in their opinion, by reason of eminent position and attainments, a fit and proper person to receive such a degree, and their recommendation is supported by a majority of those present at a meeting of the Senate and is confirmed by the Chancellor, it shall be lawful for the Chancellor, Vice-Chancellor and Fellows to confer on that person the degree of Doctor in the Faculty of Law, without requiring him to undergo any examination.

III.

BYE-LAWS.

THE SENATE.

The Senate* as constituted by Act No. II of 1857, shall meet ordinarily once a year, on the third Saturday in April,† and at other times when convened by the Vice-Chancellor.

2. The Vice-Chancellor shall convene a meeting of the Senate on the requisition of any six of the members.

3. Nine Members of the Senate shall constitute a quorum, and all questions shall be decided by a majority of the votes of the Members present.

THE FACULTIES.

1. The Senate shall be divided into four Faculties, namely, Arts, Law, Medicine and Engineering. Every Member of the Senate may be a Member of one Faculty at least, and any Member of the Senate may be a Member of more than one Faculty.

2. The Faculties shall be appointed by the Senate at its Annual Meeting.

3. Each Faculty shall elect its own President. Every Meeting of a Faculty shall be convened by its President, or, in his absence, by the Senior Fellow belonging to that Faculty.

4. If any Faculty omit to elect a President before the Annual Meeting of the Senate, or, in case the office should become vacant during the year, to elect a President for the rest of the year within one month after the vacancy occurs, the Vice-Chancellor may appoint any Member of such Faculty to be its President.

* By the 8th Section of Act No. II of 1857, the Senate have power to make and alter Bye-laws and Regulations, subject to the approval of the Governor-General of India in Council.

† The Syndicate have power to alter all dates.

5. Three Members of any Faculty shall constitute a quorum of that Faculty.

THE SYNDICATE.

1. The Executive Government of the University shall be vested in a Syndicate; consisting of the Vice-Chancellor and ten of the Fellows, who shall be elected for one year by the several Faculties, in the following proportions:—

Five by the Faculty of Arts.

Two by the Faculty of Law.

Two by the Faculty of Medicine.

One by the Faculty of Engineering.

2. The elections, both of the Presidents of the Faculties and of the Members of the Syndicate, shall take place before the Annual Meeting of the Senate, and the names of the persons elected shall be declared at such Meeting.

3. The Syndicate shall meet ordinarily once a month, and at other times when convened by the Vice-Chancellor.

4. All Members of the Syndicate must be resident in or near Calcutta. If any Member be temporarily absent from Calcutta, the President of his Faculty may appoint a Member to officiate during his absence. Should the period of absence exceed three months, the Vice-Chancellor may declare his place vacant.

5. On every vacancy in the Syndicate, caused by death, resignation, absence from Calcutta, or otherwise, the Faculty, by whom the Member causing the vacancy was elected, shall proceed to elect a new Member for the remainder of the current year.

6. If any Faculty omit to elect a Member of the Syndicate within one month after a vacancy occurs, the Vice-Chancellor may appoint one from among the Members of that Faculty.

7. Four Members of the Syndicate shall constitute a quorum, and all questions shall be decided by a majority of the votes of the Members present.

8. The Vice-Chancellor, or, in his absence, the Senior* Fellow present shall preside at all Meetings of the Syndi-

* The ex-officio Fellows of the University are always the Senior Fellows in order of official precedence. The seniority of the other Fellows mentioned in the Act of Incorporation is according to the order in which their names appear there. The seniority of all other Fellows is according to the date and order of their appointment.

cate, and if the votes, including that of the President, are equally divided, the President shall have a casting vote.

9. It shall be the duty of the Syndicate to appoint, and if necessary to remove, the Examiners and all other officers of the University, except the Registrar; to order examinations in conformity with the Regulations, and to fix the times at which they shall be held; to grant Degrees, Honours, and Rewards; to keep the Accounts of the University: and to correspond on the business of the University with the Government and all other authorities and persons.

10. During the year, between the Annual Meetings of the Senate, the Syndicate may appoint any Member of the Senate to any one or more of the Faculties, and may transfer any Member from one Faculty to another.

11. *The Syndicate shall from time to time frame such Bye-laws and Regulations as may be necessary, subject to the approval of the Senate. Each Faculty shall report on any subject that may be referred to it by the Syndicate.*

12. Any Faculty, or any Member or number of Members of the Senate, may make any recommendation to the Syndicate, and may propose any Bye-law or Regulation for the consideration of the Syndicate.

13. The decision of the Syndicate on any such recommendation or proposition, or any matter whatever, may be brought before the Senate by any Member of the Senate at one of its Meetings, and the Senate may approve, revise or modify any such decision, or may direct the Syndicate to review it.

14. No question shall be considered by the Senate that has not, in the first instance, been considered and decided on by the Syndicate.

THE REGISTRAR.

1. The Registrar shall be appointed by the Senate at the Annual Meeting. He shall be appointed for two years only, but at the end of every such term he may be re-appointed. The term of office of the Registrar shall commence on the first day of May next following his election. If a vacancy occur in the office of Registrar between two Annual Meetings of the Senate, the Syndicate shall appoint a person to officiate until the next first day of May.

2. It shall be competent to the Syndicate at their

discretion to grant leave of absence for short periods to the Registrar, when such leave can be granted without public inconvenience or extra expense. It shall also be competent to the Syndicate once during the Registrar's two years' tenure of office to grant him leave of absence on medical certificate, without forfeiture of salary, for a period not exceeding three months; provided that a satisfactory arrangement can be made without extra expense for the discharge of the Registrar's duties during his absence. Should it be necessary for the Registrar, after enjoying one such leave of absence, to be absent a second time (otherwise than for a short period as already provided,) or should it be necessary for the Registrar at any time to be absent for more than three months, or to proceed to Europe, the office of Registrar shall thereupon become vacant.

3. The Registrar shall be the custodian of the Records, Library, Common Seal, and such other property of the University as the Syndicate shall commit to his charge.

4. All Meetings of the Senate, the Syndicate, and the Faculties shall be convened through the Registrar, who shall keep a record of the proceedings of such meetings.

IV.—ELEMENTARY PHYSICS.

(a) *General Ideas—*

Units of measurement, and definitions of mass, force, motion.

Laws of motion.

Work and energy,—measurement of each.

Chief forces of nature.

General properties of solids, liquids, and gases.

Conditions of equilibrium of a mass acted on by forces.

Motions of translation and rotation.

Pressure of fluids and gases : measurement of pressure.

Equilibrium of floating bodies.

Specific gravity and its determination.

Motion of pendulum, and of the torsion pendulum or balance.

(b) *Heat—*

Laws of expansion of solids, liquids, and gases under heat.

Determination of co-efficients of expansion.

Measurement of temperature.

Maximum density of water.

Changes of molecular state, and latent heat of molecular changes of state.

Influence of change of pressure on the boiling point and melting point.

Regelation.

Laws of pressure of gases.

Elastic force of vapour ; dew point, and its determination.

Formation of dew and clouds.

Radiation, conduction and convection of heat.

Phenomena of combustion.

Steam engines.

(c) *Light—*

Laws of transmission of light and of its intensity.

Shadows.

Images produced by small apertures.

Photometry.

Reflection of light.

Refraction of light.

Images by reflection, and refraction, and their position.

Critical angle.

Properties of Prisms and lenses.

Telescope, microscope, spectroscope, the human eye.

Decomposition of light.

BACHELOR OF ARTS.

1. An Examination for the degree of Bachelor of Arts shall be held annually in Calcutta and at such other places* as shall from time to time be appointed by the Syndicate, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any undergraduate of the University may be admitted to the examination, provided he has prosecuted a regular course of study in any affiliated institution for not less than two academical years after passing the First Examination in Arts.†

3. Any candidate may be examined either for a pass or for honours in any branch. A candidate who desires to be examined for honours in any branch, must take up instead of the pass subject the corresponding honour subject. A candidate who obtains honours in any branch will be considered to have also passed in that branch. Should a candidate not have deserved honours in any branch, the examiners shall be authorized to declare that he has passed in that branch, if they consider that his attainments come up to the pass standard.

4. Every candidate shall send his application, with a certificate in the form entered in Appendix A. to the Registrar at least six weeks before the date fixed for

- the commencement of the Examination. If he desires to be examined for honours, he shall state in his application the subject or subjects in which he desires to be so examined.

5. A fee of thirty rupees shall be payable by each candidate. No candidate shall be admitted to the examination, unless he shall have paid this fee to the Registrar. A candidate who fails to pass or to present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations for the degree of Bachelor of Arts on payment of a like fee of thirty rupees on each occasion, provided he produces a certificate from the head of an *affiliated institution* shewing that he has prosecuted a regular course of study for six months since the date of the last Examination to which he was admitted.

6. The Examination for the degree of Bachelor of Arts shall be conducted by means of printed papers.

7. At such time as the Syndicate shall determine (the date to be approximately notified in the Calendar for the year) the Syndicate shall publish a list of the candidates who have passed, arranged in alphabetical order, together with a list of those who have obtained honours in each branch, arranged in two divisions, both in order of merit. At the examination for the degree of Bachelor of Arts every candidate shall be examined in one or other of the two following courses marked A and B:—

Virtual velocities.

(b) *Dynamics*—

Definition and measurement of mass, force, velocity, acceleration, momentum, work and energy.

Laws of motion.

Uniform motion.

Uniformly accelerated motion—

(1) In a straight line,

(2) In a parabola.

(3) In a circle.

Simple cases of impact.

(c) *Hydrostatics*—

The transmission and intensity of fluid pressure.

Determination of component and resultant fluid pressure in simple cases.

Centre of pressure.

Conditions of equilibrium of floating bodies.

Metacentre.

Properties of elastic fluids and determination of pressure.

Specific gravity, and the methods of determining it.

Measurement of heights by the barometer.

Mixture of gases.

Description of the barometer, air-pump, common and force pumps, the diving-bell, the balloon, siphon, and Bramah's press, as applications of hydrostatical principles.

The honour subjects shall include—

(a) *Analytical Plane Geometry.*

Rectangular and polar co-ordinates.

Transformation of co-ordinates.

The straight line.

The circle.

The parabola.

The ellipse.

The hyperbola.

The general equation of the second degree.

BACHELOR OF ARTS.

(b) *Differential Calculus.*

Definition of differential co-efficients.

Differentiation of functions of a single variable.

Successive differentiation.

Taylor's and Maclaurin's theorems, and their simpler applications.

Evaluation of functions which assume an indeterminate form.

Differentiation of functions and implicit functions.

Maxima and minima values of functions of one variable.

Tangents, normals, asymptotes, curvature, singular points, evolutes, involutes.

Tracing of curves.

(c) *Integral Calculus.*

Integration of simple functions of a single variable.

Integration of rational fractions.

Integration by formulæ of reduction.

Determination of lengths and areas of curves.

III, IV,—PHYSICS AND CHEMISTRY.

The Elements of Physics shall include the following considered with special reference to Chemistry :—

(a) *Heat*—

Heat of combustion, absolute thermal effects and pyrometric thermal effects of chemical combination, theory of flame, theories of the source of light in luminous flames.

b) *Light*—

Reflection and refraction, dispersion, spectrum analysis, chemistry of light, photography fluorescence, double refraction and polarization, saccharimeters.

c) *Magnetism*—

Magnetism, magnetic polarity, natural and artificial magnets, diamagnetism.

d) *Electricity*—

Two kinds of electricity; insulators and conductors; sources of electricity, electricity developed by chemical action, voltaic electricity, various batteries, electrolysis, laws of electrolysis, electroplating, electro-gilding.

Physics shall include—

a) *General Ideas*—

—Wave motion :—

Measurement of simple or harmonic wave motions.

Combination of wave motions.

Resolution of complex wave motions into simple or harmonic wave motions.

—Potential :—

Definition of potential.

Calculation of potential in simple cases.

Determination of force from potential.

Fundamental propositions respecting lines of forces, equipotential surfaces, and tubes of force.

3.—Elasticity :—

Definition of elasticity.

Measurement of elasticity in the cases of solids, liquids and gases.

Distinction between, and determination of, elasticity of constant temperature and of constant entropy for gases.

(b) Heat—

In addition to a more thorough acquaintance with the subject than that required for the First Arts Examination and a greater power of working problems on heat, an elementary knowledge of the principles of thermo-dynamics will be required.

(c) Light—

In this subject more difficult questions in the determination of foci, focal lengths, &c., will be required than for the First Arts Examination. Also the following :—

Spherical aberration.

Dispersion.

The formation of rainbows.

(d) Frictional Electricity—

This subject must now be taken up in connection with potential.

(e) Sound—

The laws of the production and propagation of sound determined experimentally.

Intensity, pitch, and quality of sounds.

The velocity of sound in air and other media : Doppler's principle.

Reflection and refraction of sound.

Measurement of sound vibrations and wave lengths of air. Resonance.

Interference of sound waves. Beats.

Harmonic tones ; their generation and function in sound.

Longitudinal vibration of rods and of columns of air.

Transverse vibration of strings.

Formation of Chladni's figures.

Vibrations of tuning-forks and bells.

Nature of musical sounds.

Vocal organs of man.

(f) Dynamical Electricity—

Voltaic batteries as sources of electric currents.

Action of currents on magnetic needles. Galvanometers.

Thermo-electric currents.

Definition and measurement of electric force, conductivity, resistance, and current.

Ohm's law, and its simpler applications.

Laws of action of currents on currents, and their simpler applications.

Solenoids. Ampère's theory of magnetism.

Electro-magnets.

Mechanical, chemical, and heating effects of currents. Electrolysis.

Induced currents, their modes of generation and laws of action.

Ruhmkorff's coil.

Electro-magnetic currents.

Electro-magnetic machines; the more important details of the working of telegraphs.

Theories of electricity.

(g) *Magnetism*—

Properties of permanent and artificial magnets.

Magnetic induction.

Phenomena of terrestrial magnetism.

Determination of declination, dip, and intensity of the magnetic force of the earth.

The compass needle.

Methods of magnetisation.

Determination of magnetic laws of action by the torsion balance.

Magnetic Potential.

(h) *Polarization of Light*—

Undulatory theory of light.

Reflection and refraction of light.

Prismatic analysis of light.

Achromatism.

Explanation of lines in the solar and other spectra.

Interference of light.

Diffraction of light.

Measurements of wave lengths of light.

Colours of thin plates.

Double refraction.

Polarization of light by reflection, refraction, and double refraction.

- Interference of polarized light as shewn by double refracting crystals. Polariscopes.

Elliptic and circular polarization.

Rotary polarization.

The Elements of Chemistry shall include :—

(a) The following general considerations :—

Definition of Chemistry; differences between chemical action and the action of the physical forces; simple and compound matter; different modes of chemical action; combining weights, volume weights; principles of chemical nomenclature, symbolic notation, graphic notation; chemical equations; atoms and molecules; general knowledge of atomicity of elements; simple and compound radicals; classification of elements.

- (b) A fairly complete knowledge of the modes of occurrence, methods of preparation, properties, uses, and general characters of the following non-metallic elements, of their allotropic modifications, and of their principal and best known compounds :—

Hydrogen, fluorine, chlorine, bromine, iodine.
Oxygen (and ozone).
Boron.
Carbon, silicon.
Nitrogen, phosphorus, arsenic.
Sulphur.

- (c) A general knowledge of :—

The distinctions between non-metals and metals.
Acids, bases and salts.
The constitution of salts.
The principles of crystallography.

- (d) A knowledge of the methods of preparation, properties, and uses of the following metals and their principal salts :—

Sodium, potassium, ammonium, silver.
Calcium (glass manufacture, &c.), magnesium, zinc, copper, mercury.
Gold.
Lead, tin, platinum, aluminium (porcelain, pottery, &c.).
Antimony, bismuth.
Chromium, manganese, iron.

Chemistry shall include, in addition to a fuller knowledge of the subjects specified under the head Elements of Chemistry—

Inorganic Chemistry—

- (a) General considerations :—

Laws of chemical combination, equivalents, atomic weights, physical and chemical relations of atomic weights, specific or atomic volumes, a more complete knowledge of the subject of atomicity, or quantivalence; artiads, perissads, &c.; variations of atomicity; absolute, latent, and active atomicity; relations between atomic weight and quantivalence, chemical affinity, influence of pressure on chemical action, relations of heat to chemical affinity, &c., physical properties of metals, chemical relations of metals, alloys, general characters and general methods of preparation of compounds of metals with non-metals, theory of normal, acid and basic salts, isomorphism, the principles of qualitative analysis.

- (b) Study of the following elements :—

Selenium, tellurium, lithium, caesium, rubidium, barium, strontium, the earth metals, cadmium, indium, gallium, titanium, vanadium, uranium, tungsten, molybdenum, nickel, cobalt, and the platinum metals.

- (c) A knowledge of the methods used in the preparation of the more important acids, salts, &c., employed in the arts and manufactures.
- (d) A knowledge of metallurgical operations, such as are employed in the preparations of iron, zinc, copper, lead, tin, mercury, silver and aluminium.

Organic Chemistry—

- (a) The following general considerations :—
 Definition of organic bodies, synthesis from inorganic materials, decompositions and transformations of organic compounds, analysis of organic bodies.
 Determination of the specific gravity of gases and vapours.
 Determination of empirical, rational, and constitutional formulæ ; theory of types, classification of organic compounds, organic series, constitutional formulæ of organic compounds.
- (b) Isomerism, metamerism, and polymerism, physical properties of organic compounds.
 A knowledge of some few typical compounds in each of the different classes of organic compounds.

V. Physiology shall include :—

- (1) A course of practical instruction in Elementary Physiology.
 (2) General Physiology.

Botany shall include—

- (a) The morphology and histology of flowering plants ; the general principles of their classification on the systems of Linnæus and De Candolle, with a detailed acquaintance with the characters of the following natural orders :—

Anonaceæ.	Apocynææ.
Menispermaceæ.	Asclepiadaceæ.
Nymphæaceæ.	Convolvulaceæ.
Papaveraceæ.	Solanaceæ.
Cruciforæ.	Boraginæ.
Malvaceæ.	Acanthaceæ.
Sterculiaceæ.	Verbenaceæ.
Tiliaceæ.	Labiataæ.
Aurantiacææ.	Amarantaceæ.
Ampelidææ.	Urticaceæ.
Anacardiaceæ.	Euphorbiaceæ.
Leguminosæ.	Palmææ.
Myrtaceæ.	Aroideæ.
Combretaceæ.	Commelynaceæ.
Cucurbitaceæ.	Orchidaceæ.
Umbelliferæ.	Scitamineæ.
Rubiaceæ.	Cyperaceæ.
Compositæ.	Gramineæ.

- (b) A general acquaintance with the morphology, histology and classification of cryptogams.
- (c) Vegetable Physiology.

Zoology shall include :—

- (a) Embryonic development and comparative anatomy of the principal orders of animals, ordinal classification of the animal kingdom, and generic classification of one selected order of Vertebrata and one of Invertebrata, to be notified beforehand. The geographical distribution and habitats of animals. The species of the mammals of India, omitting the micro-mammalia *viz.*, Insectivora, Rodentia, and Chiroptera; and the Indian genera of one order of Reptilia and one of Aves, to be previously notified.
- (b) Special Physiology of the Vertebrata.
- (c) Special Physiology of the Invertebrata.

VI. Geology shall include :—

The classification, structure, and formation of rocks. The evidence of past changes afforded by their present condition, and a practical acquaintance with their mineral characteristics, to be tested by specimens. The generic determination of the most characteristic fossil forms, and the indications of age and habitat which they afford. A practical knowledge of fossil forms to be tested by specimens. A general knowledge of the geology of Great Britain and Western Europe, and a more detailed knowledge of the geology of India. An acquaintance with geological maps to be tested by the construction of a geological section from a given map.

Mineralogy shall include :—

- (a) General characteristics of minerals.
- (b) Crystallography of the structure of minerals, fundamental forms of crystals, cleavage, secondary forms, compound crystals, dimorphism, irregularities of crystals, measuring angles of crystals, massive minerals, columnar structure, lamellar and granular structure, pseudomorphous crystals.
- (c) Physical properties of minerals; lustre, colour, diaphaneity, refraction and polarization, phosphorescence, electricity and magnetism, specific gravity, hardness, state of aggregation, fracture, taste, odour.
- (d) Chemical properties of minerals; action of acids, &c., on minerals; blow-pipe re-actions of minerals.
- (e) Classification of minerals.
- (f) Description and recognition of the more important minerals and rocks or mineral aggregates.
- (g) Chemical composition and formulæ of minerals.

Physical Geography shall include :—

The form and density of the earth, and modes of ascertaining them. The distribution and characteristic geographical phenomena of land and water. Climate and its determining causes. The inorganic physical geography of India. Meteorology.

EXAMINATION FOR THE DEGREE OF M. A.

1. An Examination for the degree of Master of Arts shall be held annually in Calcutta, commencing at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any candidate who has passed the B. A. Examination may be examined for the degree of M. A. in one or more of the following branches :—

- (1) Languages.
- (2) History.
- (3) Mental and Moral Philosophy.
- (4) Mathematics.
- (5) Natural and Physical Science.

3. A fee of rupees fifty shall be payable by each candidate. No candidate shall be examined unless he shall have paid this fee to the Registrar. A candidate who fails to pass or to present himself for examination shall not be entitled to claim a refund of the fee.

4. Every candidate shall intimate to the Registrar the branch or branches in which he desires to be examined. Such intimation must reach the office of the Registrar at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

5. The examination in languages shall be in English for candidates whose vernacular is not English, or in any one of the following classical languages, *viz.*, Greek, Latin, Sanskrit, Arabic, Persian, Hebrew and Pali.

The subjects in languages shall be selected by the Syndicate two years before the examination.

The examination shall include written answers in English to questions relating to the books selected for the examination.

- It shall also include questions on Comparative Grammar, with special reference to the language professed by the candidate.

Every candidate shall be required to write an essay in English on a subject connected with the History or Literature of the Language professed by him.

The examination in English shall include the elements of Anglo-Saxon grammar, and one paper in English literature generally.

The examination in the classical languages shall include translation into English from the languages professed by the candidate, and into that language from English. A candidate for the degree of M. A. in Sanskrit shall be allowed to take up Indian palæography and epigraphy instead of any group which he may select of the text-books in philosophy fixed by the Syndicate. The Syndicate to determine what constitutes a group for the purpose of this regulation.

6. The examination in History* shall be in the following subjects :—

- (a) The History of England (including Scotland, Ireland and the British Colonies and Dependencies) to the accession of Queen Victoria.
- (b) The Constitutional History of England.
- (c) A selected period of History—Indian or European, Ancient, Mediæval, or Modern—to be studied with reference to original sources.
- (d) Political Philosophy, General Jurisprudence, and International Law.
- (e) *Political Economy and Economic History.*

Candidates shall also be required to write an Essay in English on some subject included in the foregoing course.

7. The Examination in Mental and Moral Philosophy shall be in the following subjects :—

- Logic, Deductive and Inductive.
- Psychology.
- Ethics.
- Natural Theology, or the Evidences of Christianity.

The above subjects shall be studied historically in the works of the principal authorities.*

8. The Examination in Mathematics shall be in the following subjects :—

- (1) Algebra.
- (2) Plane Trigonometry.
- (3) Theory of Equations and the Elements of Determinants.
- (4) Analytical Plane Geometry.
- (5) Analytical Solid Geometry.
- (6) Differential Calculus.
- (7) Integral Calculus, omitting elliptic integrals and the calculus of variations.
- (8) Differential Equations.
- (9) Statics.
- (10) Dynamics of a Particle, omitting the more complicated problems of constrained motion upon surfaces, and also propositions involving the application of the calculus of variations.
- (11) Hydromechanics, omitting the theory of sound.
- (12) Geometrical optics, omitting the formulæ for the calculation of spherical aberration, and reflection and refraction at surfaces in any manner.
- (13) Spherical Trigonometry, omitting the parts which are not required in Astronomy.
- (14) Practical and Spherical Astronomy.
- (15) Newton's Principia, sections I to III.
- (16) Rigid Dynamics, including the motion of Rigid Bodies in two dimensions.

* For text-books, see Section IX.

9. Candidates in Natural and Physical Science shall be allowed to select alternatively one out of the following subjects :—

- (A) Chemistry.
- (B) Heat, Electricity and Magnetism, as principal subjects, with Light and Sound as subsidiary subjects.
- (C) Light and Sound as principal subjects, with Heat, Electricity and Magnetism as subsidiary subjects.
- (D) Botany.
- (E) Physiology and Zoology.
- (F) Geology and Mineralogy.

(A). The course in chemistry shall be both theoretical and practical. In the practical Examination candidates ought to show a good knowledge of chemical manipulation and ought to be able to qualitatively analyse complex inorganic substances. They should also be acquainted with the principles of quantitative analysis.*

(B) and (C). Candidates will have to show a thorough knowledge of the principal subjects and a general acquaintance with the subsidiary subjects, treating the subjects mathematically and experimentally.

(D) Botany* shall include the following :—

- (a) General and special Morphology and Physiology.
- (b) Systematic Botany.
- (c) Palæobotany.

(d) Practical knowledge of indigenous Indian plants, and identification of specimens of them by Roxburgh's *Flora Indica* (Clarke's edition).

(E) Zoology* shall include the subjects of (a) Comparative Anatomy and Physiology, (b) Distribution, and (c) Evolution.

(F) Geology and Mineralogy* shall include the subjects of (a) Stratigraphical Geology, (b) Palæontology, (c) Mineralogy, (d) Crystallography, (e) Elementary Inorganic Chemistry.

10. As soon as possible after each examination for the degree of M. A., the Syndicate shall publish a list of candidates who have passed, arranged in three classes, each in order of merit. Candidates shall be bracketed together, unless the Examiners are of opinion that there is clearly a difference in their merits. Each successful candidate shall receive with his degree of M. A. a certificate setting forth the subject in which he was examined, and the class in which he was placed.

11. The candidate who shall be placed first in the first class in each branch shall receive a Gold Medal and a prize of books to the value of one hundred rupees, and the second student of the first class in each branch shall receive

* For text-books, see Section IX.

a Silver Medal and a prize of books to the value of one hundred rupees.

12. Any Master of Arts may, on payment of a fee of fifty rupees, be admitted to the M. A. Examination in any branch other than that in which he was previously examined, and may, if his attainments come up to the standard prescribed for the degree of M. A., be granted a certificate to that effect, stating the class in which he has passed. A candidate who fails to pass, or to present himself for examination, shall not be entitled to claim a refund of the fee.

REGULATIONS FOR THE EXAMINATIONS OF FEMALE CANDIDATES.

GENERAL.

1. Female candidates shall be examined in a separate place under the superintendence of ladies.

2. No female candidate shall be admitted to any examination without presenting a certificate in the form to be prescribed by the Syndicate, signed by a member of the Senate, or the head of an affiliated institution.

3. In all examinations, the fees paid by female candidates shall be the same as those paid by males.

4. No unsuccessful candidate shall be entitled to a refund of her fee.

ENTRANCE EXAMINATION OF FEMALE CANDIDATES.

1. The Entrance Examination shall be the same for females as for males.

F. A. EXAMINATION OF FEMALE CANDIDATES.

1. Female candidates may be admitted to this examination without studying in an affiliated institution. No candidate, however, shall be allowed to present herself for this examination, until two years have elapsed from the time of her passing the Entrance Examination.

2. Every female candidate shall be allowed to take up the subjects prescribed by the University of Calcutta for the F. A. course, with the option of substituting French, German, Italian, or an Indian vernacular for the second language.

3. Female candidates shall also be allowed to substitute Botany for Physics.

B. A. EXAMINATION OF FEMALE CANDIDATES.

1. Female candidates may be admitted to this examination without studying in any affiliated institution. But no candidate shall be allowed to present herself for this examination until two years have elapsed from the time of her passing the F. A. Examination.

2. The names of those female candidates who may succeed in passing the B. A. Examination shall be submitted to the Senate every year before the Convocation, with a view to their being admitted to the degree of Bachelor of Arts.

M. A. EXAMINATION OF FEMALE CANDIDATES.

The M. A. Examination shall be the same for females as for males.

(ii.) LAW.**BACHELOR IN LAW.**

1. An examination for the degree of Bachelor in Law shall be held annually in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any Graduate of the University may be admitted to the Examination, provided that he has prosecuted a regular course of study in a school of law recognized by the Syndicate for not less than three academical years, two of which shall be after passing the B. A. Examination.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least thirty days before the date fixed for the commencement of the Examination.

4. A fee of thirty rupees shall be payable by each candidate. No candidate shall be admitted unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of thirty rupees on each occasion.

5. The examination shall be written and oral.

6. Every candidate shall be examined in the following subjects :—*

* For text-books, see Section IX.

years, and that in habits and character he is a fit and proper person for the degree of Doctor; *and*

(2.) He shall produce an essay, approved by the President of the Faculty of Law for the time being, on some subject connected with Law or Jurisprudence.

2. A fee of rupees one hundred shall be payable for the degree of Doctor in Law. No candidate shall be admitted unless he shall have previously paid this fee to the Registrar.

(iii.) MEDICINE.

LICENCE IN MEDICINE AND SURGERY.

1. An examination for a Licence* in Medicine and Surgery shall be held annually in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year. The examination shall consist of two parts, entitled respectively the First and Second Licentiate Medical Examinations.

FIRST LICENTIAE MEDICAL EXAMINATION.

2. Any ungraduate of the University who can produce certificates to the following effect, may be admitted to this examination :—

- (a.) Of having completed his nineteenth year.
- (b.) Of having been engaged in Medical studies for three Academic years after passing the First Examination in Arts.
- (c.) Of having attended the following courses of lectures at a School of Medicine recognized by the Syndicate.

Two Courses each of 70 Lectures.

Descriptive and Surgical Anatomy.

Chemistry.

Materia Medica.

General Anatomy and Physiology.

One Course of 20 Lectures.

Botany.

One Course.

Practical Chemical Exercises in testing the nature of ordinary poisons, and in examination of animal secretions and urinary deposits.

(d.) Of having studied Practical Pharmacy for three months and having acquired a practical knowledge of the preparation and compounding of medicines.

(e.) Of having dissected during three winter terms, and of having completed at least twelve dissections in each term.

* The holder of this Licence shall be styled Licentiate in Medicine.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least fourteen days before the date fixed for the commencement of the Examination.

4. A fee of twenty rupees shall be payable by each candidate. No candidate shall be admitted, unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of twenty rupees on each occasion.

5. The examination shall be written, oral and practical.

6. Every candidate shall be examined in the following subjects:—

- (a.) Descriptive and Surgical Anatomy.
- (b.) Chemistry, Organic and Inorganic, having special reference to Practical Medical Science.
- (c.) Botany, so far as regards the anatomy, histology and physiology of flowering plants.
- (d.) Materia Medica and Pharmacy, so far as regards drugs contained in the British Pharmacopœia.
- (e.) General Anatomy and Physiology.
- (f.) Practical Chemistry, so far as regards the testing of urine and urinary deposits. The identification of microscopic preparations shall form no part of any of the examinations in the foregoing subjects.

The Syndicate shall notify, three months before the Examination, the portions of Botany* in which candidates shall be examined.

7. As soon as possible after the Examination the Syndicate shall publish a list of the candidates who have passed, arranged in alphabetical order. Every candidate shall, on passing, receive a certificate in the form entered in Appendix A.

• 8. Any passed student of any Vernacular School of Medicine, if recommended by the Principal of an affiliated Medical College for distinguished merit, may be admitted to this Examination, on producing certificates to the following effect:—

- (a.) Of having passed the First Arts Examination of the University.
- (b.) Of having completed his nineteenth year.
- (c.) Of having passed the final Examination of the Vernacular School of Medicine with marked distinction.
- (d.) Of having, subsequently to qualifying in the Vernacular classes, been engaged for one year in the study of Medicine and

* See Section IX.

Surgery, and during that time of having attended, in a School of Medicine recognized by the Syndicate, a course of lectures in each of the following subjects :—

Anatomy.	Botany.
Physiology.	Chemistry.

9. A female student who has passed the Entrance Examination, attended classes, and obtained her certificate in Medicine, Surgery and Midwifery in the Calcutta Medical College, shall, if recommended by the Principal, be admitted to this Examination on her producing certificates to the following effect :—

(a.) Of having passed the First Arts Examination of the University.

(b.) Of having completed her nineteenth year.

(c.) Of having attended in a school of medicine recognized by the Syndicate an additional course of lectures in each of the following subjects :

Anatomy.	Botany.
Physiology.	Chemistry.

SECOND LICENTIATE MEDICAL EXAMINATION.

10. Any candidate who can produce certificates to the following effect, may be admitted to this Examination :—

(a.) Of having passed the First Licentiate Medical Examination or First M. B. Examination at least two academical years previously.

(b.) Of having, subsequently to passing the First Licentiate Medical Examination, or First M. B. Examination attended the following courses of lectures at a School of Medicine recognized by the Syndicate :—

Two Courses of 70 Lectures.

Medicine (including Hygiene).

Surgery.

Midwifery.

One Course of 40 Lectures.

General Pathology and Morbid Anatomy.

Two Courses of 50 Lectures.

Medical Jurisprudence.

One Course of 25 Lectures.

Diseases of the eye.

(c.) Of having subsequently to passing the First Licentiate Medical Examination, or First M. B. Examination dissected the surgical regions, and performed surgical operations during two winter sessions; the certificate to state the number and nature of the operations so performed.

(d.) Of having duly and carefully performed six *post-mortem* examinations, and having regularly attended one course of practical demonstrations in the Dead House.

(e.) Of having conducted at least six Labours.

Certificates on this subject will be received from any legally qualified practitioner in Medicine.

(f.) Of having attended Hospital and Dispensary Practice during, the last three academic years of study in the following manner, viz. :—

Three months of attendance at the Out-door dispensary of a recognized Hospital.

Fifteen months of attendance at the Surgical practice of a recognized Hospital, and Lectures on Clinical Surgery during such attendance.

Fifteen months of attendance at the Medical practice of a recognized Hospital, and Lectures on Clinical Medicine during such attendance.

Three months of attendance at the practice of an Eye-Infirmary.

(g.) Of having drawn up, in his own handwriting, six Medical and six Surgical cases, during his period of Service as Clinical clerk or dresser.

(h.) Of general character and conduct from the Principal of the College or School of Medicine at which he has studied.

11. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least fourteen days before the date fixed for the commencement of the examination.

12. A fee of twenty-five rupees shall be payable by each candidate. No candidate shall be admitted unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of twenty-five rupees on each occasion.

13. The examination shall be written, oral and practical.

14. Every candidate shall be examined in the following subjects :—

(a.) Principles and Practice of Medicine.

(b.) Ditto ditto of Surgery.

(c.) Ophthalmic Medicine and Surgery, so far as regards the diseases of the conjunctiva, cornea and iris.

(d.) Midwifery with the exception of the subjects of conception, generation and the Physiology of the foetus.

(e.) Medical Jurisprudence with the exception of the subjects of birth, inheritance, legitimacy, paternity, hermaphroditism, impotence, insanity, and life insurance.

(f.) Hygiene and general Pathology. The identification of microscopic preparations shall form no part of any of the questions in the foregoing subjects. The subject of poisons in the examination in medical jurisprudence shall be limited to poisons commonly used in India; and in the subject of pathology no question in special pathology shall be asked.

The Clinical Examination shall be conducted in the wards of a Hospital.

15. Every candidate shall be required—

To examine, diagnose, and treat cases of Acute or Chronic Diseases to be selected by the Examiners, and to draw up careful histories of the cases; also, if required, to perform and report in detail necropsical examinations of any of the selected cases that may have died in Hospital.

To apply apparatus for great surgical injuries and explain the object to be attained by them, as well as the best manner of effecting those objects.

To perform capital operations upon the dead subject, after detailing to the Examiners the pathological conditions in which such operations are necessary, the different modes of operation adopted, and the reasons for preferring any particular mode of procedure.

16. As soon as possible after the examination the Syndicate shall publish a list of the successful candidates, arranged in alphabetical order. Every candidate shall, on passing, receive a certificate in the form entered in Appendix A.

BACHELOR IN MEDICINE.

1. An examination for the degree of Bachelor in Medicine shall be held annually in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year. The examination shall consist of two parts, entitled respectively the First and Second M. B. Examinations.

FIRST M. B. EXAMINATION.

2. Any undergraduate of the University, who can produce certificates to the following effect, may be admitted to this examination :—

(a.) Of having passed the First Examination in Arts; *Latin having been one of the languages in which he was examined.**

(b.) Of having, subsequently to passing the First Examination in Arts, been engaged in Medical studies for three academical years.

(c.) Of having attended the following courses of lectures at a School of Medicine recognized by the Syndicate :—

Two Courses each of 70 Lectures.

Descriptive and Surgical Anatomy.

Chemistry.

Materia Medica.

General Anatomy and Physiology.

* The words here printed in italics are to take effect as soon after 1869 as the Syndicate may order.

*Two Courses each of 20 Lectures.***Botany.***One Course of 40 Lectures.***Comparative Anatomy and Zoology.***One Course.*

Practical Chemical Exercises in testing the nature of ordinary poisons, and in examination of animal secretions and urinary deposits.

(d.) Of having studied Practical Pharmacy for three months, and of having acquired a practical knowledge of the preparation and compounding of medicines.

(e.) Of having dissected during three winter terms and of having completed at least twelve dissections in each term.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least fourteen days before the date fixed for the commencement of the examination.

4. A fee of twenty rupees shall be payable by each candidate. No candidate shall be admitted, unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of twenty rupees on each occasion.

5. The examination shall be written, oral and practical.

6. Every candidate shall be examined in the following subjects :—

Descriptive and Surgical Anatomy.

Elementary Chemical Physics, including the general laws of Light, Heat, Electricity and Magnetism ; also Chemistry, Organic and Inorganic, having special reference to practical Medical Science.

Botany.

• Materia Medica and Pharmacy.

General Anatomy and Physiology.

Comparative Anatomy and Zoology.

Practical Chemistry, so far as regards the testing of the presence and nature of ordinary poisons, and the examination of animal secretions and urinary deposits.

The Syndicate shall notify, three months before the examination, the portions of Botany* in which candidates shall be examined.

7. As soon as possible after the examination the Syndicate shall publish a list of the candidates who have passed, arranged in two divisions, the first in order of merit, and the second in alphabetical order. Every

* See Section IX.

candidate shall, on passing, receive a certificate in the form entered in Appendix A.

SECOND M. B. EXAMINATION.

8. Any candidate who can produce certificates to the following effect, may be admitted to this examination :—

(a.) Of having passed the First M. B. Examination at least two academical years previously.

(b.) Of having subsequently to passing the First M. B. Examination attended the following courses of lectures at a School of Medicine, recognized by the University.

Two Courses each of 70 Lectures.

Medicine (including Hygiene).

Surgery.

Midwifery.

One Course of 40 Lectures.

General Pathology and Morbid Anatomy.

Two Courses of 50 Lectures.

Medical Jurisprudence.

One Course of 25 Lectures.

Diseases of the Eye.

(c.) Of having subsequently to passing the First M. B. Examination, dissected the surgical regions, and performed surgical operations during two winter sessions; the certificate to state the number and nature of the operations so performed.

(d.) Of having duly and carefully performed six *post-mortem* examinations, and of having regularly attended one course of practical demonstrations in the Dead House.

(e.) Of having conducted at least six Labours.

Certificates on this subject will be received from any legally qualified practitioner in Medicine.

(f.) Of having attended Hospital and Dispensary Practice during the last three academic years of study in the following manner, *viz.* :—

Three months of attendance at the Out-door Dispensary of a recognized Hospital.

Fifteen months of attendance at the Surgical Practice of a recognized Hospital, and Lectures on Clinical Surgery during such attendance.

Fifteen months of attendance at the Medical practice of a recognized Hospital and Lectures on Clinical Medicine during such attendance.

Three months of attendance at the practice of an Eye-Infirmiry.

(g.) Of having drawn up in his own handwriting, six Medical and six Surgical cases during his period of service as clinical clerk or dresser.

(h.) Of general character and conduct, from the Principal of the College or School of Medicine at which he has studied.

9. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least fourteen days before the date fixed for the commencement of the examination.

10. A fee of thirty rupees shall be payable by each candidate. No candidate shall be admitted unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of thirty rupees on each occasion.

11. The examination shall be written, oral and practical.

12. Every candidate shall be examined in the following subjects :—

Principles and Practice of Medicine.

Ditto ditto of Surgery.

Ophthalmic Medicine and Surgery.

Midwifery.

Medical Jurisprudence.

Hygiene and Pathology.

General and Comparative Physiology.

Practical Toxicology.

The Clinical Examination shall be conducted in the Wards of a Hospital.

13. Every candidate shall be required—

To examine, diagnose, and treat cases of Acute or Chronic Diseases to be selected by the Examiners; and to draw up careful histories of the cases; also, if required, to perform and report in detail necroscopical examinations on any of the selected cases that may have died in Hospital.

To apply apparatus for great Surgical injuries, and explain the objects to be attained by them, as well as the manner of effecting those objects.

To examine in presence of the Examiners, morbid products chemically and by the aid of the microscope, demonstrating the results obtained.

To perform capital operations upon the dead subject after detailing to the Examiners the pathological conditions in which such operations are necessary, the different modes of operation adopted, and the reasons for preferring any particular mode of procedure.

14. As soon as possible after the examination the Syndicate shall publish a list of the successful candidates, arranged in two divisions, each in alphabetical order.

15. Any Licentiate of two years' standing whose diploma dates before the 1st of January 1887, may be admitted to this degree, on paying a fee of fifty rupees, and producing certificates to the following effect :—

(a.) Of having passed the First Examination in Arts,* *Latin having been one of the languages in which he was examined.*†

(b.) Of having attended, at a School of Medicine recognized by the Syndicate, a course of lectures in Comparative Anatomy and Zoology consisting of at least 40 lectures.

(c.) Of having passed an examination in Comparative Anatomy and Zoology and in General and Comparative Physiology.

16. Any candidate who has passed the Licentiate Examination before 1867, or the Senior Diploma Examination of the Medical College, may be admitted to this degree, without further examination or fee, on producing a certificate of having passed the First Examination in Arts,* *Latin having been one of the languages in which he was examined.*†

HONOURS IN MEDICINE.

1. Any candidate who has been placed in the first division at the Second Examination for the Degree of Bachelor in Medicine, may be examined for Honours in one or more of the following branches:—

Surgery.

Midwifery.

Medicine.

Medical Jurisprudence.

A fee of fifty rupees shall be payable by each candidate for examination in one or more of the above branches.

2. The examination shall take place in the week following the completion of the Second Examination, and shall be conducted by means of written papers and practical tests.

3. As soon as possible after each examination for Honours, the Syndicate shall publish a list of the successful candidates, arranged in order of merit. Candidates shall be bracketed together, unless the Examiners are of opinion that there is clearly a difference in their merits.

DOCTOR IN MEDICINE.

1. An examination for the degree of Doctor in Medicine shall be held annually in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

* Any Licentiate in Medicine and Surgery may proceed to the First Examination in Arts or to the B. A. Examination, without completing the two years' attendance at an affiliated Institution required under para. 2 of the First Arts and B. A. Regulations.

† The words here printed in italics are to take effect as soon after 1869 as the Syndicate may order.

2. Any Bachelor in Medicine may be admitted to this examination, provided he can produce certificates to the following effect :—

- (a.) Of having been admitted to the degree of Bachelor of Arts.*
- (b.) Of having, subsequently to passing the M. B. Examination, completed—

Five years of certified practice of the Medical profession, or
Two years' hospital practice and two years' private practice, or
Two years' practice, either hospital or private, if the candidate be a Graduate in Medicine with Honours.

- (c.) Of good moral character, signed by two persons of respectability.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least one month before the date fixed for the commencement of the examination.

4. A fee of one hundred rupees shall be payable by each candidate. No candidate shall be admitted unless he shall have paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of one hundred rupees on each occasion.

5. The examination shall be written, oral and practical.

6. Every candidate shall be examined in the following subjects :—

Medicine, including the Practice of Physio.

Surgery.

Midwifery.

Hygiene and Pathology,

7. As soon as possible after the examination the Syndicate shall publish a list of the successful candidates, arranged in alphabetical order.

8. Any candidate who is not a Bachelor in Medicine, may be admitted to the examination for the degree of Doctor in Medicine, on producing certificates to the following effect :—

- (a.) Of having passed the Senior Diploma Examination of the Medical College or the Licentiate Examination in Medicine and Surgery of the University.

- (b.) Of having attained the age of 35 years.

* Any Bachelor in Medicine may proceed to the B. A. Examination without completing the two years' study at an affiliated Institution required under para. 2 of the B. A. Regulations.

(c.) Of having practised the Medical profession with repute for five years.

(d.) Of fitness, moral and social, for the degree.

(e.) Of having passed the B. A. Examination,* *Latin having been one of the languages in which he was examined ; or †*

The following preliminary examination for those candidates only who had completed their Medical Education on or before the Session of 1859 :—

English.

Subjects of examination shall not be appointed, but the answers of the candidates in all subjects must be such as to show a competent knowledge of the English language.

Mental and Moral Science.

Mental Science ;—as contained in Abercrombie on the Intellectual Powers.

Moral Philosophy ;—as contained in Payne and Abercrombie.

(iv.) ENGINEERING.

FIRST EXAMINATION IN ENGINEERING.

1. The First Examination in Engineering shall be held every year in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any undergraduate of the University may be admitted to this examination, provided he has prosecuted a regular course of study in a School of Engineering affiliated to the University, for three years after passing the Entrance Examination.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar, at least fourteen days before the date fixed for the commencement of the examination.

4. A fee of twenty rupees shall be payable by each candidate. No candidate shall be admitted unless he has paid this fee to the Registrar. A candidate who fails to appear or to present himself for examination shall not be

* Any person who has passed a University Examination for a Licence in Medicine and Surgery in or before 1864, may proceed to the B. A. Examination without passing the First Examination in Arts or completing the two years of study at an affiliated Institution required under para. 2 of the B. A. Regulations.

† The words here printed in italics are to take effect as soon after 1869 as the Syndicate may order.

entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of twenty rupees on each occasion.

5. Every candidate shall be examined in the following subjects :—

- | | |
|----------------------|--------------------------------|
| I. Mathematics. | III. Engineering Construction. |
| II. Natural Science. | IV. Geodesy. |
| | V. Drawing. |

I. MATHEMATICS.

Arithmetic. The whole.

Algebra.

To the Binomial Theorem (omitting scales of notation), Exponential Theorem and Logarithms.

Geometry.

Euclid—Books 1, 2, 3, 4, and 6, with deductions, Conic Sections treated geometrically.

Trigonometry.

As far as the solution of all cases of plane triangles. De Moivre's Theorem, Exponential values of Sine and Cosine.

Mensuration.

Mensuration of surfaces and solids.

Analytical Geometry.

Equations of the straight line, circle, ellipse, hyperbola, and parabola, without reference to the general equation of the 2nd degree.

Statics.

Parallelogram and triangle of forces, Resultant of parallel forces, Couples, Moments, Equilibrium of any forces acting on a particle or rigid body, Centre of parallel forces, Centre of gravity, Friction, simple cases of Tension of Strings, Levers, Pulleys, Wheel and Axle, Inclined Plane, Screw.

Dynamics.

Definition and measurement of mass force, velocity, acceleration, momentum, work and energy.* Laws of motion. Uniform motion. Uniformly accelerated motion in a straight line, parabola and circle. Relative motion. Simple cases of Impact.

* Special importance will be attached to a thorough comprehension of the principles of Work and Energy, and of their application to the solution of Mechanical questions.

II. NATURAL SCIENCE.

Chemistry.

Inorganic Chemistry. The metals and non-metals.

Physics.

Light, Heat, Electricity, Magnetism and the elements of Telegraphy.

III. ENGINEERING CONSTRUCTION.

Materials. Structure, Classification, and characteristic qualities of Building Stones, Artificial Stones, Quarrying and Blasting, Preparation of Bricks and Tiles, Cementing materials, Plasters, Paints and Varnishes, Properties and preservation of timber, Iron and Steel, Lead, Copper, Zinc and the common Alloys.

IV. GEODESY.

Use of the scales, Prismatic Compass, Pocket Sextant, Level, Theodolite and Plane table. Topographical Surveying of limited areas. Practice of Levelling. Route surveying and laying out curves. Elements of Practical Astronomy. (Attested surveys, executed by the candidate, will be submitted to the Examiner, to which marks will be assigned.)

V. DRAWING.

1. Free-hand Drawing.
2. Projection (a) Orthographic, (b) Isometric, (c) Perspective.
6. The Examination shall be conducted by means of printed papers, and a paper of questions shall be set in each of the following subjects :

Arithmetic and Algebra.

Plane Geometry and Geometrical Conic Sections.

Trigonometry and Mensuration.

Statics and Dynamics.

Analytical Geometry.

Chemistry.

Light and Heat.

Electricity, Magnetism, and the elements of Telegraphy.

Materials of Construction.

Geodesy.

Drawing.

7. As soon as possible after the examination, the Syndicate shall publish a list of the successful candidates arranged in two divisions, each in order of merit. Every candidate, shall, on passing, receive a certificate in the form entered in Appendix A.

LICENCE IN ENGINEERING.

1. An Examination for a Licence* in Engineering shall be held annually in Calcutta, and shall commence

* The holder of this Licence shall be styled a Licentiate in Engineering.

at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any undergraduate of the University may be admitted to this Examination on producing a certificate from the head of an institution affiliated to the University in Engineering, shewing that he has prosecuted a regular course of study for one year after passing the First Examination in Engineering.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar at least fourteen days before the date fixed for the commencement of the examination.

4. A fee of twenty-five rupees shall be payable by each candidate. No candidate shall be admitted unless he has paid this fee to the Registrar. A candidate who fails to pass or to present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of twenty-five rupees on each occasion.

5. Every candidate shall be examined in one of the following Branches marked A and B :—

A.—(Civil Engineering).

- I. Mathematics.
- II. Natural Science.
- III. Engineering Construction.
- IV. Drawing.

I. MATHEMATICS.

Differential Calculus.

• Differential coefficients of simple and complex functions, successive differentiation, Differential functions of two variables, functions of functions; Implicit functions. Taylor's and Maclaurin's Theorems. Maxima and Minima values of functions of one variable.

Integral Calculus.

Integration of simple functions, Rational fractions. Formulæ of reduction. Lengths of curves. Areas of curves and surfaces. Volumes of solids. Differentiation of an Integral.

Hydrostatics.

Equilibrium of fluids, Specific gravity, Equilibrium of floating bodies, Centre of pressure, Elastic fluids, Principles of Barometer, and application to determine heights of Mountains; of the air-pump, Condenser-pump, Siphon, Hydrostatic Press and the Hydrometers.

II. NATURAL SCIENCE.

Geology. (Excluding Palæontology and the Stratigraphical classification based thereon) with special reference to the practice of mining.

Mineralogy. The form of minerals. The physical, optical, and chemical character of minerals. The distribution of minerals. Paragenesis.

Metallurgy. The metallurgy of Iron, Steel, Tin, Copper, Zinc, Lead, Mercury, Silver and Gold.

III. ENGINEERING CONSTRUCTION.

Practice of Building. Brick and stone masonry, Earthwork, Carpentry, Foundations, Walls, Floors and Roofs of Buildings, Construction of masonry, Wooden and iron bridges, Construction and maintenance of Road, Construction of Railroads and Railway appliances.

Hydraulic Engineering. Canal and River Engineering, River training and improvements, Flow of liquids through orifices, Flow of liquids in pipes. The movements of water in Canals and Rivers. Flow of water over weirs and waste weirs, Afflux of fluids caused by obstruction, Water-wheels and Turbines, Storage of water, Supply of water to towns.

Applied Mechanics. Direct stresses, Bars and pillars of various forms in tension and compression, Transverse strain, Deflection of Beams, Resistance to torsion. The equilibrium, stability and strength of Framed Structures, Stability of suspension bridges, Theory of Earth pressure, and Resistance of Block work Structures. Elements of Graphic Statics.

Mechanism. Elementary forms of Machines, Levers, Cranks, Rolling Contacts, Sliding Contacts, Mechanism for modifying motion, Accumulation and Regulation of Motion.

Steam-Engine. Measurement of Heat, Joule's Equivalent, Indicators and Indicator diagrams, Boilers, Heating surface, injectors and all other parts of high and low pressure Engines.

(Attested designs for an Engineering work executed by the candidate will be submitted to the Examiner to which marks will be assigned.)

IV. DRAWING.

Engineering and Architectural Drawing.

II. ENGINEERING CONSTRUCTION.

Practice of Building. As laid down for the Examination for Branch A.

Applied Mechanics. As laid down for the Examination for Branch A.

Steam-Engine. The Steam-Engine as viewed under a knowledge of the doctrine of Latent Heat, with history of improvements and alterations in original theories, Combustion of fuel, Heat Engines. The conversion of Motion, Indicators and details of Construction, Boilers, Compound Cylinder Engines, Miscellaneous details.

Hydraulic Engineering. Hydraulic Machinery, Flow of water in pipes.

III. MACHINERY.

Mechanism and Machine design. Elementary forms of Machines, Levers, Cranks, Rolling Contacts, Sliding Contacts, Mechanism for modifying motion, Accumulation and Regulation of Motion. Mode of designing Riveted Joints, Fastenings, Journals, Pivots, Axles, Shaftings, Bearings, Strength and form of toothed gearing, Belt and rope gearing, Link-work, Pistons, Stuffing boxes, Valves and Cocks.

Workshop Appliances. Measures of length and methods of measuring. Hand tools for wood and metals, Forming straight edges and surface plates. Foot and power Lathe, Machinery for drilling, Boring, Planing, Shaping, Slotting, Punching, Shearing and Sawing. Distribution of motive power to Machine tools.

Designs. Designs of Factories and Workshops with arrangement of Machinery.

(Attested designs executed by the candidate will be submitted to the Examiner, to which marks will be assigned.)

IV. DRAWING.

Machine Drawing.

6. Candidates shall also be allowed to present themselves for Examination in one or more of the following optional Subjects, proficiency in which will affect their place in the division list, but will not be counted towards a pass.

Optional Subjects.

- I. MATHEMATICS.
 Pure Mathematics } as in the First Examination in Engineering.
 Mixed Mathematics }
- II. NATURAL SCIENCE.
 • Chemistry } as in the First Examination in Engineering.
 Physics }
- III. ENGINEERING CONSTRUCTION.
 Materials of Construction, as in the First Examination in Engineering.
- IV. GEODESY, as in the First Examination in Engineering.

7. The Examination shall be conducted by means of printed papers, and a paper of questions shall be set in each of the following subjects:

Branch A.

Differential and Integral Calculus.
 Hydrostatics.
 Geology.
 Mineralogy and Metallurgy.

Details of Construction.
 Roads and Railways.
 Hydraulic Engineering.
 Applied Mechanics.
 Mechanism and Steam-Engine.
 Engineering and Architectural Drawing.

Branch B.

Differential and Integral Calculus.
 Hydrostatics.
 Details of Construction.
 Roads and Railways.
 Applied Mechanics.
 Hydraulic Engineering.
 Mechanism and Machine design.
 Designs, and Workshop appliances.
 The Steam-Engine.
 Machine Drawing.

Optional.

Pure Mathematics.
 Mixed Mathematics.
 Chemistry.
 Physics.
 Materials of Construction.
 Geodesy.

8. As soon as possible after the Examination, the Syndicate shall publish a list of the successful candidates arranged in two divisions, each in order of merit. Every candidate shall, on passing, receive a certificate in the form entered in Appendix A.

BACHELOR IN ENGINEERING.

1. An Examination for the Degree of Bachelor in Engineering shall be held annually in Calcutta, and shall commence at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any candidate who has passed the First Examination in Arts* may be admitted to this examination, provided he produces a certificate from the head of an Institution affiliated in Engineering, shewing that he has prosecuted a regular course of study for one year, after passing the First Examination in Engineering.

* Any under-graduate who has passed the First Examination in Engineering may proceed to the First Examination in Arts and the Bachelor of Arts Examination, without completing the two years of study at an affiliated Institution required under para. 2 of the First Arts and B. A. Regulations.

3. Every candidate for admission to the examination shall send his application, with a certificate in the form entered in Appendix A, to the Registrar, at least fourteen days before the date fixed for the commencement of the Examination.

4. A fee of thirty rupees shall be payable by each candidate. No candidate shall be admitted, unless he has paid this fee to the Registrar. A candidate who fails to pass or present himself for examination shall not be entitled to claim a refund of the fee. A candidate may be admitted to one or more subsequent examinations on payment of a like fee of thirty rupees on each occasion.

5. Every candidate shall be examined in the subjects and in the manner ordered in paras. 5, 6 and 7 of the Regulations for a Licence in Engineering.

6. As soon as possible after the examination, the Syndicate shall publish a list of the successful candidates arranged in two divisions, each in order of merit. Every candidate shall, on passing, receive a certificate in the form entered in Appendix A.

7. The first candidate of the first division shall receive a gold medal to the value of one hundred rupees.

8. Any Licentiate in Engineering, who has passed the First Examination in Arts, may, on paying the usual fee, be admitted to the Degree of Bachelor in Engineering without further examination.

HONOURS IN CIVIL ENGINEERING.

1. An examination for Honours in Civil Engineering shall be held annually in Calcutta, commencing at such time as the Syndicate shall determine, the date to be approximately notified in the Calendar for the year.

2. Any candidate who has passed the Examination for the degree of Bachelor in Civil Engineering, or for a Licence in Civil Engineering, may be examined for Honours.

3. Every candidate for Honours shall send his application to the Registrar, at least fourteen days before the date fixed for the commencement of the examination.

4. The examination shall be written and oral.

5. Every candidate shall be examined in the following subjects :—

- I. Mathematics.
- II. Mechanical Philosophy.
- III. Natural and Experimental Science.
- IV. Geodesy.

I. MATHEMATICS.

Spherical Trigonometry as applied to Geodesy.
Descriptive Geometry.

II. MECHANICAL PHILOSOPHY.

Central Forces.
Rotation and Oscillation of Bodies. Centrifugal Forces.
Motion of Fluids.
Geometrical Optics.
The Elements of Astronomy, and its application to Geodesy.

III. NATURAL AND EXPERIMENTAL SCIENCE.

Heat, with reference to Steam and Combustion.
Chemistry, as applied to Cements and preservation of Materials.
Practical application of Electrical Science.
General Principles of Geology and Mineralogy, and their application to Engineering.

IV. CONSTRUCTION.

Practice of Building.
Theory and Practice of Bridge-Building.
Roads and Railways.
Hydraulic works.
Equilibrium of Structures, theory of Machines with special reference to the Steam Engine.
Principles of design.

V. GEODESY.

Surveying.
Topographical Drawing.

6. The candidates' qualifications shall be tested by written papers on the first three and the fifth subjects, and by written papers and *viva voce* examination on the fourth subject.

7. As soon as possible after the examination, the Syndicate shall publish a list of the successful candidates arranged in order of merit.

MASTER IN CIVIL ENGINEERING.

1. No special examination shall be held, but any person who has graduated as B. C. E. and has at any time passed the Honour Examination, may be admitted to the degree of Master in Civil Engineering without examination, provided that—

(1.) Two members of the Faculty of Engineering or two Masters in Civil Engineering shall testify to the satisfaction of the Syndicate that, since graduating, he has practised his profession with repute for four years and that in habits and character he is a fit and proper person for the degree of Master.

(2.) He shall produce an essay approved by the President of the Faculty of Engineering for the time being, on some subject connected with Engineering.

2. A fee of one hundred rupees shall be payable for the degree of Master in Civil Engineering. No candidate shall be admitted, unless he has previously paid this fee to the Registrar.

(v.) GENERAL.

1. No question shall be put at any University examination, so as to require an expression of religious belief on the part of the candidates; and no answer or translation given by any candidate shall be objected to on the ground of its expressing any peculiarities of religious belief.

2. The Syndicate shall have power in any case to admit to any University examination in any Faculty any person who shall present a certificate from any Institution authorized on that behalf by the Governor-General of India in Council, shewing that in such Institution he has attended courses of study, passed examinations, or taken degrees corresponding to those which, in connection with such examinations, are exacted from students of the University.

(vi.) ACADEMICAL COSTUME.

Graduates shall wear a European dress with a College Cap, or a white Chapkan and Trousers, with a Shawl Pagree and black *Taz*. They also shall wear Gowns and Hoods for the several degrees, as described below—

For the Degree of B.A.

A black silk or stuff Gown. The Hood shall be of black silk or stuff, edged on the inside with a border of dark blue silk.

For the Degree of B.L.

A black silk or stuff Gown. The Hood shall be of black silk or stuff, edged on the inside with a border of green silk.

For the Degree of M.B.

A black silk or stuff Gown. The Hood shall be of black silk or stuff, edged on the inside with a border of scarlet silk.

For the Degree of B.E.

A black silk or stuff Gown. The Hood shall be of black silk or stuff, edged on the inside with a border of orange-coloured silk.

For the Degree of M.D. or Master in any of the Faculties.

A black silk or stuff Gown. The Hood shall be of black silk or stuff, with a lining of silk corresponding in colour with the inside border of the Hood for Bachelors of the Faculty.

For the Degree of Doctor-in-Law.

A violet silk Gown with full sleeves. The Hood shall be of scarlet silk with a lining of white satin.

(vii.) AFFILIATION.

1. Institutions or departments of Institutions, may be affiliated in Arts, Law, Medicine, and Engineering.

2. The power of affiliating rests, under the sanction of the Governor-General of India in Council, with the Syndicate, to whom all applications for affiliation must be addressed through the Registrar.

In the case of a Government Institution, application must be made by the Director of Public Instruction or other chief educational officer of the province in which the Institution is situated.

In the case of any other Institution, application must be made by the chief controlling authority of such Institution.

Every application must be countersigned by two Members of the Senate, and if thought necessary, in the case of distant Institutions, by the Secretary to the Government of the province in which the Institution is situated.

3. The application must contain—

(a.) A declaration that the Institution has the means of educating up to the standard under which it desires to be affiliated.

(b.) A statement shewing the provision made for the instruction of the students up to the same standard.

(c.) Satisfactory assurance that the Institution will be maintained on the proposed footing for five years at least.

4. The Syndicate may, with the sanction of the Governor-General of India in Council, at any time, withdraw the privileges of affiliation from any Institution.

RULES FOR EXAMINATIONS

PASSED BY THE SYNDICATE.

(i) ARTS.

I.—General.

1. The Syndicate shall appoint a Board of Examiners in Arts in the subjects noted below. Each member of the Board shall be called a Senior Examiner in his particular subject :—

English,	3	Examiners.
Mental and Moral Science,	2	"
Sanskrit,	2	"
Latin and Greek,	1	"
Arabic and Persian,	2	"
History and Political Economy,	2	"
Mathematics,	2	"
Physics,	1	"
Chemistry,	1	"
Botany,	1	"
Zoology,	1	"
Geology,	1	"

2. The Registrar shall be *ex-officio* Secretary to the Board and he may likewise, if duly appointed, be a member thereof.

3. The Board and all the Examiners in Arts shall be appointed in May.

4. The Board shall meet from time to time to discuss and to report to the Syndicate on questions in connection with the Examinations of the University as may be thought desirable either by the Syndicate or by the Board. Meetings to be called on the requisition of two members of the Board or by the Registrar. One-third of the number of members on the Board for the time being shall form a quorum, provided that no question in any subject shall be decided on unless at least one Examiner in that subject be present.

5. The duties of the individual Senior Examiner in a subject when only one Examiner is appointed, and the *joint* duty, when more than one Examiner is appointed, shall be :—

- (a) To set the M. A. and B. A. Examination Papers required in the particular subject.
- (b) To moderate the F. A. and Entrance Examination Papers in consultation with the F. A. and Entrance Examiners, appointed to set those papers.
- (c) To see that the Examination Papers set at the various examinations in their subjects conform to the conditions

laid down by the University for such examinations, and that the standard of the questions set remains approximately uniform from year to year.

- (d) To examine a printed copy of each Examination Paper before it is issued at an Examination, with a view to rectify any errors they may contain.
- (e) To examine all the Answer Papers in their subjects in the M. A. and B. A. Examinations.
- (f) To determine, in consultation with the F. A. and Entrance Examiners, the method of marking the Answer Papers in these Examinations.
- (g) To re-examine a sufficient number of Answer Papers looked over by the F. A. and Entrance Examiners, so as to see whether the Examiners are working according to a uniform method, and to direct, if necessary, any Examiner to conform strictly to the method indicated and to revise his marks. To enable this to be carried out *all* the answer-papers in a subject shall be laid before the Senior Examiner or Examiners.
- (h) To report the results of the Examinations in their subjects to the Syndicate with any remarks they may think requisite.

6. The Syndicate shall have power to appoint, if necessary, additional Examiners to the Board in any subject at any time during the year.

7. The results of the Examinations in Arts shall be moderated by a *Sub-Committee of the Syndicate*, consisting of four of the representatives of the Faculty of Arts.

8. The number of Examiners in each subject for the Entrance and F. A. Examinations shall be as follows :—

University Library.

Babu Joykissen Mookerjee, of Ooterpara, made a donation of Rs. 5,000 to the University, on the 20th July, 1869, for the purpose of forming a Library. The amount was invested in four per cent. securities till the completion of the University building.

In 1874, the sum of Rs. 3,500 was added to the Library Fund from the surplus income of the University of that year; and the Syndicate, having thus at their disposal more than Rs. 9,000 appointed a Committee to report on the steps it was advisable to take to form a Library. The Committee reported (see Minutes, Vol. XVIII, page 22) that they thought "it desirable to begin with procuring such books as shall render the Calcutta University Library *Supplementary to other Libraries now existing in Calcutta.*" The general principles laid down by the Committee, and the mode of procedure they proposed for adoption, were approved by the Syndicate; and further transfers have from year to year, been made to the Library fund from the surplus income of the University. Several instalments of books have been received, and the Library now contains, besides English works of reference, and the chief authorities on Indian antiquities, fairly complete sets of the Sanskrit, Arabic, Latin, French and German classics. The following Regulations have been approved by the Syndicate :—

Regulations for the Management of the University Library.

1. (a.) The Library shall be under the management of a Committee consisting of not less than five Appointment of the Committee. Resident Fellows of the University, who shall be appointed annually by the Syndicate. The Registrar shall be *ex-officio* Librarian and Secretary of the Committee.

(b.) Members of the Committee, who may leave India during their year of office, with the intention of not returning before the end of their time of office, shall be considered to have vacated their membership.

(c.) Vacancies which may be caused by the retirement or departure of Members, or otherwise, at any time during their year of office, shall be reported to the Syndicate, who may then, at their discretion, nominate other Fellows to the office vacated.

(d.) The Syndicate may at any time, at their discretion, appoint additional Members to the Committee.

2. (a.) It shall be competent to the Committee to make such Powers and duties of Committee. bye-laws, rules and arrangements, as they may think fit, for holding meetings, and generally for conducting the business pertaining to their office, provided that all such rules and arrangements are consistent with the provisions of the Act of Incorporation, the Bye-laws of the University, and with these present Regulations.

(b.) The Committee shall decide on the purchase of books with the moneys placed at their disposal for that purpose by the Syndicate.

(c.) The Committee shall establish a regular and authentic record of all books borrowed from the Library and returned to it, together with the name of borrowers, the dates of borrowing and returning and such further details as they may deem advisable.

3. The Library is for the use of Resident Fellows of the University, and they alone have the privilege to use it, subject to the present Regulations and to such further rules and orders as may be agreed to by the Library Committee under Regulation 2 (a).

4. (a.) Persons residing in Calcutta, not being Fellows of the University, may receive special permission from the Syndicate to use the Library for the purpose of literary research. Such permission will be granted only on the recommendation of the Library Committee.

(b.) In recommending any person to the Syndicate under this Regulation, the Library Committee shall specify in writing, for the information of the Syndicate, the grounds on which they base their recommendation.

(c.) Persons not being Fellows of the University may consult the Library for the purpose of literary research, without removing the books from the Library, between the hours of half-past ten A. M. and half-past three P. M. on the written recommendation of a Member of the Library Committee to the Librarian, but not otherwise.

5. (a.) Subject to the exceptions specified in Regulation 7, Fellows and other persons allowed to use the Library under Regulation 4 (a) may borrow and temporarily remove such books as they may require, provided that one person shall not at one and the same time have more than ten volumes in his possession on loan from the Library. In this Regulation the term "volumes" shall include pamphlets and parts of works separately sewn.

(b.) No books shall be issued and delivered except to the authorised borrower in person, or to some one having written authority from him to receive it on behalf of the authorised borrower.

(c.) Every volume borrowed shall be returned to the Library within two calendar months of the date on which it was removed from the Library. In case any borrower fails to return any book within this period, a notice shall be sent to him by the Librarian calling for the return of the book.

(d.) If a book called for under the previous section be not returned within one week after the receipt of the Librarian's notice, the person who has borrowed the book from the Library shall be subject to a fine of one rupee for each volume so retained, and to a further fine of an equal amount for each additional week that he may retain it after the expiration of the second week.

(e.) Subject to the provisions of Regulations 6, 7, 8 and 9, a book returned to the Library may be again borrowed by the same person, provided that no other Fellow or person entitled to use the Library has lodged with the Librarian an application for the same work. If such application has been made, the book may not be taken out by the original borrower until returned by the second applicant.

6. The privilege of any Fellow or other person to use the Library shall be suspended, so long as he retains any book which, under these Regulations, he is not entitled to retain, or so long as he leaves unpaid any fine which may have been imposed on him under Regulations 5, 8, and 9.

7. (a.) Books which are valuable on account of their rarity or which belong to a series, and which Books not to be removed. being out of print, it may be difficult or impossible to replace if lost, or books required for constant reference, shall not be removed from the Library.

(b.) A list of the works excluded from removal under this Regulation shall be drawn up by the Library Committee, and will be subject to revision and extension from time to time.

8. (a.) The Librarian shall report to the Committee all cases in which books have been mutilated, disfigured by writing on the margin or otherwise injured, while in the possession of readers.

(b.) Any person, guilty of such an offence shall be required to replace the injured, by an injured copy of the book, and shall be liable to the cost of its proper binding and other charges. Further, he shall be fined and suspended from the privileges of the Library at the discretion of the Committee.

9. (a.) A general inspection of the Library and of the record of books issued and returned, shall be made annually in the first week of April by the Library Committee, or by one or more Members of the Committee deputed by them for that purpose.

(b.) During this period of inspection the Library shall be closed, and all books whatever and by whomsoever borrowed shall be returned to the Library by the 31st March of each year.

(c.) Any person who fails to return, in accordance with this Regulation, all books borrowed by him, shall be subject to a fine of not less than two rupees for each volume retained, and if such volume is not returned before the expiration of one week after the last day of the inspection, a further fine of an equal amount shall be imposed for each volume for each additional week until that volume is returned or until a copy of the same edition and of equal value is placed in the Library in its stead, and all expenses connected therewith paid by the borrower.

10. The Library shall be closed on Sundays and all public holidays and on all days for holding public examinations. Subject to the exception of Regulation 9, it shall be open on other days between the hours of half-past ten A. M. and half-past three P. M.

LIBRARY COMMITTEE.

PREMCHAND ROYCHAND STUDENTSHIPS.

Premchand Roychand, Esq., of Bombay, in a letter to the Government of India offered to make a donation of two lakhs of Ru. to the Calcutta University, and on the 9th February, 1866, paid over this amount to the Government of India, to be transferred to the University, and held by it as a Body Corporate under section 2 of Act II of 1857. Mr. Premchand Roychand further expressed a hope "that the money should be devoted to some one large object or to a portion of some large object for which it might in itself be insufficient."

The Senate, at a meeting on the 21st July, 1866, accepted Mr. Premchand Roychand's munificent donation, and directed that it should be invested in 5 per cent. Government Securities. The Senate also sanctioned the following plan for appropriating the proceeds of the donation :—

1. Five studentships of Rs. 1,600 a year each, to be called the Premchand Roychand studentships, shall be maintained on the interest of the Endowment.

2. Any M. A. of the University of Calcutta shall be eligible for one of these studentships, during nine years from the time that he passed the Entrance Examination.

3. Each studentship shall be tenable for five years, and one election shall be made annually after examination, provided any one candidate be declared by the Examiners to be entitled to a Studentship.

4. The Studentships shall be awarded in alternate years for proficiency in Literary and Scientific subjects.

The Literary subjects shall be as follows :—

1. English.
2. Not more than two of the following languages, to be selected by the candidate.

Sanskrit.
 Arabic.

Greek.
 Latin.

3. Comparative Philology.
4. Philosophy.
5. History.

The Scientific subjects shall be as follows :—

1. Pure Mathematics.
2. Mixed Mathematics.
3. Chemistry, Inorganic and Organic.
4. Physical Science including—
Electricity and Magnetism.
Heat.
Physical Optics.
5. Natural Science including—
Geology.
Botany.
Zoology

5. Candidates must give notice six months before the examination, of their intention to appear, and must, at the time of giving such notice, state in writing the subjects they intend to take up, pay a fee of Rs. 32 to the Registrar.

The Examiners shall meet together before the examination, in order to compare their questions, and after the examination, in order to draw up a report (to be printed in the University Minutes) declaring the name of the candidate whom they consider entitled to the Studentship.

7. Should the Examiners in any year report, that no student has in their opinion shewn sufficient proficiency in the subjects of the year to entitle him to a Studentship, it shall be competent to the Syndicate to award the vacant Studentship for proficiency in those subjects in the following or any subsequent year.

8. The names of the Premchand Roychand students, past and present, shall be printed in the Calendar after the names of the Fellows.

RULES FOR THE P. R. S. EXAMINATION

PASSED BY THE SYNDICATE.

1. The Examination shall be held in the month of November and two papers shall be given each day—one in the morning from 10 A. M. to 1 P. M. and the other in the afternoon from 1-30 P. M. to 4-30 P. M.

2. In each of the five subjects for examination four papers shall be set.

3. In subject 2 of the Literary course four papers shall be set in each of the optional languages.

4. In subject 3 of the Scientific course two papers shall be theoretical and two practical.

5. In subjects 4 and 5 of the Scientific course three papers shall be theoretical and one practical.

6. Each paper shall carry 100 marks.

7. Only marks in excess of 30 in each paper shall be counted towards the total and each mark above 70 shall count as 2 marks towards the total.

8. The Examiners shall meet together before the examinations, in order to compare their questions, and after the examination,

in order to draw up a report (to be printed in the University Minutes).

9. Should the Examiners in any year report, that no student has in their opinion shewn sufficient proficiency in the subjects of the year to entitle him to a studentship, it shall be competent to the Syndicate to award the vacant studentship for proficiency in those subjects in the following or any subsequent year.

DUFF SCHOLARSHIPS.

The subscribers to a fund, raised for the purpose of commemorating the services of the Rev. Dr. Duff, directed the investment of the amount collected (Rs. 20,000) in Government Securities; and offered to transfer the same to the University of Calcutta on the following conditions:—

1. The interest of the money shall be applied to establish:—

I.—A Scholarship of Rs. 15 a month, tenable for one year by the student who shall obtain in the First Arts Examination the highest number of marks for Languages.

II.—A Scholarship of Rs. 15 a month, tenable for one year by the student who shall obtain in the First Arts Examination the highest number of marks for Mathematics.

III.—A Scholarship of Rs. 15 a month, tenable for one year by the student who, having been educated for at least one year in the Free Kirk Institution, shall obtain the highest number of marks in all the subjects of the First Arts Examination taken together.

IV.—A Scholarship of Rs. 15 a month, tenable for one year by the student who, being a Christian in religion, and having been educated for at least one year in any of the affiliated Institutions for the education of Europeans and Eurasians shall obtain the highest number of marks in all the subjects of the First Arts Examination taken together.

2. The above Scholarships shall be called "Duff Scholarships," and shall be tenable with any other Scholarships.

3. The surplus of the funds, after paying any small incidental expenses, shall be suffered to accumulate, and used for the purpose of giving rewards to any students of the University, who shall pass with credit in the Evidences of Revealed Religion, Natural Theology and Moral Philosophy in the Examination for Honours, or for the Degree of M. A., such rewards to be called "Duff Prizes."

4. Should the accumulations appear to the Syndicate greater than is necessary to carry out Rule 3, they may add to the value of the Duff Scholarships, or increase their number.

5. The Syndicate shall have the power of putting a fair interpretation on any doubtful point in the above rules.

The Senate, at a meeting on the 21st July, 1866, accepted this benefaction from the subscribers of the Duff Memorial Fund.

ESHAN SCHOLARSHIP.

Baboo Eshan Chundra Bose, of Calcutta, bequeathed, by his will to the University, the sum of Rs. 12,000 in Government Securities of the 5 per cent. loan, for the purpose of founding a Scholarship, to be awarded annually in accordance with the terms specified in the following extract from the will :

"I direct my said Executors, immediately on my decease, if the same shall not be contributed during my lifetime, to set apart out of my estate, Government Securities of the late East India Company, or of the Government of India, or both of them, for the amount of Rupees twelve thousand, of some 5 per cent. loan, or otherwise that my Executors shall immediately, after my decease, invest a sufficient part of my estate in the purchase of similar Government Securities for Rupees twelve thousand, of some five per cent. loan, so as to provide an annual income of Rupees six hundred, and to endorse over and transfer the same to the Government of Bengal, or the President, for the time being, of the Syndicate of the Calcutta University, subject to the trusts hereinafter mentioned concerning the same, that is to say, interest to found a Scholarship in the Calcutta University, to be called 'Eshan's Scholarship,' to be awarded to the first scholar, being a Hindu Native of India, on the B. A. list for the year in the order of merit, in consideration of his continuing his studies at the Calcutta Presidency College with a view to the attainment of the higher Degree of M. A., and to be paid to him upon or in case of his attaining that Degree, but not otherwise."

TAGORE LAW PROFESSORSHIP.

The Hon'ble Prosunno Coomar Tagore, C. S. I., bequeathed, by his will, to the University, a monthly allowance of Rs. 1,000, for the purpose of founding a Professorship of Law in connection with

the University, to be called the "Tagore Law Professorship." The terms of the bequest are given in the following extract from the will :—

"I am desirous of founding a Law Professorship, to be called 'The Tagore Law Professorship,' and of providing an adequate remuneration for the Professor who shall fill the chair provided by me. I direct that my Trustees or Trustee do, and shall as soon as may conveniently be after my death, invest in Government Securities such a sum of money taken from my personalty or by degrees from the income of my real estate, at the discretion of my Trustees or Trustee, as will produce the monthly sum of Rs. 1,000, and that when such sum has been invested, the same may be assigned, transferred, and made over to the University of Calcutta to be held upon the following trusts, that is to say: In trust to pay out of the interest accruing due therefrom the annual sum of Rs. 10,000 by equal monthly payments to the Tagore Law Professor' for the time being, and in trust to apply the residue of the interests in the manner hereinafter mentioned. And I desire that until such sum shall have been so invested and made over as hereinbefore directed, my said Trustees or Trustee shall either from the proceeds of my personal estate or from the rents, issues, and profits arising from my real property, pay the sum of Rs. 1,000 a month to the University of Calcutta, to be applied by the University in the same manner and for the same purposes as the interest to accrue due from the funds which I have hereinbefore directed to be made over to the University. And I declare that the right of appointing a Professor to the said 'Tagore Law Professorship' and removing or dismissing the incumbent therefrom shall be vested in the Senate of the University. And that the first appointment shall be made so as to begin to take effect not later than the end of one year from the date of my death; my will is that the 'Tagore Law Professor' shall read or deliver at some place within the town of Calcutta one complete Course of Law Lectures without charge to the students and other persons who may attend such lectures. Within six months after the delivery of each course of lectures, the lectures shall be printed, and not less than 500 copies thereof shall be distributed gratuitously. I desire that the expense of such printing and distribution may be defrayed out of the residue of the annual interest of the said fund. Whatever portion of the residue may remain after defraying the expenses, I desire that it may be devoted to the printing and publication of approved works on Law or Jurisprudence. It is my will that the said 'Tagore Law Professorship' shall, save as herein provided, be as to the kind of law which is to be taught and in all other matters and things regulated by and subject to the control of the Senate of the said University."

The Senate has adopted the following scheme for lectures :—

1. That in the month of August in each year, the Faculty of Law shall name four or more subjects, upon one of which (to be selected by himself) the Professor for the following year shall be required to deliver a course of at least twelve lectures.

2. That immediately after the subjects shall have been thus named, advertisements shall be published in such newspapers as the Syndicate may think proper, stating the subjects for the lectures, and inviting candidates for the Professorship.

3. That the candidates shall then send in their names to the Registrar on or before the 1st of January following; and each candidate shall be required to state upon which of the subjects he is willing to lecture.

4. That the election of the Professor shall then take place in the month of March; and that he shall be appointed for one year only, the Senate being at liberty to re-elect him, if they shall think proper.

GOVERNMENT SCHOLARSHIPS TENABLE IN ENGLAND
BY NATIVES OF INDIA.*

1. Six Scholarships, the cost of which is defrayed by the Government of India, are established tenable in England by persons

These Scholarships were instituted by Home Department Resolutions No. $\frac{1}{45-57}$,

dated the 12th February 1886, and No. $\frac{1}{269-31}$, dated the 23rd August 1886. See *Minutes* 1885-86. p. 210, and 1886-87 p. 119.

who are natives of India within the meaning of Section 6 of the Statute 33 Vic., Cap. 3. The Scholarships are placed at the disposal of the Universities of Calcutta, Bombay, Madras and the Punjab in rotation, one scholarship being given to each of the first two Universities during one year, and one Scholarship to each of the last two during next year.

2. Each Scholarship entitles the holder to an allowance not exceeding £200 per annum, payable from the date of his arrival in England, and is tenable for three years.

3. Each Scholar is provided with a free passage to and from England.

4. If any Scholar, not being disabled by sickness, fails to complete a residence of three years in England, or is guilty of gross misconduct or disregard of the orders of Her Majesty's Secretary of State, he will, at the discretion of the Secretary of State, forfeit his Scholarship, and will also be liable to refund the amount representing the cost of his free passage to England.

5. Scholars will be expected to reach England before the opening of the October term at the Universities of Oxford or Cambridge, to one of which Universities they will be required to proceed.

RULES FOR ELECTION TO THE GOVERNMENT SCHOLARSHIPS.

1. Candidates for the Government Scholarships must be natives of India within the meaning of section 6 of the Statute 33 Vic., Cap. 3.

2. The selection of the scholars shall take place not later than the month of June in the year in which a scholarship is placed at the disposal of this University.

3. The candidates for the scholarship shall be only such Graduates of the University as have passed the examination for the degree of M. A., or the examination for the degree of B. A. with Honours, and must in all cases be under 22 years of age on the 31st of March in the year in which the selection is made by this University.

4. Candidates for the examinations mentioned in the preceding rule, who are desirous of competing for the Government scholarship at the disposal of this University either in the year of their examination, or in the year following, shall intimate the fact to the Registrar at the time they make their applications for these examinations, and shall state whether they have the consent of their families to proceed to England in order to complete a University education there.

5. Candidates mentioned in rule 4, who have the consent of their families to proceed to England, shall, at the time when they notify their intention of competing for the scholarship, submit to the Registrar certificates of—

(a) their good conduct from persons of respectability and position with whom they may be acquainted—

(b) their knowledge of the English language, from one or more of the Professors of the Colleges in which they have been educated, and—

(c) their physical capacity to undergo the course of life and study which they will have to follow in England, signed or countersigned by a Presidency or Civil Surgeon.

6. It shall be the duty of the Senior Board of Examiners in submitting the results of the examinations mentioned in rule 3 to state which of the candidates are in their opinion fit and proper persons to be selected for the Government scholarship.

7. In the year in which the selection is to take place, the names of the candidates recommended by the Senior Board of Examiners for that year and for the previous year shall be laid before a Committee of the Syndicate, consisting of not more than three members, who shall have power to call for reports from the Principals and Professors of the Colleges in which the graduates were educated, and to make such other enquiries as they think fit, and who shall recommend to the Vice-Chancellor one of the candidates for selection.

8. Candidates competing, but not selected, shall be ineligible for competition in any subsequent year.

Hughli College.

AFFILIATED, 1857.

This Institution was founded in 1836, and was originally supported from funds bequeathed by Muhammad Mohsin, a wealthy Muhammadan gentleman, who dying without heirs in the year 1806, left his large property, yielding an annual income of Rs. 45,000 to Muhammadan Trustees "for the service of God." Owing to the misappropriation of the funds, Government assumed the office of Trusteeship. The right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation extended over many years, during which the annual income accumulated, forming a surplus of Rs. 8,61,100. The surplus was devoted to the foundation and endowment of the Hooghly College, and was further increased by a portion of the original zemindaree that became available on the death of one of the Mootawallees of the Hooghly Imambarah, an Institution which also derives its support from Muhammad Mohsin's legacy. The College endowment was further increased by the accumulation of unexpended revenue, until the income amounted to Rs. 51,000 per annum. In 1873, the Government of India resolved to transfer the whole of the Mohsin endowment to the purpose of Muhammadan education throughout Bengal, and accordingly increased the provincial assignment for education in Bengal by Rs. 50,000 a year, in order to meet the expenses of the Hooghly College, which has now become an Institution maintained by the Government.

The College consists of three Departments, an English, an Arabic, and a Law Department, and is under the control of the Director of Public Instruction, Lower Bengal. The English Department is open to all students who have passed the University Entrance Examination, the fees being one rupee per mensem for Muhammadans, and Rs. 6 for all others. In the Law Department the fee is Rs. 5 per mensem for the 1st year class and Rs. 7 for the 2nd and 3rd year classes.

There are Hindu and Muhammadan Hostels connected with the College; the boarding-fee in the former is Rs. 4 per mensem, and in the latter Rs. 3.

SCHOLARSHIPS, STUDENTSHIPS, &c.

1. One Laha scholarship of Rs. 25 per mensem tenable for one year is awarded annually to a B. A. of the College preparing for M. A. in any branch.

2. One Raneer Kutyanee scholarship of Rs. 16 per mensem, tenable for two years, is awarded annually to the most deserving student who has passed the F. A. Examination from the College and who has not gained a Government scholarship.

3. One Zemindaree scholarship of Rs. 8 per mensem tenable for two years is awarded annually to the most deserving student who has passed the Entrance Examination from the Collegiate or Branch School, and who has not gained a Government scholarship, preference being given to a student of the latter school.

4. Two Mohsin Junior scholarships each of Rs. 8 per mensem tenable for two years at this College are awarded annually.

5. Babu Doorgacharan Laha awards 5 studentships each of Rs. 5 per mensem to students reading in the English Department of the College, and 5 of Rs. 3 each to students of the Collegiate School.

6. Nine Mohsin Anglo-Persian scholarships tenable for one year, 3 of Rs. 5, 3 of Rs. 4, and 3 of Rs. 3 per mensem, are awarded annually to the most deserving Muhammadan students of the Collegiate School.

7. Seventeen Free Boarderships are attached to the Muhammadan Hostel and are open to all Muhammadan students of the College and Collegiate School who have not gained any Government or Mohsin scholarships.

8. Six Mohsin scholarships tenable for one year, attached to the Arabic Department are awarded annually, 2 of Rs. 8, 2 of Rs. 6, and 2 of Rs. 4 per mensem.

A *Thwaytes Gold medal* of the value of about Rs. 48, is awarded annually to the graduate from this College who gains the highest number of marks in Mathematics at the B. A. Examination of each year.

Dacca College.

AFFILIATED, 1857.

The College is supported by Government, and is under the control of the Director of Public Instruction, Lower Bengal.

It was originally opened as a school, by the General Committee of Public Instruction, in the year 1835. In 1841 it was converted into a College, when a Principal was appointed, and an increase made to the staff of teachers. The College building was erected partly by public subscription in 1841.

Any undergraduate of the University may be admitted, and instruction is given up to the standard of the M. A. Examination in Honours of the University of Calcutta. Lectures in Law also are delivered, and students are prepared for the B. L. Examination.

Students in the General Department pay a monthly fee of Rs. 6 and in the Law Department, of Rs. 7.

A silver medal, called the Donnelly Prize, the value of the interest on Rs. 1,000 subscribed by the native assistants of the late Abkaree Commissioner's office, in memory of the late A.F. Donnelly, Esq., and

a prize, called the Lewis Prize, the value of the interest of Rs. 500, subscribed by students of the College, in memory of G. Lewis, Esq., one of the former Principals of the College, are awarded annually—the former for proficiency in History and the latter for proficiency in English.

Four Scholarships, of Rs. 6 each, are given by the Nawab Ahsanullah, K. B. to Muhammadan students from the Dacca Madrasah, tenable in the 1st, 2nd, 3rd, and 4th years respectively.

A scholarship of Rs. 20 a month, the interest on Rs. 6,000, is given by the Koomar Rajendra Narain Rai Chaudhuri, of Bhawal, in memory of his father, Kali Narayan Ray Chaudhuri. The scholarship is given to a graduate of the College to enable him to read for M. A.

Attached to the College and under the control of the Principal is the Raj Chandra Hindu Hostel, founded in memory of the late Babu Raj Chandra Das, Zemindar and Banker of Dacca. It is supported by an annual contribution from his son, Babu Protáp Chandra Das, Zemindar and Banker, a monthly capitation grant from the Government of Bengal, and the fees paid by students.

Under the control of the Principal are the Collegiate School and the Survey School. The staff of the former consists of a Head Master, thirteen Anglo-Vernacular Masters, and three Pandits, the latter, of a Head Master and two Assistant Masters.

Krishnagar College.

AFFILIATED, 1857.

This College was founded by Government in 1845, and is under the control of the Director of Public Instruction, Lower Bengal.

Any person who has passed the University Entrance Examination may be admitted. Students pay a monthly fee of Rs. 5.

The College is a handsome building, standing upon 3 bigahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected in 1856 at a cost of Rs. 66,876; 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy, free of expense, at the College in perpetuity, and another, for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government; for the remainder, the College is indebted to the munificence of the Maharaja of Nuddea and the Maharani Swarnamyi, of Cossimbazar.

In 1871, the B. A. classes (the third and fourth year classes) were abolished by Sir George Campbell, then Lieutenant-Governor of Bengal; and for some years the College only afforded instruction up to the First Examination in Arts. In 1875, however, Sir Richard Temple, on the petition of the chief inhabitants of the district, consented to restore the College to its former status, provided that a considerable share of the increased cost was subscribed for by the community. A sum, amounting to more than Rs. 40,000, was subscribed during the year, and with this endowment the College was re-established on its original footing.

A prize of Rs. 80 founded by Babu Mohini Mohan Ray in 1883, and called the Mohini Mohan Ray prize, is awarded annually to the student who most successfully passes the B. A. Examination with honours, or to a graduate of the College who passes the M. A. Examination in any subject.

Berhampore College.**AFFILIATED, 1857.**

It was opened as a College in 1853.

It was raised to the status of a College, giving instruction up to the standard of the B.A. Examination of the University of Calcutta in 1865.

A Law Department was added in 1864. The status was, however, reduced in 1872, and instruction is now given up to the First Arts Examination of the University of Calcutta. The Law Department was abolished in 1875. It is open to all classes of the community, and any University undergraduate is admissible.

The foundation-stone of the building, one moiety of the cost of which was paid by the community, was laid in 1863, and it was occupied in 1869.

Attached to the College is a Hindoo Hostel, the boarder's fee for which is Rs. 4 a month. Rai Rajiblochan Roy Bahadur, the generous Dewan of Her Highness the Maharani Swarnamayi of Kasimbazar, died in 1881 leaving the sum of Rs. 15,000 to the Berhampore College, the interest to be used for assisting deserving students.

The interest of this sum is used in giving five scholarships of Rs. 5 a month each, to the five students who gain the highest marks among the candidates, who compete for the Entrance Exa-

mination from the Berhampore centre. Each student retains his scholarship for two years, on the condition that he continues for that time in the Berhampore College, after passing the Entrance. Full information about these scholarships will be obtained by referring to the Calcutta Gazette dated 10th December 1884, Supplement, page 2457.

In pursuance of the policy recommended by the Education Commission and adopted by the Government of India, the Bengal Government decided in 1886 to transfer the Berhampore College to private management. The munificent offer of Her Highness the Maharani Swarnamayi C. I. of Cossimbazar to maintain the College for five years, was accepted.

Accordingly, by Bengal Government Resolution dated the 14th May 1887, the control of the College, administrative and financial was vested in a Board of Trustees, nominated by the Maharani, consisting of the District Magistrate and the District Judge for the time being Babu Baikuntha Nath Sen, B. L., Babu Srinath Pal, B. L., Babu Shama Das Ray, Dr. Ram Das Sen, Zemindar, and Babu Gopal Chandra Mukerjee, M. A., B. L., Pleader, Judge's Court, Moorshedabad.

Doveton College.

AFFILIATED, 1857.

This College is attached to the Parental Academic Institution, a day and boarding-school which was established on the 1st March, 1823, by a body of Christian parents who were anxious to secure for their children the benefits of liberal education, its affairs being conducted by a Committee of Management elected chiefly from among the parents.

In 1855 a legacy of rupees Two Lakhs and Thirty Thousand was bequeathed to the Institution by the late Captain John Doveton, which enabled the Committee of Management to extend its sphere of usefulness by the addition, in 1856, of an Infant School or Initiatory Department, and the establishment of a College Department, named in honour of the donor. A few years later a Girls' Department was added.

In 1871 other bequests were made to the Institution by the late Mr. Lawrence Augustus de Souza, of the Firm of Messrs. Thomas de Souza and Sons of Calcutta. These consist, first, of the interest on a sum of rupees Three Lakhs, made permanently applicable to the maintenance and education of a certain number of boys and girls of East Indian parents of a certain class, who are admitted as boarders on the "Lawrence de Souza Foundation," at the age of 10, and kept at school till the age of 18; and second of the interest on a sum of Rs. 15,000 for the establishment of a Scholarship in English literature, styled the "Lawrence de Souza Scholarship." It is of the value of Rs. 50 per mensem, and is tenable for one year at the Doveton College; but it is open to any East Indian boy from any School or College, the successful candidate of one year being at liberty to compete for and hold the Scholarship from year to year until he graduates.

In addition to the above, Mr. L. A. de Souza bequeathed a further sum of Rs. 30,000, the interest of which is to be applied towards the education in England of an East Indian youth of ability, with the view of enabling him to compete for the Covenanted Civil Service of India. This is open to any East Indian candidate, whether educated at the Doveton College or elsewhere.

St. Paul's School, Darjeeling.**AFFILIATED, 1857.**

This School was founded in 1845, and was formerly located in Chowringhee, Calcutta. In 1863 the want of a good school in the hills was much felt, and Calcutta being well supplied with schools, the old premises were sold, and with the proceeds an estate was purchased in Darjeeling, and a new school bearing the same name as the school in Calcutta was built.

In 1858, two scholarships, worth 20 rupees a month, were founded as a memorial of Bishop Wilson, who had been from the beginning a warm friend to the school. One is given every year, and held for two years.

In 1863, Mr. Patrick Arson of Calcutta bequeathed to the school Rs. 3,500—Government securities 5 per cent.—to establish an "Arson Scholarship."

The school is managed by a Committee meeting in Calcutta, of which the Bishop of Calcutta is President and the Archdeacon Vice-President. The present Secretary is the Rev. F. R. Michell Offg. Archdeacon of Calcutta. There is also a Referee in Darjeeling, who inspects the accounts and consults with the Rector in emergencies.

The course of study is that prescribed by the University for its examinations for degrees in Arts, and the Code of education for European schools with the addition of religious training upon the principles of the Church of England.

Free Church Institution Calcutta.**AFFILIATED, 1857.**

Originally established by Dr. Duff in August, 1830, for the education of native youths under the name of the General Assembly's Institution, and since 1843 designated the Free Church Institution, being supported by the Free Church of Scotland.

The Institution since 1875 has been in a handsome new edifice, Nimtollah Street, which has been erected at a cost of upwards of £15,000.

It consists of two departments—a College Department and a Preparatory School.

In the College Department all the branches of a higher education, in English Literature, Science, Philosophy, with Bengali and Sanskrit, are taught, in immediate connection with systematic instruction in the doctrines and evidences of natural and revealed religion.

Scholarships.

1. There is an endowment of Rs. 80 per month for small Scholarships of Rs. 5 per month each, which are allotted only to those who pass the University Examinations.

2. There are two endowed Theological Scholarships, of Rs. 16 per month each called "the Duff Scholarships" designed for students who are candidates for the Christian ministry.

3. There is also an endowed "Hawkins Scholarship," of Rs. 8 per month, founded by the liberality of the gentleman whose name it bears.

Annual Prizes.

1. Endowed Prizes:—The Hawkins Gold Medal of Rs. 80 to the most successful in the Institution.

The Macdonald Prize.

The Ewart Memorial Prize of Rs. 50.

The Kelloe Prize of Rs. 40 founded by the late Mr. Buchan of Kelloe.

These are usually allotted for the best essays on prescribed subjects.

2. Besides these, prizes for general Scholarship and regular attendance are awarded in all the classes; with several more for special exercises or essays.

La Martiniere, Calcutta.

AFFILIATED, 1857.

La Martiniere of Calcutta, together with similar Institutions at Lucknow and Lyons, was founded by General Claude Martin, a native of the latter place, and a General in the service of the King of Oudh.

General Martin bequeathed a large sum of money to be devoted to the establishment of a school for the Christian inhabitants of Calcutta, under the direction of the Supreme Court. The School was opened on the 1st March, 1836, and was according to the provision in General Martin's will, named "**La Martiniere**."

By decrees of the Supreme and High Courts, a body of Governors has been constituted, consisting of the Governor-General, the Lieutenant-Governor of Bengal, the Chief Justice of the High Court, the Bishop of Calcutta, the Commander-in-Chief, the Members of Council, the two Senior Barrister Judges of the High Court, the Advocate-General for the time being, and the Chairman of the Justices of Calcutta. The *ex-officio* Governors elect annually four other Governors, who, with one of the *ex-officio* Governors, form a Board of Acting Governors, to whom the general control of the Institution is entrusted.

By the decree of the Supreme Court, there must be upon the Foundation not less than 75 boys and 40 girls. The Foundationers are entirely supported from the funds of the school, and receive an apprentice-fee or other allowance on leaving the School.

The Foundationers are chosen from amongst the Christian population of Calcutta; and must not be at the time of election less than four, or more than ten, years of age.

Boarders and Day Scholars are also received on payment of a monthly fee.

London Missionary Society's Institution, Bhowanipore.

AFFILIATED, 1857.

This Institution was founded by the London Missionary Society in the year 1838. In 1854 the large and handsome building now used, consisting of a library, a hall, and sixteen class-rooms, was first opened.

The Institution is divided into three departments, *viz.*, a College Department for undergraduates of the University, a School Department, and a Theological class for training Christian natives for missionary work.

The course of study comprehends English, Sanskrit, and Bengali Literature, Mental and Moral Philosophy, Mathematics, History and Geography, together with the Sacred Scriptures and Christian evidences.

Serampore College.

AFFILIATED, 1857.

This Institution was founded in 1818 under the patronage of the Marquis of Hastings, then Governor-General of India, by the Revs. *Dr. Carey, Dr. Marshman, and W. Ward, who, together with Colonel Krefling, the Danish Governor of Serampore, and J. C. Marshman, Esq., formed the First Council.*

In 1821 it received a munificent donation from the King of Denmark consisting of certain premises to the north-west of the College, and this act of liberality was followed in 1828 by the grant of a Royal Charter giving perpetuity to the Institution and its endowments. At the cession of Serampore to the East India Company, this Charter was confirmed at the especial request of the Danish Sovereign.

The ground on which the College stands was purchased chiefly by subscription; the entire expense of the buildings, amounting to about £15,000, was met out of the private funds of the Serampore Missionaries who were the first promoters of the undertaking. After the death of Dr. Marshman, the funds for carrying on the operations of the College were provided partly by the endowments, but chiefly by the liberality of J. C. Marshman, Esq., the only surviving member of the original Council. On his departure from India in 1856 the College was placed under the general direction of the Baptist Missionary Society, which has since contributed towards its support and become identified with its operations.

Agra College.

AFFILIATED, 1860.

In 1818 Ganga Dhar Shastri bequeathed to the East India Company the rents of certain lands in the Districts of Aligarh and Muttra for the promotion of education. In accordance with the Shastr's will Agra College was opened in 1823, the endowment then yielding over Rs. 22,000 a year. Subsequently Government added to the income and raised the College to its present status.

In 1883 the management was transferred to a Board of Trustees. The College now receives annual grants of Rs. 10,000 from Government and Rs. 8,000 from the Municipality of Agra in addition to the original endowment. At the time of the transfer the Trustees

made an appeal to the noblemen and gentlemen of the N.-W. Provinces and a lakh of rupees was added to the endowment while the capital of the Scholarship Fund was raised from Rs. 25,000 to Rs. 45,000. The Maharajahs of Gwalior and Bhartpur maintain additional scholarships.

The immediate control of the College is in the hands of a Committee of the members, two of whom are official, the rest nominated by the Trustees.

The College consists of two Departments, *viz.*, the College proper under a Principal and four Professors and the School under a Head Master with 16 assistants. There are 560 students enrolled, of whom 120 are Boarders.

There are also Law Classes in connexion with the College carried on by the leading members of the local bar.

St. Xavier's College.

AFFILIATED, 1862.

This Institution was established under the direction of the Society of Jesus, in January 1860, in the large building, No. 10, Park Street formerly appropriated by the late Dr. Carew for St. John's College.

Since 1868, the adjoining house enlarged and improved, forms part of the College.

Its object is to give to Catholic youths a full course of liberal education, and to train up their hearts to virtue. Pupils of other religious persuasions are also admitted on the same principle of non-interference as the old St. Xavier's College which broke up in 1846.

The College has an Infant class, a Lower and an Upper School Departments, averaging about 500 pupils, and a College Department of over 200 students. The course of studies embraces all subjects up to the M. A. Standard.

Competitions are held during the year, and medals and prizes in books are awarded to the best scholars at the Christmas examination.

A solar spectroscopic observatory, a meteorological observatory, and a splendid museum of Physical Science instruments are attached to the College.

The College Department of St. Xavier's has been removed to No. 288 Bow Bazar, and the following is the Staff for the year 1885.

Joynarain's College, Benares.

AFFILIATED, 1862.

A free school was founded in the year 1817 by Raja Joynarain Ghosaul, Bahadur, in gratitude for his recovery from a protracted illness.

He endowed it with a monthly sum of Rs. 200, to which Government added an endowment grant of Rs. 252-12 per mensem.

The founder appointed the Committee of the Sagra (Benares) Church Missionary Association, for the time being, trustees with directions that they should "appoint such members as shall be able to satisfy the inquiries of the learned of this city on subjects of science, history, and religion."

In 1858 the spacious school-room provided by Joy Narain, having been found insufficient for the number of students, the present building was erected; at the same time the School was raised to a College, and named after the founder.

The College Department was closed in 1875.

Delhi Government College.

AFFILIATED, 1864.

AN Oriental College, founded in 1792, and supported by the voluntary contributions of Muhammadan gentlemen, acquired a large accession of income in 1829 by the munificent gift of Rs. 1,70,000 of the late Nawab Itmad-ud-Dowlah, formerly Minister at Lucknow. The College was then divided into two departments, an Oriental and English; and in 1841 Mr. F. Boutros was appointed first Principal; in 1855 the instruction, up to that time under the supreme direction of a Managing Committee, was placed under the control of the Director of Public Instruction for the North-West Provinces. In 1857 the very valuable Oriental Library was plundered and destroyed by the mutineers, after which, in 1858, a new school was founded, which is now, by affiliation to the Calcutta University, the present Delhi College. Students pay fees of Rs. 2 and Rs. 5.

XXVI.

The General Assembly's Institution, Calcutta.

AFFILIATED, 1864.

This Institution was established in 1830, by the General Assembly of the Church of Scotland. It is the oldest Institution of the kind in India: for it was here that the system, now all but universally followed, was first tried—of imparting the highest forms of knowledge, including sound Christian instruction, through the medium of the English language. Before this experiment, Bengali or Sanskrit had been exclusively favoured in Bengal by the Government, by Oriental Scholars, and even by Missionaries themselves. The new system was introduced by Dr. Duff, who began his Missionary labours by founding this Institution. Valuable help in the way of procuring pupils was given at the commencement by the famous Rajah Ram Mohan Roy. The success of the Institution soon surpassed all expectations. The Governor-General declared publicly that it had produced “unparalleled results.” After having been carried on for some years in various hired premises, the Institution was removed in 1839 to the present building, which is most conveniently situated in Cornwallis Square, in the very centre of the Hindu population.

The Institution was temporarily closed in 1844, in consequence of the secession of the Missionaries with the Free Church. But it was re-opened in 1846 by the Church of Scotland, under the superintendence of the late Rev. Dr. Ogilvie, by whom it was carried on unin-

interruptedly, and with great efficiency, till his death in 1871. Dr. Ogilvie was succeeded by Dr. Robert Jardine who retired in 1876; after which Mr. James Wilson officiated as Principal for the next two years.

The General Assembly's Institution is divided into two departments,—the College Department and the School Department.

The College Department, which has been affiliated in the Faculty of Arts to the University of Calcutta since 1864, was attended in 1883 by more than 400 students, divided into five classes, and paying a monthly fee of Rs. 5 each. In these classes the regular subjects of the University curriculum are taught, embracing the English language and literature, the Sanskrit language and literature, history, mathematics, pure and applied, chemistry, physics, botany and physiology, mental philosophy, and the doctrines and evidences of the Christian religion.

The School Department was attended in 1883 by 690 pupils, divided into fourteen classes, and paying fees in the different classes from 8 annas to Rs. 2-8 a month. Instruction is given in these classes in English, Bengali, and Sanskrit, history and geography, *arithmetic, algebra, and geometry*, according to the degree of *advancement which they have attained. Careful attention is also given to instruction in religious knowledge.*

The Government grant to the General Assembly's College has been raised since 1881 from Rs. 350 to Rs. 600 a month in consequence of the large increase in the number of students.

Scholarships and Prizes.

1. The Macfarlane Gold Medal is awarded every year to the student of the fourth-year class who shows the greatest proficiency in all the College examinations of the year.

2. The Ogilvie Memorial Scholarship, of at least Rs. 5 per mensem, is awarded every alternate year to the student of the second-year class who takes the highest position in all the College examinations, and succeeds in passing the F. A. Examination of the University. This Scholarship is tenable in the General Assembly's College for the two years after passing the First Examination in Arts.

3. The Macleod Memorial Scholarship is awarded to a Christian student, who being an under-graduate of the Calcutta University, is preparing for the ministry of the Christian Church.

4. The Steel Gold Medal is given for Scripture knowledge.

5. Several prizes and scholarships are awarded for general proficiency in the College examinations.

Lahore Mission College.

AFFILIATED, 1864.

This Institution was founded on the 10th December, 1849, soon after the annexation of the Panjab and is the oldest English School in the province.

The four religions represented in the School are the Hindu, Mus-sulman, Sikh and Christian. The greater part are Hindus. The number of Sikhs is small, owing to the fact that they compose a small part of the community.

The instructive staff consists of the Rev. C. W. Forman, M.A., Principal; C. B. Newton, B. A.; R. C. Dass, Headmaster; and seventeen other Teachers.

XXVIII.

Victoria College, Agra.

AFFILIATED, 1865.

This School was founded in 1862 by Pandit Bunsee Dhar and other respectable natives of Agra. It is managed by a Committee of native gentlemen, presided over by Judge Keene as Patron of the Institution; the chief supporters being the Maharajahs of Jeypore, Ulwar, and Bhartpore, and Pandit Ajodhya Nath, the late Secretary. The Government also gives a liberal grant-in-aid.

The Entrance fee is Re. 1, each class has its fixed rate of tuition fee; and it varies from Rs. 1-8 to 0-6-0 according to classification; average number of students above 300.

Prizes and Scholarships.

There are two endowed Scholarships of Rs. 5 and 4 each, the former founded by the Maharajah of Jeypore, in commemoration of the visit of His Royal Highness the Prince of Wales, and called the Jeypore-Wales Scholarship, and the latter out of the subscriptions collected by the Secretary from other friends of the Institution. Other Scholarships, to the amount of Rs. 20 per mensem are given half-yearly to the most proficient student of the three senior classes.

XXX.

Bishop Cotton School, Simla.

(FOUNDED, 1859 : AFFILIATED, 1866.)

This School, the Head Mastership of which is in the appointment of the Bishop of Calcutta, was founded by the most Rev. G. E. L. Cotton, Bishop of Calcutta, under the name of the Simla Public School. The Founder promulgated statutes for the School in 1863, wherein he styled his foundation, the Bishop's School, Simla; but this designation was subsequently changed, in 1866, to that at present in use for the purpose of perpetuating the name and generosity of the Founder.

The Government of the School is vested in a body of eight Governors, who act in conjunction with the Head Master.

The Governors are four *ex officio*, and four elected from permanent residents of Simla.

The Head Master must be a communicant, and, *ceteris paribus*, one in Holy Orders is to be preferred to a Layman; the second and Assistant Masters and all subordinate officers are appointed by the Head Master, their number being fixed by the Governors.

There are eight exhibitions of the annual value of Rs. 120 which are awarded to boys, whose parents cannot without difficulty pay the full charges for their education.

A limited number of other exhibitions has also occasionally been awarded either under the same conditions as above, or as prizes given by examination: five such are being held at the present time.

The Trustees have the right of accepting any exhibitions founded by private liberality, under any rules, or on any patronage of which they approve.

The course of instruction in the Primary and Middle Departments of the School is framed upon the Educational Code of the Panjab Government: the High School adopts for its standard the curri-

culum of this University. Latin and Urdu are taught throughout the School: French, Greek Drawing, Music, and Carpentering are taught as optional subjects. All the scholars are required to attend daily prayers, and to receive regular instruction in Holy Scripture. There is also instruction at stated times in the Church Catechism and the Prayer Book. There are at present 149 boys on the boards, of whom 37 are day boys and there is further accommodation for 50 boarders.

Canning College, Lucknow.

AFFILIATED, 1867.

This College, founded by the Talookdars of Oudh in memory of the late Earl Canning, was opened on the 1st of May, 1864. The Institution comprises four departments,—the College proper, a Law Department, an English School, and an Oriental Department, in which only Sanskrit, Persian, and Arabic are taught.

Canning College is supported by the Talookdars of Oudh, aided by Government. By a *sunrud* duly executed, the Talookdars unanimously endowed the College in perpetuity with a percentage of the revenues of their talooks. This sum, amounting on an average to forty-one thousand rupees per annum, is collected by the officers of Government, and is deposited in the Government Treasury for the use of the College. A Government grant-in-aid to the amount of twenty-five thousand rupees is also enjoyed by the College, so that its total income from endowment, grant-in-aid, and fees, aggregates seventy-one thousand rupees per annum.

The Institution is open to all classes, and its object, as declared by the rules, is to impart instruction in the English language and literature, in mathematics and science, in law, in the oriental classical languages, and the vernacular languages of the Province of Oudh. Its management is vested in a Committee, consisting of the Commissioner of Lucknow, the Deputy Commissioner, the Inspector of Schools, Oudh Circle, the District Judge, the Executive Engineer, the Principal, and the representatives of the Talookdars.

The students of the Entrance and Preparatory Entrance classes pay a fee of one rupee per mensem. The fee for the College classes is Rs. 3 for the F. A. classes, and Rs. 5 for the B. A. and M. A. classes. The Committee reserve to themselves the right of admitting Oudh students to the free list, or of admitting them on a modified fee.

In addition to Government scholarships, there are local scholarships to the value of Rs. 150 per mensem.

La Martinière College, Lucknow.

AFFILIATED, 1869.

This Institution was established in 1840, pursuant to the will of Claude Martin, a native of France, and a Major-General in the service of the Honorable East India Company. He was born at Lyons, 1735; died at Lucknow 13th September, 1800; and was buried within the building.

For the support of the College at Lucknow, the sum of sicca rupees eight hundred and sixteen thousand four hundred and forty-four was decreed by the High Court of Judicature out of the estate of the founder.

The pupils consist of foundationers (100), boarders (100), and day scholars (about 40). A foundationer is educated and maintained free of charge to his friends. Boarders pay for board, lodging and education, at rates varying according to the means of the parents, from Rs. 15 to Rs. 35 per mensem.

The general management of the affairs of the Institution is vested in a Visitor and *ex-officio* Governors. The Chief Commissioner of Oudh is *ex-officio* Visitor, and the Judicial and the Financial Commissioners, with the General commanding at Lucknow, and the Commissioners of Lucknow, are *ex-officio* Governors.

The educational staff consists of a Principal, Head Master, and six Assistant Masters, besides Native Teachers.

Prizes and Scholarships.

The former consist of books, mathematical instruments, &c., and are distributed to the most deserving boys in each class on prize-day, 1st December in each year; the latter are two in number, value Rs. 50 per mensem each, and are bestowed on the two most deserving

lads, who have passed the Roorkee Entrance examination, to enable them to pursue their studies at the College. Each Scholarship is tenable for 18 months.

Muir Central College, Allahabad.

AFFILIATED, 1872.

In 1870-71, Sir William Muir, then Lieutenant-Governor, acceding to a generally expressed wish, invited the co-operation of the Chiefs and Fendatories of the North-Western Provinces and territories adjacent in founding a Central College at Allahabad, the seat of Government. His proposal having been warmly responded to, the College was temporarily opened in a hired building on the 1st July, 1872.

This Institution admits all classes of students who have passed the University Entrance examination, and is affiliated in Arts and Law. The Course of Instruction embraces the University requirements for degrees in those branches.

A fund of sixty-three thousand rupees in Government four per cent. notes, endowed by H. II. the Nawab of Rampore, the Maharajahs of Vizianagram, Rewah, Punnah, Chirkaree, and others, furnishes fourteen local Scholarships, ranging in value from twenty to ten rupees monthly. These are tenable with Government Scholarships. There are also four minor stipends.

The late Nawab Ali Azghar Khan, C. S. I., of Rampore, by a *waqf nama* dated 13th November, 1872, endowed scholarships to the value of Rs. 50 monthly "to be given to those students who pass in Arabic."

AFFILIATED, 1881.

This Institution has been established by the educated and more advanced portion of the Muhammadans of Upper India, under the leadership of Syed Ahmed Khan, Bahadur, C. S. I. The objects in view are to place the benefits of a liberal education within the reach of the Muhammadan community who have markedly failed to avail themselves of Government Educational Institutions, and to reconcile the Muhammadans to the study of Western Science and Literature by founding a scheme adapted to meet the special educational wants of the Muhammadan community. However, the Institution is catholic in its character and is open to students of every creed and race.

This Institution was first opened as a school in June, 1875, and in January 1878 it was converted into a College and was, from the beginning of that year, affiliated to the Calcutta University up to the standard of the First Arts Examination. In Arts the College has been affiliated to the University up to the B. A. standard from the 1st of January, 1881, and in Law it has been affiliated up to the B. L. standard from the 1st of January 1883.

In the College and School attached to it, all subjects are taught in the English language, and Arabic, Persian, or Sanskrit is taken as the Second Language.

And all the Muhammadan students are taught Theology in Persian or Arabic according to their sect, viz., Sunnis according to the Sunni Sect and Shias according to the Shia Sect.

The College is under the guidance and control of the following three Committees :—

1. *The College Fund Committee*, with which rests the financial management of the College.
2. *The Committee of Directors of Instruction*, which consists of three branches :
 - a. *The Directors of Instruction in various Languages and secular learning.*
 - b. *The Directors of Instruction in the Sunni Theology.*
 - c. *The Directors of Instruction in the Shia Theology.*
3. *The Managing Committee.*

The College Fund Committee has established two separate funds for this College, which are known by the names of the Capital and Building Funds respectively.

The Capital fund consists of—

1. Government Promissory notes and immovable property purchased from the sums raised by private subscriptions.
2. Government Promissory note for Rs. 10,000, granted by the Right Honorable the Earl of Northbrook, the late Viceroy and Governor General of India, for the foundation of certain scholarships for the Mahomedan students of the College.
3. Interest accruing on the Government Promissory note for Rs. 30,000 deposited by His Highness the late Nawab Muhammad Kalb-i-Ali Khan Bahadur, G. C. S. I., of Rampore.

XLII.

London Mission College, Benares.

AFFILIATED, 1871.

This College is the result of the gradual growth of a small vernacular school formed in the Sikraul suburb of Benares, by the Rev. M. T. Adam in 1821, the year after the Benares Mission of the London Missionary Society was established by him. In 1823 this School was succeeded by another founded by him in the Kashipur portion of Benares. Such Schools gradually multiplied until in 1840 they were eight in number and contained 405 pupils. Early in 1844 a superior Educational Establishment was opened under the name of the Central School in the heart of the city; and in November 1845 its standard was raised by the addition of an English Department. During the next twenty-five years it gradually absorbed into itself the smaller schools; and its educational character steadily advanced until it reached the Entrance standard of the Calcutta University. In 1870 it was removed to a suburb of the city and united with another school which had rapidly sprung up there. In the following year this amalgamated institution was affiliated under the name of the London Mission High School up to the First Arts standard of the Calcutta University. During the succeeding twelve years its progress continued; and early in 1883 it was affiliated under the name of the London Mission College up to the B. A. standard of the Calcutta University.

The number of students on the rolls is about four hundred and fifty. Instruction is given in Christianity and in general secular subjects from the Alphabet in English and in the vernaculars up to the B. A. standard.

The late Maharaja of Vizianagram, K.C.S.I., endowed the institution with a sum of money for the annual purchase of a gold medal of the value of eight pounds, to be called the "Vizianagram medal," to which is attached a small monthly scholarship. In addition, the College awards several scholarships to deserving students, tenable for twelve months.

XLIII.

City College, Calcutta.

AFFILIATED, 1881.

This Institution was founded as a school under the name of the City School in January 1879. The aim of the Institution from the beginning has been to impart education on a broader basis than is usually adopted; so that it should embrace not only intellectual training and proper enforcement of discipline, but also the improvement of character and the healthy development of all the faculties of the mind. The success of the Institution and a desire further to develop and carry out their ideas regarding education led the College Council to add a College Department, which has been affiliated to the Calcutta University up to the standard of the First Arts Examination from January, 1881, and up to the B. A. standard from January, 1884.

Particular attention is paid to the moral training of the students, and special classes are held in Gymnastics, Drawing, Music and Science. All the classes are open to the students of the Institution without any extra payment, except the Drawing class, for which a small fee of 8 annas a month is charged. The Drawing class is also open to out-siders on a payment of Re. 1 per month. With a view to give practical training to those who may be anxious to avail themselves of it, a Carpentry class has been opened for the students of the Institution.

Fortnightly lectures are delivered to students with a view to impart general information and to create in their minds an interest in things outside the immediate range of class studies. The Library and the Reading Rooms in connection with the Institution also help in furthering this object.

Besides the annual and periodical examinations, special or Honor examinations are held in the subjects studied in the different classes, at which the more advanced students compete and by which aptitude in special subjects is encouraged. Monthly returns as to the attendance, progress and conduct of the pupils are sent to their guardians whose suggestions and co-operation are also invited.

The Institution consists of a College and a School Department.

College Department.

It teaches up to the standard of the B.A. Examination. There is an admission fee of Rs. 5 and a monthly tuition fee of Rs. 3.

XLIX.

Free Church Institution and Hislop College, Nagpur.

The Hislop College is so named in memory of the Rev. Stephen Hislop, the reverend founder of the Free Church Mission, Nagpur. Connected with it is the Institution which comprises the High, Middle and Lower School Departments. The classes of the former are accommodated in the original building, which is situated at the west end of the city on the margin of the Juma Talao. This is a large and substantial sandstone structure, having a central hall 66 by 33 feet and 30 feet to the highest part of the roof, with a wing on both sides, each containing two class rooms separated by a corridor. It was erected at the expense of Rs. 24,000, £1200 being contributed by the late Miss Mary Barclay of Edinburgh, while the remainder was raised by special donations from friends in India. The Institution was opened on the 1st April 1861, after having drafted into it the pupils of one small Anglo-vernacular and six vernacular schools, by which, from 1845, when the Mission was founded, educational operations had been carried on in the city of Nagpur. In 1868 the Institution began to send candidates to the Entrance Examination, first of Bombay and then of the University of Calcutta. At the beginning of 1883 a College class, teaching up to the standard of the First Arts Examination, was formed, which has resulted in the establishment of the Hislop College to qualify students for the B. A. degree. The classes of the High and other School Departments are conducted in two blocks of rooms not more than three minutes' walk from the College buildings.

1.

Calcutta Madrasah.

AFFILIATED, 1867.

This Institution was founded by Warren Hastings in 1781, with the view of enabling Muhammadans of Bengal to acquire such a knowledge of Arabic literature and law as would qualify them for the Judicial Department, and was endowed by him with a zamindari yielding an estimated rental of Rs. 29,000. In July 1819, the zamindari was resumed, and the rental was commuted to a fixed annual charge on the treasury of Rs. 30,000.

In 1873, the interest of the Muhammad Muhsin Legacy, amounting to Rs. 51,000, which had hitherto been expended on the Hooghly College, was set free and was devoted to Muhammadan education in Bengal. Several new Madrasahs were founded; and the sum of Rs. 35,000, *plus* the schooling fees, changed afterwards to Rs. 31,000, was fixed as the annual charge of the Calcutta Madrasah and Colingah Branch School.

The Institution consists of three departments and a Branch School. In the *Arabic Department*, Arabic and Persian literature, logic, rhetoric, and Muhammadan Law are taught. The course extends over six years. Of modern sciences, arithmetic and geometry (taught in the vernacular) were made compulsory in 1874, and arrangements have been made to allow students to take up some of the English subjects taught in the Anglo-Persian Department. The monthly fee is eight annas; average number of students, 409.

The *Anglo-Persian Department* is a collegiate school, and teaches up to the Entrance Examination. The monthly fee is Re. 1; average number, 465.

The *College Department* is a second grade College (established in 1884) and teaches up to the F.A. standard. The monthly fee is Rs. 2; average number, 27.

The *Branch School* is a middle-class English School, and has an Oriental Department attached to it, which prepares students for the Madrasah. The monthly fee is 8 and 4 annas; average number of students, 311.

There are 16 Muhsin scholarships of Rs. 10, 8, 6, 4 respectively, awarded in the Arabic Department; 6 Muhsin scholarships of Rs. 5, 4, 3, respectively in the Anglo-Persian Department; and a Scindia and Bhopal scholarship of Rs. 3. Two junior Muhsin scholarships of Rs. 10, tenable for two years, are annually awarded to successful Entrance students.

In the Branch School there are four Muhsin scholarships of Rs. 3, two tenable in the Arabic and two in the Anglo-Persian Department of the Madrasah.

In the College Department there are the following scholarships. 2 Muhsin scholarships and 3 other scholarships, each of Rs. 10, and tenable for two years by students reading for the F.A. Examination; also 2 scholarships of Rs. 10 each tenable for two years by passed students of the Madrasah, reading for the B.A. degree in any College of Calcutta.

Schore High School.

AFFILIATED, 1868.

This School was founded in October 1839, by Launcelot Wilkinson, Esq., Bombay Civil Service, Political Agent of Bhopal, for the instruction of the Malwa youths in the vernaculars only, the funds being supplied by the Begum of Bhopal and the neighbouring Chiefs.

In 1849 it was re-organized by Captain J. D. Cunningham, and a large and commodious building in the Saracenic style, erected at a cost of Rs. 30,000, supplied by the Begum and Chiefs of the district.

In February, 1857, an English Department was added to the School, the Begum of Bhopal subscribing Rs. 4,545-7-3, and the neighbouring Chiefs Rs. 3,448-3-1, per annum towards its support.

It was eventually, at the solicitation of Lieutenant-Colonel Willoughby Osborne, C. B., Political Agent of Bhopal, placed on the same footing as other Government schools, and subjected to the inspection of the Government Inspector of Schools for the adjoining circle; and lastly, at his solicitation, it was affiliated to the Calcutta University, December 23rd, 1867.

It owes its support to subscriptions and donations from the Begum of Bhopal and the Chiefs surrounding, supplemented by an annual subscription from Government of Rs. 5,127-4-5.

There are two scholarships in each department, of the monthly value of Rs. 6 and Rs. 4 each, tenable for one year.

St. Peter's College, Agra.

AFFILIATED, 1870.

This Institution was founded in 1846 by Bishop Borghi. The building which has a frontage of about 400 feet was erected by means of contributions from Catholics in Europe and India together with a large grant from the funds of the Agra Mission. Long before the Mutiny it had established its name as one of the best Seminaries in the North-Western Provinces. In July 1857 the mutineers sacked the building, but it was again opened for educational purposes in January 1858. Since its foundation St. Peter's College has been under the patronage of the Vicars Apostolic of the Agra Mission and the management of two priests as Rector and Vice-Rector, assisted by a staff of teachers both religious and laymen. Though intended chiefly for Catholic children St. Peter's admits also the children of other religions on the principal of non-interference. The course of studies embraces all the subjects for the Calcutta University Examination in Arts, and the First and Second Departments of the Thomson College, Roorkee. Candidates are also prepared for the Opium, Secretariat, Survey and Subordinate Medical Departments. Two classes of boarders are admitted into the College: Parlour boarders paying Rs. 25 a month, who dine with the instruc-

tive staff and sleep apart from the rest of the boys, and boarders paying Rs. 20 a month. A reduction is made in the case of brothers. Both classes pay an annual fee of Rs. 10 at the beginning of the year for the use of books, stationery, medicines &c. Day-scholars pay a fee of Rs. 4 a month and a 'bus fee of Rs. 3, paying also for their own books &c. A reduction is also made in the case of brothers. The average number of boarders is 50 and of day-scholars 60.

Attached to St. Peter's College is St. Paul's Orphanage, chiefly for the orphans of British soldiers; children of Civilians too poor to pay for their children in the College are also admitted into the orphanage at Rs. 10 a month and clothes. Difference of religion is not taken into account. The orphans are separated from the boarders in the refectory and play-ground and dormitory, but pursue the same studies and are instructed by the same staff of masters. The following is the Instructive and Disciplinary staff of both Institutions.

London Mission School, Mirzapur.

AFFILIATED 1872.

This Institution was formed by the union of two schools which had existed in connection with this Mission, one on its premises since its commencement in 1838, and the other in the city since 1862. The Institution was afterwards enlarged by several small vernacular schools being incorporated with it.

The present building was opened in 1868. Its style is gothic. It is conveniently situated in the heart of the city.

The Institution is divided into three Departments—Anglo-Vernacular, Persian and Urdu, Sanskrit and Hindi: instruction is given in the Anglo-Vernacular Department up to the First Arts standard of the Calcutta University.

The expenditure of the Institution is met by a grant from the London Missionary Society, the scholars' fees, subscriptions and a Government grant-in-aid.

Midnapur College.

AFFILIATED, 1873.

This Institution was founded as a zila School in 1834, and was converted into a High School in 1873. Since Government orders of the 16th October, 1877, changing the nomenclature of Government Schools, it has been called the Midnapur 2nd Grade College. It is supported partly by Government and partly by the interest of an endowment fund, raised by the people of the district of Midnapur, amounting to Rs. 51,000 in Government Securities and Municipal Debentures. The management of this College and the attached Collegiate School, which was under the control of the Director of Public Instruction and of a District School Committee, has been made over by Government to the local Municipality since the 1st of July last on the Grant-in-aid system.

It consists of a College and a School Department. Into the former, such students are admitted as have passed the University Entrance Examination and intend to study for the First Examination in Arts. The schooling fee in the College Department is Rs. 5 a month, and that in the School Department varies from one rupee in the lowest to three rupees in the highest class.

A Law Department was also opened in 1873, and a Law Lecturer appointed.

There is a gymnastic class attached to the College in which the boys are taught exercises according to European and native methods.

Local Scholarships and medals.

One Luchman Prasad Garga scholarship of Rs. 5 per mensem, tonable for two years, founded by the zemindar of Moisdal of that name, and one Ajodhyaram Khan's scholarship of Rs. 5 per mensem, tonable for two years, founded by Babu Mahendra Lal Khan, zemindar of Midnapur, to perpetuate the memory of his father, are awarded annually to the two most deserving students who pass the University Entrance Examination from the Collegiate School, but who fail to gain Government Scholarships, on condition that they prosecute their studies in this College.

One Luchman Prasad Garga gold medal, of the value of about Rs. 32, endowed by the zemindar of Moisdal of that name, is awarded annually to the student from the Midnapur College who passes highest at the F. A. Examination.

Four silver medals, of the value of about Rs. 16 each, called the Harrison, the Martin, the Kali Prasanna Raychaudhuri and the Bipin Bihari Datta medal, are annually awarded to the best students of the Collegiate School in mathematics, history, English composition and English language and literature respectively. The money for the Martin Medal Fund was subscribed by the native friends and admirers of the late R. L. Martin, Esquire, Inspector of Schools, to commemorate his name. The rest were endowed by the donors whose names they bear.

7.

Jaypur Maharaja's College.

AFFILIATED 1873.

It was founded in 1844 by the Jaypur Darbar to secure for the people of Jaypur the benefits of liberal education. It was originally opened as a School; but the success of the institution having shown that its sphere of usefulness might be extended, it was raised to the status of a College in 1873, the instructive staff being at the same time augmented and improved to meet its wants. The institution now comprises three departments,—an English, an Anglo-Vernacular and an Oriental Department. The English Department consists of the College proper, giving instruction up to the standard of the First Examination in Arts of the Calcutta University, and a Preparatory School containing 12 graduated classes many of which are divided into sections. In the Anglo-Vernacular Department all subjects are taught in Hindi, and English is taken as the second language. In the Oriental Department Arabic, Persian or Sanskrit is exclusively taught, and the students are trained up for the Oriental Examinations of the Panjab University. The average number of students on the roll of the College is 1500. Besides intellectual training and a proper enforcement of discipline, particular care is taken to ensure the physical and moral well-being of the students. The institution also affords to its students advantages of such an education as may fit them for state employment or professional career.

A library and a debating club are attached to the College.

Connected with the College and under the control of the Principal is a Rajput School, attended only by the young chiefs of the State who undergo a special course of instruction.

The College is also the centre of a number of Schools in the State, which are in a manner affiliated to it and are under the control of its Principal. These Schools are divided into District Schools, Village Schools and Girls' Schools, and amount in number to 160 with a daily attendance of about 5000 pupils. A system of examination is in force for the whole of Jaypur, the chief State schools sending candidates to the main institution. These examinations are intended to lead up to the Middle Class Examination, and are managed by the Principal of the Maharaja's College.

The educational institutions described above are entirely supported by the State; no tuition or entrance fee is exacted from the students. All undergraduates of the College receive scholarships

from the state, varying from Rs. 8 to Rs. 20 per month and tenable for two years. A medal is annually awarded by His Excellency, Lord Northbrook to the first boy of the College for general proficiency, in commemoration of his visit to Jaypur in 1876. Prizes and scholarships to the value of more than Rs. 3000 are also awarded to the deserving pupils of the Preparatory School and the other educational institutions according to the results of the periodical examinations and examinations in special subjects. Books, too, are given *gratis* to poor boys, many of whom also receive stipends for their maintenance.

Patiala Maharajah's College.**AFFILIATED, 1874.**

This School, originally established by His Highness Maharajah Narinder Sing, was thoroughly reorganised by His Highness Maharajah Mahinder Singh, the late Maharajah of Patiala, in 1870 who, when he was invested with the full powers of Government, established an Educational Department under the control of a Director of Public Instruction.

Education is now given in the English, Persian, Arabic and Sanskrit languages. In January 1874 this School was affiliated to the Calcutta University. The school is also affiliated to the Punjab University College, and prepares its students for the examinations of that Institution, as well as for those of the Calcutta University. The school is entirely maintained by funds paid by His Highness the Maharajah from his treasury, and the schooling fee varies with the income of the parents. Annual prizes and monthly scholarships to the value of Rs. 6,500 are awarded to the deserving pupils of the school. Poor boys are admitted free and receive stipends for their maintenance. A gold medal of Rs. 70 is annually awarded by His Excellency Lord Northbrook to the first boy of the school for general proficiency, in commemoration of his visit to Patiala and laying the foundation-stone of the Mahinder College in March 1875.

Under the orders of the Council of Regency, a First Arts class was opened in the year 1880 and a Principal appointed also. In the English Department, instruction is now given up to the standard of the First Examination in Arts of the Calcutta University and the Proficiency Examination of the Panjab University College.

The Sanskrit, Persian and Arabic Departments train up students for the following examinations of the latter University:—the Shastri, Bisharada, Pragya, and Entrance Examinations in Sanskrit; the Munshi Fazil, Munshi Alim, Munshi and Entrance Examinations in Persian; the Maulavi Fazil, Maulavi Alim, Maulavi, and Entrance Examinations in Arabic.

AFFILIATED 1877.

This College was established in 1876. For some years special classes for sons of native chiefs were carried on along with the ordinary College classes in one building, but in 1881 the two departments were entirely separated except in so far as the Principal exercises control over both, and in November 1885 a new building was opened by H. E. the Viceroy, specially for the use of the Rajkumar students, under the name of the Daly College. The revenue is derived from local funds, fees and the interest of an accumulated fund. The number of students in the ordinary College classes varies from 130 to 150, and instruction is given up to the Entrance standard. The number of Rajkumars is usually from 12 to 15, who undergo a special course of instruction. A system of examination is also in force for the whole of Central India, the chief State schools sending candidates to the various centres. These examinations are intended to lead up to the Entrance Examination of the Calcutta University, and are managed by the Principal of the Residency College.

Albert College.

This Institution belongs to the Indian Reform Association. It was founded in the year 1872, with the object of imparting education to students of the middle classes at moderate and convenient rates. The College has been a self-supporting one from the beginning, being maintained entirely from fees. It consists of two departments, the English and the Vernacular, containing thirteen classes many of which are divided into sections. The College Department was opened in 1881, teaching up to the standard of the First Examination in Arts. In the Vernacular classes both English and Bengali are taught, but the latter is used as the principal medium of instruction. Besides the branches rendered compulsory by University requirements, the College insists upon regular instructions in the principles of ethics, separate hours being set apart for lectures on that subject. There are classes also for music and elementary science.

An admission fee of rupees 3 is charged on all students of the College Department, and the monthly tuition fee is Rs. 3. In the School Department the rates of fees vary from one rupee in the lowest classes to three rupees in the highest.

There are three scholarships attached to the Institution :

- (1) Keshub Chunder Sen Scholarship of Rs. 5 *per mensem* tenable for two years.
- (2) The Baring Scholarship (in honour of Sir Evelyn Baring) of Rs. 5 *per mensem* tenable for two years.
- (3) The Yule Scholarship of Rs. 5 *per mensem* tenable for one year.

Burdwan Raj College.

AFFILIATED, 1882.

This Institution, since its first establishment in 1817, has been one of slow but steady growth. True to its mission of supplying the demands of the public of Burdwan for education, in the modern acceptation of the term, it has always kept pace with the real wants of the place. Started as an Anglo-vernacular school, imparting rudimentary education which satisfied the intellectual craving of the Burdwan people of the early days of British rule in India, it passed through different stages of improvement, developed various phases of usefulness, and at last attained a recognized position as a second grade College in 1881.

The responsibility of teaching a zila, worthy as it was of the princely and munificent house that undertook it, assumed at a later period such formidable proportions as might well stagger any man of weaker nerves than those of His Highness the lamented Maharaja Mahtab Chand Bahadur. When the Government, actuated by a sense of the growing wants of the people of Burdwan, and dissatisfied with the slow and indifferent working of the moribund Government school that dragged its listless existence from year's end to year's end, intended to enlarge the sphere of its usefulness, the Maharaja, jealous for the honour of his house, which could never brook a rival in its field of charity, undertook so to improve the condition of his own school, that by providing for all the educational wants of the district, it would supersede the necessity of a second institution maintained by the Government. A great change accordingly came over the spirit of the Institution. His Highness the Maharaja, with characteristic liberality and discrimination, rose equal to the magnitude and urgency of the occasion and thoroughly reorganized and improved the Institution by establishing it on a sounder basis. It was then that the school in all its departments was enabled for the first time, to meet the varied requirements of a community that after ages of intellectual torpor was at last awaking to a sense of its degradation and wants. The College, as the Institution then first came to be called, was so organized as to consist of four Departments—English, Persian, Bengali, and Sanskrit. Thus it will be seen that the arrangements which, by reason of their variety, were calculated to meet the wants of the different sections of the community, left no room for complaint. Later on the rapidly growing demand for better education and higher culture which characterized the movements of the people in and about the metropolis, and which ere long made its way even into the backward district of Burdwan, did not find the Maharaja unprepared. He anticipated the demands of the people and commenced a magnificent building for the future accommodation of his school, which he intended to elevate to the condition of a College. This building and the good work in connection with it were destined, however, to be completed by his worthy successor, and the College was in 1881 affiliated to the Calcutta University up to the Standard of the First Examination in Arts, and was located in the same year in the block of buildings that it now occupies.

The educational establishments of His Highness the Maharaja divide themselves at the present time under six heads:—First the College Department, which is open to all students that are matriculated in the Calcutta University, teaching up to the F. A. standard.

Second, the School Department serving chiefly as a feeder or tributary to the above, preparing students for the Calcutta University Entrance Examination.

Third, the Bengali School, teaching up to the Vernacular Scholarship Examination standard.

Fourth, the Persian Department, teaching, amongst others, those boys of the first two Departments that take up Persian as their second language.

Fifth, the Sanskrit School, imparting instruction in the orthodox native style to those whose religious scruples prevent them from availing themselves of the advantages of the English school.

And sixth and last, the Girls' Schools, the present provision in connection with which, though meagre, is more than sufficient to meet the requirements of female education as it is understood in Burdwan. All these Departments, with the exception of the last two, are under the control of the Principal.

The disbursements in the different Departments aggregate annually about Rs. 21,000, they being entirely met by the munificent charity of His Highness the Maharaja.

Education in all its varieties and phases is imparted gratuitously, several boys in consideration of their extreme indigence being found in money, besides being provided with free tuition.

Three scholarships of Rs. 10 per month each, and tenable for two years, are annually awarded to the best amongst those successful F. A. candidates from the College who fail to secure Government Senior scholarships, to enable them to study for the B. A. Examination.

AFFILIATED, 1886.

This Institution was founded in January 1886 under the auspices of the late Babu Ramratan Ray, zemindar of Naral. Encouraged by its success, the present managers sent up an application in April 1886, to the Syndicate of the University to authorise its affiliation up to the F. A. standard, and the prayer was granted by the Government of India in their Memo. No. 162 of the 25th April 1886.

The Institution receives a Government grant-in-aid and a liberal subscription from the local zemindars towards its maintenance.

There are two scholarships of the monthly value of Rs. 5 each, founded by Babu K. C. Ray, to be held by the two most deserving pupils of the College Department, and a gold medal to be annually awarded by Babu Upendrachandra Ray to the student who would head the list of the successful candidates in the F. A. Examination from this College. There is also a silver medal for the most successful Entrance candidate from the School.

A student Boarding has lately been opened in connection with the College for the accommodation of students, the rate is very cheap and medical aid is offered gratis.

It has been settled that the rate of tuition fee should be Rs. 3 in the College class.

Uttarpara College.

AFFILIATED 1887.

This College is the final outcome of the long-continued efforts of Babu Jaykishen Mukherjee in furtherance of the cause of English education. In 1846 he had a Government School opened at Uttarpara, on the basis of an endowment by him and his deceased brother, Babu Rajkishen Mukherjee, of Rs. 1200 a year, and a Government assignment of equal value. The School prospered, and it has for a long time past ranked as one of the best schools in Bengal. Babu Jaykishen's wish was that his school should ultimately expand into a College, and to this end so long ago as the year 1853 he asked Government to raise the School to a first class College, offering to contribute an equal sum with Government towards the maintenance of the College. Government did not, however, comply with the proposal. In 1883 he submitted a proposal for the conversion of the School into a second grade College, offering to make an endowment for its support, so that it might cost the Government nothing. The recently initiated educational policy of Government stood, however, in the way of his proposal being accepted, and it was accordingly not accepted. He finally went up to Government in April last with a proposal for the establishment of an aided College in connection with the old Government School. Government has accorded him permission to open such College, but on the condition that he should take the School too off the hands of Government, and he has agreed to do so provided Government would leave to the school the material advantages it derived from its connection with Government. Negotiations for the transfer of the School are still in progress. In the meantime the College has opened with the following instructive staff:—

Principal and Lecturer of Logic and English ...	{ Syamacharan Ganguli, B.A.
Lecturer of Sanskrit and English	Janakinath Bhattacharyya, B.A.

Tej Narayan Jubilee College, Bhagalpur.

AFFILIATED, 1887.

The Institution was founded as a middle class school in the year 1883, under the patronage of Rai Tej Narayan Singh Bahadur. The number on its rolls, however, rapidly increasing, it was within two months of its foundation raised to the rank of a Higher Class Institution with an endowment of Rupees 150 a month settled upon it by its proprietor Rai Tej Narayan Singh Bahadur. In commemoration of the Jubilee of Her Gracious Majesty a College Department has been in the current session added to the School,

the proprietor having provided funds for the maintenance of the department.

The tuition fee in the College department is Rs. 4, and no separate fee is charged for admission. Two stipends each of Rs. 10, under the name of Bayley Scholarships, have been reserved for the department by the proprietor of the Institution, and these are intended for boys that pass highest from the Collegiate School in the Entrance Examination, and continue their studies afterwards in the Institution. There are two other scholarships in the department—each of Rs. 5, and tenable for a year—granted by Babu Jaggannath Sahai a local zemindar. The stipends spoken of are all destined for boys that fail to secure Government scholarships.

The School department consists of nine classes. There is a graduated scale of Schooling fee for the classes, and the scale rises from eight annas to rupees two. The number of free students is twenty-five. The department is endowed with a scholarship—the grant of Babu Jaggannath Ram a local merchant—which is open to the Behari boys in the Entrance class, and with a medal, granted by Babu Upendra Chandra Singh, a zemindar of the town, and awarded to the boy most proficient in Mathematics. There are prizes besides for general proficiency, awarded upon the results of the Annual Examination, and for regular attendance.

The Institution is under the control of a Managing Committee with the proprietor Rai Tej Narayan Singh Bahadur as its president. It is located in a spacious building which has been erected at the sole cost of the proprietor.

A boarding Institution has been lately established for the benefit of students coming from outside. The amount charged upon each boarder is Rs. 5 a month.

The schooling fee is Rs. 4 for the first three classes, Rs. 3 for the 4th class, and Rs. 2 for the remaining classes, and admission fee is equal to the schooling fee of each class. The novel feature in the school is the institution of a six years' course instead of the usual 8 or 9 years' course. Special arrangements have been made for teaching the English language in the juvenile classes. Each year is divided into two terms of 6 months each, and at the end of each term scholarships, free studentships and prizes are awarded to the deserving students of each class.

1.

Medical College of Bengal.

AFFILIATED, 1857.

1. The Medical College of Bengal was founded by Lord William Bentinck in the year 1835.

The Government of the College and Hospital is vested in the Principal, aided by a Consultative Council, composed of all the Professors, subject to the general control of the Director of Public Instruction.

Ten free presentations will then be awarded. These are given to students according to their relative position in the University, B.A., B.L., and F.A. Examinations, preference being given to those who have passed the highest examination.

No person shall be enrolled as a matriculated student of the College who has not previously passed the First Arts Examination of the Calcutta University, or a preliminary Arts Examination of the United Kingdom recognised by the British General Medical Council.

All matriculated students of the College shall pay Rs. 15 on entrance, Rs. 30 for the summer session on the 23rd June, and Rs. 30 for the winter session on 1st November of each year.

Mahomedan students are required to pay Rs. 15 on entrance and one-third fee, i. e., Rs. 10 per session. The remaining two-third fees are charged to the Moshin Fund.

Any matriculated student of the College may, with the permission of the Principal and the Professor of the subject, attend courses of lectures or departments of hospital practice in addition to the full curriculum for the year, and shall be entitled to certificates of attendance at such extra lectures, if the Professor is satisfied that he or she has really studied the subject. The fees payable in advance for such additional courses are the following :—

For a single course of lectures on each subject in one year...	Rs.	40
For six months' attendance in each department of hospital practice	60

Any matriculated student who leaves the College before completing his University course, with the object of continuing his studies at a Medical School in Europe, may receive certificates of attendance at lectures on payment of fees at the rate fixed in the foregoing rule. But in calculating the sum to be so paid, the amount of the fees already paid by him as a regular student, or in the case of a free student, the amount which would have been paid by him had he been a paying student, shall be deducted.

Any person not being a matriculated student of the College, who wishes to attend any course of lectures, or any department of hospital practice, may do so with the permission of the Principal and Professor of the subject, on payment, in advance, of fees at the rates fixed in rule 5.

If such student has passed the Entrance Examination of the University, he shall receive certificates of attendance at lectures.

A student who has not passed the Entrance Examination will receive no class certificates.

College scholarships, prizes, and certificates of honour are open for competition only to matriculated students of the College, Hospitable Apprentice and Female Certificate classes.

Junior scholarships of Rs. 8 per mensem and free tuition for one year are annually awarded to 10 students of the 2nd and to 10 of

the 3rd year, on the results of the 1st and 2nd years' Test and Honour Examinations respectively.

Ten senior scholarships of Rs. 12 per mensem and free tuition are annually awarded to students of the 4th year on the results of the University First Examination in Medicine. But these shall not be awarded to students who gain Doorga Charan Laha and Female Medicine scholarships. These are tenable for two years. Failed students are not eligible for these scholarships.

Goodeve scholarships of Rs. 12 per mensem are annually awarded to students of the 5th year on the result of the Midwifery Test Examination of the 4th year.

F. C. Chatterjee scholarship of Rs. 17 per mensem is annually awarded to the best student in Histology at the end of the 4th year.

Abdool Gunny scholarship of Rs. 26 per mensem is annually awarded to the best student at the General Examinations of the 1st to 4th year.

Duke of Edinburgh's prize is awarded to the best in Surgery at the end of the 5th year.

Bhola Nath Bose's prize of Rs. 40 is awarded to the best clinical clerk in Surgery and Medicine in alternate years.

A gold medal and certificates of honour are awarded to the best students in each subject.

Goodeve and Macnamara silver medals are given to the 1st year students in Anatomy and Chemistry respectively.

College scholars, who receive less than Rs. 20 per mensem, are not required to pay Rs. 30 per session.

The holders of the Doorga Charan Laha and all other scholarships shall pay fees as matriculated students. These may pay their fees in advance, or have their scholarship money deducted till the full amount is received.

Any student holding a Medical College scholarship will be permitted to draw the stipend of the said scholarship at any recognized Medical School in the United Kingdom, provided he furnishes from the head of such school a certificate of good conduct and diligent prosecution of his studies.

The class assistants of Pathology, Physiology and Comparative Anatomy can be held only by matriculated students of the College.

Thomason Civil Engineering College, Roorkee, P. W. D.

AFFILIATED, 1864.

The Thomason College was founded in 1847 by the Hon'ble James Thomason, Lieutenant-Governor, N. W. P. It is designed to supply the Public Works and Survey Departments with Assistant Engineers, Overseers, and Sub-Overseers, and to furnish professional works either on loan or purchase through its Library, Press, and Book Depot.

The College contains three principal classes, viz., an "Engineer Class," an "Upper Subordinate Class," and "Lower Subordinate Class," open to candidates of all ranks and classes—intended to recruit the Engineer, Upper Subordinate, and Lower Subordinate Departments of the Public Works Department. It also conducts examinations of outsiders for several grades of the P. W. D.

Engineer Class.

The class is open to all statutory natives of India.

The Course lasts two years, when the passed students receive certificates as Assistant Engineers of the P. W. D. A certain number 4 and 5 in alternate years receive permanent appointments to the P. W. D. in the Engineer grade commencing as Apprentice Asstt. Engineers. A year's training as Apprentice is also given to two more, and there are also two permanent appointments to the Upper Subordinate Grade open. Candidates for this class must be between the ages of 18 and 22, and must all pass a *competitive* entrance examination in language, literature, history, mathematics and elementary drawing and physical science.

All European students pay a college fee of Rs. 10 monthly. Three scholarships of Rs. 50, one of Rs. 40, and one of Rs. 35, per mensem, tenable for two years, are annually open to native students. Several valuable prizes are given annually; one of Rs. 1000 to the best student; one of Rs. 250 and one of Rs. 100 for the two best

native students; besides two prizes of Rs. 100 and five of Rs. 50, open to all.

Upper Subordinate Class.

The College Course lasts two years, when the passed students receive certificates as Sub-Engineers or Overseers of the P. W. D., and 25 standing first on the list are then sent for a year's probation on to the Public Works as "Apprentice Overseers," after which, if approved, they are appointed 1st, 2nd, or 3rd grade Overseers in the P. W. D.

All candidates for admission must pass a *competitive* entrance examination in English reading and writing, arithmetic, elementary geometry, mensuration, and drawing, and in Urdu and Hindi; and civilian candidates must be between the ages of 18 and 24.

Soldier students receive a "college allowance" of Rs. 11 monthly. Three scholarships of Rs. 30 each, and three of Rs. 25 each per mensem, are annually allotted to English civil students, and three of Rs. 10 each to native students, all tenable for two years.

Students of third grade, if not stipend-holders, pay a college fee of Rs. 1-8 monthly. College prizes in each of the principal subjects of the course are annually given.

During the "apprentice year," a "staff allowance" is given to soldier students, raising their pay to a total of Rs. 80, together with free quarters and the usual "family allowance." Second and third grade apprentices receive salaries of Rs. 60 and 40 respectively; free quarters are also given to those of the second grade.

Lower Subordinate Class.

This class is intended for natives of India only. Most of the students remain for one and a half years only at College, and if successful, receive certificates as Sub-Overseers, and are appointed to the P. W. D., as vacancies occur: there is no guarantee of appointment.

The Entrance Examination is competitive, and in the Urdu language. It comprises for class A, elementary history and geography, and the use of English figures and words. For class B, a recommendation by an Executive Engineer that the candidate is a useful man is required, and candidates are examined in arithmetic and writing. Candidates for class A must not be more than 22, nor less than 18, years of age.

Free quarters are provided, no fees are required and the great majority of the students draw stipends of Rs. 5 a month and some of those standing highest on the list Rs. 10. All students of B. classes draw stipends of Rs. 10 a month.

Courses of Study in principal Classes.

These vary very much, but include mathematics, civil engineering, surveying, drawing, and Urdu for all the above principal classes,—the extent read being of course very different in each classes,—besides experimental Science for the Engineer class and Photography for both Engineer and upper Subordinate classes.

Natives' Military Surveying Class.

A class of 15 native N. C. O. and sepoye from the native army

are annually passed through a ten months' course in *Military Engineering and Surveying*.

Fees.

[With the exception of the small college fees above noted, the instruction in College is entirely gratuitous.]

Outside Examinations.

The College holds also examinations, and grants certificates (of qualification only) for the grades of Sub-Engineer, 1st grade Overseer, Assistant Examiners of Accounts, and 4th grade Accountant of the P. W. D., for all candidates who present themselves under certain rules.

Subsidiary Departments.

These are—

1. A free PUBLIC LIBRARY containing over 13,500 volumes.
2. A large PRESS which executes printing, binding, lithographs, and woodcuts, for the College, Government, and public.
3. A BOOK DEPÔT for sale of the College publications and text-books.
4. A VOLUNTEER COMPANY: all European civilian students are enrolled in the College Volunteer Company.

Staff.

The Principal Staff of the College is as follows :—

Principal	...	Lt.-Col. M. Brandreth, R.E.
Assistant Principals...	...	{ Capt. J. H. C. Harrison, R.E. „ E. Blunt, R.E.

2.

Government Engineering College.

AFFILIATED, 1880.

The College was opened on the 5th April, 1880, and is under the control of the Director of Public Instruction, Bengal. All classes of the community are admitted, and the course of instruction is adapted to the requirements of the following :—

- (1) Civil Engineers.
- (2) Mechanical Engineers.
- (3) Foreman Mechanics (Apprentices).

Pupils for the two higher classes are admitted on producing a certificate of having passed the University Entrance Examination: their theoretical course, including two and one half hours daily in the shops, is completed in four years, and the fifth or last year is spent by Civil Engineers at Akra in learning brick-making, and on works in progress: by Mechanical Engineers, in supervising actual work in the shops.

The tuition fee for these classes is Rs. 8 per mensem during the four years of their instruction in class, no such fee being charged to any student after the completion of his theoretical course. The messing fees for those who elect to reside upon the premises are,—for Christians, Rs. 20 plus Rs. 5 for rent; for Natives, Rs. 7 plus Re. 1 for rent.

For admittance to the Apprentice Department there is an examination, but any candidate who has passed the University Entrance Examination, or has passed by Standard VII of the code of European schools is admitted without further test. The theoretical course—including three hours daily in the shops—continues for three and a half years, and the remaining year and half of the five years' apprenticeship is spent entirely in the shops learning a trade.

Members of this department *must* be boarders, and the charge for Europeans and Eurasians up to 25 in number is Rs. 5 each per mensem, whilst 5 are admitted free, and for Natives up to 40 in number Rs. 2 per mensem; but apprentices in excess of these numbers are received on payment of the same messing fees as Engineer students.

One scholarship of Rs. 20, three of Rs. 15, and six of Rs. 10 tenable for two years are given annually to students entering the Engineer department, and scholarships of the same number and value are competed for at the end of the second year's course, provided that the number of scholarships awarded does not exceed one half of the number of candidates presenting themselves for examination. In addition there are two scholarships, each worth Rs. 10 per mensem, attached to the College, which were founded in memory of the late Major-General Forbes. These scholarships are tenable for one year, and are awarded on the result of the First Examination in Engineering. Two stipends of Rs. 100 reserved for students who have passed the F.A. Examination, and 6 of Rs. 50 tenable for one year are granted to those students who pass the best examination at the end of the fourth year, and there are now, guaranteed by Government, in alternate years 1 and 2 appointments in the superior service of the public Works Department open to students of the College.

To Foreman-Mechanics, as apprentices, the system of scholarships is not applicable, but after their final examination ten stipends of Rs. 10 and ten of Rs. 6 each, tenable for one year and a half are awarded to those apprentices who pass the best examination, both theoretical and practical.

For further information see the College rules, which will be forwarded on application to the Principal.

ADDENDA.

I. Duty of Boards of Studies.

The duty of the Boards of Studies shall be to advise the Syndicate with regard to the selection of text-books in the various subjects of the Arts Examination.

II. Duties of Moderators.

The duties of the Moderators shall be to scrutinize, in consultation with the Registrar, the papers of Examiners before they are printed or lithographed, and to revise, in consultation with the same officer, the lists of passed candidates before they are published in the Gazette.

The Arts Moderators shall be four of the five representatives of that Faculty in the Syndicate, the Legal Moderator shall be the representative of the Law Faculty, the Medical Moderator shall be the representative of the Medical Faculty, and the Engineering Moderator shall be the representative of the Engineering Faculty.

The Moderators, in consultation with the Registrar, shall be empowered to omit or insert questions in examination papers, to alter the wording of questions* and to pass students who have failed in one subject only in an examination by the addition of grace marks.

If the Moderator or Moderators and the Registrar disagree on any point, it shall be referred for the decision of the Syndicate at their next meeting.

In all other cases, the Registrar shall be justified in taking action on the decision of himself and the Moderator or Moderators in anticipation of the sanction of the Syndicate.

* These duties, in the case of the Arts Moderators, have been made over to the Senior Examiners. See Section VIII. Rules for Examinations passed by the Syndicate p.p. 107-108.

REAL PROPERTY, INDIAN SUCCESSION ACT &c.

Examiner—BABU SRISCHANDRA CHAUDHURI, M. A., B. L.

The figures in the margin indicate full marks.

1. What is 'estate tail' ? State briefly the object of the statute De Donis Conditionalibus. 8

How far does an English "life estate" resemble the estate of a Hindu widow ? In what respects do these estates differ from each other ?

2. Distinguish between a "vested" interest and a "contingent" interest, between a "reversion" and a "remainder." 10

A grant is made to A for his life and one week after his death to B and his heirs. Does B get a good remainder ? Give reasons for your answer.

A grant is made to A, a bachelor, for his life, and after the determination of that estate, by forfeiture or otherwise, in his lifetime, to B and his heirs during the life of A, and after A's death to the eldest son of A and the heirs of the body of such son. How do you designate the interest of B and the interest of the eldest son of A ?

3. What was the general object and effect of the Statute of Uses ? Explain how it gave rise to the distinction between legal and equitable estates in trust-property. 7

4. State the Rule against perpetuity (with exceptions, if any) under Act X of 1865, under Act IV of 1882 and under the Hindu law of wills. 7

5. Define "mortgage by conditional sale," "English mortgage" and "suit for foreclosure." What orders are necessary in a decree for the plaintiff in a foreclosure suit ? 7

6. W mortgaged 3 villages *a*, *b* and *c* to X, and after that, two of them *a* and *b* to Y and lastly the village *a* only to Z. What are the rights of Y against X and Z, as regards the village *a* ? 7

Y had no notice of the mortgage to X, but Z took the mortgage of *a* with full notice of the prior mortgages. How far should the securities be marshalled ? Could Z by paying off the mortgage to X gain priority over Y as regards the village *a* ?

7. Explain—"specific legacy," "demonstrative legacy," and "ademption of legacies." 8

A, governed by the Indian Succession Act, died 6 months after executing his will whereby he bequeathed his estate to B for his life and after his decease to a hospital. C the son of a half-sister of A was alive at the time of A's death. State the rules of law, which apply to this case, and the result of their application.

8. What is the rule of priority, under Act III of 1877, between a registered document and an oral agreement relating to the same property, and what is the rule as between a registered and an unregistered document relating to the same land? 7

1. Explain the following passages :—

24

(a.) When a mere child he strayed a bird's *nesting* from his (4
grandmother's house in company with a cow-boy : the dinner each
hour elapsed ; he was absent and could not be found : and the down
alarm of the family became very great, *for* they apprehended to f)
that he *might* have been carried off by gipsies.

(b.) The men were thus sent to adventure themselves, not
so much against an enemy whom they would have beaten, as
against a climate which would do the enemy's work.

(c.) In Nelson there was *more* than the casiness and human-
ity of a happy nature ; he did not merely abstain from injury ;
his was an active and watchful benevolence, ever desirous not
only to render justice but to do good.

(d.) When I am called upon to speak of the merits of the
captains of His Majesty's ships and of the officers and men,
whether seamen, mariners, or soldiers, *that* day had the
happiness to command, then I say that never was the glory of
this country upheld with more determined bravery than upon
that occasion ; and if I may be allowed to give an opinion *as*
a Briton, *then* I say that more important service was never
rendered to our King and country.

(e.) At this time he was not without some cause of anxiety ;
he was in want of frigates, the eyes of the fleet, as he always
called them ; to the want of which the enemy before *were*
indebted for their escape, and *Buonaparte* for his arrival in
Egypt.

(f.) Lightly they'll talk of the spirit that's gone
And o'er his cold ashes upbraid him,—
But little he'll reck if they let him sleep on
In the grave where a Briton has laid him.

(g.) Parse the words in the above extracts that are printed in italics.

2. Explain the following phrases :—

10

(1) Going directly before the wind ; (2) he shortened sail, (3) and (3) hove to ; (4) they fell in with ; (5) he was thrown into each the King's Bench ; (6) he was released under an Act of Insolvency ; (7) discharged his farewell shot ; (8) season of the dog-days ; (9) in reference to ; (10) fourteen sail of the line ; (11) he was stone blind ; (12) she had some shots between wind and water ; (13) a flag of truce ; (14) the *ne plus ultra* ; (15) genial latitudes ; (16) my heart burns ; (17) he was cut to the heart ; (18) he cut a caper ; (19) lay salt upon their tails ; (20) he made for the Gulf.

3. (a.) Distinguish between *canal* and *channel*.

8

(b.) Account for the change in the verb in the sentence : (2) —All the company, which *was* considerable after dinner, *were* each mad with joy.

(c.) Remark on the position and meaning of the word *there* in the following :—*There* he would have sailed immediately ; *there* were two boys present.

(d.) "As soon, however, as they perceived the English approaching they retired." Re-write this sentence, beginning with the words "No sooner," and making the necessary alterations in the rest of it.

4. Give the meaning of the following words :—*maxim*, *resignation*, *campaign*, *mortification*, *apprise*, *intoxicated*, *policy*, *preposterously*, *vivacity*, *implement*, *pallet*, *epaulette*, *buckle*, *Catholic*, *daughter*, *superstition*, *cupidity*, *budget*, *frustrated*, *orientals*.

10

5. Turn the following into indirect narration :—

12

(a.) "I suppose, sir, from the length of time you were cruising among the Bahama Keys, you must be a good pilot there." each (3)

(b.) "To write letters to you," says Nelson to his wife, "is the next greatest pleasure I feel to receiving them from you. What I experience when I read such as I am sure are the pure sentiments of your heart, my poor pen cannot express ; nor indeed would I give much for any pen or head which could express feelings of that kind. Absent from you I feel no pleasure ; it is you who are everything to me."

(c.) "My son," said he, "I shall never see you more ; but in my mind I shall ever be present with you. Your design is great and noble ; and I doubt not but God will bless you in it."

(d.) To night will be a stormy night—
You to the town must go ;
And take a lantern, child, to light
Your mother through the snow.

6. (a.) Write out from memory the first and the last stanza of the "Burial of Sir John Moore."

10

(b.) Narrate, in your own words, the story of Campbell's Parrot, and state the moral it is intended to teach.

7. Indicate (a) which are the accented syllables in the following words :—*Armour*, *enclosed*, *survivor*, *endeavour*, *funeral*, *steadfastly*, *hurricane*, *lantern*, *welcomes* ; and (b) which are the unaccented syllables in the following words :—*understood*, *entertains*, *melody*, *delightful*, and *Cardigan*.

12

(c.) Give three words whose meaning changes by a change in the accent.

(d.) Distinguish between the different sounds of the letters *ea* in the following words : *tears* (the noun), *tears* (the verb,) *meads*, *death*, *beauty*, *eager*, *treasure*, *hear*, *heard*, *heart*, *ceasing*, *breast*, *head*, by giving another word to rhyme with each.

8. From the following sentences remove the *nouns* and in their place put the cognate or corresponding *verbs*, while retaining the sense or meaning [thus "Make no *scruple*" = "*Scruple* not] viz.—They returned the salute; he was put under arrest; and give two other examples in which the verb *make* and a noun are used as in the example within the brackets. 4

1. If a side of a triangle be produced, the exterior angle is equal to the two interior and opposite angles, and the three angles of every triangle are together equal to two right angles. 7

2. If the square described on one of the sides of a triangle be equal to the squares described on the other two sides of it, the angle contained by these two sides is a right angle. 7

3. ABCD is a quadrilateral of which the sides AB and DC are parallel, and E, F are the middle points of the sides BC and AD respectively; prove that the straight line EF is parallel to AB or CD and equal to half their sum. 5

5. If a straight line be divided into two equal and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line and of the square on the line between the points of section. 7

To what algebraical formula does it correspond, and why? 2

5. If from any point without a circle two straight lines be drawn, one of which cuts the circle and the other touches it, the rectangle contained by the whole line which cuts the circle, and the part of it without the circle, shall be equal to the square on the line which touches it. 7

If two circles cut each other, their common chord produced bisects their common tangents. 5

6. Inscribe a circle in a given triangle. 6

In what case does the centre of the inscribed circle coincide with that of the circumscribed circle, and why? 2

AB, AC are tangents to a given circle, and BC is the chord joining the points of contact. From the middle point D of BC, the straight line EDF is drawn at right angles to BC cutting the circumference of the given circle at E and F. Prove that E and F are the centres of two circles, one of which touches the three sides, and the other touches one side and two sides produced, of the triangle ABC. 6

7. The sides BC, CA, AB of the triangle ABC are 13, 12, and 5 respectively, and D is the middle point of BC; find the area of the triangle ABC and the length of the line AD. 3

8. The chord of an arc of a circle is 10 feet and the chord of half the arc is 6 feet; find the radius of the circle and the height of the arc. 3

9. Find the area of a regular octagon inscribed in a circle of radius 20 feet. 6

যদি তোমার গৃহে পরিজনদের অনৈক্য না হয়, তবে কি
প্রকারে আমার অন্ত স্থানে গমন হইবে? আমি নদীর ত্রায়
নীচগা এবং বিদ্যুতের ত্রায় অস্থিরা; কিন্তু আমি যেমত
নারায়ণের প্রিয়তমা হইয়া তাঁহার নিকটে চিরকাল আছি,
সেই মত নীতিশালী রাজার অতি প্রিয়তমা হইয়া তাঁহার
নিকটে দীর্ঘকাল থাকি, এবং অনীতি কিম্বা কলহ এই দুই
ব্যতিরেকে তাঁহার নিকট হইতে গমন করি না; অতএব
আমি অন্তত্বে যাইতে পারিলাম না। ইহা কহিয়া লক্ষ্মী
নরপতিকে ঐ বর দিয়া তাঁহার গৃহে চিরকাল স্থিরতরা

Do not let us suppose that those ancient Aryans were less wise than we are. They knew, as well as we do, that a man may live in the forest and yet have his heart darkened by passions and desires : they also knew, as well as we do, that a man, in the very thick of a busy life, may have in his heart a quiet hermitage, where he can always be alone with himself, and his truest self.

Colomb, insouciant de leur colère, mais uniquement préoccupé du sort de sa découverte, écrivit sur parchemin plusieurs courtes relations de sa découverte, enferma les unes dans un rouleau de cire, les autres dans des caisses de cèdre, et jeta ces témoignages à la mer pour que le hasard les fit flotter un jour, après lui, jusqu'au rivage. On dit qu'une de ces bouées, abandonnées aux vents et aux flots, fut balottée pendant trois siècles et demi sur la surface, dans le lit ou sur les grèves de la mer, et que le matelot d'un navire européen, en embarquant du lest pour son vaisseau, il y a quelque temps, sur les galets de la côte d'Afrique en face de Gibraltar, ramassa une noix de coco pétrifiée, et l'apporta à son capitaine comme une vaine curiosité de la nature. Le capitaine, en ouvrant la noix pour s'assurer si

l'amande aurait résisté au temps, trouva, renfermé dans l'écorce creuse, un parchemin sur lequel étaient écrits en lettres gothiques, déchiffrées avec peine par un érudit de Gibraltar, ces mots : " Nous ne pouvons résister un jour de plus à la tempête ; nous sommes entre l'Espagne et les îles découvertes d'Orient. Si la caravelle sombre, puisse quelqu'un recueillir ce témoignage !—CHRISTOPHER COLOMB."

Soon the Indians, becoming familiar with their visitors, began to show them their springs of water, their dwellings, their villages, their canoes: they brought as a tribute their edible fruits, their cassava-palm, and some ornaments of pure gold. They pointed to the south, and the admiral and his crew thought there must be on that side an Indian island or continent. Columbus provisioned his ship with fresh water from the island springs, and his deck was loaded with fruits and roots, the

gifts of the poor and happy Indians. Columbus brought away one, that he might learn the Spanish language, and serve later as an interpreter.

(a.) Strive to fulfil the hopes of your parents by growing in knowledge, by shunning bad companions, by avoiding profane and wicked words, by speaking the exact truth, by being kind and honest, and by loving and serving your Father in heaven. This is the best way of pleasing your parents, and repaying their kindness. Let them see you growing in wisdom and in goodness, and they will never think that you have been a burden and care to them.

(b.) Children ! these are your duties ! O strive to do them ! Love, reverence and obey your parents. Be to them a comfort and an honour. Be more than they expect ; be, if possible, all they desire. So live that they may ever look upon you with delight. So live that the thought of your virtues may smooth their last hours.

(c.) The weakness of French colonial policy, which for two centuries has frustrated all their efforts to build up a colonial empire, springs from a permanent cause. The French people do not care for colonies unless they will pay, and pay directly, and do not care much for them even then. They do not want to emigrate, only a few of them are attracted by planter's work, and they are at heart indifferent to colonial trade.

(d.) This, however, is but one, and that one of the smallest of the considerations which justify the publication of the Re-

port. The good it will do is manifest. These revelations cannot fail to touch the heart and rouse the conscience of the English people. It speaks not of leaden despair, but gives a joyful promise of better things to come.

1. Explain the thoughts in the following extracts : 16
 - (a.) Thus fares it still in our decay,
And yet the wiser mind
Mourns less for what age takes away
Than what it leaves behind.
 - (b.) Thy soul was like a star, and dwelt apart.
Thou hadst a voice whose sound was like the sea—
 - (c.) Great God ! I'd rather be
A Pagan suckled in a creed outworn,
So might I, standing on this pleasant lea,
Have glimpses that would make me less forlorn ;
Have sight of Proteus rising from the sea,
Or hear old Triton blow his wreathed horn.
 - (d.) Type of the wise who soar but never roam,
True to the kindred points of heaven and home !
 - (e.) The still sad music of humanity.
 - (f.) Nature never did betray
The heart that loved her.
 - (g.) They flash upon that inward eye
Which is the bliss of solitude.
 - (h.) With gentle hand
Touch—for there is a spirit in the woods.
2. Prove by quotations that the " Battle of Lake Regillus " 6
is " in all respects a Homeric battle." Who is supposed to
recite the lay of " Horatius," and who that of the " Battle of
Lake Regillus," and on what special occasions ?
3. Explain the allusions in— 10
 - (a.) " Hail to the great Asylum !
Hail to the hill-tops seven !
Hail to the fire that burns for aye
And the shield that fell from heaven !
 - (b.) Mars without the wall.
 - (c.) Titus the youngest Tarquin,
Too good for such a breed.
 - (d.) Unwatched along Clitumnus
Grazes the milk-white steer.
 - (e.) Now Roman is to Roman
More hateful than a foe,

And the Tribunes beard the high
And the Fathers grind the low.

4. Explain by a clear paraphrase—

3

Beauty is Nature's brag, and must be shown
In courts, at feasts, and high solemnities,
Where most may wonder at the workmanship;
It is for homely features to keep home,
They had their name thence; coarse complexions
And cheeks of sorry grain will serve to ply
The sampler, and to tease the housewife's wool.
What need a vermeil-tinctured lip for that,
Love-darting eyes, or tresses like the morn?

5. Explain the words in italics: to *bolt* arguments, *budge* doctors, *urchin* blasts, *bosky* bourn, *merry wakes*, *all* to ruffled, *purpled* scarf; and give a note on Milton's use of *his* in—

8

Sure *something* holy . . . moves the vocal air
To testify *his* hidden residence.

6. Give in simple prose the meaning of

8

(a.) . . . and thence

That which he better might have shunn'd, if *griefs*
Like his have worse or better, Enoch saw.

(b.) Prayer from a living source within the will,
And beating up through all the bitter world,
Like fountains of sweet water in the sea,
Kept him a living soul.

(c.) A front of timber-crost antiquity.

(d.) . . . till drawn through either chasm
Where either haven open'd on the deeps,
Roll'd a sea-haze and whelm'd the world in grey;
Cut off the length of highway on before,
And left but narrow breadth to left and right
Of wither'd holt or tilth or pasturage.

7. (a.) Describe in your own words Annie's endeavour "to find a sign." What is the significance of the sign which she found, and how did she misinterpret it? What "sign" of Annie was given to Enoch on the lonely isle?

6

1. Relate briefly the events that took place in India during Clive's second visit to the East, and give the substance of Macaulay's reflections on Clive's conduct in connexion with those events. 7 3

2. "But perhaps the fall of the Carolingians furnishes the nearest parallel to the fall of the Moguls." How does Macaulay expand this idea? What causes tended to embitter the latter years of Clive's life? 5 2

3. Explain with reference to the context:—

(a.) He defended himself in a strain, worthy of Captain Bobadil. 1

(b.) But he had chosen the good part, and he called up all the force of his mind for a battle far harder than that of Plassey. 1

(c.) They raised the price of everything in their neighbourhood, from fresh eggs to rotten boroughs. 1

(e.) In the circle of his home affections he practised those virtues without letting his right hand know what was done by his left. 1

(f.) He must needs yoke the celestial steed to his parliamentary plough. 1

(g.) This is quite in character for the Scotch apostle of "blood and iron." 1

4. "The chief complaint against Macaulay is of a constant want of depth either of thought or sentiment." Consider the justice of this complaint. 4

5. Discuss Macaulay's claim to the title of a poet, and contrast him with Scott. 6

6. Notice and account for the principal defects observable in Macaulay's *History of England*, adducing instances in support of your remarks. In what sense was he a reactionary in his view of history? What does Mr. Morison say regarding the duty of historical impartiality? 5 1 2

7. Give instances in the *History of Herodotus* in which he displays a critical spirit. How does he describe the infatuation of Cambyzes? 2½ 3½

8. What Egyptian peculiarities does Herodotus record? Illustrate the Spartan character by anecdotes from his history. Trace after Herodotus the course of events that led to the invasion of Greece by the Persians. 3 3 4

9. Explain fully, noticing all allusions:—

(a.) It was a kind of inverted doctrine of the divine right of kings. 1

- (b.) The rich man's taste was the poor man's gain. 1
 (c.) Few of them survived this St. Bartholomew of Susa. 1
 (d.) This caused the haughty Persian aristocracy to say of him, in their contempt for red tape, that Cyrus had been a father to the State, but Darius was "a huckster." 1
 (e.) Sophocles adopts the same curious sentiment in his tragedy of Antigone. 1
 (f.) Darius himself would under no provocation have so far forgotten his knighthood. 1
 (g.) They certainly would have had the English law of trusteeship on their side. 1
 (h.) *Nature without Art, and Art without Nature, had reached similar but not identical results in style.* But in the process two things had been learnt. 1
 10. Describe the general causes of the growth of English Literature since the middle of the last century. Trace the effect produced by the ideas expressed in the French Revolution upon different English writers shortly before and after that event. 5 4

(2.) $CF.CX = CA^2 = CN.CT$.

3. In the ellipse QV is an ordinate to the diameter PCG and CD is conjugate to CP; prove that $QV^2 : PV \cdot VG :: CD^2 : CP^2$. 6

State the corresponding proposition in the circle, and prove that all the chords of an ellipse are bisected by the diameters to which they are ordinates.

4. A sphere of radius $\frac{3 - \sqrt{3}}{2}$ feet is inscribed in a right 8

circular cone of semivertical angle 30° . A plane is drawn touching the sphere on the side remote from the vertex and cutting the axis at an angle of 60° ; find the axes and latus rectum of the section of the cone made by this plane.

5. Find a formula connecting the circular measure of an angle with the number of degrees and with the number of grades in it. Express by each of these methods the angle of a regular polygon of twelve sides. 5

6. Prove the identities:— 6

$$(1.) \cos(A + B) + \cos(A - B) = 2 \cos A \cos B.$$

$$(2.) \cos 2A + \cos 4A + \cos 6A + \cos 8A = 4 \cos A \cos 2A \cos 5A.$$

$$(3.) \tan 3A (1 - 3 \tan^2 A) = 3 \tan A - \tan^3 A.$$

$$(4.) \frac{1 - \cot^2 \left(\frac{\pi}{2} + B \right)}{1 + \cot^2 \left(\frac{\pi}{2} + B \right)} = \cos 2B.$$

 When the first spirit of conquest led the armies of Rome beyond the Alps, they found all the countries which they invaded inhabited by people whom they denominated barbarians, but who were nevertheless brave and independent. These defended their ancient possessions with obstinate valour. It was by the superiority of their discipline rather than that of their courage that the Romans gained any advantage over them.

Equidem non modo eos novi, qui sunt, sed eorum etiam patres et avos; nec sepulchra legens, vereor, quod aiunt, ne memoriam perdam: his enim ipsis legendis in memoriam redeo mortuorum. Nec vero quemquam senem audiui oblitum quo loco thesaurum obruisset. Omnia quæ curant meminerunt, vadimonia constituta, quis sibi, cui ipsi debeant. Quid iurisconsulti; quid pontifices, quid angures, quid philosophi senes? quam multa meminerunt! Manent ingenia senibus, modo permaneat studium et industria, neque ea solum in claris et honoratis viris, sed in vita etiam privata et quieta. Sophocles ad summam senectutem tragœdias fecit: quod propter studium cum rem familiarem negligere videretur, 8

Mohammad Sheran was a person of good family of the tribe 15
of Khulijy, and had given many proofs of activity and valour.
It is related that, after the Mussulman forces had taken possession
of the city of Nuddeah and the troops were occupied in
collecting the spoil from all the neighbouring villages, Moham-
mad Sheran was for three days absent without any person
knowing what had become of him. As Muhammad Bukhtyar
esteemed him one of his best officers he much regretted his
loss, and sent a number of people to search for his body.

Mohammed, generally called Meer Joomla, was born in the vicinity of Ispihan, a city for many years the capital of Persia. When arrived at the age of manhood, he imitated the example of a number of his successful countrymen, and went to seek his fortune in India. His propitious stars led him to Golconda; where, about the year A.H. 1060, he obtained an employment in the service of the Sultan Abdullah Kattub Shah, sovereign of Telingana; and by degrees rose to the command of the army.

Ali Baber expected to find only a dark and obscure cave, and was much astonished at seeing a large, spacious, well-lighted, and vaulted room, dug out of the rock, and higher than a man could reach. It received its light from the top of the rock, cut out in a similar manner. He observed in it a large quantity of provisions, numerous bales of rich merchandise piled up, silk stuffs and brocades, rich and valuable carpets, and besides all this, great quantities of money, both silver and gold, some in heaps, and some in large leather bags, placed one on another. At the sight of all these things it seemed to him that this cave had been used not only for years, but for centuries, as a retreat for robbers, who had regularly succeeded each other.

The King of Pagan (Pukkāmanagara) being defeated, ascended the river in boats, and encamped on a small island not far from Prome (Sīrikhettara), where he remained for a few days; his chief General crossed the mountains to gather a new army in Arakan (Dhaññavati), but sickness compelled him to return.

Bodhisat said to his page: There must be water underneath this stone; do not lose courage; take this iron hammer, and go down into the pit, and give the rock a good blow. The lad obeyed, and though they all stood by in despair, he went down full of determination and struck at the stone; the rock split in two and fell below and no longer blocked up the stream; they all drank of the water, and bathed in it.

FRENCH TEXTS.

Examiner—MISS ADAMS.*The figures in the margin indicate full marks.*

1. Compare *Mérope* with any play of Shakespeare you may have read, and comment on the chief points of difference 8

2. What are "masculine" and "feminine" couplets? Give examples of each.

3. Turn the following passage into idiomatic French prose : 4
Mérope, Acte II. Scène II.

*Un vain désir de gloire a séduit mes esprits :
On me parlait souvent des troubles de Messène,
Des malheurs dont le ciel avait frappé la reine,
Surtout de ses vertus, dignes d' un autre prix :
Je me sentais ému par ces tristes récits.
De l'Elide en secret dédaignant la mollesse,
J'ai voulu dans la guerre exercer ma jeunesse,
Servir sous vos drapeaux, et vous offrir mon bras :
Voici le seul dessein qui conduisit mes pas :
Ce faux instinct de gloire égara mon courage :
A mes parents, flétris sous les rides de l'âge,
J'ai de mes jeunes ans dérobé le secours :
C'est ma première faute : elle a troublé mes jours :
Le ciel m'en a puni : le ciel inexorable
M'a conduit dans le piège, et m'a rendu coupable.*

Il faut que ma fortune y tombe, ou le franchisse,*

And explain the force of the subjunctive in both quotations.

5. Give a short account of Voltaire's life and works. 6

6. Write in French—

Cresphontes, king of Messene, bequeathed to his son a suit of armour, by which after many wanderings, and a long banishment, he was at length recognised by *Mérope*, his widowed mother. He finds that mother on the point of marrying Polyphontes. At the altar he attacks and kills the tyrant, and the populace, suddenly reverting to their allegiance to the royal race, acknowledge him as king.

M. de Pomponne est disgracié : Il eut ordre samedi au soir, comme il revenait de Pomponne, de se défaire de sa charge, qu'il en aurait sept cent mille francs, qu' on lui continuerait sa pension de vingt mille francs qu'il avait comme ministre, et que le Roi avait réglé toutes ces choses pour lui marquer qu'il était content de sa fidélité. Ce fut M. Colbert qui lui fit ce compliment, en l'assurant qu'il était au désespoir a'être obligé, &c. M. de Pomponne demanda s'il ne pourrait point avoir l'honneur de parler au Roi, et savoir de sa bouche quelle faute avait attiré ce coup de tonnerre : on lui dit qu'il ne pouvait point parler au Roi : il lui écrivit, lui marqua son extreme douleur, et l'ignorance ou il était de ce qui pouvait lui avoir attiré sa disgrâce : il lui parla de sa nombreuse famille, il le supplia d'avoir égard à huit enfants qu'il avait.

ENGLISH LITERATURE.

FIRST PASS PAPER.

Examiner—MR. A. E. GOUGH, M. A.*The figures in the margin indicate full marks.*

1. Prove that parts of Macbeth are probably the work of an inferior dramatist. Point out references in Macbeth to the events and characters of the writer's own days. 12

Indicate the sources from which Shakespeare derived the stories of the caskets and the pound of flesh in his Merchant of Venice.

2. Write notes on the following extracts, and refer to the context from which each is taken :— 13

- (a.) Mark you this, Bassanio,
The Devil can cite Scripture for his purpose.
- (b.) Indeed my father did something smack, something grow to, he had a kind of taste.
- (c.) A second Daniel, a Daniel, Jew!
Now, infidel, I have you on the hip.
- (d.) Within this hour at most
I will advise you where to plant yourselves,
Acquaint you with the perfect spy o' the time,
The moment on 't; for 't must be done to-night,
And something from the palace; always thought
That I require a clearness.
- (e.) It will have blood: they say blood will have blood:
Stones have been known to move, and trees to speak;
Augures and understood relations have
By maggot-pies and choughs and rooks brought forth
The secret'st man of blood.
- (f.) Off goes his bonnet to an oyster-wench;
A brace of draymen bid God speed him well,
And had the tribute of his supple knee.
- (g.) We see the wind set sore upon our sails,
And yet we strike not, but securely perish.
- (h.) That power I have, discharge; and let them go
To ear the land that hath some hope to grow,
For I have none.

3. Mention the principal passages in Paradise Lost in which Milton refers to his own life and times. 12

4. Write notes on the following extracts :— 13

- (a.) Meanwhile inhabit lax, ye powers of heaven.

- (b.) But soon his clear aspect
Returned, and gracious purpose thus renew'd.
- (c.) Spot more delicious than the gardens feign'd
Or of reviv'd Adonis, or renown'd
Alcinous, host of old Laertes' son,
Or that, not mystic, where the sapient king
Held dalliance with his fair Egyptian spouse.
- (d.) Greedily she ingorged without restraint,
And knew not eating death.
5. Give a brief account of the life and writings of Oliver 12
Goldsmith. Point out the domestic and personal allusions in
the Traveller and the Deserted Village.
6. Refer the following extracts to the several poems from 13
which they are taken. Write short notes on each :—
- (a.) Let old Timotheus yield the prize,
Or both divide the crown ;
He rais'd a mortal to the skies,
She drew an angel down.
- (b.) This Partridge soon shall view in cloudless skies,
When next he looks through Galilæo's eyes ;
And hence th' egregious wizard shall foredoom
The fate of Louis, and the fall of Rome.
- (c.) How small, of all that human hearts endure,
The part which laws or kings can cause or cure.
- (d.) And thou art long, and lank, and brown,
As is the ribbed sea-sand.
7. Write a brief prose narrative of the passing of Arthur, 12
occasionally inserting lines from Tennyson's *Mort d'Arthur*.
8. Write short notes on the following passages, and mention 13
the poem from which each is taken :—
- (a.) Why should we only toil, the roof and crown of things ?
- (b.) Again she said : I woo thee not with gifts.
Sequel of guerdon could not alter me
To fairer. Judge thou me by what I am,
So shalt thou find me fairest.
- (c.) The stern black-bearded kings with wolfish eyes,
Waiting to see me die.
- (d.) Such times have not been since the light that led
The holy Elders with the gift of myrrh.
- (e.) Turning to scorn with lips divine
The falsehood of extremes.

SECOND PASS PAPER.

Examiner—REV. R. J. BELL, M. C. P.*The figures in the margin indicate full marks.*

1. What circumstances led Burke to write his *Reflections* ? 3
What object had he in view ? 2

- How was the French Revolution regarded (i) by the people of England, and (ii) by Burke? 5
2. State Mr. Morley's opinions of the *Reflections*, (i) as a political work, (ii) as to its influence. 4
3. Sketch the character of Burke as a statesman, an orator, and a friend. Who were his contemporaries in Parliament, and his friends in social life? 8
4. Show that Burke took a deep interest in the government of India and in its people. 2
5. Explain fully, from the context, the following extracts : 12
- (a.) The *Reflections* was no superb improvisation. 1
- (b.) His excited vision revealed to him a band of vain, petulant upstarts, insulting a virtuous and innocent sovereign, and covering with humility the august daughter of the Cæsars. 4
- (c.) An hour had come when the spirit of property and of justice compelled a supersession of the letter. 4
- (d.) Many of our men of speculation, instead of exploding general prejudices, employ their sagacity to discover the latent wisdom which prevails in them. 3
- (e.) The situation of man is the preceptor of his duty. 3
- (f.) In France the king is no more the fountain of honour, than he is the fountain of justice. 2
- (g.) The king's turnspit was a member of Parliament. 2
6. Show the appropriateness of the allusions and the metaphors in the following passages :
- (a.) Men turned to Burke, as they went of old to Ahithophel. 1
- (b.) Like the Romans in Greece or Macedon, the French innovators had destroyed the bonds of union, under colour of providing for the independence of each of their cities. 3
- (c.) It was the feet of clay they adored in their image, and not the head of fine gold, and the breasts and arms of silver. 2
- (d.) To separate freedom from justice was nothing else than to steer the ship of state direct into the maelstrom. 2
7. Annotate :
- Had your nobility and gentry, who formed the great body of your landed men, and the whole of your military officers, resembled those of Germany at the period when the Hanse Towns were necessitated to confederate against the nobles in defence of their property,—had they been like the Orsini at Vitelli in Italy, who used to sally from their fortified dens to rob the trader and traveller, had they been such as the Mamelukes in Egypt, or the Nayres on the coast of Malabar, I do admit that too critical an inquiry might not be advisable into the means of freeing the world from such a nuisance. The statues of Equity and Mercy might be veiled for a moment. 10
8. State Burke's view of the origin of society. 8
9. Point out the special characteristics of Burke's style. 10
10. How does Burke use the following words : charitably, meliorated, well-born, explode, purchase, pleader, expatiate, lay-divine, officious? 2
-

FIRST HONOUR PAPER.

Examiner—MR. A. E. GOUGH, M. A.*The figures in the margin indicate full marks.*

1. "Shakespeare's genius shows itself more in the development of character than in the construction of a story." Examine the truth of this remark. 8

2. Write notes on the following passages, and refer to the context in which each occurs : 14

(a.) As I have set up my rest to run away, so I will not rest till I have run some ground.

(b.) I once did lend my body for his wealth ;
Which, but for him who had your husband's ring,
Had quite miscarried : I dare be bound again,
My soul upon the forfeit, that your lord
Will never more break faith advisedly.

(c.) Confusion now hath made his masterpiece !
Most sacrilegious murder hath broke ope
The Lord's anointed temple, and stolen thence
The life o' the building.

(d.) How he solicits heaven
Himself best knows : but strangely visited people
All swol'n and ulcerous, pitiful to the eye,
The mere despair of surgery, he cures,
Hanging a golden stamp about their necks,
Put on with holy prayers : and, 'tis spoken,
To the succeeding royalty he leaves
The healing benediction.

(e.) We must supplant those rough rug-headed kerns
Which live like venom, where no venom else,
But only they, have privilege to live.

(f.) If that thy valour stand on sympathies
There is my gage, Aumerle, in gage to thine.

3. Write a brief notice of the life and writings of Ben Jonson. 8
Give dates.

4. Write notes on the following extracts : 8

(a.) *E. Know.*—You speak very well, coz.
Steph.—Nay, not so neither, you shall pardon me :
but I speak to serve my turn.

E. Know.—Your turn, coz ! do you know what you say ?
A gentleman of your sort, parts, and
estimation, to talk of your turn in this
company, and to me alone, like a tankard-
bearer at a conduit ! fie !

(b.) By the foot of Pharaoh, an 't were my case now, I
should send him a charTEL presently. The
bastinado ! A most proper and sufficient
dependence, warranted by the great
Caranza.

5. How does Milton treat astronomical problems in his account of the creation? Illustrate your answer with quotations. 12
Point out autobiographical allusions in *Paradise Lost*.

6. Write notes on the following passages : 10

- (a.) But feather'd soon and fledge,
They summ'd their pens, and soaring the air sublime
With clang despised the ground.
- (b.) The parsimonious emmet, provident
Of future, in small room large heart enclosed,
Pattern of just equality perhaps
Hereafter.
- (c.) Eve, now I see thou art exact of taste,
And elegant, of sapience no small part,
Since to each meaning savour we apply,
And palate call judicious.
- (d.) O Eve, in evil hour thou didst give ear
To that false worm.

7. Explain the following passages, and specify the poem from which each is taken : 10

- (a.) The lifted axe, the agonising wheel,
Luke's iron crown, and Damien's bed of steel,
To men remote from power but rarely known,
Leave reason, faith, and conscience all our own.
- (b.) His fall was destined to a barren strand,
A petty fortress, and a dubious hand.
He left the name, at which the world grew pale,
To paint a moral, or adorn a tale.
- (c.) Where once we dwelt our name is heard no more,
Children not thine have trod my nursery floor.

8. Point out the metaphysical ideas suggested in Wordsworth's *Intimations of Immortality*. Illustrate your answer with quotations. 10

9. State the political reflections and sentiments embodied by Tennyson in—*You ask me why, tho' ill at ease ; Of old sat Freedom on the heights ; Love thou thy land with love far-brought ;* and in the conclusion of the *Princess*. Make quotations. 8

10. Annotate the following extracts :

- (a.) Hear me, for I will speak, and build up all
My sorrow with my song, as yonder walls
Rose slowly to a music slowly breathed.
- (b.) The island valley of Avilion
Where falls not hail, or rain, or any snow,
Nor ever wind blows loudly.
- (c.) And I sat down and wrote,
In such a hand as when a field of corn
Bows all its ears before the roaring East.
- (d.) A mere love-poem ! O for such, my friend,
We hold them slight : they mind us of the time
When we made bricks in Egypt.

SECOND HONOUR PAPER.

Examiner—REV. R. J. BELL, M. C. P.

The figures in the margin indicate full marks.

1. Whence did Burke's hostility to the French Revolution arise? What effect was produced by the publication of the Reflection, (i) in Parliament, (ii) in England, (iii) on the Continent? 8
2. What political opinions were held by Dr. Price, and how were they refuted by Burke? 6
3. What was the design of Helps in writing Realmah? Describe the city Abibah. Where have remains of such cities been discovered? What theory has been based upon relics found of such? 7
4. What is meant by "the intellectual power of government"? On this subject what are Helps' and Burke's views respectively? Describe the government of Sheviri after the Revolution. Relate Realmah's actions on that occasion. Criticize his policy. 14
5. Define the following:—Dynastic idea, bewildering tomes, yeoman's service, guerilla warfare, embroidered language, arid effects. 2
6. Helps states that denigration, unjust criticism, pedantry, irrational conservatism, are some of the main enemies to human comfort. Explain the terms, and show how he maintains his opinions. 9
7. What are the leading features in Realmah's character which you consider worthy of note? State on what occasions exemplified. 6
8. Explain the following extracts, and give the full import of their context:—
 - (a.) He has to smile and smile and be a pauper with a brougham which he is afraid to put down. 2
 - (b.) This Ishmaelite; his tongue, if not his hand, is against everybody. 2
 - (c.) Men cannot be sneered out of manifest physical advantages. 6
 - (d.) He was one of those men who even when not gifted with genius yet have their way in the world. 3
 - (e.) When there are few real distinctions amongst mankind, it is especially necessary to invent conventional distinctions. 2
9. Dr. Johnson says that Browne "never mentions the motions of the earth but with contempt and ridicule." Prove the assertion. What popular errors do we find in Religio Medici? 5
10. What effects follow toleration and intolerance according to Browne and Helps? 4
11. Give an analysis of "Realmah's Great Project," and an abstract of the conversation which followed its recital. 10

12. Comment on the following extracts, and point out any peculiarities of style, of grammar, and idiom :— 6

(a.) To see ourselves again, we need not look for Plato's year: every man is not only himself: there have been many Diogenes and as many Timons.

(b.) This is the dormitive stake to bedward.

(c.) 'Twas no dumb chance that to discover the fougade, or powder plot, contrived a miscarriage in the letter. I like the victory of '88 the better for that one occurrence which our enemies imputed to our dishonour, and the partiality of fortune; to wit, the tempests and contrariety of winds.

(d.) Aristotle, who hath written a singular tract of sleep, hath not, methinks, thoroughly defined it; nor yet Galen, though he seems to have corrected it, for these *noctambulos* and night-walkers, though in their sleep, do yet enjoy the action of their senses.

13. Why does the author of *Religio Medici*, in his Preface endeavour to excuse himself from rigorous examination? What other works did he publish, and what their subjects? The work has been called "a species of confession of faith." Why so called? Prove your opinion from the work itself. 8

THIRD HONOUR PAPER.

Examiners— { MR. A. E. GOUGH, M. A.
 { REV. R. J. BELL, M. C. P.

The figures in the margin indicate full marks.

1. Describe the rise of King's English, and point out leading characteristics by which it is distinguished from the provincial dialects. Exemplify its bilingual formations. Give an account of the writers through whose influence it became the literary language. 9

2. Write a list of verbs strong in Elizabethan and weak in modern English. Show that the writers of the eighteenth century went farther in the translation of strong verbs into weak forms than the sense of the nation has approved. 8

3. Point out flexional adverbs formed from case-endings which have survived in modern English. 8

Illustrate the formation of substantival phrases (a) by means of symbols, and (b) by juxtaposition of the nouns in a reversed order.

4. (a.) State the changes which English literature underwent in the seventeenth century. 15

(b.) Indicate the influences which stimulated the leading writers.

(c.) Mention the chief prose writers of this period, and the subjects of their works.

(d.) Discuss the influences exerted by their works upon human thought and action.

5. Sketch the history of prose fiction. How may works of fiction be classified? Who are the chief writers in each class? What are the chief characteristics of the works of Richardson, Fielding, Walter Scott, and Dickens? 13

6. Write an English essay on one, and one only, of the following subjects :

- (a.) The rise of the English language.
- (b.) The life and literature of Elizabethan England.
- (c.) The origin and progress of serial and periodical literature in England.
- (d.) The life of an Indian villager.

MENTAL AND MORAL SCIENCE.

Examiners ... { DR. P. K. RAY,
REV. W. SMITH, M. A.
MR. H. STEPHEN, M. A.

FIRST PASS PAPER.

PSYCHOLOGY.

The figures in the margin indicate full marks.

1. Define and distinguish psychology, metaphysics, and philosophy. 10
2. State and compare the theories of Bain and of Jardine as to the relation between the mind and the body. 12
3. Contrast Bain's account of the muscular sense with that given by Mansel. 10
4. Explain and illustrate the laws of association. What use is made of them by Bain and Mansel respectively? 12
5. How does Jardine prove the existence of an external world? Compare his doctrine of the external world with Mansel's. What is Bain's view of the external world? 15
6. State and compare the views of Mansel, Jardine, and Bain as to the nature and origin of axioms. 16
7. Contrast the views of Mansel and Bain as to the nature of the will. 10
8. State and compare the views of Mansel, Jardine, and Bain as to the nature of the ego or self. 15

SECOND PASS PAPER.

ETHICS.

The figures in the margin indicate full marks.

1. Define ethics, and point out its relation to psychology and metaphysics. 10

2. If a man strive to master irritability of temper, what exercise is there for conscience, judgment, and will, respectively? 15
3. Distinguish the views of Calderwood and Bain as to the nature of conscience. 10
4. Give Mansel's analysis of moral judgments, and compare his view with that of Calderwood. 10
5. "A doctrine of personality is a pre-requisite for a doctrine of personal identity." Explain. 8
6. Explain, with critical remarks : 15
 - (a.) The Socratic doctrine, that knowledge is virtue.
 - (b.) The Platonic view that virtue is the harmony of the soul.
 - (c.) The Aristotelic definition of virtue.
7. State Calderwood's view about all attempts to prove the existence of God. What is his view regarding the origin of our belief in God? 10
8. Give Calderwood's classifications, psychological and ethical, of the impulses to action. 10
9. Give a short sketch of the ethical system of any *one* of the following: Hobbes, Clarke, Hutcheson, Bentham. 12

FIRST HONOUR PAPER.

PSYCHOLOGY AND ETHICS.

The figures in the margin indicate full marks.

1. Define and distinguish psychology, metaphysics, and philosophy, noting differences of opinion. 8
2. State and criticise the different theories of the relation between the mind and the body. 10
3. Give Berkeley's theory of vision, noting the arguments for and against it. 10
4. Give and examine the theories of Mansel, Jardine, and Mill, as to the origin and nature of our belief in an external world. 12
5. Describe and explain the phenomenon of attention. To which of the three classes of mental phenomena does it belong? Distinguish the different degrees of it, and describe its origin and growth. 10
6. State and examine the different theories of the origin and nature of axioms. 10
7. Give and examine the various theories of the nature of conscience. 10
8. State and examine the doctrines of Calderwood and Mill as to the origin and nature of personality. 10
9. The characteristic mark of every form of utilitarianism is that it is a calculus of pleasures. Point out the difficulties in the way of such moral arithmetic. 10

10. Give and examine the opposing theories, ancient and modern, as to what constitutes the supreme end of life, or the *summum bonum*. 10

SECOND HONOUR PAPER.

HISTORY OF PHILOSOPHY.

The figures in the margin indicate full marks.

1. Give a sketch of Descartes' system of philosophy. 12
 2. What is Locke's theory of the origin of ideas? Give his classification of ideas, and his account of the origin of the ideas of power and of substance. 12
 3. Explain the monad theory of Leibnitz. 10
 4. State Berkeley's doctrine of the spirit or soul, and compare it with Mansel's doctrine of the ego or self. 10
 5. State Hume's criticism of the principles of causation and of substance and attribute. 12
- Give the substance of the answers given by Kant and Reid, respectively.
6. Give an account of the ethical system of Plato or of Aristotle. Is there any indication in the theories of Socrates, Plato, and Aristotle of the modern doctrine of conscience? Give reasons for your answer. 12
 7. Give an outline of Kant's Critique of Practical Reason. 12
 8. State and examine the fundamental ethical doctrines of any one of the following:—
Hobbes, Clarke, Hutcheson, Bentham. 10
 9. How does Leibnitz attempt to reconcile the presence of evil in the world with his optimism? 10

THIRD HONOUR PAPER.

NATURAL THEOLOGY.

The figures in the margin indicate full marks.

1. Define religion, and point out its relation to psychology and metaphysics. What is natural theology? Point out its relation to philosophy. 10
2. Contrast the views of Calderwood, Flint, and Mill as to the origin and nature of our belief in God. 12

3. Explain the meaning of the causal principle, noticing 12
differences of opinion on the subject.

What may be inferred about the existence and nature of God
by means of it?

4. What is pantheism? Distinguish it from theism and 10
polytheism. Give an account of Spinoza's pantheism.

5. Give and examine Kant's criticism of the argument from 12
design. What does Flint mean by the argument from order?
Has the theory of evolution affected the value of the design
Argument?

6. Examine the following: "There is in nature a permanent 12
"element and also a changeable, the changes are always the
"effects of previous changes; the permanent existences, so far
"as we know, are not effects at all."

7. Explain: "But to us probability is the very guide of 8
Life."

8. On what grounds does Butler hold that necessity does not 12
destroy the proof of an intelligent author of nature?

9. Give and examine Butler's arguments for the immortality
of the soul. State any other arguments you may know.

PURE LOGIC.

Ueberweg's System of Logic and History of Logical Doctrines.

1. Explain Ueberweg's definition of logic, and his division 10
of logic into pure and applied.

2. Fully explain the following:— 10

"The Aristotelian logic is an *analytical theory of thinking*,
but the formal logic, in the Kantian sense, a *theory of analyti-
cal thinking*."

3. What is meant by a category? 10

Name the categories of Aristotle, and give Ueberweg's view
of them.

4. Explain Ueberweg's doctrine of internal perception, and 15
compare it with Kant's.

5. Explain and illustrate Ueberweg's doctrine of the *essence* 12
or the essential attributes of an object.

6. Show how Ueberweg represents A, E, I, and O by circles. 8
Draw as many inferences as you can, naming the process you
employ, from the proposition "Every phenomenon is caused."

7. Explain the following:—"The possibility of the syllogism 12
"as a form of knowledge rests on the hypothesis that a real
"conformability to law exists, and can be known, according to
"the axiom of sufficient reason."

8. Explain Ueberweg's view of the dilemma. Analyse the 7
following forms, and show if they conform to his definition:—

(i.) If A is, either B or C is;
Neither B nor C is;
∴ A is not.

(ii.) If A is, either B nor C is;
If D is, either B or C is;
∴ If D is, A is not.

9. Distinguish a sorites from an epicheirema, and the Aristotelian sorites from the Goclenian. Show that both the sorites are episyllogistic. 6
10. What is Ueberweg's view of imperfect induction? 10

PHYSICS AND THE ELEMENTS OF CHEMISTRY.

Examiner—MR. W. BOOTH, B. A.

FIRST PASS PAPER.

The figures in the margin indicate full marks.

1. Describe how you have seen the following substances prepared in the laboratory for lecture purposes: marsh gas, phosphoretted hydrogen gas, arseniuretted hydrogen, cyanogen. 12
2. How are chlorine, bromine, iodine, prepared for lecture purposes, and what substances may be prepared by means of any of them with the help of caustic potash? 12
3. What do you know of the principle of the manufacture of sulphuric acid? 6
4. What do you know of the preparation of any of the salts of mercury? 8
5. How is the absolute dilatation of mercury determined? 6
6. How did Regnault determine the density of a gas? 6
7. How did Dumas determine vapour densities? Why is a knowledge of vapour densities desirable? 8
8. Explain how Carnot, by bringing the working substance back to its initial state, was logically in a position to assign a quantitative relation between mechanical energy and heat. (a.) On what does the efficiency of a perfectly reversible engine depend? Prove the statement. 14
9. "The calorific power of Hydrogen is 34,000." What is the meaning of this statement? Describe Favre and Silbermann's calorimeter. 8
10. Give some account of Foucault's pendulum experiment (Maxwell). 8
11. What is the value of the stress or attraction between a planet and the sun in terms of their masses P and S , their mean distance a , their actual distance γ , and the periodical time T . Prove the formula (Maxwell). 12

SECOND PASS PAPER.

The figures in the margin indicate full marks.

1. What do you know about the construction and uses of Koenig's manometric flames? 8

2. What is the state of the air at a node of an organ pipe? 6
What is the state of the air in the loops?
3. On what properties of a substance does the velocity of 12
sound in it depend? Assuming that 20,000 cubic inches of
water under one atmosphere pressure become when the pressure
is increased to two atmospheres 19,999 cubic inches. Find
approximately the velocity of sound in water.
4. What is a double convex lens? if its focal length is 8
10 inches, where are the images of a small object on its axis
when placed successively at distances 8 and 12 inches from the
lens? How does a man see an object through such a lens?
5. What is the use of the narrow slit, the collimator, and 10
the telescope in a spectroscope?
6. What do you understand by the term "polarisation" of 10
light? What are the phenomena which have induced men to
use such an expression? The term polarisation occurs twice
elsewhere in physics in very different senses. Explain.
7. Compare diffraction and refraction spectra. 6
8. What do you know of the bifilar magnetometer? 8
9. How did Faraday show that the quantities of inducing 6
and induced electricities are equal?
10. How does theory show that the heating effect of an 10
electric current depends on RI^2 ?
11. Draw a curve of potential for a closed circuit, and ex- 10
plain your diagram.
12. What is meant by the dimensions of a physical quantity? 6
Find those of quantity of electricity in electro-static units.

CHEMISTRY AND THE ELEMENTS OF PHYSICS.

Examiner—MR. A. PEDLER, F. C. S.

FIRST PASS PAPER.

The figures in the margin indicate full marks.

1. Describe clearly how you would ascertain the Specific 6
Gravity of Solids and Liquids, and work out some examples of
both determinations.
2. Explain what you mean by the reflection and refraction 7
of light. What are the laws which govern the reflection of
light? Under what circumstances will total reflection occur?
3. State what you know with reference to Fraunhofer's 9
lines, and what facts they prove.
4. What is meant by the boiling point of a liquid? How 9
are the boiling point of water and the melting point of ice affected by pressure? Does the same law hold good with other
substances?
5. Describe the construction of a cell of any form of battery 9
with which you are acquainted, and explain clearly what happens
when the battery is brought into work, and the source of the
power which is produced.

6. What are the conditions necessary for electrolysis? 10
Describe what takes place when a current of voltaic electricity is passed through a solution of (a) acidulated water, (b) hydrochloric acid, (c) copper sulphate, and (d) sodium sulphate. What relative weights of substances are produced?
7. What are the methods by which hydrogen dioxide is prepared? Describe its properties, and explain its action in oxidation. 7
8. How does chlorine occur in nature? How would you prepare hydrochloric acid? Describe the properties and uses to which it is put. 8
9. Describe the various forms in which carbon occurs in nature, and the mode of occurrence. Describe their properties and uses. 9
10. Describe the formation of boracic or boric acid. What is borax, and how is it used? 6
11. Explain clearly the difference between chemical compounds and mechanical mixtures. State in what class you would place atmospheric air, brass, and gunpowder, and give your reasons for doing so. 10
12. Classify 20 of the important elements according to atomicity, quoting examples to prove the atomicity stated. 10

SECOND PASS PAPER.

The figures in the margin indicate full marks.

1. Describe the methods that are used in the preparation of metallic lead. What are the properties of the metal, and its uses? Which of its salts are largely used? 8
2. What are the principal ores of copper, and how is it usually obtained from its ores? 8
3. What compounds does arsenic form with oxygen, and with oxygen and hydrogen? How can they be formed, and what are their properties? 9
4. Describe the manufacture of soda ash. What secondary products are formed in the process of manufacture, and how are they utilised? 8
5. Describe how you would prepare a jar of ammonia gas, and what tests you would employ to prove the nature of the gas. You must give sufficient details to show you understand the manipulation required. 8
6. Explain the action, if any, of sulphuretted hydrogen on (a) a neutral solution of a silver salt, (b) an acid solution of a barium salt, (c) an alkaline solution of a zinc salt, and (d) an alkaline solution of a magnesium salt. 6
7. Give the distinctive characters by which the metals of the copper group may be determined by blowpipe tests, and the wet tests you would use to confirm the results of the blowpipe tests. 9

8. A solution containing the following ingredients is given for analysis; describe how it can be done: Potassium chloride, copper sulphate, nickel nitrate, and magnesium acetate. 10
9. Explain how you would qualitatively detect the presence of C, H, O, N, S, and P in organic substances. 6
10. Give the formulæ of all the hydrocarbons of the marsh gas series up to those containing five atoms of carbon. 10
11. Show the connection that exists between the alcohols, aldehydes, acids, ketones, and ethers derived from the ethyl series of radicals. 10
12. How is ethyl alcohol formed on a large scale, and how can "absolute alcohol" be obtained from ordinary spirits of wine? 8

PHYSICS AND CHEMISTRY.

FIRST HONOUR PAPER.

Examiner—MR. W. BOOTH, B. A.

The figures in the margin indicate full marks.

1. Explain the statement: "The attraction of the earth on a litre of dry air at 0°C . and 760 m.m. pressure depends on the square of the intensity of gravity." 5
2. Explain in detail how statistics have been obtained connecting the temperature and the corresponding pressure of the vapour of boiling water. 7
3. Describe Ingenhousz's apparatus. Can you explain completely the statement "The order in which the melting begins is the order of the diffusivities of the metals employed, and when it has reached its limit (if the temperature of the liquid be maintained constant) the order of the lengths melted is the order of their conductivities"? 12
4. How has the modern dynamical theory of heat been of use in explaining on physical principles the phenomena of glacier motion? Prove the quantitative relation connecting the melting point of ice with the corresponding pressure. 10
5. What are Lissajou's figures? Construct accurately and neatly the figure for two forks whose vibrational numbers are as 3 to 4; there being no difference of phase. 8
6. A stationary organ pipe sounds a note whose vibrational number is n ; how is this note affected if the listener is travelling at the rate of five feet per second straight towards the organ-pipe. (a) If the listener be stationary, and the same organ pipe sounding the same note travel straight towards the listener at the rate of five feet per second, how is the note affected? (b) It is said that the bright star Sirius is departing from our system. What is the nature of the evidence? 8
7. Explain and demonstrate the statement that the force just outside a charged conducting closed surface is $4\pi\rho$. 8

8. State and prove the "*conjugate*" principle of a Wheatstone's bridge, and explain Thomson's method of finding the resistance of a galvanometer. 10
9. Prove that, neglecting the thickness of a prism, conjugate foci are at the same distance from it, and on the same side, when the deviation is a minimum. 10
10. How are the spectra of solar and electric light properly thrown on a screen. How would you exhibit the phenomenon of fluorescence. 6
11. Explain the effect of interposing a bi-refracting crystal between the polariser and analyser, the screen being previously dark. 10
12. Is there any difference between a solenoid and a hollow bar magnet? Draw neatly the lines of force of each, and carefully explain your diagram. 6

PHYSICS AND CHEMISTRY.

SECOND HONOUR PAPER.

Examiner—MR. A. PEDLER, F. C. S.

The figures in the margin indicate full marks.

1. Two volumes of marsh gas, four volumes of olefiant gas, and six volumes of hydrogen, are mixed with 40 volumes of oxygen (measured at 0°C. and 760 m.m.) and exploded by an electric spark. What is the volume of the gaseous products at the same temperature and pressure, and what would it be at 200°C. ? 9
2. Give examples of monatomic, diatomic, triatomic, tetra-atomic, and hexatomic elementary molecules. Draw the graphic formulæ of these molecules. 8
3. I heat *each* of the following substances in a flask ; explain what changes, if any, take place, and give equations for any chemical changes which may occur :—Ammonium nitrite, hydrogen disodium phosphate, lead nitrate, platinic chloride, ammonium chloride, and mercuric cyanide. 8
4. How would you prepare pure nitrogen dioxide gas ? Give full experimental details. 6
5. Give a short summary of the relations which have been found to exist between the heats of combination and chemical action. 9
6. How may the metals nickel and cobalt be distinguished by blowpipe and by wet tests ? 6
7. Describe Bessemer's process for the production of steel. 6
8. Classify the more important inorganic acids according to basicity, and draw the graphic formulæ of the acids given. 10
9. Describe what is meant by the term "*hardness*" as applied to water ; what is the difference between permanent and temporary hardness, and how may each be removed ? 6

10. How would you qualitatively analyse a solid substance containing the following ingredients:—Calcium carbonate, zinc chloride, lead carbonate, sodium acetate, and manganese dioxide? 10
11. Show by graphic formulæ the connection between the isomeric compound ammonias, propylamine, isopropylamine, methylethylamine, and trimethylamine. What would be the action of ethyl iodide on each? 8
12. Distinguish between the true organic cyanides and the isocyanides. How can their constitution be proved? 8
13. Describe the mode of preparation of acetic acid and zinc ethyl. 6

PHYSICS AND CHEMISTRY.

THIRD HONOUR $\frac{1}{2}$ PAPER.

Examiner—MR. W. BOOTH, B. A.

The figures in the margin indicate full marks.

1. Deduce from electro-dynamic principles the theorem that when a conductor is moved in a magnetic field the electro-motive force generated by the motion, depends on the number of tubes of force which the conductor cuts per unit of time. 12
2. Explain how statistics obtained by the use of a calorimeter (like Favre and Silbermann's) are of use in determining the electro-motive force of a galvanic cell. 6
3. Explain how the intensity of light depends on the square of the amplitude of vibration. 10
4. Why does Clerk-Maxwell object to Descartes' account of the idea of space. 8
- (a.) Write a note on the term "medium."
5. Give an abstract of Clerk-Maxwell's exposition of the celebrated Cavendish experiment, and explain the paragraph—"According to Baily's experiments $C = 6.5 \times 10^{-8}$. If we assume the unit of mass, so that at a distance unity it would produce an acceleration unity, the unit of mass would be about 1.537×10^7 grammes. This unit of mass reduces the constant of gravitation (C) to unity." 14

PHYSIOLOGY AND BOTANY.

FIRST PASS PAPER.

PHYSIOLOGY.

Examiner—MR. J. WOOD-MASON.

The figures in the margin indicate full marks.

1. Describe the process of Fertilization in any Flowering Plant. 10

2. If in a living man a finger be tightly ligatured, the part of the finger beyond the ligature gradually becomes dark-coloured and painfully swollen : explain this. 10
3. Describe the mechanism whereby matter is forced from the upper or anterior into the lower or posterior extremity of the intestines. 10
4. Enumerate, with very brief explanatory notes, the vital properties manifested by an *Amoeba*. 10
5. Whence does the young Flowering Plant derive its food during the early stages of its growth ? 10
6. Explain why blood flows in jerks from a cut artery. 10
7. What are the conditions essential to the formation by green plants of organic from inorganic substance ? 10
8. What is the function of Chlorophyll ? 10
9. Classify the fundamental tissues of the human body physiologically. 10
10. Explain the principle on which glands are constructed. 10

SECOND PASS PAPER.

BOTANY.

Examiner—DR. D. PRAIN.

The figures in the margin indicate full marks.

1. Enumerate the principal kinds of "fruits." Describe accurately the various parts of the fruit of the common pea (*Pisum Sativum*). 10
2. What is the "root" ? Describe its morphological and physiological features in the various divisions of plants. 10
3. Define the terms "Æstivation," "Dimorphism," "Placentation"; and describe shortly the processes of "Metabolism," "Respiration," "Absorption" in plants. 10
4. What are the objects of a "system of classification" ? Describe some of the systems adopted, stating, with your reasons, which of these you hold most useful. 10
5. Define the natural orders "Papaveraceæ" and "Leguminosæ." Mention the orders to which each is allied, and give in each case a list of the useful products which you know to be supplied by species of these orders grown in India. 10
6. Describe the flower and fruit of the common "Banana" (*Musa*). To what natural order does this plant belong ? Describe the various modifications which the flower undergoes in this order. 10
7. Describe the flower and fruit of the "Indian corn" (*Zea Mais*). Enumerate the six food plants of the order Gramineæ which are grown in India that you consider the most valuable, placing them in order of merit, and giving reasons for your arrangement. 10
8. To what uses is "Bamboo" put ? Under each heading state, as far as you can, the variety employed ; the part of the 10

plant used; the preparation, if any, to which it is subjected; the region of India where the use is made of it.

9. Give an account of the "reserve materials" which plants temporarily store up. In what tissues are they laid up? with what object? what economic products do they yield? 10

10. Give a concise and clear account of the various modes of "Reproduction" in the vegetable kingdom. 10

(Illustrate your statements by drawings whenever possible.)

ZOOLOGY.

FIRST HONOUR PAPER.

Examiner—DR. D. PRAIN.

The figures in the margin indicate full marks.

1. Discuss the origin, mode of growth, and functions of the cell-wall. Explain clearly the bearing of your facts on the formation of vegetable tissues. Give examples and make drawings when necessary. 16

2. Define Epidermal Tissue. Enumerate the various structures included under the term and describe each shortly. Give examples and make drawings when necessary. 16

3. Give a concise account of the types and methods of Reproduction met with in the vegetable kingdom, describing fully the various organs involved in the process. 16

4. Into what large classes are the vascular cryptogams divided? Describe as fully as possible the cycle of Reproduction in each case. 16

5. Give the definition of the natural order Boraginæ—mentioning the plant selected as the type. To what orders are the Boraginæ most closely allied? Give the diagnosis from these orders, and sketch the geographical distribution of the orders. 18

6. Define the natural order Urticacæ. Describe more fully the suborders into which it has been divided. Mention types of these suborders and point out the grounds on which the division has been made. Give a sketch of the useful products supplied by plants of this order. 18

SECOND HONOUR PAPER.

ZOOLOGY.

Examiner—MR. J. WOOD-MASON.

The figures in the margin indicate full marks.

1. Describe the structure and development of any Tape worm. 15

2. "The system of cavities in an *Actinia* is therefore not a body-cavity but an entire cavity." State the grounds for this conclusion. 15
3. Draw diagrams of a gastropod and of a Lamellibranchiate Mollusk; briefly pointing out the resemblances and differences between the two. 10
4. Give the Geographical Distribution of any three of the following groups of animals:—*Pharianidæ*, *Peripetideæ*, *Tapiridæ*, *Lemuridæ*, *Rhinocerotidæ*, *Ratitæ*, *Edentata*, *Salmonidæ*, *Marsupilia*. 10
5. Compare the skeleton of the hind limb of a Bird with that of a Mammal; indicating the position of the ankle-joint in each case. 15
6. Describe the poison-apparatus in any Indian venomous snake. 10
7. Describe the structural arrangements whereby *Ophiuroidea* are distinguished from *Asteroidea*; illustrating your answer by diagrams. 10
8. Compare the mouth-parts or jaws of a Myriapod (*e. g.*, *Sclopendra*) with those of an Insect (*e. g.*, the common Cockroach), stating briefly in what important respects they differ therefrom. 15

THIRD HONOUR $\frac{1}{2}$ PAPER.

PHYSIOLOGY.

ANIMAL PHYSIOLOGY.

Examiner—MR. J. WOOD-MASON.*The figures in the margin indicate full marks.*

1. (a.) Distinguish between *Branchial*, *Trachial*, and *Pulmonary* Respiration. 10
- (b.) In the larvæ of many Insects, the trachial system is closed and the *trachiæ* penetrate and ramify in thread-like or leaf-like processes of the body-wall: how is the æration of the blood effected in such cases? 5
2. How is the temperature of our bodies regulated? 10

VEGETABLE PHYSIOLOGY.

Examiner—DR. D. PRAIN.

3. Discuss the conditions which regulate the growth of a plant. Give a detailed account of the mode of growth in thickness of an exogenous stem. 12
4. What do you understand by *irritability* in a plant? Detail the conditions under which it exists, and describe the anatomy of the part where movement takes place with the physical causes of the movements themselves. 13

GEOLOGY AND PHYSICAL GEOGRAPHY.

Examiner—MR. S. A. HILL, B. SC.

FIRST PASS PAPER.

The figures in the margin indicate full marks.

1. Enumerate the mineralogical constituents of the different varieties of granite. How do you suppose granite has been formed. and how would you distinguish it from gneiss? 10
2. Describe the lithological characters known as false bedding, foliation, cleavage and lamination, explaining how each has been produced. 11
3. What are *faults* in stratified rocks or mineral veins, and how are they produced? Give sketches of direct and reversed faults. 12
4. Describe two methods in common use for determining the ages of rock formations, pointing out which one is generally found most useful in a detailed survey of a given locality and which is best adapted for correlating formations in widely separated localities. 10
5. On a sketch map of India mark the positions of the more important coalfields. What are the chief divisions and what is the probable age of the coal-bearing strata of India? 15
6. Give a short sketch of the formation of a volcanic mountain. Mention the chief varieties of volcanic rock, dividing them into acid and basic. 12
7. Give a short description of the cretaceous rocks of Western Europe and mention any Indian rocks of the same age. Name five characteristic fossils of the cretaceous age. 15
8. Name the genus of each of the fossils marked A, B, C, D, E, F, and give its probable geological age. 15

SECOND PASS PAPER.

The figures in the margin indicate full marks.

1. Give a short account of the various theories put forward to explain the elevation of mountain chains. Whether do the rocks underlying mountains and plateaux or those underlying low plains and the ocean bed possess the greater density, and how is the difference of density detected? 15
2. Describe briefly the action of a river in modifying the superficial features of the ground both in the upper and lower reaches of its course. How do you account for the fact that the Ganges and its tributaries are now excavating deep ravines through alluvial strata deposited by the river in former ages? 12
3. How is it that a well sunk anywhere will strike water provided it go deep enough? Describe some kinds of geological 12

formation in which the depth would probably be so great as to make the sinking of a well impracticable. In what parts of a *doab* are the wells deepest, and why?

4. Distinguish between "continental" and "oceanic" islands, mentioning any peculiarities of the latter, and dividing them into classes according to their mode of formation. 10

5. Explain the cause of the seasons. What zone of the earth's surface receives most heat from the sun during the summer half year, and why are the mean temperatures of the two hemispheres probably nearly equal, though the summer is 8 days longer in the northern hemisphere than in the southern? 14

6. Draw diagrams showing the relations between the winds and the distribution of pressure in cyclones and anticyclones. Why are the winds usually much stronger in cyclonic than in anticyclonic systems? 12

7. State briefly the usual causes of rain. Draw a sketch map of India, and on it mark roughly the rainiest and the driest districts, and also those regions where the rain falls chiefly in summer and where it falls both in summer and winter. 13

8. How are the movements of the higher strata of the atmosphere observed? In what parts of the world are the currents in the upper strata opposed to those observed below, and in what other regions do the two approximately coincide? 12

1. What are the premises from which the consistent combinations follow, *viz.*, ABC, AbC, aBC, aBc? 8

2. Illustrate from Physics the value of the method of reversal "which requires that we shall be able to reverse the apparatus and mode of procedure, so as to make the interfering cause act alternately in opposite directions." 12

3. Being given the equations 14

$$\left. \begin{aligned} 2x - y + z &= 3 \\ 3x + 3y - z &= 14 \\ 4x + y + 4z &= 21 \\ -5x + 2y + 3z &= 5 \end{aligned} \right\},$$

all equally reliable, calculate the most probable values of x , y , z .

4. Write a note on the requisites of a good hypothesis. 10

5. Explain: "An event having happened m times without fail, the probability that it will happen n more times is 6

$$\frac{m+1}{m+n+1}."$$

FIRST PASS PAPER.

*Examiner—MR. W. A. BOUTFLOWER.**The figures in the margin indicate full marks.*

1. A straight line OABC N is divided into n equal parts at the points A, B, C , each part being of length a , and like parallel forces $P, 2P, 3P \dots nP$ act at the points ABC . . . N; show that the distance of their centre from o is $\frac{2n+1}{3}a$. 7

2. Show that a couple acting on a rigid body may be replaced by any couple of equal moment in the same plane whose arm is parallel to the arm of the original couple. 8

3. A system of coplanar forces acts on a rigid body, and two fixed straight lines OX, OY are drawn in the plane of the forces at right angles to each other. The algebraical sum of the moments of the forces about O is G , and the algebraical sums of their resolved parts in the directions of OX, OY are $\Sigma X, \Sigma Y$ respectively. Prove that if O' be a point in the plane whose distances from O, measured along OX, OY are a, b , respectively, the algebraical sum of the moments of the forces about O' may be denoted by $G - a\Sigma Y + b\Sigma X$. 8

Hence, or otherwise, prove that if the algebraical sum of the moments of a system of coplanar forces acting on a rigid body about three points in their plane which are not in the same straight line vanish, the algebraical sum of the moments about every point in the plane will vanish. 6

4. Two small rings, without weight, slide on a rough circle whose plane is vertical, and radius a , being connected by a string whose length is $a\sqrt{2}$. A weight is attached to the middle point of the string, and it is observed that the greatest angle which the rings can subtend at the centre of the circle is 60° . Prove that the coefficient of friction between the rings and the circle is $2 - \sqrt{3}$. 8

5. Determine the conditions of equilibrium on the common balance, and investigate the requisites of a good balance.

If a balance have unequal arms, show how the true weight of a body may be determined. 4

6. Two particles whose weights are P and Q rest one on each of two planes having a common vertex whose inclinations are α, β respectively, being connected by a string which passes over a smooth pulley at the common vertex: prove by the principle of virtual velocities that $P \sin \alpha = Q \sin \beta$. 8

7. Define acceleration; and prove that the unit of acceleration varies directly as the unit of length and inversely as the square of the unit of time. 6

If the unit of velocity be a velocity of 16 feet per second, and the acceleration of a falling body be represented by 10, determine the units of length and time.

8. Two particles, A and B, of which A is the heavier, are connected by a string without weight which passes over a smooth pulley; determine the acceleration of the system and the tension of the string.

What effect will be produced by attaching a heavy particle C to B, when the velocity of the system is v ? 6

9. A particle under the action of gravity describes a parabola. Shew that the velocity at any point is that which the particle would have acquired by falling *in vacuo* from the directrix to that point, and that the work done by or against the weight of the particle during any part of its flight is equal to the change in its kinetic energy. 6

10. An imperfectly elastic particle strikes a plane obliquely; determine the direction in which it will rebound when the plane is smooth. 5

SECOND PASS PAPER.

Examiner—MR. A. EWBANK, M. A.

The figures in the margin indicate full marks.

1. The pressure of a gas at zero temperature is given as 8
20 inches of mercury. Express this pressure in pounds per square foot.

2. Determine the centre of pressure for a triangle with one 10
side in the surface of a liquid.

Show that in any plane lamina, whether partly or wholly immersed, the centre of pressure is below the centre of gravity of the lamina.

3. Determine the conditions of equilibrium for a body that 10
floats freely in a liquid.

A hollow cylinder closed at its lower end floats in water. The external diameter is double of the internal diameter. Water is poured into the cylinder till it stands inside at a depth h . Find the additional length immersed.

4. Why is mercury used for the liquid in a barometer? If 12
it was highly compressible, would its value for this purpose be affected?

A bent tube being used as a barometer, a small hole is accidentally made at the top of the bend. Describe the result.

5. Explain the action of the common syphon. 8

6. In a forcing pump the solid piston makes a given number 14
of strokes per minute, working through a given space in one stroke. But the section of the discharge pipe is changed, the height being constant; or the height is changed, the section being constant. Will either of these changes affect the labour necessary to work the pump?

7. Describe any form of air pump, pointing out the difficul- 6
ties in the way of getting a good exhaustion.

8. The common hydrometer may be described as a cylindrical body loaded at one end. This body being floated in various liquids the unimmersed portions are measured. Show that if these increase in A. P. the densities of the liquids are increasing in H. P. 8

9. A hollow closed vertical cylinder has a length $10c$. Of this a length $9c$ is filled with a liquid while the rest contains air at ordinary pressure. This pressure is measured by a height $8c$ of the liquid. A small hole is made near the base of the vessel. Determine what proportion of liquid will escape. 14

10. Of the two instruments, a thermometer and a barometer, the readings of one are always interpreted with the help of the other. Explain this point. 10

FIRST HONOUR PAPER.

Examiner—MR. W. N. BOUTFLOWER, M. A.

The figures in the margin indicate full marks.

1. Show that a couple may be replaced by any couple of equal moment in a parallel plane. 7

2. OA, OB are chords inclined at angles of 45° and 30° respectively to OC, the diameter of a circular lamina, whose plane is horizontal, and which is capable of turning in that plane about the fixed point O. Show that the lamina may be in equilibrium under the action of forces P, 2 P, 2 P along the tangents at A, B, C respectively, and find the magnitude and direction of the pressure on the fixed point. 6

3. The centre of gravity of a triangular pyramid coincides with the centre of gravity of four equal particles placed one at each of the angular points. 3

If the weight of a particle placed at the vertex of a triangular pyramid be given, and also the sum of the weights of three particles placed one at each of the angular points of the base, determine the locus of their centre of gravity. 4

4. Show that if a rigid body be acted on by any forces, they may in general be reduced to a single force acting at any fixed point and a couple. 9

5. A heavy rod rests with one extremity on an inclined and the other on a horizontal plane in a plane perpendicular to their common section, and is just on the point of slipping. If μ be coefficient of friction between the rod and either plane, and α its inclination to either plane, show that— 8

$$\mu^2 \sin^3 \alpha + \mu \cos \alpha = \sin \alpha \cos^3 \alpha.$$

6. If a particle acted on by a system of coplanar forces be displaced, as much work is done by the forces as would have been done had they been replaced by their resultant. 5

Three weights P, Q, R are knotted in order at equal intervals to a string, and are then placed on the convex side of a vertical 5

circle, each portion of the string subtending an angle α at the centre; prove, by the principle of virtual velocities, that if θ be the angle which the radius through Q makes with the vertical,

$$\cot \theta = \frac{(P + R) \cos \alpha + Q}{(P - R) \sin \alpha}.$$

7. Find the condition that the lines $y = mx + c$, $y = m^1 x + c^1$ 4
may be perpendicular, the axes being inclined at an angle ω .

Taking two of the sides of a triangle as axes of co-ordinates, 4
prove that the perpendiculars from the angular points on the opposite sides meet in a point.

8. Show that two tangents may be drawn to a circle from an 7
external point; and that if $x^2 + y^2 = r^2$ be the equation to the circle, and h, k be the co-ordinates of the external point, their equation is—

$$(hy - kx)^2 = r^2 \{ (x - h)^2 + (y - k)^2 \}.$$

9. The equation to a conic section being $ax^2 + 2hxy + by^2 = 1$, 6
show that the equation to its axes is $xy (a - b) = h (x^2 - y^2)$.

Determine the condition that two conic sections may have 3
parallel axes.

10. P is a point on the auxiliary circle of an ellipse, and PA, 6
PA¹ meet the ellipse in Q, Q¹; prove that—

$$\frac{AP}{AQ} + \frac{A^1P}{A^1Q} = 1 + \frac{a^2}{b^2}.$$

11. Reduce the equation $(3x + 4y)^2 + 22x + 21y + 16 = 0$ 7
to the form $Y^2 = pX$.

12. Determine the equation to the normal to the hyperbola 6
 $xy = c^2$ at the point x^1, y^1 , ω being the angle between the axes.

Prove that the normals at the points where this hyperbola is 7
met by the ellipse $x^2 + y^2 = c^2$ ($\cos \omega + \sec \omega$) are parallel to one of the asymptotes.

1. Explain, with illustrations, the meaning of the terms 5
“relative motion” and “relative velocity”; and show that if two points be in motion, the velocity of one relative to the other will not be altered, if any, the same velocity be impressed on both.

2. Give a geometrical proof of the formula $s = nt + \frac{1}{2} ft^2$. 6
A body, whose acceleration is uniform and denoted by 9, starts from rest, and in 4 seconds passes over 120 feet, acquiring a 4
velocity denoted by 12. What are the units of length and time?

3. Two bodies, A and B, whose masses are m_1, m_2 , are connected by a weightless string passing over a smooth pulley. After A, the heavier body, has descended from rest through a given space, a body of mass m_3 is attached to B, and when A has again descended through the same space, the system is brought to rest; show that— 7

$$(m_3 + m_2)^2 = 2m_1^2 - m_2^2.$$

4. A particle is projected from a fixed point in a given direction with a given velocity; find the time of flight and the range on an inclined plane passing through the point of projection. 4

Prove that when the motion of the particle is parallel to the inclined plane, it is vertically above the middle point of the range. 5

5. Two smooth spheres of imperfect elasticity are moving in the same plane and impinge: obtain equations from which the magnitude and direction of the velocity of each after impact may be deduced, the impact being oblique. 4

The length of a room is to its height as 5 : 2, and a ball whose coefficient of elasticity is $\frac{1}{2}$ is thrown from the top of one of the end walls in a horizontal direction with such a velocity that after one rebound from the floor it strikes the opposite wall at right angles. Determine the velocity of projection and the points where it strikes the floor and the wall. 8

6. Explain the principle of the conservation of energy; and apply it to show that if a body whose mass is equal to that of the power be attached to the weight in the second system of pulleys where there are n strings, it will descend with an acceleration 7

$$\frac{g}{n^2 + n + 1}.$$

7. Apply Taylor's Theorem to find the first four terms and the general term in the expansion in powers of x of $\sin^3(\alpha + x)$. 14

8. Trace the curve $y = (1 - x)(5 - x^2)$ for values of x not numerically greater than $\sqrt{5}$. Find the points at which the curve becomes parallel to the axis Ox . 10

9. The semi-axes of an ellipse are a and b . CP and CD are any conjugate semi-diameters. If ρ be the radius of curvature at P prove that— 12

$$ab\rho = CD^3.$$

10. Given one side of a quadrilateral and the sum of the other three sides, show that when the area is a maximum these three sides will be equal. 14

Extend this result to a polygon of $n + 1$ sides, one side being given and the sum of the remaining n sides.

1. A syphon is emptying water from a vessel. Show that the rate of discharge will vary. What would be the effect of lengthening gradually the discharging branch by some telescopic arrangement, the section remaining nearly constant? 8

2. Define the metacentre. The cargo of a vessel is to consist of a given weight of cotton and a given weight of lead. If the build of the vessel is such that when empty and in rough water it has an excessive tendency to roll, how should the cargo be arranged to reduce the rolling to a minimum? 12

3. C is the lowest point of a bent tube ACB which contains some liquid. In AC a space AD contains air at ordinary pressure. The end A being closed, a tap is opened at C. Thus the air AD expands to some length AE. The original length AD having various values, prove that DE is greatest when E comes to the middle of AC. 14

4. An ordinary pump is placed over a well. Its water is such that the water-barometer height is h feet. The length to the water of the lower cylinder is b . The other dimensions of the pump being fixed, b is so chosen with reference to them and to the value h that if the piston starts from the bottom of its cylinder it just brings the water into the cylinder at the end of the stroke. Suppose then $b = nh$ where n is some proper fraction. Afterwards the water of the well becomes slightly denser from acting on soluble bodies in the neighbourhood. If the length of h is thus decreased by α , and if for b the necessary decrease is β , prove that 16

$$\beta = n^2 \alpha.$$

5. * Show that some of the following integrals should have a value zero, and calculate the values of the others; 12

$$(1) \int_0^\pi \sin^3 x dx; (2) \int_0^\pi \cos^3 x dx; (3) \int_0^\pi \sin^3 x \cos^3 x dx;$$

$$(4) \int_0^\pi \sin^5 x dx; (5) \int_0^\pi \cos^5 x dx.$$

6. Explain the method of integration by parts. Obtain the 12

$$\text{values of } (1) \int_0^\pi x^2 \sin x dx; (2) \int_{x=1}^{x=2} x^2 \log x dx.$$

7. Which is a partial fraction? Obtain the value of 10

$$\int_{x=3}^{x=4} \frac{dx}{(x-1)^2 (x-2)^2}$$

8. A part of the area enclosed by the curve $y = 2x - 3x^2$ lies in the quadrant where x and y are both positive. Calculate this part of the area. 8

9. The equation to a cycloid may be taken as $x = a(\theta - \sin \theta)$; $y = a(1 - \cos \theta)$; where a and θ refer to the rolling circle. Determine the length of the curve for one revolution of the circle. 8

- (h.) Is the use of **नयन्ति** in the *parasmaipadiya* form 2
correct? Give reasons for your answer.
5. Translate the following passages into Sanskrit:— 12
- (1.) Fools are addicted to discontent; wise men attain contentment. There is no end of covetousness. Contentment is the highest enjoyment, and it is therefore regarded by wise men as the highest thing. Youth, beauty, life, and accumulated jewels, royal power, and the society of those we love, are all transitory; the wise man will not eagerly covet them. Even he who seeks wealth for pious purposes had better not seek it; for it is better for men not to touch dirt than to wash it off."
- (2.) "In youth a man is deluded by other ideas than those which delude him in middle life; and again in his decay he embraces yet different ideas."

Moorshud Cooly Khan always provided against famine, and severely prohibited all monopolies of grain. He constantly made private inquiries concerning the market price of grain; and whenever he discovered any imposition, the offenders suffered the most exemplary punishments. If the importation of grain to the cities and towns fell short of what had been usual, he sent officers into the country, who broke open the hoards of individuals, and compelled them to carry their grain to the public markets. Rice then was commonly sold at Moorshudabad at four maunds for a rupee, and the prices of other provisions were in proportion.

Shujaa was humane in his disposition, averse to cruelty, an enemy to oppression : in the execution of justice he had no respect of persons, except when the natural tenderness of his disposition gave his mind a bias towards the unfortunate. Though honest, like his brother Dara, he was not so open and free. He never told a falsehood ; but he did not always tell the whole of the truth. He was more tranquil, more close and reserved than Dara, and he was more fitted for the intrigues of party, and that management which is necessary to direct the various passions of men to one point.

They had fasted three days: to complete their misfortunes, the wife of Aiass was taken in labour. She began to reproach her husband for leaving his native country at an unfortunate hour: for exchanging a quiet, though poor life for the ideal prospect of wealth in a distant country. In this distressed situation, she brought forth a daughter. They remained in the place for some hours with a vain hope that travellers might pass that way. They were disappointed: human feet seldom tread these deserts. The sun declined apace: they feared the approach of night: the place was the haunt of wild beasts; and should they escape their hunger, they must fail by their own. Chaja Aiass, in this extremity, having placed his wife on the horse found himself so much exhausted that he could scarcely move. To carry the child was impossible: the mother could not even hold herself fast on the horse.

The year of the Hejira 1104 was marked by an extraordinary
circumstance. The Grand Signior having been informed that
the Europeans procured great quantities of one of the ingre-
dients for making gunpowder from India, wrote to Aurungzeb
to desire he would no longer permit his subjects to dispose of
that article to Christians, as it was frequently used by them
in the destruction of the followers of Mohammed; that there-
fore whoever supplied them was accessory to the death of the
true believers. In consequence of this request, the principal

source of the East India Company's commercial advantages was for some time cut off by a strict injunction to the Governor of Bengal not to allow them to purchase or manufacture any more saltpetre.

The Muslims regard a child as a trust committed by God to its parents, who, they hold, are responsible for the manner in which they bring it up, and will be examined on this subject on the Day of Judgment. But they further venture to say, that "the first who will lay hold of a man on the Day of Judgment will be his wife and children, who, if he has been deficient in his duty to them, will present themselves before God and say, 'O our Lord, take for us our due from him, for he taught us not that of which we were ignorant, and he fed us with forbidden food, and we knew not:' and their due will be taken from him." By this is meant, that a certain proportion of the good works which the man may have done, and his children and wife neglected, will be set down to their account: or that a similar proportion of their evil works will be transferred to his account.

A native historian, impressed with the courage, wisdom, and ability of Aurangzeb, is at a loss to account for the ill-success of his reign. The real defect was in his heart. Had he been capable of any generous or liberal sentiment, he would have been a great prince; his subjects would not have been alienated by his narrow views in religion, nor would the power of his officers have been cramped, and their zeal chilled, by a constant spirit of suspicion and distrust. In alluding, for the last time, to his narrow views in religion, which contributed so largely to the ruin of his empire, it is well worth while to observe by how little direct persecution that evil result was produced. The Hindus seem rather to have been irritated by systematic discouragement than inflamed by acts of cruelty or oppression.

 fidence to second the resolution so eloquently proposed by the
 preceding speaker,—I say, with a feeling of diffidence, not be-
 cause I have any doubt of your enthusiastic acceptance of the
 proposal, but because I am conscious of my own inability to
 give adequate expression to the fervent feelings of loyalty and
 attachment, which animate every heart to-day, to Her Most
 Gracious Majesty, Queen Victoria, Empress of India, whose
 beneficent and blessed reign, for the last fifty years, over a
 vast Empire that extends far and wide, has been the fruitful
 source of the progress of civilization, spread of commerce, dis-
 semination of knowledge, and everything that tends to pro-
 mote the moral and material welfare of the human race. It is
 needless for me, gentlemen, to detain you long with any
 special pleading for the acceptance of a resolution which pro-
 poses to present a loyal address to our beloved Sovereign whose
 very name inspires every heart with sincere devotion and re-
 verential esteem. It is through Divine mercy that we of all
 other nations have the privilege of living under the motherly
 care and benign rule of the best and kindest of Sovereigns on
 earth at the present day.

In beginning a critical inquiry into the records and remains 12
of any ancient people, the first object we usually come across
is its language. This is the common depository of all the most
authentic information concerning those who spoke it; and if
rightly interrogated, it will often reveal much more, and more
valuable information than that which was intentionally con-
signed to its keeping. The best key to the primitive history of
a people is the history of its language; no witness is so cogent
or so faithful; for, however, those who have used it may have
debased it into the instrument of falsehood, the language itself
can never lie.

Human nature appears a very deformed or a very beautiful object according to the different lights in which it is viewed. When we see men of inflamed passions or of wicked designs, tearing one another to pieces by open violence or undermining each other by secret treachery; when we observe base and narrow ends pursued by ignominious and dishonest means; when we behold men mixed in society as if it were for the destruction of it; we are even ashamed of our species, and out of humour with our own being. But in another when we behold them mild, good and benevolent, full of a generous regard for the public prosperity, compassionating each other's distresses, and relieving each other's want, we can hardly believe, they are creatures of the same kind.

1. What is the limit dividing Ancient and Modern History, and what is the essential distinction between them? How can 16

you distinguish Historians of the Early or Middle Ages from Modern Historians? Taking Modern History to divide into two periods before and after the 16th century, can you subdivide the later period by mentioning the predominant principles during each of its sub-divisions?

2. "History does not seem to be sufficient to the right understanding of itself." Is this charge maintainable? What influence prevents men from acting upon the teaching of History, and how far can they struggle against this influence? 12

Or, *Mill's Representative Government.*

1. "The only task to which a legislative assembly can possibly be competent is not of doing the work, but of causing it to be done." Explain this statement and criticise by its aid the action of the British Parliament. What reform does Mill propose in legislation that is based on this principle? 16

2. How should members of the Executive be appointed? Contrast the method of appointment of the President of the United States with that of the Prime Minister of England? Is there any peculiarity in the case of the choice of Judges? 12

Or, *Milman's History of the Jews.*

1. Describe the nature of the duties of the tribe of Levi. How did their position change after the Captivity, and what class assumed part of their functions? What was the difference between the two great sects of the Jews in the way they regarded the Mosaic Law? 16

2. Give some account of the rise of the Maccabees and of the chief princes of the Asmonean line. How did Herod the Great supplant their authority? 12

Wheeler's and Elphinstone's Histories of India.

1. (a) Name the National and the Foreign sources of our knowledge of the history of India before the Mahomedan Conquest. (b) Give some account of the principal Dynasties that ruled in India between the Invasion of Alexander the Great and that Conquest, adding the dates of their rule, and the names and geographical positions of their capitals, as far as known. 10

2. Compare the reign of Akbar with that of Shah Jehan with respect to (a) the System of Government, and (b) the Material Prosperity of the country and people. What are the Evidences upon which we are enabled to form an estimate on these two points? 12

3. Sketch briefly, with dates, the main points in the successive conflicts between the Mahrattas and the British, stating clearly the result in each case. What was the greatest extent the Mahratta dominions ever reached? 10

Smith's and Liddell's Histories of Greece and Rome.

4. Explain the nature of a Roman Agrarian Law. Describe briefly the provisions and aims of the successive Agrarian Laws passed during the Republic. 12

5. (a) Compare the Greek with the Roman system of Colonisation, pointing out clearly wherein the two differed in aim. (b) Name the chief Greek Colonies, with date of foundation, and name of founding tribe, of each. 10

6. (a) What is meant by the Supremacy of a state in Greek history? Name the successive Supremacies in Greece, with dates of duration, and state the distinctive political character of each. (b) Give a short account of Greek affairs during the last of these Supremacies. 10

Capes' Early Empire and Age of the Antonines.

7. (a) Describe the character of Tiberius as drawn by ancient writers, pointing out any similarity between it and that of Augustus. How far has the accuracy of these writers on this point been called in question? (b) Give a short account of the reign of Tiberius. 10

8. (a) Compare the system of Government at Rome and in the Provinces during the Early Empire with that under the Antonines. (b) What were the functions of the Senate under the Early Empire? 13

9. (a) Trace the changes in the policy of the Imperial Government towards Christianity from the reign of Augustus to that of Marcus Aurelius. (b) What was the attitude of the Roman people towards that religion during the same period? How can we account for the very different treatment that other religions imported from the East received at the hands of the Roman people? 13

Fawcett's Political Economy.

1. Define Price. Investigate the laws that regulate the prices of Manufactured Commodities. What fundamental difference exists between the nature of such prices and that of the prices of Agricultural Produce? Explain the process of 12

- the Equalisation of Demand and Supply, and show how far it influences the price and the value of gold.
- 2. Distinguish between Real and Nominal Wages. Explain 16
concisely the nature of the various popular Remedies for Low Wages that have been proposed from time to time, and examine the efficacy of each in raising wages.
- 3. What is meant by the current Rate of Interest, and how 10
is it fixed? Explain the causes that tend to produce oscillations about this rate when so fixed. What influence does the rate of interest exert upon the Price of Property? In what way is the rate of interest a measure of national prosperity?
- 4. What difficulty attends the levying of an Income-Tax 12
upon temporary and permanent incomes? What is the system of Adjustment by which it is proposed to overcome the difficulty? What objection is there to this system? Explain the nature and extent of the influence that a Tax on a Commodity exerts upon its Price, and show therefrom why it is desirable to tax the manufactured goods rather than the raw material.

•
Mill's Political Economy.

- 1. What is the law of Increase of Production from land? 12
Is there any exception to this? What agency counteracts this law, and how? Show how this affects the value of agricultural produce.
 - 2. Explain the influence of Credit on prices. Why is the 12
influence of Bank Notes greater than that of Book Credits or Bills of Exchange? Briefly give the substance of Mill's criticism of the Currency Act 1844.
 - 3. What is the benefit of Foreign Commerce, and on what 14
does the advantage of a country in foreign trade depend? When two countries trade together, on what system will their commodities exchange for each other? What constitutes the value of an imported commodity?
 - 4. Define Profit. Into what elements can it be analysed? 12
Why do all profits tend to a minimum, and why have some countries a lower minimum of profit than others? Define the "Stationary State," explaining what causes retard it. Show by this, that statesmen need not fear diminishing the capital of a rich country by employing it for useful though unproductive purposes.

1. Define a rectilineal angle, a rhombus and a gnomon. 30
Distinguish between a postulate and an axiom. Write out the three postulates.

2. Upon the same base and on the same side of it there cannot be two triangles which have their sides which are terminated in one of the extremities of the base equal and likewise those which are terminated in the other extremity. 20

On a given straight line and on the same side of it, how many triangles can be described which have their sides equal to given lines? 20

3. If a straight line be divided into two equal and also into two unequal parts, the squares on the two unequal parts are together double of the square on half the line and the square on the line between the points of section. 20

Hence, if A B C be a triangle and D the middle point of BC, shew that the squares on AB, AC are together double of the squares on AD, and BD. 25

4. If a straight line be drawn from a given point to cut a circle, prove that the rectangle contained by the whole line and the part of it without the circle is equal to the square on the tangent drawn from the given point to the circle. 20

The points from which equal tangents can be drawn to a given circle lie on a circle. 20

5. If two triangles have one angle of the one equal to one angle of the other, and the sides about the equal angles proportional, the triangles shall be equiangular to one another, and shall have those angles equal which are opposite to the homologous sides. 25

Being given one angle of a triangle and the sum of the two sides which contain it, find the locus of the intersection of perpendiculars. 35

7. Draw tangents to a parabola from a given point. 30

Find a point such that the tangents from it to a parabola and the lines from the focus to the points of contact may form a parallelogram. 20

8. The sum of the focal radii vectores to any point on an ellipse is constant. 20

Find the locus of the centre of a circle touching the axis major of an ellipse, and the focal radii vectores of a point on the curve produced through the foci. 35

9. The section of a right cone made by a plane not perpendicular to the axis and not passing through the vertex is an ellipse, a hyperbola, or a parabola. 30

TRIGONOMETRY AND MENSURATION.

Examiner—MR. C. LITTLE, M. A.

The figures in the margin indicate full marks.

1. Define the unit of circular measure and prove that arcs of circles subtending the same angle at the centre are proportional to the radii. 20

Find the circular measure of the angle $175^{\circ} 47'$ correct to four decimal places. 20

2. Define the sine, cosine, and secant of an angle and shew how the values are changed by increasing the angle by $\frac{\pi}{2}$. 15

If $\sin \theta + \cos \theta = \frac{1 + \sqrt{3}}{2}$, find how many values of θ lie between 0 and 3π . 25

3. Trace the change in the value of the tangent as the angle varies from $\frac{3\pi}{2}$ to $\frac{7\pi}{2}$. 15

Find an expression including all angles which have a given tangent. 15

4. If $\cos \alpha + \cos \beta + \cos \gamma = 0$ 35
prove that

$$(1) \cos^3 \alpha + \cos^3 \beta + \cos^3 \gamma = 3 \cos \alpha \cos \beta \cos \gamma$$

$$(2) \cos^4 \alpha + \cos^4 \beta + \cos^4 \gamma = 2 (\cos^2 \beta \cos^2 \gamma + \cos^2 \gamma \cos^2 \alpha + \cos^2 \alpha \cos^2 \beta)$$

5. If $\alpha + \beta + \gamma = \pi$ 35
prove that

$$(1) \cos 2\alpha + \cos 2\beta + \cos 2\gamma = -1 - 4 \cos \alpha \cos \beta \cos \gamma$$

$$(2) 2 (\sin \beta \sin \gamma + \sin \gamma \sin \alpha + \sin \alpha \sin \beta)$$

$$= 16 \cos^2 \frac{\alpha}{2} \cos^2 \frac{\beta}{2} \cos^2 \frac{\gamma}{2} - \sin^2 \alpha - \sin^2 \beta - \sin^2 \gamma$$

6. Prove the following formulæ for a plane triangle 20

$$b = a \cos B + c \cos A.$$

$$\tan \frac{A}{2} = \sqrt{\frac{(s-b)(s-c)}{s(s-a)}}.$$

If D, E, F, be the feet of the perpendiculars from the angles of a triangle on the opposite sides, find the area of the triangle DEF. 20

7. At the top P of a tower of height h the angles of depression of two places A, B on a horizontal plane on which the tower stands are $45^\circ - \alpha$ and $45^\circ + \alpha$, respectively, P, A and B are in the same vertical plane shew that $AB = 2h \tan 2\alpha$. 30

8. Solve the triangle of which two sides and the included angle are given. 20

If $a=8$, $b=7$ $A=120^\circ$, find B and C 35

$$\log 7 = .8450980$$

$$\log 8 = .9030900$$

$$L \sin 60^\circ = 9.9375306$$

$$L \sin 49^\circ 16' = 9.8795287$$

$$L \sin 49^\circ 17' = 9.8796375$$

9. The area of a square is 18 square feet. A circle is described round it, find the area between the circle and the square. 30

10. The volume of a ring is 800 cubic inches, the radius of the cross section is 2 inches, find the length of the ring. 30

11. Shew that the area of the surface of a zone of a sphere is equal to the area of a certain portion of a cylinder enveloping the sphere. 25

Find the area of the surface of the zone having the following dimensions, Circumference of the sphere is 90 inches : distance of the ends of the zone from the centre 6 inches and 10 inches, on the same side of the centre of the sphere. 10

STATICS AND DYNAMICS.

Examiner—MR. C. LITTLE, M. A.*The figures in the margin indicate full marks.*

1. Assuming the truth of the parallelogram of forces so far as the direction of the resultant is concerned, prove it to be true for the magnitude of the resultant. 20

A bead strung on a smooth horizontal circular wire is in equilibrium under two impressed forces and the reaction. One impressed force is μ times the chord along which it acts, and the reaction is μ times the diameter. Find the direction and magnitude of the second impressed force. 20

2. Find the conditions of equilibrium of any number of forces acting in a plane. 20

Two equal uniform rods AB, BC are hinged at B, AB rests on a smooth peg, and the end C is in contact with a smooth vertical wall at a distance c from the peg. In the position of equilibrium find the distance of the peg from the hinge. 30

If l be the length of the rod find the largest value of $\frac{c}{l}$.

3. Find the C. G. of the surface of a cone. 10

ABCOA is a semicircular frame work without weight. O the centre, and B the middle point of the arc. At B a particle of mass M is placed, and along OA matter is distributed uniformly, m per unit of length. Shew that the inclination of AC to the vertical when ABC rests on a horizontal plane is given by $\tan \theta = \frac{2M}{am}$. What is the meaning of a as it appears in the expression $\frac{2M}{am}$? 25

4. State the laws of friction. 10

A uniform rod AB rests with one end on a rough horizontal plane, and the other on a smooth plane inclined at an angle α to the horizon, if in the limiting position of equilibrium $\mu = \frac{1}{2} \tan \alpha$, find inclination of the rod to the vertical. 25

5. Shew how to graduate the common steel yard. 15

The weight of a common steel yard is Q , and the distance of its fulcrum from the point from which the weight hangs is a , when the instrument is in perfect adjustment. The fulcrum is displaced to a distance $a + \alpha$ from this end: shew that the correction to be applied to give the true weight of a body which in the imperfect instrument appears to weigh 30

W is $(W + P + Q) \frac{\alpha}{a + \alpha}$, when P is the movable weight.

6. A uniform heavy rod movable about a smooth hinge fixed at A has its extremity B connected with a string which passing over a smooth pulley at a point C vertically over A ($AC = AB$) 30

sustains a given weight : find, by the principle of virtual work, the positions of equilibrium.

7. Prove the following formulæ for a body falling under gravity. 30

$$(1) \quad S = Vt + \frac{1}{2}gt^2$$

$$(2) \quad v^2 = V^2 + 2gs$$

8. Find the range of a projectile on an inclined plane. 15

A projectile is discharged with velocity v , at an inclination α , and n seconds afterwards a second one is discharged after it so as to strike it. If v' , α' be its velocity and elevation prove that, 30

$$2vv' \sin (\alpha - \alpha') = (v \cos \alpha + v' \cos \alpha') gn.$$

9. Prove that the times of falling from the highest point down chords of a vertical circle are the same. 15

Find the line of shortest descent to any plane curve from a point in the plane of the curve. 15

10. Find the total range of an imperfectly elastic particle on a horizontal plane. 25

A particle of elasticity e is projected from a point in the wall of a square room in a direction whose projection on the floor makes an angle θ with the wall. Shew that if the particle after striking each wall in succession returns to the point of projection, $e(\mu + 1) \cot \theta = e\mu + 1$, $\mu : 1$ being the ratio in which a horizontal line in the wall is divided by the point of projection. 35

ANALYTICAL GEOMETRY.

Examiner—MR. C. LITTLE, M. A.

The figures in the margin indicate full marks.

1. Find the equation of a straight line in the form $x \cos \alpha + y \sin \alpha - p = 0$. 30

Find the area of the triangle inclosed by three given straight lines, and write down the condition that these straight lines meet in a point.

2. Deduce the equation of a straight line passing through a given point and perpendicular to a given straight line. 35

By means of equations so formed prove that the perpendiculars from the angles of a triangle on the opposite sides meet in a point.

3. Find the equation of the tangent to the circle $x^2 + y^2 - a^2 = 0$ at any point, and put it in the form $x \cos \alpha + y \sin \alpha - a = 0$. 35

Straight lines pass through a given point and meet a given circle, find the locus of their poles.

4. A line PQ cutting the axes of co-ordinates in P and Q meets the circle $x^2 + y^2 - a^2 = 0$ so that the part inside the circle is constant ($=c$). On PQ as diameter a circle is described and through P a line PR is drawn parallel to the axis of y meeting the second circle in R. Find the locus of R. 40

5. The equation of the normal at any point of a parabola may be put in the form $y = mx - 2am - am^3$. 20

Shew that one or three normals can be drawn from any point to a parabola, and if m_1, m_2, m_3 be the values of m , $m_1 + m_2 + m_3 = 0$. 15

If the intercepts on the axis of y made by the tangent and normal at any point P of a parabola $y^2 = 4ax$ be $t + t^1$ shew that $(t^1 - 2t) a^2 = t^2$. 25

6. Prove that the directrix of a parabola is the polar of the focus, and also the locus of the points of intersection of tangents at right angles. 29

The circle described on any focal chord as diameter touches the directrix. 20

7. Find the equation of the director circle of the ellipse 15

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} - 1 = 0.$$

Shew the connection between the director circle of the ellipse and the directrix of the parabola.

8. In the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} - 1 = 0$, p and p^1 are perpendiculars from the foci on any tangent. Prove that $pp^1 = b^2$ and 40

$$\frac{p^2}{b^2} = \frac{2a}{r} - 1.$$

9. Find the equation of the hyperbola referred to its asymptotes as axes. 40

10. In any conic section if r and r^1 be focal distances at right angles to each other and l half the latus rectum, 40

$$\left(\frac{1}{r} - \frac{1}{l}\right)^2 + \left(\frac{1}{r^1} - \frac{1}{l}\right)^2 \text{ is constant.}$$

GEODESY.

Examiner—MR. W. B. BESTIC, A. M. I. C. E.

The figures in the margin indicate full marks.

[You are to answer only one of the first two questions and not more than seven of the remainder.]

1. Describe fully Gale's traverse system and the method of plotting by the traverse. 60

2. Describe how you would make and plot a trigonometrical survey of about 3 square miles of fairly open country and how you would fill in the details. 60

3. Construct a scale of 7 miles to the inch showing furlongs diagonally, and give its representative fraction. 20

4. State the adjustments required for a dumpy level and how you would make them. 20

5. Describe a pocket sextant and the method of using it. 20

6. In using a chain what are the points to be attended to in order to obtain an accurate measurement? 20

7. Show how to lay off a perpendicular with the chain. 20
8. Show how to find the distance of an inaccessible object using the chain only. 20
9. Explain how you would lay out a curve with the help of a theodolite, and state how you would check the correctness of your work. 20
10. Define clearly—meridian; latitude and longitude; zenith; and sensible horizon. 20
11. In levelling how do you make allowances for errors due to curvature and refraction? 20
12. What is the variation of the compass, and how would you find its amount at any given place? 20

MATERIALS OF CONSTRUCTION.

Examiner—W. B. BESTIC, A. M. I. C. E.

The figures in the margin indicate full marks.

[You are not to answer more than 8 questions.]

1. Define the structural uses and applications of cast-iron to engineering purposes. 50
2. Describe a 12-inch hollow cast-iron screw pile, giving sketch of plan and sectional elevation of the end carrying the screw blade, and plan and sectional elevation of a form of joint commonly used. 50
3. Give sketches of the various sections of bar iron [with their names] commonly made use of in construction. 50
4. Describe the different kinds of road-making materials used in Bengal. What considerations would you bear in mind in determining whether to use brick or stone metal for a road in the neighbourhood of Calcutta? 50
5. Describe either of the processes in use for the manufacture of bricks near Calcutta. 50
6. Write a specification for lime concrete to be used in the foundations of a building in Lower Bengal, and state the quantity of materials required per 100 cub. ft. of concrete. 50
7. Describe what you consider to be the best process for seasoning timber in India. 50
8. Describe the manufacture of Portland cement. 50
9. Explain how stone is quarried, ordinary powder being used for blasting. 50
10. Describe the structure and state the characteristic qualities of any good building stone procurable in Bengal. 50
11. Describe the manufacture of wrought iron from pig iron or the manufacture of steel by the Bessemer process. 50
12. State what you know of the different descriptions of gun metal. In casting bearings what proportions would you use of copper and tin? 50

CHEMISTRY.

Examiner—MR. A. PEDLER, F. C. S.*The figures in the margin indicate full marks.*

1. Each of the following substances is heated to a high temperature in a current of atmospheric air. State what will happen in each case, and if any chemical changes ensue, give equations to represent them. Iodine, Diamond, Quartz, Sulphur, Magnesium, Phosphorus, Wood, Silver, and Arsenic. 22
2. Explain the ordinary methods of making hydrogen gas. What are its properties and how can they be experimentally shown? 16
3. What volume of Carbon dioxide, measured at 17°C and 720 m. m. pressure, can be obtained by the action of Hydrochloric Acid on 50 grams of marble or Calcium Carbonate, (Ca=40). 22
4. Give the methods of making ordinary quicklime from Chalk; describe the properties of the substance produced, and the uses to which it is put. What weight of water will 100 lbs. of Quicklime combine with to produce slaked lime? 20
5. Explain what are the industrial uses of the following substances, and state the properties on which such uses depend. Soda Ash, Sulphuric Acid, Chloride of Lime, Copper, Nitric Acid, Sodium Silicate, Iron, and Steel. 24
6. State the compounds which the non-metals and metals form with hydrogen and give their formulæ. 16
7. State how metallic Zinc is obtained from its ores. What are its properties and uses? 18
8. What is the composition of Roman cement and of Portland cement? How can they be prepared? 20
9. Describe the action of water upon metallic lead. Give the tests you would employ to detect the presence of minute quantities of lead in drinking water. 18
10. What is the composition of each of the following alloys, and state how you would detect the metals which are present: Brass, Bronze, Muntz's metal, Type metal, Solder, German Silver and Gun metal. 24

LIGHT AND HEAT.

Examiner—MR. A. PEDLER, F. C. S.*The figures in the margin indicate full marks.*

1. How is heat transmitted in (a) solids, (b) liquids, and (c) gases. Explain how you would experimentally prove your statements. 16

Why do we wrap ice in a blanket to prevent it melting, and why do people use blankets to keep themselves warm in winter?

2. Describe Breguet's Metallic Thermometer, and also describe the construction of Rutherford's maximum and minimum thermometers. 18

State what form of thermometer or other instrument you would use to determine the temperatures (a) of an intensely cold freezing mixture, (b) of the Human body, (c) of boiling water and (d) of melted iron.

3. Explain what is meant by the terms Specific heat, Latent heat of fusion and Latent heat of evaporation. 22

Given that one part of Carbon in burning produces 8080 thermal units; state exactly what would happen if the total heat obtained by the complete combustion of 3 lbs. of Carbon were applied to a mass of 100 lbs. of water at 0°C .

4. Describe Runsen's Ice Calorimeter, and explain how it is used. 20

200 grammes of Ice at -12°C are introduced into some water at 0°C ; 14.5 grammes of water at 0° freeze about the lump of ice which is immersed, while its temperature rises to 0° . Required the specific heat of ice, if the latent heat of water is 79.

5. State what you know with reference to the Radiation, Reflection and Absorption of Heat. Describe the apparatus which has been used to prove the laws of radiation and reflection of heat. 22

6. What is meant by "energy" and what by the term "mechanical equivalent of heat." Discuss very briefly the methods which have been used in determining the mechanical equivalent of heat. 24

7. Roemer determined the velocity of light by observations of the eclipses of one of Jupiter's Moons. State clearly the nature of his observations, and the reasoning by which he was able to deduce the velocity of light. 16

8. A beam of sunlight is brought to a focus by a lens made of a single piece of glass with convex faces. Explain the appearance observed upon a screen placed (a) between the lens and the focus, and (b) beyond the focus. Explain clearly to what cause these appearances are due, and how they can be got rid of. 20

9. A luminous object is at first held close to a concave mirror, and is then moved along its principal axis. Explain clearly what kind of images will be formed, and where? How are images formed by convex mirrors? 18

10. Under what circumstances does double refraction of light take place? What is the condition of the rays thus obtained, and how would you experimentally show that such is the case? What is a Nicol's prism? 24

ELECTRICITY, MAGNETISM AND TELEGRAPHY.

Examiner—MR. A. PEDLER, F. C. S.*The figures in the margin indicate full marks.*

1. What is meant by Magnetic Induction? How can it be experimentally shown, and how do you explain the phenomenon? 18
2. Define what is meant by the magnetic elements of a place. Describe the Declination Compass, and explain how it is used practically. Do the magnetic elements of a place vary? 16
3. Explain the ordinary processes of magnetisation, and describe the methods of single, separate, and double touch. 20
4. What are the laws of electrical attractions and repulsion, and how can they be established? 16
5. Describe how you would construct an Electrophorus. Show clearly how it can be worked, and explain the source of the electricity which can be generated from it. 22
6. If you are given a plate electrical machine and a battery of six Leyden Jars, how will you charge and discharge the battery? Describe some of the effects which could be produced by such a battery. 20
7. Describe how you would fit up and put together a battery of Grove's Cells for working an electric light. What is the part played by the sulphuric and nitric acids in the generation of electricity? 22
8. Describe some one form of Magneto-Electric machine. Explain the action when worked, and from whence the electricity is derived. 24
9. Explain the principles on which electro-metallurgical processes are generally conducted. How can electro-gilding and electro-plating be carried out? 18
10. Describe briefly the construction and working of a Morse's telegraph. 24

DRAWING.

Examiner—MR. F. J. E. SPRING, L. C. E., MEM. INST. C. E.

Three hours and a quarter allowed for this paper.

The figures in the margin indicate full marks.

1. Make a complete set of working drawings of the article placed in front of you, a railway carriage axle brass, upon any suitable scale, with fully figured dimensions, and any degree of finish that may be desired. The drawings must be such as would suffice to permit of a workman making the article from them.

1. Plan 30
2. Elevation, front 30

- | | |
|--------------------------------------------------------|----|
| 3. Elevation, side | 30 |
| 4. Section, in the direction considered as most useful | 30 |
| 5. Isometric drawing, on isometric scale. | 50 |
2. (a.) A rectangular parallelopiped 10 ft. long, 8 ft. wide, and 9 ft. high, stands on the ground with its near or longer face parallel to and 5 feet in from the picture plane. The left hand face of the solid is 6 feet to the right of the spectator whose eye is 4 feet from the ground. The spectator is 12 ft. from the picture plane. Draw the solid in perspective on any convenient scale. 15
- (b.) A rod, 15 ft. long, leans against the left side of the above solid, the lower end of the rod is on the ground, and 2 feet to the left of the spectator, and 8 feet in from the picture plane. The rod rests near its upper end against the centre of the left hand top edge of the solid. Draw the rod. 15
- NOTE. In question No. 1, half marks will be allotted to correctness, and the remaining half marks will be divided between neatness, finish, and lettering.

L. E. and B. E. Examinations.

1887.

DIFFERENTIAL AND INTEGRAL CALCULUS.

Examiner—MR. C. LITTLE, M. A.

1. Define a differential coefficient. Deduce the differential coefficients of $\sin x$, e^x , and x^m ,

2. Differentiate the following functions,

$$(1) \tan^{-1}(e^x) \log \cot x.$$

$$(2) \sin(e^x \log x) \sqrt{1 - (\log x)^2}$$

$$(3) \text{ If } y = \log \frac{y}{a + bx}, \text{ find } \frac{dy}{dx}$$

3. Find the n^{th} differential coefficient of y with respect to x if $y = \frac{1}{x^2 + a^2}$, expressing it in terms of θ , where $\tan \theta = \frac{x}{a}$.

4. Prove Maclaurin's theorem.

$$\text{Shew that } \log(1 - x + x^2) = -x + \frac{x^2}{2} + \frac{2x^3}{3} + \frac{x^4}{4} - \frac{x^5}{5} - \frac{x^6}{3} - \frac{x^7}{7}$$

5. Define maximum and minimum values of a variable quantity. Investigate the conditions for a maximum or minimum value of a function of one variable.

Shew that the height of the cone of greatest convex surface, which can be described in a given sphere is to the radius of the sphere as 4 : 3.

6. Integrate

$$(1) \int \sqrt{a^2 + x^2} \, dx, \int \frac{dx}{\sqrt{a^2 + x^2}}, \int \frac{dx}{a + b \cos x}$$

$$(2) \int \frac{1 - x^2}{1 - 2x^2 - 3x^4} \, dx, \int \frac{\cos 3\theta}{\sin 2\theta} \, d\theta.$$

7. Integrate

$$(1) \int \frac{x^2 - x + 1}{(x+1)^2 (x-1) (x^2 - x + 1)} \, dx.$$

$$(2) \int_0^{\frac{\pi}{2}} \sin^{2m+1} \theta \cos^{2n} \theta d\theta$$

8. Prove a formula for reducing $\int \frac{x^m dx}{(a+cx^2)^n}$ m and n being both positive.

Apply it to find the integral $\int \frac{x^3}{(a+cx^2)^2} dx$

9. P is a point on the catenary $y = \frac{c}{2} \left(e^{\frac{x}{c}} + e^{-\frac{x}{c}} \right)$, PN the ordinate, and PT a length measured along the tangent equal to the arc of the catenary from the vertex to P , shew that PTN is a right-angled triangle.

10. Shew that the area between the curve $x^3 + y^3 - 3axy = 0$ and its asymptote is equal to $\frac{3a^2}{2}$, also find the area of the loop.

HYDROSTATICS.

Examiner—MR. C. LITTLE, M. A.

1. Define a fluid, and prove that at any point of a fluid the pressure is the same in all directions. How is pressure in a liquid measured?

2. Prove that the pressure at every point of a horizontal plane in a liquid at rest under gravity is the same.

Find the depth of a point at which the pressure is 200 lbs, assuming the atmospheric pressure to be 15 lbs the square inch, and an inch the unit of length.

3. Shew that the heights of the free surfaces, above the common surface of two liquids of different densities, at rest in a bent tube, are inversely proportional to the densities.

If in a circular tube two fluids be placed so as to occupy 90° each, and if the diameter joining the two open surfaces be inclined at 60° to the vertical, prove that the densities are as $\sqrt{3}+1 : \sqrt{3}-1$.

4. Find the resultant pressure on a surface in contact with liquid.

A cylinder is immersed in water in such a way that its axis is vertical and its top just level with the surface. Find the resultant pressures on its bottom, and on the part of its curved surface on one side of a vertical plane through the axis.

5. Explain the phenomenon called the Hydrostatic Paradox.

The areas of the sections of the hydrostatic bellows are 50 square feet and $\frac{1}{2}$ square inch, find how high the water must rise in the tube to support 150 lbs on the bellows.

6. State and prove the necessary conditions that a body should float in a fluid.

A cylinder which floats in water under an exhausted receiver, has $\frac{2}{3}$ ths of its axis immersed: find the depth of immersion when air whose specific gravity is .0013 is admitted.

7. Compare the specific gravity of two fluids by weighing the same solid in each.

Two metals of which the specific gravities are 11.22 and 7.25 when mixed in certain proportions without condensation form an alloy whose specific gravity 8.72: find the proportion by volume of the metals in the alloy.

8. Describe the diving bell, and find the tension of the chain which supports it when immersed.

Does the tension of the chain increase or decrease as the bell is lowered?

9. Describe the air pump, and find the density of the air in the receiver after n strokes.

10. A closed cylinder with its axis vertical is filled with two gases, which are separated by a heavy piston: determine the position of the piston, it being given that either fluid, if it filled the whole cylinder, would support a pressure equal to $\frac{2}{3}$ ths of the weight of the piston.

GEOLOGY.

Examiner—MR. A. PEDLER, F. C. S.

The figures in the margin indicate full marks.

1. Define the terms Syncline, Anticline, Inversion, Vertical 30
Fault, Outcrop and Strike as applied in Geology.
2. Describe the different kinds of springs, and show by 45
diagrams how they are formed. What are intermittent springs
and Geysers, and how do you account for them?
3. Describe the usual phenomena which attend earthquakes, 45
and state what theories have been put forward as to their
origin.
4. Describe the mode of formation of coral reefs. What is 45
Darwin's theory with reference to them?
5. What are submerged forests? How have they been 25
formed, and what do they indicate?
6. State the general characteristics and mineral composition 35
of Granite, Syenite, Trachyte, and Serpentine.
7. What is meant by mineral veins or lodes? What are the 40
special terms used in describing them, and what are their mean-
ings? What theories have been proposed as to the origin of
mineral veins.
8. Describe the geological conditions under which the prin- 35
cipal ores of Copper, Iron and Lead occur.

MINERALOGY AND METALLURGY.

Examiner—MR. A. PEDLER, F. C. S.

The figures in the margin indicate full marks.

1. State clearly and concisely the characters you would look for and the tests you would employ to refer a mineral to its class. Describe according to these principles the characters of the following minerals. Diamond, Martial Pyrites and Calc-spar. 25
2. Describe and sketch two or three of the principal forms belonging to each of the crystallographic systems. 20
3. Describe the crystalline form, formulæ etc. of the following minerals—Albite, Muscovite, Witherite, Rock Salt, Rock crystal and Apatite. 35
4. What is the mode of occurrence, the nature and name of each of the minerals which are commonly used for the extraction of the following substances :—Lead, Copper, Iron and Arsenic. 40
5. Describe the principal ores of Manganese and of Tin, giving their crystalline form, chemical composition, mode of occurrence, and the principal localities from which they are obtained. 30
6. Describe the Belgian process for the extraction of Zinc, and state its advantages or disadvantages compared with the Silesian process. 35
7. Describe Pattinson's process for the desilveration of Lead. 25
8. Give a good description accompanied by sketches of (a) a Puddling Furnace and (b) a Bessemer Converter arranged conveniently for working. 30
9. Describe the processes usually employed in the extraction of mercury from its ores. 30
10. Describe the extraction of Gold from its ores, and state clearly the methods which are used in purifying the Gold thus obtained. 30

DETAILS OF CONSTRUCTION AND PRACTICE OF BUILDING.

Examiner—MR. W. B. BESTIC, A. M. I. C. E.

The figures in the margin indicate full marks.

[You are not to answer more than eight questions.]

1. Explain the reasons that commonly determine a choice between an arch of brick or stone masonry and a superstructure consisting of straight girders for a bridge to carry a road or railway over a stream. 50

2. Supposing that a wrought iron superstructure is to be designed for a bridge to carry a roadway on brick arches supported by cross girders, explain all the considerations necessary to determine a suitable distance between the latter. 50
3. What precautions are taken to prevent unequal settlement in a building? 50
4. Describe clearly the details of a terrace floor laid on arches supported by iron beams. 50
5. Sketch a Queen-post truss to carry a tile roof. Span 30 feet; pitch of roof 30° . 50
6. Write a specification for brick masonry in lime mortar. 50
7. Describe a 12-inch hollow cast-iron screw pile, giving sketch of plan and sectional elevation of the end carrying the screw blade, and plan and sectional elevation of the two forms of joint. Describe briefly the method of sinking a screw pile. 50
8. Describe a method of constructing a firm foundation in water by sinking built-up cast-iron hollow cylinders, giving sketches with dimensions of the joints of the segmental plates (the load of the superstructure not resting on the metal). 50
9. Describe the nature and use of a coffer-dam, giving a careful sketch of a sectional elevation of a coffer-dam, with dimensions. 50
10. Describe and give sketches of an apparatus for excavating material in the interior of a brick well or a hollow cylinder, giving dimensioned sketches. 50
11. Define the structural uses and applications of cast-iron to engineering purposes. 50
12. Give sketches of the various sections of bar iron (with their names) commonly made use of in construction. 50

ROADS AND RAILWAYS.

Examiner—MR. F. J. E. SPRING, L. C. E. MEM. INST. C. E.

1. How much earth will you have to arrange to get from side cuttings for the embankment lying between the two cuttings, of which the heights and depths are given below. These heights and depths are at 100 ft. intervals. The earth from the two cuttings is to be put into the bank. Breadth of bottom of cutting 20 ft. and of top of bank 15 ft. slope of cutting 1 to 1, and of Bank 2 to 1.

Cutting, depth.	Bank, height.	Cutting, depth.
0	0	0
5	12	8
8	15	3
6	15	12
10	14	6
5	10	4
3	0	0

2. Describe the precautions usually taken in getting out deep open foundations where the ground is liable to fall in. What do you know about pile driving?

3. Describe several kinds of screw piles and explain how they are driven. What appears to you to be the principal objection to the use of groups or clusters of screw piles for the piers of deep rapid rivers?

4. Bull's, Fouracre's, and Bruce's dredgers are used for sinking well foundations. Describe these tools and their action, with illustrative sketches.

5. Design a retaining wall for the side of a cutting 30 ft. deep, in moist treacherous soil, explaining fully the reasons for all parts of your design. Intricate calculations unnecessary.

6. With a short specification for metalling a main line of road, subject to heavy traffic. What arrangements are necessary for the maintenance of such a road? At what time of year are repairs best carried out?

7. What are the principal *resistances* to motion on a railway, and on what do they depend? Write a short but intelligent essay on these resistances so as to show that you have studied and understand them.

8. Give sketches and a clear explanation of a set of points and crossings, showing that you clearly understand them. What is the *lead* of a crossing, and on what does it depend?

9. Describe the arrangements that are necessary at an ordinary railway station, near a small town that sends away about half a train load of goods daily. Explain the uses of as many of the appliances as you can think of, which lie between the two distant signals.

10. You have to lift from the ground to its bed a 60 ft. girder, weighing about 7 tons, through a height of about 20 ft. Your tools are two 5-ton winches, plenty of rope, some blocks, and strong poles of sizes. The ground is dry sand. Describe, illustrating with sketches, how you would set to work, giving *roughly* the sizes of ropes, poles &c.

11. In rivetting up a large girder you have to insert some rivets 6 inches long. What is the risk of damage to the rivet, and what precautions should be taken to avoid the risk? If the rivets are steel what further risk is there?

12. What are the considerations which usually influence the choice of a route for a line of railway between two given places, as regards the intermediate country through which it has to pass.

Note.—Nine out of the twelve questions only are to be attempted. The value of each question is $33\frac{1}{3}$ marks. Total value of 9 questions 300 marks.

HYDRAULIC ENGINEERING.

Examiner—MR. W. B. BESTIC, A. M. I. C. E.

The figures in the margin indicate full marks.

[You are not to answer more than eight questions.]

1. State briefly the principal laws of fluid friction.

2. Water is discharged from a vessel, open at the top and kept constantly full, by means of an orifice in its side, which is thin and plane. Sketch and describe the general character of the motion, and find a formula for the discharge expressed in terms of suitable co-efficients. 50

3. A weir 100 feet wide is so placed that the depth of water is 4 feet above the crest on the up-stream side and 18 inches above the crest on the down-stream side. Calculate the discharge. 50

4. An orifice 4 feet wide and 2 feet deep has 10 feet head of water above its centre on the up-stream side, and the back water on the other side is at the level of the centre of the orifice. Find the discharge. 5

5. A pipe 12 inches in diameter is suddenly enlarged to 18 inches and then to 24 inches diameter. Each section of the pipe is 100 feet long. Find the loss of head in friction in each length, and the loss due to shock at each enlargement. 50

Discharge = 10 cubic feet per second.

Co-efficient of friction = .0106.

6. Sketch roughly to scale the hydraulic gradient of the pipe in the last question. 50

7. A channel is to be constructed for a discharge of 2,000 cubic feet per second. The fall is $1\frac{1}{2}$ feet per mile; side slopes 1:1; bottom width ten times the depth. Find dimensions of channel. 50

8. State what is known by observation of the distribution of velocities in a vertical section of a stream parallel to the direction of flow. The surface velocity being five feet per second, what is the most probable mean velocity? At what depth is a velocity equal to the mean velocity found? 50

9. Describe the different kinds of spurs used for deflecting the current of water in a river. 50

10. Describe the mode of construction ordinarily adopted for earthen dams. 50

11. What is the average number of gallons of water per head of population generally assumed to be requisite in designing water-works? To what minimum by careful attention has this quantity been reduced? 50

12. Describe, with sketches, a syphon to carry a small stream under a canal. 50

APPLIED MECHANICS.

Examiner—MR. F. J. E. SPRING, L. C. E., MEM. INST. C. E.

Full marks, 300, will be awarded for nine out of the twelve questions. No more than nine must be attempted. The value of each question is $33\frac{1}{3}$ marks.

1. The horizontal tie rod of an iron roof truss has a section of $4'' \times 1''$. Bar iron of sufficient length not being procurable it is necessary to make a joint in the middle of the tie. It is also con-

sidered advisable that the joint should be so designed as to permit of the tie being tightened up if necessary to the extent of one inch. Design the joint, and fully explain the reasons of all your dimensions and of the design.

2. What load do you calculate may be safely placed upon the top of a cylindrical cast iron verandah column, 9" external diameter and 1" thick. The height of the column is 10 feet, and it has a well designed base and capital with square level ends. If Gordon's formula is used the constant may be taken as $\frac{3}{800}$.

3. Design an ordinary wrought iron king post roof truss. Span 30 ft., height 10 ft., weight of roof including truss 10 lbs. per super foot. Trusses 10 ft. apart. Wind pressure may be taken at 40 lbs per square foot. Use the graphic method.

4. It is found by experiment that a weight of 730 lbs. just breaks a little beam of sal timber one inch square in section and resting on supports one foot apart, when applied in the middle of the beam. Determine from these data how far apart you would be justified in placing the beams of a flat roof, which weighs complete with live load 180 lbs. per square foot. The span of the roof is 20 ft. and the size of the sal beams is 10" x 15".

5. Suppose the beams in the last question to be 10 ft. apart, what is the shearing force at a section of the beam 5 ft. from one wall? What is the shearing force at the wall?

6. Given that the breaking weight of a Manilla rope, in tons, is one quarter the square of the circumference in inches, find graphically what size of rope would be required as a guy for a pair of shear legs in the following case. Weight to be lifted 2 tons. Shear legs tilted over 30° from the vertical and spread 6 ft. apart at base. Length of shear legs from base to place where they are joined at top 30 ft. Guy rope anchored 100 ft. back from a live joining the feet of shear legs. Factor of safety 10.

7. Find graphically the stresses on all the members of a Whipple Murphy truss, with the following conditions. Span 150 ft. Depth 15 ft. Ten bays. Total weight of the pair of girders complete with cross girder rails &c. 100 tons. The stresses due to the dead load only are required. *Sketch of girder given.*

8. Find either graphically or by calculation the stresses on the first diagonal from the abutment on the right hand side, and in the bay of the top boom next to and at the right hand side of centre of span, due to the moving load only, when the right half of the bridge in question 7 is covered by a train weighing 1 ton per foot run. Load on top. *Conditions given on sketch.*

9. What conditions do you consider to be necessary for a well designed joint? What are the objections to the use of a single cover plate on one side of a lengthening joint in tension? Design a joint to connect two plates 12" x 1", subject to a tensile stress of 60 tons, giving all dimensions of rivets &c.

10. Prove that the moment of torsional resistance of a solid cylindrical shaft $\frac{1}{16} \pi q d^3$, when d = diameter of shaft, and q = maximum shearing stress intensity at the cylindrical surface of the shaft.

Given this formula design a shaft to stand a pressure of 5 tons, applied so as to twist the shaft, at the end of a crank or lever 5 ft.

long. No part of the shaft to be in greater stress than 5 tons per sq. inch.

11. A retaining wall with a vertical face is 30 ft. high, 10 ft. thick at bottom, and 2 ft. thick at top. The earth which it supports is level on top, and its natural slope or angle of repose is 45° . The weight of the masonry is 150 lbs. per cb. ft., and of the earth 130 lbs.; the wall is battered at back and not offsetted. Find graphically or otherwise where the resultant pressure cuts the base of the wall.

12. The load on the platform of a suspension bridge is one ton per foot run. Span 600 ft., dip 40 ft. How many square inches should there be in the section of the chains at the piers and at centre of span, if the greatest stress intensity permitted is 5 tons per square inch.

MECHANISM AND THE STEAM ENGINE.

Examiner—MR. F. J. E. SPRING, L. C. E. MEM. INST. C. E.

1. "The steam engine is an apparatus whereby the potential or latent energy of coal is caused to manifest itself as Molecular action, or Heat: and is eventually transformed into that form of external and actual energy known as motive power."

Explain the above in such a way as to show that you clearly understand what it means, dealing separately with the combustion of the fuel, the transfer of heat to the water resulting in the generation of steam, and the obtaining of motive power from the steam: and trace as well as you can the principal causes of loss of heat throughout the cycle of operations.

2. The following indicator diagram is taken off the cylinder of a condensing engine. The pressure in the boiler is 40 lbs. Judging from an inspection of the diagram what would you say were the principal faults of the engine? *Diagram given.*

3. What is the lead of a slide valve? How is it given in a locomotive engine, and why?

4. Sketch sections of a locomotive boiler, and explain the meaning of the several parts, and describe its essential details and fittings including smoke-box and fire-box.

5. Briefly show that you understand the principles which have led to the extensive use of the compound engine. What are the principal features of the Corliss engine?

6. What is the principle of Giffard's Injector? Illustrate with sketches.

7. Compare the velocity of a piston at any point of its stroke with the corresponding velocity of the crank.

8. Explain how it is possible to transfer considerable power from an engine to machinery by means of a comparatively weak band.

What are the conditions that a band shall convey motion from one pulley to another when the axles are neither parallel nor meeting in a point. How is the strength of bands calculated?

9. Explain fully, illustrating with sketches, how a shaft rotating continuously in one direction is made to convey motion to another shaft in the same or in the reverse direction at will, by means of bevil wheels and a sliding clutch. In other words explain and illustrate the sliding clutch and bevil wheel reversing gear.

10. Fully explain the action and special advantages of the knuckle joint.

11. Show that you clearly understand the principles upon which the form of the teeth of wheels depends. How are they drawn in practise?

12. Describe and sketch Stephenson's link motion as applied to the locomotive engine.

Note.—The first six questions are "Steam Engine," and the remaining six are "Mechanism." Full marks, 300, will be given for nine questions out of the twelve, of which five must be steam engine and four mechanism questions. The value of each question in 33½ marks. No more than nine may be attempted.

DRAWING.

Examiner—MR. F. J. E. SPRING, L. C. E. MEM. INST. C. E.

The figures in the margin indicate full marks.

1. Make a complete set of working drawings of the article 80
placed in front of you, full size *Locomotive spring hanger*.
2. Make an isometric drawing of the article placed in front 60
of you, on the proper isometric scale *Railway carriage axle
brass*.
3. Make a perspective drawing of the article referred to in 60
question 2. The spectator is 12 ft. from the picture plane, the
eye is 5 ft. above the ground, the near face of the article is 6 ft.
back from, and parallel to the picture plane, and it lies entirely
to the left of the spectator, its nearest face on the left being
four feet from the direction in which he is looking. The article
may be considered to be as many feet long, broad, high &c. as
it measures in inches. Scale one inch to a foot.

MATERIALS OF CONSTRUCTION.

Examiner—MR. F. J. E. SPRING, L. C. E. MEM. INST. C. E.

1. You require stone for the face of a dock wall which is exposed alternately to air and water: how would you test such stone for durability?
2. What are the essential qualities of a good brick earth?
3. Fully describe either a flame kiln or a Bull's kiln for brick burning, explaining in detail the method of loading and firing them, illustrate with sketches, and give probable outturn.

4. What do you know about the seasoning of timber? What do you know about the properties and uses of Teak, Sal, and Cotton wood?

5. What do you know about the Burrakur ironworks which you have visited?

6. In a country blacksmith's (*lohar's*) shop how would you test whether a piece of iron was cast, wrought, or steel? Give a simple rule for the weight of bar iron.

7. How would you proceed to test a specimen of kunker for hydraulicity? Fully explain the chemical reasons for the processes which you would use.

8. Describe a perpetual kiln for burning kunker lime, fully explaining its action and the amount of its probable outturn.

9. What precautions should be taken in the treatment of brick and stone before they are used with hydraulic mortar? Fully explain the reasons of the precautions.

10. Write a specification for a concrete, bricks and a fat lime being the available materials.

11. Write a brief specification for coursed rubble masonry.

12. What do you know about the manufacture, chemistry, properties, uses, and method of application of Portland cement?

Note.—Full marks given for 10 out of the above 12 questions, each question is worth 20 marks. Total marks 200.

Tagore Law Examination.

1887.

FIRST PAPER.

Examiner—MR. G. S. HENDERSON.

1. Give a brief outline of the history of rise of the right of testation among Hindus. In what respect, if any, is the idea of testamentary devise opposed to the early Hindu Law?

2. Distinguish between the right of testamentary devise in later times among Hindus governed by the Dayabhaga and the Mitakshara respectively, giving the main grounds for the existence of the distinction.

3. At the present time is there any restriction upon the power of a Hindu of the Bengal School to dispose of (1) ancestral and (2) self-acquired property? Is there any difference in extent between his right of devise and his right of alienation by gift or sale in respect of these classes of property respectively.

4. What limit (if any) was established by the Tagore case in respect of the power of a Hindu testator to create estates by will? If estates unauthorized by law are created through the intervention of trusts, are the trusts valid?

5. State the circumstances under which, and the main grounds upon which the Hindu Wills Act was passed by the Legislature. In what respects (if any) did it enlarge or curtail the right of testation or alter the mode of testation as then recognised among Hindus in the Presidency of Bengal?

6. Previous to the Hindu Wills Act which embodied S. 101 of the Indian Succession Act what was the rule against perpetuities, and to what exception was such rule subject?

7. What is the effect in a Hindu Will of a restriction upon alienation in respect of property given by the will? How are trusts for accumulation to be construed?

8. How far has a Hindu married woman power to dispose by will of property (1) which is her *stridhan* (2) which is inherited from her husband or (3) which is inherited from her father. Has the Hindu Wills Act in any way altered the previous law as to the testamentary power of Hindu married women?

9. What estate does a Hindu widow take under a simple devise by her husband to her of immoveable property? Is there any special rule of construction adopted by the Courts in dealing with gifts by will to females?

SECOND PAPER.

Examiner—MR. G. S. HENDERSON.

1. State shortly the chief general rules as to the construction of wills. When may general words in a will be construed in a restricted sense, and when may words be construed in a wider sense than that which they usually bear?

2. Where in a will the name or description of a legatee is erroneous and there is no reasonable doubt as to the person who was intended to be named what is the effect of the mistake? Under what circumstances may words material to the full expression of the testator's meaning be supplied?

3. Who will take under a bequest made to a described class of persons of whom some are not alive at the testator's death?

4. What is meant by lapse? Where a general residue is given to several persons to be equally divided among them and one of them dies before the testator, what becomes of his share? To what property is a residuary legatee entitled?

5. Explain the doctrine of election.

What is the effect of a provision for a legatee by settlement or otherwise being made by the testator subsequent to the date of his will? In such a case is there any difference between the law in India and that in England?

6. Under what circumstance may parol evidence of the intentions of a testator be received? If a will be lost, how may its contents be proved? May the declarations of the testator made after the execution of the will be received as evidence of the contents?

7. To what extent may a Mussulman dispose of his property by will? What is the effect of his bequeathing a legacy to one of his heirs?

8. If property has been bequeathed by a Mussulman to one person, what is the effect (1) of a subsequent bequest, or (2) of a subsequent sale or gift of the same property to another person?

M. A. Examination.

1887.

THE DRAMA.

Examiner—MR. K. DEIGHTON, M. A.

1. Lamb remarks that "Lear is essentially impossible to be represented on a stage": On what grounds is this criticism made? Mention anything in the character of representation in Shakespeare's day which would tend to lessen some of the difficulties. What considerations led Garrick to accept certain adaptations in acting?

2. Consider the theory that the opening scenes in *King Lear* are founded upon a gross improbability. In what respects would you compare Lear with Timon? Show by a reference to different scenes how the introduction of the comic element into *King Lear* affects the tragic character of the play. With what chief objects does Shakespeare appear to have interwoven with the main plot the story of the Gloucester and his sons?

3. Explain the aptness of the title "Much Ado about Nothing." Criticise Grant White's theory on the subject. To what dénouement in another of Shakespeare's plays does the marriage of Hero and Claudio bear a resemblance, and to what necessity, real or supposed, is such dénouement in each case due? Compare the characters of Beatrice and Rosalind.

4. Mention the chief points in which Shakespeare in *Much Ado* has departed from his originals, and discuss that departure in the case of Don John. What was Coleridge's point when he said that any other less amusingly absurd watchmen than Dogberry and Verges would have answered the necessities of the action? and how has this statement been criticised?

5. In what sense may it be said that Shakespeare's Historical Plays disclose much of the writer's personality? Point out the double aim which he seems to have had in the construction of *King John*. State the *more important* deviations from actual history in this play, and the reasons which prompted such deviations. What is your conception of Constance's character?

6. "The transition from the Julius Cæsar of Shakespeare to his Antony and Cleopatra produces in us the change of pulse and temper experienced in passing from a gallery of antique sculpture to a room splendid with the colours of Titian and Paul Veronese": explain this. Sketch the character of Antony in the play by a reference to the various impressions which it made upon the different personages therein.

7. Marlowe is regarded as the father of the English drama: show by a historical sketch of the works of his predecessors how this title is justified. To what misconception of their models did dramatic writers who before Marlowe's time used unrhymed verse owe it that their lines lacked that freedom of movement which he was the first to display? In what particulars did Marlowe show his power most strongly, and in which of the higher qualifications of a dramatist was he most wanting? Compare Marlowe's *Edward II* with Shakespear's *Richard II*.

8. Annotate the following passages, pointing out in each case the immediate context:—

(a). *Gon.* You have obedience scanted,
And well are worth the want that you have wanted.

Cor. Time shall unfold what plaited cunning hides;
Who cover faults, at last shame them derides.

(b). If wolves had at thy gate howl'd that stern time,
Thou should'st have said, 'Good porter, turn the key,'
All cruels else subscribed.

(c). That nature, which contemns its origin,
Cannot be border'd certain in itself;
She that herself will sliver and disbranch
From her material sap, perforce must wither
And come to deadly use.

(d). But do you speak this with a sad brow? or do you play the flouting Jack, to tell us Cupid is a good hare-finder and Vulcan a rare carpenter? Come, in what key shall a man take you, to go in the song?

(e.) By my troth, 's but a night-gown in respect of yours: cloth o' gold, and cuts, and laced with silver, set with pearls, down sleeves, side sleeves, and skirts, round under-borne with a bluish tinsel.

(f.) *D. Pedro.* What a pretty thing man is when he goes in his doublet and hose and leaves off his wit!

Claudio. He is then a giant to an ape; but then is an ape a doctor to such a man.

(g.) Here's a stay
That shakes the rotten carcase of old Death
Out of his rags!

(h.) The colour of the king doth come and go
Between his purpose and his conscience,
Like heralds 'twixt two dreadful battles set;
His passion is so ripe, it needs must break.

(i.) But such is the infection of the time,
That, for the health and physic of our right,
We cannot deal but with the very hand
Of stern injustice and confused wrong.

(j.) Equality of two domestic powers
Breed scrupulous faction: the hated, grown to strength,
Are newly grown to love.

(k.) *Ag.* O, rare for Antony!

Eno. Her gentlewomen, like the Nereides,

- So many mermaids, tended her i' the eyes,
And made their bends adornings.
- (l.) *Sil.* Thou hast, Ventidius, that
Without the which the soldier and his sword
Scarce grants distinction.
- (m.) Must I be unfolded
With one that I have bred ? The gods ! it smites me
Beneath the fall I have. Prithee, go hence :
Or I shall show the cinders of my spirit,
Through the ashes of my chance.
- (n.) We will find comfort, money, men and friends
Ere long, to bid the English King a base.
- (o.) Our kindest friends in Belgia have we left,
To cope with friends at home ; a heavy case
When force to force is knit, and sword and glaive
In civil broils make kin and countrymen
Slaughter themselves in others, and their sides
With their own weapons gored.
- (p.) Bring him unto a hurdle, drag him forth ;
Hang him, I say, and set his quarters up.

POETRY, &c.

Examiner—MR. K. DEIGHTON, M. A.

1. Indicate by reference to the *Canterbury Tales*, Chaucer's attitude towards the religion of his times. Give a brief account of Ballad literature in England, comparing its character with that of literature of a similar kind in other countries. What is the origin and meaning of the word Ballad ?

2. What different elements are united and harmonized in the *Faery Queene* ? Point out the chief merits of Spenser's style, and the chief defects in the plan of the poem. Give a brief analysis of the Second Book. Contrast as to purpose Spenser's *Faery Queene* and Bunyan's *Pilgrim's Progress*.

3. What is the twofold object with which Duessa and Archimago are introduced at the opening of the "pageant ?" Give instances of parallelisms and contrasts in the episodes of the two first Books. Why is the First Book naturally more full than the Second of historical allusions ? Compare the temptation of Sir Guyon in the *Faery Queene* with the temptation of Christ in *Paradise Regained*.

4. What main characteristics do we find possessed in common by Shakespeare, Bacon, Hooker, and Spenser ? Compare the first beginnings of the drama in England and in Greece. With what period in the life of a nation is excellence in dramatic production generally contemporaneous ? In what chief particulars did the drama of the Restoration differ from that of the Elizabethan age ?

5. Describe the character of Milton's prose writings. What is the chief reason that *Paradise Regained* is of inferior interest to

Paradise Lost? Refer to passages in the former poem which seem to you especially grand, and mention an episode in the Temptation which is wholly due to Milton's imagination. What indications have we in *Paradise Regained* of the impression that had been made upon Milton's mind by his study of romantic literature? In what respects does Milton's blank verse differ from that employed by dramatic writers? Consider the character of *Samson Agonistes* as a drama.

6. Give a brief sketch of the works of the principal English prose writers between A. D. 1630 and 1730.

7. What is the purpose of the *Tale of a Tub*? and of the *Fable of the Bees*? Contrast the styles of Fielding and Richardson. To what various authors have the letters of Junius been attributed? Who were the chief poets of the romantic school, and what the causes which gave birth to it? Write a short life of Burns, and specify the characteristics of his poetry. In what way has the literature of the present day been affected by German influence?

8. What do you conceive to be the moral of the *Passing of Arthur*? Show how two kinds of causes, identical in tendency, overthrew the Order of the Round Table. In what respects is there a certain narrowness in Tennyson's ideal world? How would you compare Spenser's ideal with that of Tennyson in the Arthurian legend?

9. Describe fully the characteristics of literature, its strength and its weakness, its excellences and its faults, in an aristocratic period.

10. State the chief points to be noticed in regard to pronouns, verbs, and the termination —e in the English of the Fourth Period. Give instances from Spenser of the influence of the French accent. What change has taken place in English as to the Case Absolute? Define the two divisions of Strong Verbs. Of what is the suffix in Weak Verbs a mutilated form? Mention some of the commoner noun suffixes from predicative roots. Trace the etymology of the following words through the various changes that have taken place in them: *megrim*; *parsley*; *curfew*; *dandelion*. By what chief processes, and about what period, did Anglo-Saxon pass into English? Mention some of the more important works in Anglo-Saxon and Anglo-Norman literature.

11. Write notes on the italicized portion of the following extracts:—

- (a.) Princes, Heaven's ancient sons, *ethereal thrones,*
Demonian spirits now from the element
Each of his reign allotted, &c.
- (b.) Belial, the dissolutes spirit that fell,
The sensualist, and, *after Asmodai,*
The fleshliest incubus, &c.
- (c.) My error was my error, and my crime
My crime; *whatever for itself condemned.*
- (d.) There Susa by *Choaspes, amber stream,*
The drink of none but kings.
- (e.) Their wines of *Setia, Gales and Falerne*
Chios, and Crete, and how they quaff in gold,
Crystal, and myrrhine cups.

XII. Explain the following passages :—

- (a.) Which when Sir Gnyon saw, all were he wroth,
Yet algates mote he soft himselfe appease,
And fairely fare on foot, however loth.
- (b.) Below her ham her weed did somewhat traine,
And her streight legs most bravely were embayld
In gilden buskins of costly cordewaine,
All bard with golden bendes, which were entayld
With curious antickes, and full faire aunmayld.
- (c.) Eftsoones his cruell hand Sir Guyon stayed,
Tempring his passion with advizement slow
And maistring strength on enemy dismayd ;
For th' equall dye of warre he well did know.
- (d.) And faire Philotime she rightly hight,
The fairest wight that wonneth under skye.
- (e.) And 'twixt them both a quadrate was the base,
Proportioned equally by seven and nine ;
Nine was the circle set in heavens place ;
All which completed made a goodly Dyapase.
- (f.) Them in twelve troupes their captain did dispart,
And round about in fittest steades did place,
Where each might best offend his proper part,
And his contrary object most deface.
- (g.) Isolt of Britain dash'd
Before Isolt of Brittany on the strand,
Would that have chil'd her bride-kiss ? Wedded her ?
Fought in her father's battles. Wounded there ?
The king was all fulfill'd with gratefulness,
And she, my namesake of the hands, that heal'd
Thy hurt and heart with unguent and caress
Well—can I wish her any huger wrong
Than having known thee ?

Examiner—MR. CHARLES H. TAWNEY, M. A.

Turn into modern English—

(a.) Another error, that hath also some affinity with the former, is a conceit that of former opinions or sects after variety and examination the best hath still prevailed and suppressed the rest ; so as if a man should begin the labour of a new search, he were but like to light upon somewhat formerly rejected and by rejection brought into oblivion : as if the multitude, or the wisest for the multitude's sake, were not ready to give passage rather to that which is popular and superficial, than to that which is substantial and profound ; for the truth is that time seemeth to be of the nature of a river or stream, which carrieth down to us that

which is light, and blown up, and sinketh and drowneth that which is weighty and solid.

(b.) A judge were better be a *briber* than a respecter of persons.

(c.) Which kind of fortified carriage, with a ready *rescussing* of a man's self from scorns, is sometimes of necessity imposed upon men by something in their person or fortune; but it ever succeedeth with good felicity.

(d.) *Turn your style* and let us hear what you can say against us.

(e.) A nuncio of the pope, returning from a certain nation where he had served as a *lidger*.

(f.) Touching the frauds, *cautels*, impostures and vices of every profession.

Write notes on the italicised words.

2. Justify the following dictum—

"The greatest politiques have in a natural and free manner professed their desires, rather than been reserved and disguised in them."

3. In what sense does Bacon use the words, *anatomy*, *plash*, *fripper*, *glasses of steel*, *mechanical*, *mystery*, *remora*? Illustrate his use of these words by quotations from other authors.

4. What does Bacon mean by *Philosophia Prima*? What reasons does he give for considering Plato's estimate of rhetoric unjust?

5. Give some account of Lamb's contemporaries at Christ's Hospital. Who was G. D.? Who was J. E.?

6. Explain the following passages:

(a.) He is the true Propontic which never ebbeth.

(b.) I cannot shake off the story of Hugh of Lincoln.

(c.) Pray is it true that the young Spartans among you are born with six fingers which spoils their scanning?

(d.) Dying "he put on the weeds of Dominic."

Comment on the following:

My friend M. with great painstaking got me to think I understood the first proposition in Euclid, but gave me over in despair at the second. I am entirely unacquainted with the modern languages; and like a better man than myself have "small Latin and less Greek." Write a life of M.

7. On what basis of fact does the Essay called *Dream Children* rest? What account does Charles Lamb give of his sister's education?

8. Mr. Ainger gives it as his opinion that "of all old authors the authors of the *Urn Burial* and the *Religio Medici* appears oftenest in quotation or allusion in the *Essays of Elia*." Give your own opinion, supporting it by quotations. What does Mr. Leslie Stephen consider to be the secret of the strange charm of Sir Thomas Browne's style?

9. "The History of England, throughout a very large segment of the eighteenth century, is merely a synonym for the works of Horace Walpole." Justify or impugn this statement.

10. Give an abstract of the plot of Jane Austen's *Emma* from Harriet Smith's meeting with the gypsies to the end of the book

11. Give some account of Lamb's relations with Southey, and Wordsworth.

GENERAL QUESTIONS.

Examiner—MR. CHARLES H. TAWNEY, M. A.

[You are requested to attempt only 9 of these questions. The 13th must be one of the 9 chosen.]

1. Give Chaucer's description of (1) The Franklin; (2) The Miller; (3) The Prioress, as nearly as possible in the words of the poet. Give some account of Chaucer's House of Fame.

2. Compare the form which the Pagan Renaissance assumed in England with that assumed by the same movement on the Continent.

3. Write an essay on Euphuism.

4. Give some account of the following writers:—Webster the dramatist, Herrick, Moore, Keats.

5. Characterise the style of (1) Hooker; (2) Jeremy Taylor; (3) Milton in his prose works.

6. What is the subject of Pope's *Essay on Man*? Give a short account of the Rape of the Lock, quoting any passages that you can remember.

7. Write a history of Pastoral Poetry in England.

8. Account for the verisimilitude of De Foe's tales. What was the fate of "The Shortest way with the Dissenters?" What amount of truth is there in the following lines:

Earless on high stood unabashed De Foe
And Tutchin flagrant from the scourge below.

Sketch the character of Sir Charles Grandison.

9. Write a life of Addison, embodying an account of his works, and of his relations to other literary men.

10. Compare Byron's *Manfred* with Goethe's *Faust*, and Goethe's *Faust* with Marlowe's. What was Lamb's view on the comparative merits of Goethe's work and that of Marlowe, and what was his general opinion of Lord Byron?

11. Give some account of the following works, naming their authors—*Absalom and Achitophel*, *Hudibras*, *Adonais*, *Night Thoughts*, *Sartor Resartus*.

12. Give an account of two of Tennyson's longer works. On what old romance are the *Idylls of the King* principally founded and how far is Tennyson indebted to it?

13. From what works of what authors are the following passages taken? (Marks will be given for stating the names of the authors only.)

- ANGLO-SAXON AND COMPARATIVE GRAMMAR.

1. Arrange the Aryan languages in groups, showing the exact position of English.

3. Explain clearly the meaning of the word Euhemerism. How does Lord Bacon interpret classical myths? How does Sayce account for the production of myths? Apply his theory to the story of the Nibelungen Lied. What reason is there for thinking that much of the folk-lore of modern Europe has come from India?

"Race in physiology and race in philology are two totally different things."

6. Shew that the progress of the civilisation implies a continuous diminution of the language and dialects of the world.

8. Give the derivation of the following English words, *uncouth*, *king*, *sledge-hammer*, *thunder*, *deer*, *pew*, *impertinent*. Draw

any conclusions which the history of these words may suggest to you.

9 (a.) Translate into modern English—

Parse the Italicised words.

10. Translate into Anglo-Saxon.

- (a.) Each of those who hear these my words.
- (b.) The noble king.
- (c.) Thou art worthy of death.
- (d.) They said among themselves.
- (e.) We can teach you a plan.
- (f.) If I am bound with seven ropes, I shall at once be overcome.

Write down the present singular indicative of the Anglo-Saxon verb *lufian*, and give all the cases of *ic* (I) in the Singular, Dual, and Plural.

(a.) Accipite nunc, quaeso, non ea quae ipse in se atque in domesticum dedecus impure et intemperanter, sed quae in nos fortunasque nostros, id est in universam rempublicam impie ac nefarie fecerit. Ab hujus enim scelere omnium malorum principium natum reperietis. Nam quum L. Lentulo C. Marcello consulibus Kal. Jan. labentem et prope cadentem rempublicam fulcire cuperetis, ipsique C. Caesari, si sana mente esset, consulere velletis, tum iste *renditum atque emancipatum tribunalum* consiliis vestris opposuit, cervicesque suas ei subiecit securi, qua multi minoribus in peccatis occiderunt. In te, M. Antoni, id decrevit senatus et quidem incolumis, nondum tot luminibus extinctis, quod in *hostem togatum* decerni est solitum more majorum. Et ta apud Patres conscriptos contra me dicere ausus es, quum ab hoc ordine *ego conservator essem*, tu hostis, *reipublicae judicatus*? Commemoratio illius tui sceleris intermissa est, non memoria deleta. Dum genus hominum, dum populi Romani nomen exstabit,—quod quidem erit, si per te licbit, sempiternum—tua illa pestifera intercessio nominabitur. Quid cupide a senatu, quid temere fiebat, quum tu *unus adolescens* universum ordinem decernere de salute reipublicae prohibuisti? neque semel sed saepius: neque tu tecum de senatus auctoritate agi passus es.

(b.) Ubi est septies millies, quod est in tabulis quae sunt ad *Opis*? funestae illius quidem *pecuniae*, sed tamen quae nos, si iis quorum erat non redderetur, a tributis posset vindicare. Tu autem quadringenties sestertium, quod Idibus Martiis debuisti, quonam modo ante Kalendas Apriles debere desisti? Sunt ea quidem innumerabilia quae a tuis emebantur, non insciente te, sed unum egregium de rege Deiotaro populi Romani amicissimo, decretum in Capitolio fixum quo proposito nemo erat qui in ipso dolore risum posset continere. Quis enim cuiquam inimicior quam Deiotaro Caesar? aequae atque huic ordini, ut equestri, ut Massiliensibus ut omnibus quibus rempublicam populi Romani caram esse sentiebat. Igitur a quo vivo nec praesens nec absens quidquam aequi boni impetravit, apud mortuum factus est gratus. Compellarat hospitem praesens, computarat, pecuniam imperarat, in ejus tetrarchia unum ex Graecis comitibus suis collocarat. Armeniam abstulerat a senatu datam. Haec vivus eripuit, reddit mortuus. At quibus verbis? Modo aequum sibi videri, modo non iniquum. Mira verborum complexio

Explain the construction of "*Opis*," and also that of "*pecuniae*." When did Caesar exhibit enmity to Deiotarus? When to the Massilienses?

(c.) Respice, quaeso, aliquando rempublicam, M. Antoni, quibus ortus sis, non quibuscum vivas considera, mecum uti voles: redi cum republica in gratiam. Sed de te tu *videris*; ego de me ipse

profitebor. Defendi rempublicam *adolescens* non deseram *senex*, contempsi Catilinae gladios, non pertimescam tuos. Quin etiam corpus libenter obtulerim, si representari morte mea libertas civitatis potest, ut aliquando dolor populi Romani pariat, quod jamdiu *parturit*. Etenim si abhinc annos prope viginti hoc ipso in templo negavi posse mortem immaturam esse consulari, quanto verius nunc negabo seni? Mihi vero, patres conscripti, jam etiam optanda mors est¹ perfuncto rebus iis quas adeptus sum quasque gessi: Duo modo haec opto, ut moriens populum Romanum liberum relinquam: hoc mihi majus a diis immortalibus dari nihil potest: alterum ut ita enique eveniat ut de republica quisque mereatur. Cicero Philip II, XLVI.

What is the construction of *videris*?

What sort of a verb is *parturit*?

What year A. U. C. has Cicero in his mind, when he uses the word "*adolescens*" above?

What when he uses the word "*senex*"?

(d.) Mirabile videtur, quod non rideat haruspex, cum haruspiciem viderit: hoc mirabilis quod vos inter vos risum tenere possitis. Non est corpus, sed quasi corpus. Hoc intellegere quale esset si in ceris fingeretur aut fictilibus figuris: in deo quid sit quasi corpus aut quasi sanguis, intellegere non possum. Ne tu quidem, Vellei, sed non vis fateri. Ista enim a vobis quasi dictata redduntur, quae Epicurus oscitans hincinatus est, cum quidem gloriaretur, ut videmus in scriptis, se magistrum habuisse nullum. Quod ei non predicanti tamen facile equidem crederem, sicut mali aedificii domino glorianti se architectum non habuisse. Nihil enim olet ex Academia nihil ex Lycio, nihil ne e puerilibus quidem disciplinis. Xenocraten audire potuit quem virum di immortales! et sunt qui putent audisse; ipse non vult. Credo plus nemini. Pamphilum quendam, Platonis auditorem, ait a se Sami auditum: ibi enim adolescens habitabat cum patre et fratribus, quod in eam pater ejus Neocles agripeta venerat, sed, cum agellus eum non satis aleret, ut opinor, ludi magister fuit. Sed hunc Platonem mirifice contemnit Epicurus: ita metuit, ne quid unquam didicisse videatur. In Nausiphane Democriteo tenetur, quem quum a se non neget auditum, vexat tamen omnibus contumeliis. Atqui si haec Democritea non audisset, quid audierat? Quid est in physicis Epicuri non a Democrito? Nam etsi quaedam commutavit, ut quod paulo ante de inclinatione atomorum dixi, tamen pleraque dicit eadem, atomos, inane, imagines, infinitatem locorum, innumerabilitatem mundorum, eorum ortus, interitus, omnia fere, quibus naturae ratio continetur.

Cicero De Nat. Deor. I. Ch. XXVI.

(e.) Roges me quid aut quale sit deus, auctore utar Simonide, de quo cum quaesivisset hoc idem tyrannus, Hiero, deliberandi sibi unum diem postulavit; cum idem ex eo postridie quaereret, biduum petivit; cum saepius duplicaret numerum dierum admiransque Hiero requireret, cur ita faceret. Quia quanto diutius considero, inquit, tanto mihi res videtur obscurior. Sed Simonidem arbitror—non enim poeta solum suavis, verum etiam ceteroque doctus sapiens—quo traditur—quia multa venirent in mentem acuta atque subtilia, dubitantem, quid eorum esset verissimum, desperasse omnem veritatem. Epicurus vero tuus—nam cum illo malo disserere quam tecum—quid dicit quod non modo philosophia dignum esset, se mediocri prudentia. Cicero De Nat. Deor. I, Ch. XXII.

(f.) At deo ne excusatio quidem est inscientiae; quem vos praelare defenditis, cum dicitis eam vim deorum esse, ut etiam si quis morte poenas sceleris effugerit, expetantur eae poenae a liberis, a nepotibus, a posteris. Utrum poetae Stoicos depravarint an Stoici poetis dederint auctoritatem, non facile dixerim: portenta enim ab utrisque et flagitia dicuntur. Neque enim, quem Hipponactis iambus laeserat aut qui erat Archilochi versu vulneratus, a deo immissum dolorem, non conceptum a se ipso continebat, nec, cum Aegisthi libidinem aut cum Paridis videmus, a deo causam requirimus, cum culpae pene vocem audiamus. (a.) His senatus consultis perfectis L. Cornelius Lentulus pontifex maximus consulente collegitum praetore, omnium primum populum consulendum de vero sacro censet; injussu populi voveri non posse. Rogatus in haec verba populus: "Velitis jubeatisne haec sic fieri? Si respublica populi Romani Quiritium ad quinquennium proximum, sicut velim voveamque, salva servata erit hisce duellis, quod duellum populo Romano cum Carthageniensi est, quaeque duella cum Gallis sunt qui cis Alpes sunt, tum donum duit populus Romanus Quiritium, quod ver attulerit ex suillo, ovillo, caprino, bovillo grego, quaeque profana erunt, Jovi fieri, ex qua die senatus populusque jusserit. Qui faciet, quando volet quaque lege volet, facito: quo modo faxit, probe factum esto. Si id moritur, quod fieri oportebit, profanum esto, neque scelus esto. Si quis rumpet occidetve insciens, ne fraus esto. Si quis clepsit ne populo scelus esto, neve qui cleptum erit, Si atro die faxit insciens probe factum esto. Si nocte sive luce, si servus sive liber faxit, probe factum esto. Si antidea ac senatus populusque jusserit fieri, faxitur, eo populus solutus liber esto."

Livy Hist. XXII, 10.

(b.) Haec pugna est Canensis, Aliensi cladis nobilitate par, ceterum ut illis, quae post pugnam accidere, levior, quia ab hoste est cessatum, sic strage exercitus gravior foediorque. Fuga namque ad Alam sicut urbem prodidit, ita exercitum servavit: ad Cannas fugientem consulem vix quinquaginta secuti sunt, alterius morientis prope totus exercitus fuit. Livy Hist XXII, 50.

(c.) Sine, quaeso, priusquam de conditione nostra queror, noxam, cujus arguimur, nos purgare. Si non deum ira nec fato, cujus lege, immobilis rerum humanarum ordo seritur, sed culpa perimus ad Cannas, cujus tandem ea culpa fuit? militum an imperatorum? Equidem miles nihil unquam dicam de imperatore meo, cui praesertim, gratias sciam ab senatu actas, quod non desperaverit de republica cui post fugam a Cannis per omnes annos prorogatum imperium. Ceteros item ex reliquiis cladis ejus, quos tribunos militum habuimus, honores petere et gerere, et provincias obtinere audivimus. An vobis vestrisque liberis ignoscitis facile, patres conscripti, in haec vilia capita saevire libet? et consuli primoribusque aliis civitatis fugere, quum spes alia nulla esset turpe non fuit, milites utique morituros in aciem misistis?

The question put to the people in the passage marked (a) is evidently not Livy's composition. Examine this statement, adding internal proof to support either your justification or refutation of the statement.

Give the date, circumstances, and geographical position of what is called in (b) the *Alvensis clades*.

Who is alluded to in the words, "*non desperaverit de republica*" which occur in (c).

Medici varie disserere: huic non exesum vim luminis, et redituram, si pellerentur obstantia; illi elapsos in pravam artus, si salubris vis adhibeatur, posse integrari. Id fortasse cordi diis et divino ministerio principem electum; denique patrati remedii gloriam penes Caesarem, irriti ludibrium penes miseros fore. LATIN COMPOSITION AND LITERATURE.

Examiner—REV. A. W. ATKINSON, M. A.

1. Translate into Latin :—

The place was worthy of such a trial. The grey old walls were hung with scarlet. The long galleries were crowded by an audience such as has rarely excited the fears or the emulation of an orator. There were gathered together, from all parts of a great, free, enlightened, and prosperous Empire, grace and female loveliness, art and learning, the representatives of every science and of every art. There were seen, side by side, the greatest painter and the greatest scholar of the age. The spectacle had allured the one from that easel which has preserved to us the thoughtful foreheads of so many writers and statesmen, and the sweet smiles of so many noble matrons. It had induced the other to suspend his labours in that dark and profound mine from which he had extracted a vast treasure of erudition, a treasure too often bound in the earth, too often paraded with injudicious and inelegant ostentation, but still precious, massive, and splendid.

 The answers to questions 2, 3, 4 are intended to be exercises in English composition, therefore attention must be paid to form as well as to facts.

2. "It is difficult to separate Cicero's religion from his philosophy. In both he was a sceptic, but in the better sense of the word." Examine the truth of this criticism under the light thrown on Cicero's mind from our study of his "*De Natura Deorum*."

3. There are three speakers in the imaginary conversation, "*De Natura Deorum*," omitting the author. (1) Who were the speakers? (2) What school of philosophy is each made the exponent of? (3) What were the main tenets of each of these schools?

4. Though Livy gives no clear estimate of his own as to the causes, moral and material, which led to the ultimate success of Rome in the Second Punic War, he supplies us with materials for an estimate. Sum up the causes as clearly and as fully as you can.

5. (a) What is Livy's radical defect in his treatment of History?

(b) Give Quintillian's estimate of Livy as a historian and say with what Greek he matches him.

(a) Write comments in Sanscrit, in the style of Mallinātha, on the above slokas, and translate into English, the first two.

(b.) Name the metres of the first two, and scan them.

N. B.—To scan is to divide the sloka into the proper *gaṇas* or groups, indicating the light and the heavy syllables.

(c.) Expound the Samāsa लीलाघातप्रतिहततत्त्वस्यैकदन्तः.

From what root does प्रतिहत come? Is there any tautology in the expression लीलाघातप्रतिहत? If not, how is it obviated? Can you give English words exactly corresponding to लीलाघात and प्रतिघात?

(d.) Derive व्यायत.

(e.) Why is मणिवन्धन so called? What is the more usual form of the word?

(f.) Account for the द्वितीया in खेदखेशः. Give the English word similar in sound and sense to खेदः

(g.) Mention four Sanskrit words, formed with the root चर, similarly to the word गिरिचर; also give their feminine forms.

(h.) From what root does न्यस्र come? Give its form in लङ्, second person, dual.

(i.) What is meant by पूर्व in क्रूरपूर्वम्?

3. Compare, either in English, or in Sanskrit, the style of Bhavabhūti, with that of Viśākhadatta, the author of the Mudrā-rākhshasa.

Explain the first line of the above sloka, with particular reference to the expression कायवान् परिणतः. Cite a passage parallel to the second line, marking, if any, the difference between the two passages. What is ब्रह्मकोश? Give the various significations of the words ब्रह्मन्, both masculine and neuter; also state its root, and the meaning of the root. Can you give any significance to the plural number in सामर्थ्यानाम्?

5. असारं संसारं परिमुषितरत्नं त्रिभुवनं

Give the different meanings of the word सार, quoting the lexicon for it, and illustrating its use in those meanings by appropriate

examples. The root **सुप्** sometimes corresponds to the English verb, *to rob*; sometimes, to the verb, *to steal*; which is it here in the above sloka? Give an example of the other use. What is the **अलङ्कार**, or rhetorical figure in the above sloka? By **अलङ्कार**, is to be understood, either **शब्दालङ्कार** or **अर्थालङ्कार**.

6. Explain—

कश्च तु खश्च न जानौमहि ? Explain the reply of the *Agnis* :—य-
द्वाव कं तदेव खं यदेव खं तदेव कमिति. Why is the subject in the
first proposition used as the predicate in the second and vice versa ?

(g.) What is the purport of the last sentence in the above
passage ?

10. अक्षो वाव कोको गौतमाग्निस्तथादित्य एव समिद्रमयो धूमोऽहर-
विश्वम्भमा अङ्गारा नचचारि विस्तुष्टिङ्गाः । तस्मिन्नेतस्मिन्प्रो देवाः अक्षां
जुहुति तस्या आहतिः सोमो राजा सम्भवति ।

Explain the metaphor in the above extract. Why is a passage like the above introduced into the *Upanisads*, when there is no reference in it either to Brahman or to any philosophical doctrine ?

RHETORIC AND GRAMMAR.

Examiner— { MAHÁMAHOPÁDHYÁYA MAHEŚACHANDRA
NYÁYARATNA, C. I. E.

1. In the following sentences point out such words as are *vedic* in their structure or form, and write grammatical notes on them :—

- १ । स अपलुपं नाशकत् ।
- १ । काममाविजनिवोः सन्धवामः ।
- २ । दुग्धं दैव्याय कर्मणे देवयज्यायेः ।
- ४ । अस्त्र्यं देवेभिर्धायि विभ्रम् ।
- ५ । कथा ग्रामं न पृच्छसि ।
- ६ । वज्रप्रजा निर्वृतिमाविशे ।
- ७ । नान्यस्त्रिभ्यः निश्चिक्चुरन्यम् ।
- ८ । अक्षन्नमीदन्त हि ।

2. Why do Sanskrit grammarians divide the *kárakas* into six classes when there are seven case-endings in the language ? Can you show by an example how a word with the sixth case-ending may be, under certain circumstances, rightly regarded as an instance of *káraka* ?

3. Is there any difference in meaning or application between the लृट्, लुट्, and लिट् forms of verbs in *vedic* usage ? Illustrate your answer by examples.

4. हव वर्षकं वसु यस्य स हवषस्तुः ।

Account for the retention of न and ष in हवन, and also for the cerebral ण in हवषस्तु. Give the modern form of the last word.

5. What are the two classes into which roots in the Indo-European languages may be divided ? What is the theory of Indian grammarians regarding the origin and derivation of words. Explain clearly the nature and peculiarity of verbal roots in Sanskrit, and compare them with those of the Semetic languages.

6. Establish by a comparison of grammatical forms the original unity of the Indo-European languages. What place does Sanskrit

hold in this family? Which of these languages are most nearly related to Sanskrit? Give reasons for your answer.

7. "The changes that take place in language are due partly to imitation, partly to the desire of clearness or emphasis, and partly to the principle of least effort." Illustrate this by a comparison of Sanskrit words with their *Prakrita* equivalents.

8. Briefly summarise the arguments by which Sanskrit rhetoricians attempt to prove the doctrine of **व्यञ्जना दृष्टिः**. On what grounds do the *Naiyayikas* reject it? What is the difference between **शब्दी व्यञ्जना** and **वार्थी व्यञ्जना**? Quote an example of **वङ्गार्थ-व्यञ्जना**.

9. Why cannot a sentence be charged with any of the following defects:—**दुतसंस्कारता**, **असमर्थता**, **निरर्थकता**? Distinguish between:—**असमर्थता** and **अवाचकता**; **निहतार्थता** and **अप्रयुक्तता**; **निरर्थकता** and **अधिकपदता**; **विधेयाविमर्ष** and **विध्ययुक्तता**; **दृष्टान्त** and **अर्थान्तरन्यास**; **तद्गुण** and **मीलित**; **काव्यलिङ्ग** and **अर्थान्तरन्यास**.

10. **निगृह्य केशेष्वाल्लष्टा कृष्णा येनाग्रतो मम ।**

सोऽयं दुःशासनः पापो लब्धः किं जीवति क्षणम् ॥

Name and explain the **वङ्गार्थ**, **दोष**, **गुण**, **अलङ्कार** and **रस** of the above sloka.

11. **लिम्पतौव तमोऽङ्गानि वर्षतौवाञ्जनं नभः ।**

असत्पुरुषसेवेव दृष्टिर्निष्फलतां गता ॥

What is the main figure of speech in the above sloka? What are its subsidiary (**अङ्ग**) figures Give reasons for your answer.

12. Explain what is meant by **विरोध** among the *rasas*. Name the *rasas* that are opposed to one another. Mention any circumstances in which the combination of two or more conflicting *rasas* is justifiable.

NYÁYARATNA, C. I. E.

1. What different views have been held by Hindu philosophers regarding the nature of the soul? By what arguments do they attempt to prove its existence?

2. According to Sankhya philosophers, the soul is निर्दिष्ट Where then is the necessity, on their principle, of the soul's salvation or emancipation?

3. Why do philosophers of the Nyāya School make a distinction between *mind* and *soul*?

4. How do the Vedantists explain the phenomena of individual grief and individual joy on the basis of the cardinal doctrine of their school, अद्वैतवाद?

5. एवमयसनादिरनन्तो नैगमिकोऽध्यायो मित्याप्रत्ययरूपः कर्तृत्वभोक्तृत्वादिप्रवर्णकः सर्वलोकप्रत्यक्षः। अस्यानर्थहेतोः प्रहाणाय आत्मिकत्वविद्याप्रतिपत्तये सर्ववेदान्ता आरभ्यन्ते।

Explain clearly the purport of the above passage, stating concisely the arguments of which it is a summary.

6. What are the objections of the Vedantic School against the Sankhya doctrine of the creative agency of Prakriti? Cannot similar objections be urged with equal force against their own theory of creation?

7. Explain the following *sūtras* :—

(१) नाभाव उपलब्धेः।

(२) न भावोऽनुपलब्धेः॥

8. दृष्टान्तदृष्टसर्वधर्मानुरोधेन तनुमाननिष्कृतः सर्वानुमानोच्चेदप्रसङ्गः॥

Illustrate the above doctrine by an example. What is the technical name given to this kind of fallacy?

9. Establish or disprove by arguments the difference between a thing and its material cause.

10. Name and characterise विशेषण according to the Vaiseshika school.

11. By what arguments does the *Vaiseshika* attempt to prove the existence of आकाश?

12. Give a brief statement of the different views held by the Nyāya and the Mīmāṃsā school regarding the causes of प्रवृत्ति.

Notice in detail the points of similarity and explain the discrepancy in the names.

10. *Translate into Persian* (clear writing is required). It would be difficult to lay down any course of study, not technical, that would be peculiarly fitted to form a man of business. He should be brought up in the habits of reasoning closely and to secure this, there is hardly anything better for him than the study of geometry. In any course of study, universality should be aimed at, which not only makes the mind agile but gives variety of information. Such a system would make him acquainted with many modes of thought, with various classes of facts, and will enable him to understand men better.

There will be a time in his youth which may be well spent in those studies which are of a metaphysical nature. In the investigation of some of the great questions of philosophy, a breadth and tone may be given to a man's mode of thinking which will afterwards be of signal use to him in the business of every-day life.

4. Is the foundation of scansion in Persian on the pronounced or written letters?

(a) How are reduplicated letters scanned?

(b) What is understood by و او اشہام ضمہ?

(c) How is ۛ quiescent treated (1) in the middle of a line, (2) at the end of a line? What would be the تقطیع of (1) چون کدم and of ای قد دلجوی تو سرو روان and of جان کدم?

(d) What is the rule regarding (1) two quiescents and (2) three quiescents occurring together at the end or in the middle of a line?

5. Name the three purely Persian metres which do not occur in Arabic prosody and give their standard form.

6. Define the terms. شتر - حرم - عصب - قطف - معری - (الزحاف المزوج) - نحر - جدم - نقص - شکل - خزل خبل

7. Translate into Persian (clear writing is required).

A. One of the greatest triumphs of organisation must be justly to divide governmental from local action.

B. But in education what do you say?

A. I merely say this, that the want of education is a want which can never be so easily perceived by the mass of men, as the

want of good air, good water and good drainage. And, therefore, these require just that degree of additional governmental aid, which would counter-balance the additional difficulty created by the want of perception of the good to be aimed at or the evil to be avoided.

B. I believe this is all true : but how difficult it is to work up to these nice boundaries to be aimed at. The moment you have any system organised, it is eager to extend beyond its just boundaries.

12. Remark on the comparative merits of قانبي and خاقاني as far as diction, thought and choice of themes are concerned.

13. Translate into good Persian:—

I have often thought if the minds of men were laid open, we should see but little difference between that of the wise man and that of the fool. There are infinite reveries numberless extravagances and perpetual vanities which pass through both. The great difference is that the first knows how to pick and cull his thoughts for conversation by suppressing some and communicating others; whereas the other lets them all indifferently fly out in words. This sort of discretion, however, has no place in private conversation between intimate friends. On such occasion the wisest men very often talk like the weakest; for indeed the talking with a friend is nothing else but thinking aloud.

The ardour of individuals where any thing is to be risked is more easily excited than upheld. Though the list of subscribers, while the scheme of 'Indian adventure' was yet in contemplation, had been readily filled up, the calls of the committees for the payment of the instalments were very imperfectly obeyed. Even when the charter was obtained, it was either understood to confer no power of compelling payment or the directors were afraid to make use of it. Instead of exacting the stipulated sums and trading upon the terms of a joint-stock company, the subscribers who had paid were invited to take upon themselves the expense of the voyage, and as they sustained the whole of the risk, to reap the whole of the profit.

ESSAY.

Examiner—COL. H. S. JARRETT.

The rise and progress of Sufism. Notice under this thesis, its doctrinal teaching and the manner of its divergence from the original rule of faith of Islam. Mark also the limits of its geographical extension and the nature and force of its influence, political and literary, on the various Mahomedan states with which it has come in contact.

You are not permitted to attempt more than FIVE questions from EACH group; but you are at liberty to substitute the Essay for any TWO of the questions.

GROUP I.

Subjects 1, 2.

1. The arithmetic mean of any number of different positive quantities is greater than their geometric mean.

If x be any positive quantity different from unity, establish the inequality

$$\frac{1-x^{2(n+1)}}{1-x^{2n}} > x \left(1 + \frac{1}{n}\right).$$

2. Prove Sir John Wilson's Theorem that $1 + \underline{p-1}$ is divisible by p , when, and only when, p is a prime.

Shew that the sum of the squares of the products of the first n natural numbers taken r at a time ($r < n$), is divisible by $(2n+1)$.

3. Exhibit

$$(p^2x + 2pry + r^2z)(q^2x + 2qsy + s^2z) - \left\{ pqx + (ps + qr)y + rsz \right\}^2$$

as the product of three factors.

$$\begin{aligned} \text{If } x &= a^2 - b, \quad y = d - 4ac + 3b^2, \quad z = bd + 2abc - c^2 - a^2d - b^3, \\ u &= c + 2a^3 - 3ab, \end{aligned}$$

where a, b, c, d are four independent quantities, investigate whether there exists any relation connecting x, y, z, u .

$$4. \text{ If } \cos x = \cos \theta \cos \phi - \sin \theta \sin \phi \sqrt{1 - c^2 \sin^2 x},$$

$$\text{shew that, } \cos \theta = \cos x \cos \phi + \sin x \sin \phi \sqrt{1 - c^2 \sin^2 \theta}.$$

If λ, μ be the two values of θ which satisfy

$$1 + \frac{\cos \theta \cos \phi}{\cos^2 x} + \frac{\sin \theta \sin \phi}{\sin^2 x} = 0,$$

prove that

$$1 + \frac{\cos \lambda \cos \mu}{\cos^2 x} + \frac{\sin \lambda \sin \mu}{\sin^2 x} = 0.$$

5. If the infinite continued fraction

$$\frac{1}{x +} \frac{1}{x +} \frac{1}{x +} \&c. \text{ ad. inf.},$$

where $x = a + \sqrt{-1} \beta$, be of the form $\cos \phi + \sqrt{-1} \sin \phi$,

$$\text{shew that } \sin \phi = \frac{1}{2}(a^2 + \beta^2)^{\frac{1}{2}}.$$

$$\text{If } \sin \left\{ \log(a + \sqrt{-1} \beta) \right\} = \log \left\{ \sin(\gamma + \sqrt{-1} \delta) \right\}$$

you are required to find the relations between the real quantities a, β, γ, δ .

6. Sum the infinite series,

$$\frac{c}{1} \sin^2 \theta - \frac{c^2}{2} \sin^2 2\theta + \frac{c^3}{3} \sin^2 3\theta - \&c.$$

$$\text{If } 3\lambda + 2\epsilon\lambda^2 = (3 + \lambda^2) \tan^{-1} \lambda,$$

you are required to expand ϵ in a series of ascending powers of λ .

7. Give a satisfactory proof of the theorem

$$\sin \theta = \theta \left(1 - \frac{\theta^2}{\pi^2}\right) \left(1 - \frac{\theta^2}{2^2\pi^2}\right) \dots \&c.$$

Hence shew that

$$\frac{1}{3^4} + \frac{3}{5^4} + \frac{6}{7^4} + \frac{10}{9^4} + \frac{15}{11^4} + \dots \text{ad inf} = \frac{\pi^2}{64} \left(1 - \frac{\pi^2}{12}\right).$$

GROUP II.

Subject 3.

1. Form the equation whose roots are the squares of the differences of the roots of $ax^3 + 3bx^2 + 3cx + d = 0$, and, thence derive criteria of the nature of the roots of the given cubic.

2. If the derived equation of $ax^4 + 4bx^3 + 6cx^2 + 4dx + e = 0$ has a double root, prove that its reducing cubic in Euler's method of solution is of the form

$$4(\frac{1}{2} + H)^2 = I a^2 \theta,$$

where H, I are functions of the co-efficients which you are required to exhibit.

3. In the biquadratic of Ques. 2, substitute $(a + \beta u)$ for x , and determine α, β that the resulting equation in u may be reciprocal. Can you represent α, β , geometrically?

4. Enunciate and prove Fourier's Theorem respecting the situation of the real roots of a given algebraic equation; shew that it includes Descartes' rule of signs, as well as Newton's rule for determining the superior and inferior limits of the roots of an equation.

5. Establish Newton's Theorem on the sums of the powers of the roots of an equation. Shew how to express any symmetric function of the roots in terms of the co-efficients; do you see any objection to the method which employs the sums of the powers of the roots?

6. Evaluate

$$\begin{vmatrix} 2 & 1 & 2 \\ 2ac & ac+bc-ab & 2bc \\ b^2(c-a)^2 & ab(c-a)(c-b) & a^2(c-b)^2 \end{vmatrix}$$

7. Exhibit severally the values of x, y, z , by the help of determinants, from the system,

$$(lx^2 + my^2 + nz^2) - (lyx + mzx + nxy) = a^3$$

$$(mx^2 + ny^2 + lz^2) - (myx + nzx + lxy) = b^3$$

$$(nx^2 + ly^2 + mz^2) - (nxy + lzx + mxy) = c^3$$

GROUP I.

Subject 4.

1. If $ax^2 + 2hxy + by^2 + 2gx + 2fy + c = 0$ represents a parabola, and two tangents be drawn from the origin to the curve, shew that the area of the triangle formed by the two tangents and the right

line joining their points of contact, is $\frac{c\sqrt{c}}{f\sqrt{a} - g\sqrt{b}}$.

2. Let ϕ be the angle between two tangents drawn from any point P to the ellipse

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1;$$

if λ, μ be the semi-axes-major of the two conics which can be drawn through P confocal to the given one, prove completely that

$$\tan^2 \frac{\phi}{2} = \frac{a^2 - \mu^2}{\lambda^2 - a^2}.$$

3. The general equation of the second degree in trilinear co-ordinates

$$ax^2 + by^2 + cz^2 + 2fyz + 2gza + 2hax = 0$$

represents an equilateral hyperbola when

$$\frac{1}{2}(a + b + c) = f \cos A + g \cos B + h \cos C,$$

where A, B, C are the angles of the triangle of reference.

4. Explain clearly the "principle of duality" which is used by Dr. Salmon in connection with the theory of reciprocal polars.

Reciprocate the theorem: "If from a fixed point, tangents be drawn to a series of concentric circles, the locus of the points of contact is a circle passing through the fixed point and through the common centre."

5. Determine the locus of a point such that the tangents drawn from it to two given conics may form a harmonic pencil.

Find, in terms of the invariants of the two conics, the condition that the locus may break up into right lines.

6. Calculate the invariants of two conics referred to their common self-conjugate triangle; and, find the equation of the common tangents to such a pair of conics.

7. Find the locus of the foci of a conic which has double contact with two fixed confocal conics.

GROUP II.

Subject 5.

1. The equations of four planes being given by four equations of the form $Ax + By + Cz + D = 0$, prove the formula for the volume of the tetrahedron they determine.

If h be the shortest distance between two opposite edges of a tetrahedron whose lengths are a, b , and which include an angle λ , the volume of the tetrahedron is $\frac{1}{6} abh \sin \lambda$.

2. Investigate the condition that the general equation of the second degree in xyz , should represent (1) a cone, (2) a surface of revolution.

3. How do you find the equation of a cone whose vertex is any given point and whose base is the curve of intersection of any two surfaces? Apply your method to find the equation of the cone whose vertex is the centre of an ellipsoid, and, which passes through the intersection of the ellipsoid with a given sphere whose centre is the extremity of one of the axes.

4. Prove that confocal quadrics intersect at right angles, and also appear to do so from whatever point in space they may be viewed. Hence, shew that the surfaces

$$(x^2 + y^2 + z^2)^2 + 2l_1x^2 + 2m_1y^2 + 2n_1z^2 = 0$$

$$(x^2 + y^2 + z^2)^2 + 2l_2x^2 + 2m_2y^2 + 2n_2z^2 = 0$$

intersect orthogonally, if

$$\frac{1}{l_1} - \frac{1}{l_2} = \frac{1}{m_1} - \frac{1}{m_2} = \frac{1}{n_1} - \frac{1}{n_2}.$$

5. Investigate the quadratic whose roots give the magnitudes of the two radii of curvature at any point of the surface $z = f(x, y)$. Hence, find the locus of points on the surface $xyz = k^3$, where the principal curvatures are equal and opposite.

6. Investigate by any method the differential equation of the family of surfaces which have one system of lines of curvature parallel to a given plane.

7. Given a point O in the interior of an ellipsoid, you are required to determine geometrically an exterior point P , such that for every chord QOR through O , the relation $PQ : PR :: OQ : OR$ may hold good.

Essay (Optional).

Write a dissertation on *only one* of the following subjects, entering, as fully as time permits, into important details, and, stating as you proceed the most remarkable applications of the subject you choose.

(a). The Method of Projection in Plane Analytic Geometry.

(b). Modular Generation of Quadrics.

You are not permitted to attempt more than FIVE questions from EACH group; but, you are at liberty to substitute the Essay for any TWO of the questions.

GROUP I.

Subjects 6, 7.

1. Eliminate, by differentiation, the arbitrary constants from $ax^2 + 2hxy + by^2 + 2gx + 2fy + c = 0$, so as to obtain Monge's differential equation to all conics

$$9\left(\frac{d^2y}{dx^2}\right)^2 \frac{d^5y}{dx^5} - 45 \frac{d^2y}{dx^2} \frac{d^3y}{dx^3} \frac{d^4y}{dx^4} + 40 \left(\frac{d^3y}{dx^3}\right)^2 = 0.$$

2. If V be any function of x, y, z , and $x = r \sin \phi \cos \theta$, $y = r \sin \phi \sin \theta$, $z = r \cos \phi$, find the transformation of

$$\frac{d^2V}{dx^2} + \frac{d^2V}{dy^2} + \frac{d^2V}{dz^2},$$

when the independent variables x, y, z , are replaced by r, θ, ϕ .

3. Given the tangent at any point of a plane curve, explain how you draw the tangent, at the corresponding point of its inverse, pedal, and reciprocal polar; thence shew that the second pedal of a conic with respect to a focus, is the inverse of a conic.

4. Given that

$$PQ \frac{dR}{dx} + 2R \left(P \frac{dQ}{dx} - Q \frac{dP}{dx} \right) = M,$$

$$P^2 - Q^2 R = N,$$

where P, Q, R are rational and integral functions of x , you are required to perform the integration

$$\int \frac{M}{N} \frac{dx}{\sqrt{R}}.$$

5. Establish any two of the following integral identities.

$$(a). \int_0^\infty \frac{\cos ax}{1+x^2} dx = \frac{\pi}{2} e^{-a}.$$

$$(B). \int_0^4 \frac{\log kx}{\sqrt{4x-x^2}} dx = \pi \log k.$$

$$(7). \int_0^{\frac{\pi}{2}} \frac{dx}{(\alpha \cos^2 x + \beta \sin^2 x)^{n+1}} = \frac{\pi}{2} \frac{(-1)^n}{|n|} \left(\frac{d}{d\alpha} + \frac{d}{d\beta} \right)^n (\alpha\beta)^{-\frac{1}{2}}$$

Work out completely the case $n=3$.

6. Prove by Dr. Jellett's or any other method that the whole surface of the ellipsoid

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} + \frac{z^2}{c^2} = 1,$$

is given by $S = \pi a^2 b^2 c^2 (I + J)$, where I, J are two integrals which you are required to exhibit.

7. If $z = f(x, y)$ be the equation of any closed surface without singular points, and $p = \frac{dz}{dx}$, $q = \frac{dz}{dy}$, prove that the value of the integral

$$\iint \frac{z - px - qy}{(x^2 + y^2 + z^2)^{\frac{3}{2}}} dx dy,$$

taken through the whole of the surface, will be 4π .

GROUP II.

Subject 8.

1. Integrate completely by Dr. Boole's or any other method the equation

$$(A + A_1 x + A_2 y)(x dy - y dx) - (B + B_1 x + B_2 y) dy + (C + C_1 x + C_2 y) dx = 0.$$

2. Integrate

$$y^2 \frac{d^2 y}{dx^2} + (m-1) y \left(\frac{dy}{dx} \right)^2 + (m-3) y \left(\frac{dy}{dx} \right)^2 = 0.$$

3. Obtain the integral of

$$\frac{d^2 y}{dx^2} + \cot x \cdot \frac{dy}{dx} - y \operatorname{cosec}^2 x = \phi(x)$$

in the form

$$y = \tan^{\frac{\pi}{2}} \int \cos^{\frac{\pi}{2}} \frac{x}{2} \cdot \phi(x) \cdot \frac{dx}{2} - \cot^{\frac{\pi}{2}} \frac{x}{2} \int \sin^{\frac{\pi}{2}} \frac{x}{2} \cdot \phi(x) \cdot \frac{dx}{2}.$$

4. Establish Jacobi's Theorem that when a first integral of $\frac{d^2 y}{dx^2} = f(x, y)$ is known, the complete primitive may be found.

Hence, determine the primitive of

$$\frac{d^2 y}{dx^2} = y (1 + 2 \tan^2 x),$$

if a first integral is of the form

$$\frac{dy}{dx} = y f_1(x) + c f_2(x).$$

5. Prove that the equation

$$\left(2y - \frac{1}{x^2} + x^2 y^2 + x^4 + 2xyx^2\right) dx + 2xdy + 4xdx = 0$$

satisfies the criterion of integrability, and, find the primitive.

6. Integrate

$$y^3 \left(y - x \frac{dy}{dx} \right)^2 = 2 \frac{dy}{dx} \left(x \frac{dy}{dx} + y \right)$$

and determine the singular solution.

7. Find the curve in which the product of the perpendiculars from two fixed points on the tangent is constant.

Essay (Optional).

Write a dissertation on *only one* of the following subjects, entering, as fully as time permits, into important details, and, stating as you proceed the most remarkable applications of the subject you choose.

MATHEMATICS IV.

STATICS AND DYNAMICS.

Examiner—MR. W. BOOTH, B. A.

1. A heavy triangle ABC is suspended from a point by three strings, mutually at right angles, attached to the angular points of the triangle; if θ be the inclination of the triangle to the horizon in its position of equilibrium, then

$$\cos \theta = \frac{3}{\sqrt{1 + \sec A \sec B \sec C}}$$

2. If S be any closed surface to which all the attracting mass is external, dS an element of S, and dn an element of the normal drawn outwards at dS , then

$$\int \frac{dV}{dn} dS = 0$$

the integral being taken throughout the whole surface S. Again, if V be the potential of any mass M_1 and if M_0 be the portion of

of M_1 contained within a closed surface S then

$$\int \frac{dV}{dn} dS = -4\pi M_0.$$

(a.) From these theorems or otherwise establish Laplace's and Poisson's theorems in the theory of attraction relative to the value of

$$\frac{d^2V}{dx^2} + \frac{d^2V}{dy^2} + \frac{d^2V}{dz^2}.$$

(b.) If $u=C$ be the equation of any surface [u being a function of x, y, z], $u=C+\delta C$ a consecutive surface of the same family; dn the element of the normal measured outwards; you are required to express $\frac{du}{dn}$ in terms of $\frac{du}{dx}, \frac{du}{dy}, \frac{du}{dz}$.

3. Prove completely, with the usual notation, Green's celebrated theorem, *viz.*,

$$\begin{aligned} \int U \frac{dV}{dn} dS - \iiint U \nabla^2 V dx dy dz \\ = \int V \frac{dU}{dn} dS - \iiint V \nabla^2 U dx dy dz \end{aligned}$$

explaining the meaning of the notation and remarking the difficulties in the demonstration.

4. Write an essay after Prof. Tait on the now famous corollary to Newton's Third law of Motion.

5. A string has its ends fastened to two fixed points and is in equilibrium under the action of a central force; find the two fundamental formulæ requisite to solve all questions connected therewith.

(a.) If a flexible cord of uniform thickness in free equilibrium under the action of any forces which have a potential, intersect twice any surface of equilibrium of the forces, show that the two tensions are equal at the two intersections.

(b.) Two particles connected by an elastic string are projected in any manner. Show that in the relative orbit

$$\frac{1}{p^2} = Ar^2 + Br + C.$$

6. Two lines are moving in their own plane about their point of intersection with constant angular velocities ω, ω' ; if the co-ordinates of a moving point referred to them be x, y at a time t , prove that its accelerations parallel to the axes are

$$\frac{d^2x}{dt^2} - \omega^2 x - 2\omega \cot(\omega' - \omega) t \frac{dx}{dt} - 2\omega' \operatorname{cosec}(\omega' - \omega) t \frac{dy}{dt}$$

and a similar expression; explain how this expression is almost written down from first principles.

7. The velocity of a particle is the resultant of the velocities v and v' along radii-vectores r and r' measured from two fixed points at a distance a apart. Prove that the corresponding accelerations are $\frac{dv}{dt} + \frac{vv'}{2r^2r'}$ ($r^2 - r'^2 + a^2$) and a similar expression.

8. If a number of separate particles whose masses are m_1, m_2 &c. subject to forces f_1, f_2 &c. respectively, and successively projected from the same point in the same direction with velocities v_1, v_2 &c. all describe one path; the same path will also be described by a particle of mass M projected with velocity \bar{U} from the same point in the same direction, and acted on at once by the same forces f_1, f_2 &c. provided that

$$M \bar{U}^2 = \Sigma (M v^2)$$

9. Prove that every curve, plane or twisted, for which $S^2 = \phi(x, y, z)$, where S is the length of any arc of it AP measured from a fixed point A and x, y, z , the rectangular co-ordinates of its variable extremity P , is tautochronous with respect to the fixed point for the force or system of forces whose components parallel to the co-ordinate axes are $X = -\frac{1}{2} K \frac{d\phi}{dx}$ and similar expressions,

K being any constant.

10. A particle, under a constant force in its line of motion, moves in a resisting medium of uniform density, of which the resistance varies as the square of the velocity; to determine the motion.

11. A body moves about a fixed horizontal axis acted on by gravity only; determine the motion and exhibit in the case of small oscillations the principles of a compound pendulum.

12. A homogeneous sphere rolls directly down a perfectly rough inclined plane under the action of gravity. Find the motion.

HYDROMECHANICS AND OPTICS.

Examiner—MR. W. BOOTH, B. A.

1. Find the pressure at any point (h, k) , of a plane area subject to fluid pressure of such a nature that the total pressure on the rectangle bounded by $OX = x$, $OY = y$ and parallels to these lines through P whose coordinates are x, y , is

$$ax^4 + 4bx^3y + 6cx^2y^2 + 4dxy^3 + ey^4.$$

2. Circles are drawn having their centres on the axis of z and touching at the origin the plane xy , and the position of a point

P is defined by r, θ, ϕ , where r is the radius of the circle through P, centre C, θ is the angle OCP, and ϕ the inclination of the plane OCP to a fixed plane through the axis of z ; prove that

$$\frac{dp}{\rho} = R dr + S d\theta + T d\phi$$

where R, S, T , depend on the forces on an element of liquid at P along CP, along the tangent to the circle at P, and perpendicular to the plane of the circle.

3. A solid, floating at rest in a homogeneous liquid, is made to turn through a small angle in a given vertical plane; you are required to determine whether the fluid pressure will tend to restore it to its original position or not.

4. Deduce after Mr. Greenhill, Euler's fundamental Hydrokinetic equations.

5. Of all the motions of a liquid contained within a given contour, which give at each point of the contour the same velocity component along the normal, non-vortical motion produces the least energy.

6. Give the common doctrine of the Rainbow and find the formulæ for the radii of the primary and secondary bows.

7. If α, β be the coordinates of a radiant point, the caustic curve formed by reflexion at the circle $x^2 + y^2 = c^2$ is

$$\left[4(\alpha^2 + \beta^2)(x^2 + y^2) - c^2 \{ (x + \alpha)^2 + (y + \beta)^2 \} \right]^2 = 27c^4 (\beta x - \alpha y)^2 (x^2 + y^2 - \alpha^2 - \beta^2)^2$$

8. What do you understand by that strange expression *irrationality* of dispersion? What is achromatism? When do two lenses of the same material form an achromatic combination? Explain without the use of mathematical symbols how a telescope enables a person to see stars invisible to the unassisted eye; explain, again, how a microscope assists a person in examining the texture of a fabric.

9. Explain how the index of refraction of the material of a transparent prism is determined; prove completely the requisite formula.

10. Explain why the prism is placed in the position of minimum deviation in producing a spectrum. What is a pure spectrum?

11. A finite portion of homogeneous incompressible liquid is in equilibrium under the attractions mutual of its own particles and its outer surface is a sphere; the law of force is the law of Nature; find the pressure at the centre; how does it depend on the density?

12. What is an equivalent lens; find the focal length of a lens equivalent to a combination of two lenses on the same axis at a given distance from each other.

MATHEMATICS VI.

NEWTON AND ASTRONOMY.

Examiner—MR. W. BOOTH, B. A.

1. How does Newton determine the orbit when the law of force is inversely as the square of the distance?

(a.) How does he determine the orbit when the force varies directly as the distance?

(b.) How when the force varies inversely as the cube of the distance perpendicular from a line?

(c.) Given the law of force round one centre, how is the law of force determined round any other in the plane of the orbit, the periodic time being the same?

2. (a.) How does Newton determine the diameter of curvature at any point of a conic?

(b.) How does he find the time of motion and the velocity acquired by a body falling through a given space from rest, the force being that of Nature?

3. In a spherical triangle of which the sides are a, a', a'' , and the opposite angles A, A', A'' , prove the equations of the form

$$\cos a \sin A'' = \cos A \sin A' + \sin A \cos A' \cos a'';$$

and show that they give

$$\tan \frac{1}{2} (a' - a) \tan \frac{1}{2} (a' + a) \left(\cot \frac{a''}{2} \right)^2 = \frac{\sin (A' - A)}{\sin (A' + A)}.$$

Verify these when the triangle becomes plane.

4. Prove also the formula

$$2 \cot A \sin a = \tan \frac{B}{2} \sin (c + a) + \cot \frac{B}{2} \sin (c - a).$$

5. Conceive that after marking the places of the principal fixed stars on a celestial globe (of which the radius is taken for unity), by their right ascensions (α) and declinations (δ), we desire to transfer the representations of those stars to a plane which touches the globe at a point of which the right ascension (A) and the declination (D) are known; and let this transference or projection of each star be performed by prolonging the corresponding radius of the globe until it meets the plane. Then the two rectangular coordinates of the projection measured on the plane and from the point of contact may be denoted thus

$$\begin{aligned} X &= \cos \phi \sec (\phi - D) \tan (\alpha - A) \\ Y &= \tan (\phi - D) \end{aligned}$$

in which $\tan \phi = \tan \delta \sec (\alpha - A)$.

6. What is Flamsteed's method of determining the position of the first point of Aries? What are its advantages?

7. Convert the mean solar time at a given meridian into the corresponding sidereal time.

Also convert the apparent time at any meridian into the corresponding sidereal time.

8. If a star have a small motion along an arc drawn from it to a fixed point O and proportional to the sine of that distance; and if we estimate the components of that motion along two other great circles at right angles to each other, and passing through the star, the small motion of each is proportional to the cosine of the distance of O from the pole of the other. Prove this, and show how the effects of aberration in Right Ascension and Declination, in latitude and longitude may be found.

(a.) If λ be the latitude of a star and w the obliquity of the ecliptic and k'' the constant of aberration; then aberration does in the course of a year cause the apparent declination of the star to

vary through a range $2k'' \sqrt{\sin^2 w + \cos^2 w \sin^2 \lambda}$.

9. Have you ever seen, and if so, how and where, Jupiter's. Satellites, Saturn's Ring, Canopus, α Centauri, Aldebaran, Fomalhaut, Rigel, Procyon, Cassiopeia, Arcturus, Sirius, Capella, Vega, the Pleiades.

(a.) Explain the passage

"By this the Northerne wagoner had set
His seven fold teeme behind the stedfast starre
That was in ocean waves yet never wet
But firme is fixt and sendeth light from farro."

10. Shew that the time of sunset is earliest some days before, and the time of sunrise latest some days after, the shortest day.

HISTORY.

Examiner—MR. M. PROTHERO, B. A.

SIXTEENTH CENTURY (I).

1. Explain the term "Protestants." Into what main sects were they divided and what chief differences separated them? Sketch the principal events of the Reformation down to the publication of the Confession of Augsburg. What attitude did the leaders of the "New Learning" take up towards the Reformers in Germany?

2. What were the principal points in which the Clergy abused their power under Henry VIII? Describe the remedies applied to these abuses from 1529 down to the completion of the Dissolution of the Monasteries.

3. Describe the constitutional checks upon the royal authority in Castile and Aragon, and give some account of the Spanish rebellion against the despotic rule of Charles V. By what means did Charles V and Philip II crush the liberties of Spain?

4. What efforts were made in foreign countries to use the Protestant princes of Germany as allies against Charles V? What princes formed the Smalcaldic league? How was this league broken up?

5. Draw a genealogical tree or otherwise indicate the rights of the various claimants to the English crown at the death of Edward VI. What order had been laid down in which they should succeed to the Crown, and when?

6. Under what circumstances was the Council of Trent first summoned? Sketch its history, pointing out how it was affected by contemporary politics. What were its decisions, and why did they disappoint the Protestants?

7. Describe the state of religious parties in England at the accession of Mary. How did the conduct of the Protestants when in power under Edward VI injure their cause?

What were Mary's chief objects and the chief difficulties in realising them? How were these difficulties increased by the action of Pope Paul IV? Account for the Pope's action.

8. What effect was produced upon the position of German Protestants by the Diet of Augsburg 1530, Diet of Spire, the Interim, Treaty of Passau, Diet of Augsburg 1555?

HISTORY.

Examiner—MR. M. PROTHERO, B. A.

SIXTEENTH CENTURY (II).

1. What were the chief subjects of dispute between Elizabeth and her Parliament? Why was the Queen so unwilling to accede to the requests made to her?

2. Trace and account for the reaction against Protestantism in the middle of the century.

3. Enumerate the Persecuting Edicts issued in the Netherlands. Under what other grievances did the Netherlands labour? What was the constitution of "the Joyous Entry," and how did Philip II violate it?

4. Why was it impossible that the Northern and Southern provinces of the Netherlands should remain united? When did the split become complete, by whose means was it brought about, and how?

5. Explain Elizabeth's policy in religious matters. Trace the rise of the Presbyterians, distinguishing them from the Puritans, and showing how religious eventually became political opposition to the Crown. What influence had Cartwright's "Admonition to Parliament" upon Elizabeth's attitude towards the Protestant Nonconformists, and why?

6. Sketch the history of England's relations with the revolted Netherlands, and account for Elizabeth's policy.

7. What policy did Coligny recommend Charles IX to follow towards the revolted Netherlands, and how did the French endeavour to turn the rebellion to their own advantage?

8. Give some account of the Religious Wars in France. What part did Elizabeth and Phillip II take in them respectively?

CONSTITUTIONAL AND POLITICAL HISTORY OF ENGLAND.

Examiner—MR. M. PROTHERO, B. A.

1. Give some account of the development of the English Towns, and contrast it with that of the cities of France and Germany. Notice the special importance of the Guild system. How were the Towns taxed before their admission to parliamentary representation, and when did this change take place?

2. Trace the gradual emancipation of the Villeins from the oppression of Feudalism.

3. How did the Crown attempt to violate the following clauses of Magna Carta?

A. That no taxes can be levied without consent of Parliament.

B. That no one can be imprisoned except by legal judgment of his peers.

What statutes contain provisions directed against these abuses?

4. Explain the nature and extent of the authority of the King's Council. In what relation did the Courts of Chancery and Star Chamber stand to it?

5. Discuss the growth of the theory of Divine Right of Kings, and explain in connection with it James the First's saying, "No bishop, no king." Contrast the theory with that maintained by Hobbes and with the ancient Teutonic idea of a king.

6. What is Privilege of Parliament? Trace the steps by which it was gained, mentioning any important decisions concerning it.

7. "If books are to be measured by the effect they have produced upon the fortunes of mankind, the *Wealth of Nations* must rank among the greatest of books." Explain this and show how the younger Pitt acted upon the teaching of Adam Smith. How far did the circumstances of the time favour the financial skill of the minister?

8. Give an outline of the penal legislation in matters of religion, and trace the gradual realisation of complete religious liberty and equality.

POLITICAL ECONOMY.

Examiner—MR. H. M. PERCIVAL, M. A.

1. State Adam Smith's views regarding the nature and operations of each of the following:—Wages, Rent, Value, Price. Point out wherein these views differ, if at all, from those of Mill on the same subjects. Explain the relations that existed, according to Adam Smith, between the Price of Corn and the following:—Reserved rents; Value of Silver; Bounty on corn; Import duty on corn.

2. Sketch the history of what Adam Smith calls the "Different Progress of Opulence in Different Nations," since the fall of the Roman Empire. What does he mean by the "Natural Progress of Opulence"? Does the actual course of the development of industry in Europe support Smith's theory of "natural progress"?

3. Examine the several fallacies that underlie the Colonial System and the Agricultural System respectively. Under what altered names and with what modifications has the Colonial system survived down to present times? What effect have Treaties of Commerce had upon it? What name would you give to Adam Smith's own system of Political Economy according to his theory of the basis of the Wealth of Nations? Explain the nature of that basis.

4. "The social problem of the future is how to unite the greatest individual liberty of action, with a common ownership of the raw material of the globe, and an equal participation in all the benefits of combined labour." Sketch the essentials of the principal schemes that have been propounded for realising one or another of the constituent elements of this union, and point out, after Mill, the defects that led to their failure. What reforms does Mill himself propose in the systems of production and of distribution of private property? How far do his proposals contribute to the solution of the above problem?

5. Define Credit. Explain how it influences Prices, and modifies the use of Money. What considerations regulate the issues of a Convertible and an Inconvertible Paper Currency, respectively? What effect have such issues upon Industry? Explain Law's System, and expose its fallacy.

6. Explain the effects that the War of the French Revolution and the American Civil War, respectively, had upon British Commerce. Trace the course of Commercial and Economic Revival and Progress in England from the conclusion of the first of these wars to the inauguration of Sir Robert Peel's Reforms.

7. What is a Commercial Crisis? Explain the causes and the effects of the Commercial Crises that occurred between the passing of the Bank Charter Act of 1844 and the outbreak of the Franco-Prussian War, noting any distinctive feature in each crisis. Was there any connection between this Act and the first of these crises?

POLITICAL PHILOSOPHY.

Examiner—MR. H. M. PERCIVAL, M. A.

1. Distinguish Positive Law from the science of Legislation, and Positive Morality from Ethics. Define Constitutional Law and Metaphorical Law. To what kinds of law are Sanctions attached? What is meant by the Coincidence of Laws, and what misconception as to the origin of positive law is due to such coincidences? What is a Determinate source of law, and how can the rules of positive morality be classified, with this source as a basis?

2. What are the Limits of Sovereign power? Show how these limits are consistent with (a) the civil liberty of the subject, and (b)

the doctrine that a sovereign government has no legal rights against its own subjects. What, according to Austin, is the origin of political government? State briefly his arguments against the theory of the "Original Covenant" as the source of political society.

3. Define International Law. In what relation does it stand to Positive Law? With what limitation must the appellation of "Law" be given to the rules of conduct between nations? Explain the various kinds of Union under which Sovereign States may be combined. What is the Identity of a State? How are international relations variously affected when the identity of a state is disturbed, according as that state belongs to one or another of these Unions?

4. In what cases do the Right of Self-Preservation and the Right of Independence admit of the exercise of the Right of Intervention? Illustrate this from European history. Explain the various ways in which national Proprietary Rights and Jurisdiction may be acquired by sea and by land. In what cases are these rights imperfect? Illustrate, by references to International Treaties, how far these rights can be modified by compact.

5. State the arguments from which Mill lays down his criteria of a good form of government. On what grounds does he reject Order and Progress as true criteria? Under what social conditions is the ideally best form of government inapplicable? What evils attend upon the system of representation of Majorities? What difficulties lie in the way of carrying out any system of representation of All? How would a diversity of nationalities influence the working of a system of representative government?

6. Describe the nature of the germs of modern European Civilisation that the dissolution of the Roman Empire left behind. Describe briefly and characterise the successive organisations of society, from that period to the beginning of the 15th century, by which it was attempted to develop these germs. Explain the nature of the new forces that came into play at the latter period, and describe the condition in which their operation left Europe in the beginning of the 16th century.

7. What were the "Origins" of the Third Estate in France? What element does it constitute in the civilisation of that country? Distinguish between the nature and constitution of the Third Estate and of the Boroughs. Explain how the causes that brought about the decay of the power of the Boroughs, served only to strengthen that of the Third Estate.

ESSAY.

Examiner—MR. H. M. PERCIVAL, M. A.

(a.) The Progress of British Commerce and Industry since the end of the Seven Years' War, and its effect upon the belligerent power of the British Nation.

Or

(b.) The Sixteenth Century: its place in the history of European Civilisation.

PHILOSOPHY I.

Examiner—DR. P. K. RAY.

PSYCHOLOGY.

1. Compare Hamilton's classification of the cognitive faculties with Bain's. How would you account for the difference between the two classifications?
2. Explain and examine the theory of the projection of sensations. Is there any indication of this theory in Mansel's *Metaphysics*? Does Bain hold it?
3. Explain and criticise Mill's theory of the belief in an external world.
4. State and examine the different views that have been held as to the nature of the *Primum cognitum*.
5. Compare the fundamental doctrines of Hamilton's system of Philosophy with those of Mansel's. Are there any points in which both of them agree with Reid?
6. Explain Hamilton's theory of pleasure and pain, and compare it with Bain's. Reproduce Mill's criticism of Hamilton's theory and give your own estimate of Bain's theory.
7. Explain and examine Bain's theory of the will.

PHILOSOPHY II.

Examiner—MR. W. SMITH, M. A.

ETHICS.

1. Give Aristotle's objections to the Ideal Theory of Plato. What account has Plato given of the Idea of the Good. State and examine the objections to discussing morals under the general conception of the Good.
2. Explain and examine Calderwood's view of Free-Will.
3. State and examine the meanings attached by Determinists to the terms 'ought,' 'responsibility,' 'desert,' and 'deliberation.' Indicate the connection between the question of Free-Will and Systematic Ethics.
4. State and examine the fundamental Ethical doctrines of Cudworth and Hutcheson.
5. What proofs have been given of the existence of a moral nature in man? How is Hobbes's view to be met, that benevolent affection and its pleasures are merely a form of the love of power?
6. Examine the following objections to Utilitarianism :
 - a. That utility is an uncertain standard—differently interpreted by each person.
 - b. That renunciation and not pursuit of happiness is the first condition of all nobleness of character.
 - c. That it is impossible to make a calculation of consequences previous to every action.
7. Write a short essay on the relation between Morality and Religion.

PHILOSOPHY III.

LOGIC.

Examiner—DR. P. K. RAY.

1. Give Mill's view of the scope and province of Logic and compare it with those of (1) Aristotle, (2) Kant and (3) Hegel.
2. Explain and examine Ueberweg's doctrine of the Notion.
3. State and criticise:—
 - (1.) Hamilton's Theory of Predication.
 - (2.) Ueberweg's Theory of the Judgment.
 - (3.) Mill's Theory of the Import of Propositions.
4. (1) What is Inference?
 (2) Can all Inference be reduced to the syllogistic form?
 Discuss these two questions as fully as you can.
5. Explain what Mill means by the Axiom of the uniformity of the course of nature.
6. Explain and exemplify Mill's "experimental methods." Are these methods experimental or deductive?
7. State and explain the conditions of a legitimate hypothesis. How would you distinguish a legitimate hypothesis from an induction?
8. State and criticise Mill's theory of the Explanation of Laws of Nature.

PHILOSOPHY IV.

HISTORY OF PHILOSOPHY I.

Examiner—DR. P. K. RAY.

1. Distinguish and characterise the different periods of development of Greek Philosophy.
 2. Compare the Atomic Philosophy of Democritus with Modern Materialism.
 3. Sketch the life and teaching of Socrates and trace his influence upon subsequent Greek Philosophy.
 4. Explain the fundamental doctrines of Plato's Ethics.
 5. Give an account of Aristotle's Psychology.
 6. Compare the Ethical doctrines of the Stoics with those of the Intuitional Moralists.
 7. Give the substance of DesCartes's *Meditations* and trace its influence upon subsequent Philosophy.
-

PHILOSOPHY V.

HISTORY OF PHILOSOPHY II.

Examiner—MR. W. SMITH, M. A.

1. Give the substance of Berkeley's *Principles of Human Knowledge* and trace its influence upon subsequent English Philosophy.
 2. Explain and criticise :—
 - (1) Kant's distinction of Phenomena and Noumena.
 - (2) Hegel's identification of Thought and Being.
 - (3) Schopenhauer's identification of the Will and the Thing-in-itself.
 3. Explain Schelling's doctrine of "Intellectual Intuition" and compare it with the doctrine of Reason of the Scottish philosophers.
 4. Give a critical estimate of Cousin's system of Philosophy.
 5. Explain Ueberweg's doctrine of Internal Perception and compare it with Kant's.
 6. Write historical and critical notes on the meanings of the following :—(1) Substance. (2) Cause. (3) Realism. (4) Idea. (5) Intuition. (6) Category.
-

PHILOSOPHY VI.

NATURAL THEOLOGY.

Examiner—MR. W. SMITH, M. A.

1. What does Caird mean by 'the necessity of religion' ? State and examine the definitions of Religion that have been given by Comte and Mill.
 2. Explain the nature of the objection to the competency of Reason in the province of Religion from the relative character of human knowledge. How may the objection be met ?
 3. Give a critical estimate of Flint's *à posteriori* arguments for the existence of God.
 4. What is the relation of Nature and Finite Mind to God (1) according to Flint, (2) according to Caird ?
 5. What are the real and apparent defects of Pantheism ? Contrast Hindu Pantheism with that of Spinoza.
 6. What is meant by Positivism, Secularism and Pessimism as Anti-Theistic theories ? Examine the fundamental doctrines of Positivism as an Anti-Theistic theory.
 7. State and examine the Ontological argument for the existence of God. Examine the view that the Cosmological, the Teleological and the Ontological arguments represent a development from imperfect to more adequate conceptions of religion. What is the real meaning and value of the Ontological argument according to Caird ?
-

PHILOSOPHY VI.

EVIDENCES OF CHRISTIANITY.

Examiner—MR. W. SMITH, M. A.

1. What several kinds of evidences have been adduced in favour of Christianity? How far may Reason judge of matters said to be given by Revelation? What objections have been taken to Revelation in general?

2. 'Christianity rests on unsatisfactory evidence, that is, on evidence not sufficient for certainty.' How does Butler reply to this objection?

3. State and examine the analogies pointed out by Butler between Christianity and the natural government by general laws.

4. What value does Paley attach to the morality of the Gospels and to the character of Christ as evidences of the truth of Christianity? Give your own view as to the validity of such evidence.

5. State the modern critical theory of primitive Christianity. Give an outline of Christlieb's Criticism of the Teubingen Theory.

6. Reproduce Butler's argument from the Analogy of Nature in favour of the doctrine of the atonement. Shew that the idea of mediation is not foreign to the religions of India.

7. Give a brief account of the mythical theory of the Gospel narratives. State any objections you know to the theory. Examine and compare the theory of Strauss with the naturalistic interpretation of Renan.

CHEMISTRY I.

Examiner—MR. A. PEDLER, F. C. S.

1. Give a clear explanation of the work done by Lavoisier, and point out the part he played in the development of modern chemistry.

2. Define clearly what is meant by the terms equivalent, combining proportion and atomic weight as applied to chemical elements, and show how each of the terms has been displaced by the other.

3. Describe what is meant by the diffusion of gases; by whom was this property discovered, and how can it be explained? What is the "effusion" of gases, and to what purpose is this property of gases applied?

4. Contrast the decomposition of Calcium Carbonate and of Potassium Chlorate by the action of heat. How is the decomposition of Calcium Carbonate explained?

5. Describe the action of heat on Nitrogen tetroxide. How do its properties vary at different temperatures? Describe any analogous cases you are acquainted with.

6. Describe Cailletet's and Pictet's processes for the condensation of gases.

7. Explain clearly by what methods the composition of Hydrochloric Acid may be determined, both by synthetical and analytical processes.

8. How can you distinguish Chlorides, Bromides and Iodides of metals, (a) when separate, and (b) when mixed together? In the latter case how can they each be estimated quantitatively?

9. How would you detect and estimate ammonium salts, and how would you demonstrate clearly the volumetric composition of ammonia gas?

10. How can orthosilicic acid be obtained? What are the principal classes of silicates, and from which Silicic acids are they supposed to be derived?

11. Explain what is meant by the dualistic theory of salts, and in what way does it differ from the unitary theory of salts. Explain precisely the meaning of the following formulæ.

12. What are the processes used in the preparation of metallic Potassium and Sodium? Why can Sodium be manufactured on a much larger scale than Potassium?

13. How is Magnesium Carbonate prepared, and in what way may its composition vary? How may this composition be explained?

14. How is metallic Cadmium prepared? What are its properties, and for what purposes are its salts employed?

N. B.—Only twelve of the above questions need be attempted, and full marks will be given for complete answers to any twelve out of the fourteen.

CHEMISTRY II.

Examiner—MR. A. PEDLER, F. C. S.

1. Give a general idea of the composition of ordinary natural waters, and state the method you would employ to analyse a sample of water, so as to see whether it is fit for drinking.

2. How would you perform the quantitative analysis of a mineral, insoluble in acids, and containing Aluminium, Calcium and Potassium oxides combined with Silicon dioxide?

3. The Sulphide of a dyad metal when analysed contained 86.21 per cent. of metal, while the oxide contained 92.60 per cent. What is the atomic weight of the metal and its name? ($S = 31.98$ $O = 15.96$).

4. How would you determine the three metals quantitatively in the following salts Ba Cl_2 , Hg Cl_2 , and Fe S O_4 .

5. Discuss the various definitions of organic chemistry which have been proposed.

6. Define clearly the terms Isomerism, Metamerism, Polymerism and Physical Isomerism, as applied to Organic Substances.

7. Discuss the constitution of the 4 classes of Paraffins.

8. Discuss the composition of the Hydrazines, and show how they are connected with the Amines.

9. Describe the methods which have been used in the synthesis of the primary Alcohols and the fatty Acids.

10. Describe how the Methyl Phosphines are prepared, and what are their properties?

11. Discuss the theories which have been put forward in explanation of the process of Etherification.

12. What is the general formula of the Aldehydes? How is Acetaldehyde prepared? in what forms does it occur, and what are their properties?

13. How many Hydrocarbons of the formula $C_n H_{10}$, and how many radicals of the formula $C_n H_{11}$ are possible? Give their graphic formulæ. What are the principal compounds derived from these Hydrocarbons, or Radicals, and explain the cause of isomerism among them.

14. Give a short description of the method of manufacture and purification of Coal Gas. Explain the source of the luminosity in a coal gas flame.

N. B.—Only twelve of the above questions need be attempted and full marks will be given for complete answers to any twelve out of the fourteen.

CHEMISTRY.

PRACTICAL PAPER.

Examiner—MR. A. PEDLER, F. C. S.

1. You are given two substances, marked A. and B., which may contain from one to three metals and you are required to determine which metals are present by blowpipe analysis in each sample.

2. You are given a mixture, marked C., which may contain up to 4 acids and 4 bases, and you are required to analyse it by wet and dry methods and to state its constituents.

PHYSICS.

ELECTRICITY.

Examiner—MR. J. ELIOT, M. A.

1. Describe Sir William Thomson's Absolute or Portable Electrometer. Explain the use of the guard ring in the latter. Prove that if the plates be parallel, S the area of the opposed surfaces in square centimetres, d the perpendicular distance in centimetres, and V the potential difference in volts between the two plates, the force of attraction will be very approximately—

$$\frac{4.5 \times 10^{-10} \times V^2 \times S}{d^2} \text{ grammes.}$$

2. What is meant by the free charge and what by the capacity of a conductor?

Find the law of distribution of electricity consistent with equilibrium on a spheroid freely charged. Thence deduce the capacity of a circular plate.

3. Supposing a series of conductors to be kept at constant potentials by sources of electricity external to the field. Prove that the energy of the system increases for a given displacement by a quantity equal to the work done by the electrical forces during the displacement.

Thence (or in any other way) prove that in Sir William Thomson's quadrant electrometer, the deflection is proportional to

$$(V_1 - V_2) \left\{ V - \frac{V_1 - V_2}{2} \right\}$$

where V is the potential of the needle, and V_1 and V_2 the potentials of the two pairs of plates.

4. Explain according to Faraday and Maxwell the part played by the Dielectric in electricity, referring to experimental evidence so far as is necessary for illustration.

5. Prove that in any electrical system in equilibrium, the potentials may be expressed as a linear function of the charges, or the charges as a linear function of the potentials. Establish the following:—

(a). In a system of fixed insulated conductors, the potential (P_s) produced in conductor A_s by a charge E communicated to A_r is equal to the potential (P_r) produced in A_r by an equal charge E communicated to A_s .

(b). In a system of fixed conductors connected all but one with the earth or the walls of the room, the charge E_r induced on A_r when A_s is raised to unit potential, is equal to the charge E_s induced on A_s when A_r is raised to unit potential.

Also prove that the total energy of a system of conductors is $\frac{1}{2} \sum EQ$ and express it in terms of potentials only, and of charges only.

6. Explain the method of finding the law of distribution of electricity by means of electric images.

Find the distribution of electricity on a sphere connected with the earth, and in the field of a quantity of electricity e concentrated at an external point.

A sphere is charged with E units of electricity, and near it is a very small conductor charged with e units. Find what amount of work would have to be done to remove the small conductor to an infinite distance.

7. Find the distribution of electricity on a conducting sphere placed in a uniform field of force (a) when the space is insulated, (b) when it is connected with the earth.

A sphere of radius a with a charge E is influenced by a charge E_1 on another sphere at a distance d , so large that the force due to it may be considered uniform in the neighbourhood of the first sphere. Shew that the part of the energy of the first sphere

due to the presence of the second is—

$$\frac{E E_1}{d} - \frac{\alpha^3 E_1^2}{d^4}$$

8. Describe Biot's hypothesis respecting the magnetism of the earth, and thence deduce the law of force at the earth's surface.

In what respects does this hypothesis fail to account for the more important facts known respecting terrestrial magnetism.

9. Explain fully (deducing the necessary formulae) the method of measuring the horizontal component of the earth's magnetic force, and its variations by means of the Bifilar magnetometer.

10. Explain, as fully as you can without the use of Spherical Harmonics, Gauss's general Theory of terrestrial magnetism, and the method thence adopted to find the law of magnetic force at any point of the earth's surface.

ELECTRICITY AND MAGNETISM.

SECOND PAPER.

Examiner—MR. A. EWBANK, M. A.

1. A current of electricity passes from a single wire into a network of wires. Indicate the method of finding the partial currents.

A portion of a circuit is a piece of uniform wire. This is removed and divided into suitable lengths so as to make a regular hexagon with its diagonals. The hexagon is introduced into the circuit, the current entering at one vertex and leaving at the opposite vertex. Show that the resistance of the undivided wire was fifteen times that of the hexagon.

2. There are $m+n$ insulated conductors, and electrical charges are to be placed on m of them. Determine the work to be done. If during the process some of the remaining n conductors are put to earth will the necessary work be altered? Sometimes the former question is supposed to be answered by proving that $\frac{1}{2} M_1 V_1$ is the work of charging a single conductor, and then asserting that $\frac{1}{2} \Sigma M V$ must be the work necessary for charging the system. Is this reasoning satisfactory?

3. AB is a straight wire of indefinite length conveying a current of electricity. CD is a parallel wire of finite length along which another current is passing. Calculate the mutual actions.

4. Part of a circuit is a ring of wire which rotates about a diameter, which is perpendicular to the lines of force in a uniform magnetic field. Determine the amount of electricity produced in the ring in one half revolution. Show how a current constant in direction may be obtained in another part of the circuit.

5. A voltaic battery consists of a given number of cells which are identical and are placed in series. After the battery has been a little time in action, one cell is removed and replaced with its poles inverted. Describe the effects on this cell. Here any type of cell may be chosen, and the answer must be given with reference to the type selected.

6. What does Faraday mean by secondary actions? A vessel is divided into three parts by two porous partitions. On the left is a solution of zinc nitrate. In the middle is a solution of barium chloride. On the right is a solution of sodium sulphate. The current enters on the left through a silver plate and leaves on the right from a platinum plate. It is required to describe the various effects produced. Instead of the above-named solutions any others may, if thought convenient, be substituted.

7. In the circuit of a sufficiently powerful and very constant battery, we place successively a Gramme Machine A, a Gramme Machine B, an electromagnet M and a sensitive galvanometer G. When the system is in steady action, A is stopped by the hand. After a little time A is made by hand to take a rotation opposite to what it had originally. It is again left to itself and a piece of soft iron being brought within the field of action of M moves towards it and finally adheres. It is required to describe any noticeable effects which in these various cases may be produced in any parts of the system.

8. The vertices of a Wheatstone's bridge are R, X, Y, Z. The resistances of RX, XY, XZ, ZR are x , y , z , r , respectively. The galvanometer resistance g is in RY. The other diagonal has a resistance p . The resistance to be determined r is known to be nearly 100. The adjustable resistance z is taken initially at 1000. g and p are given say each 1000. It is desired to select the most suitable values for x and y , that r may be most accurately observed.

9. From a right circular cone whose base has a radius c is cut a similar cone whose base has a radius d . The frustum thus left when introduced into a circuit has a resistance ρ_1 . It is then replaced by a cylinder of the same length, volume and material. This has a resistance ρ_2 . Show that

$$\rho_1 : \rho_2 = c^2 + cd + d^2 : 3cd.$$

If a perfect cone is introduced into a circuit the current entering at the vertex and leaving at the base, what is the effect on the current?

10. Describe any form of induction machine, with or without permanent magnets, which produces a continuous current when ordinary mechanical power is applied.

[Full marks given for an adequate treatment of any eight out of the above ten questions]

HEAT AND MOLECULAR PHYSICS.

FIRST PAPER.

Examiner—MR. A. FWRANK, M. A.

1. Into pure water various soluble or insoluble substances are introduced, one substance only being in a given volume of water. How do these usually influence the boiling point?

If very pure water could be raised to a temperature of, say, 120°C , and a very slow stream of air at 100°C could be passed through the

water, what results might we anticipate? Here ordinary evaporation and loss of heat by radiation are to be neglected.

2. Describe that method of ascertaining the absolute heat expansion of mercury which was introduced by Dulong and Petit, and improved by Regnault.

3. State the principal laws of the radiation of heat from gases. Indicate briefly the applications of these laws to purposes of research.

4. In the ordinary apparatus used to illustrate the expansion of solids by heat, a thin horizontal cylinder has one end immoveable, while the other end presses the short arm of a thin lever, whose long arm is a pointer that rises in a vertical plane. If the length of the cylinder receives by heat equal increments in equal times, show that the velocity of the pointer will continuously vary. Show also that on the arc described by the pointer, it is possible to find two points 60° apart, such that the velocity at one point shall be four times the velocity at the other.

5. For a cubic mass whose edge has a length π Fourier gives the equation $v = e^{-\frac{y^2}{4t}} \cos x \cos y \cos z$, to define at time t the temperature of the point x, y, z . The axes are central and parallel to the edges. $y = \frac{3K}{CD}$ using Fourier's notation. Show that the mass by cooling down to zero has lost a quantity of heat equal to $8CD$.

6. Determine the equation of the varied movement of heat in a solid sphere. The surface conditions are not required.

7. Obtain for the propagation of heat in solid bodies the general equation

$$\frac{dv}{dt} = \frac{K}{CD} \left(\frac{d^2v}{dx^2} + \frac{d^2v}{dy^2} + \frac{d^2v}{dz^2} \right)$$

8. The wire between two telegraph posts hangs approximately in the arc of a circle. The distance between the points of suspension is $2d$. The depth of the lowest point of the wire below the points of suspension is h . Thus $h = md$ where m is a small quantity. If owing to heat the wire sinks a small additional quantity β , show that approximately the elongation of the wire will be

$$\frac{3}{2}m\beta - \frac{1}{15}m^3\beta.$$

Hence show that the elongation by heat of a wire is made more noticeable by stretching it horizontally between two fixed points than by suspending it vertically.

9. Of a certain liquid at 0°C the barometer height is h . A straight glass tube of uniform section closed at the top stands vertically in the liquid, with a height h outside the liquid. Half of the tube contains a gas which does not mix with the liquid. In the other half there is liquid. The temperature is 0°C . The co-efficient of expansion of the gas is α . The co-efficient of heat expansion for the liquid is β . The glass expands equally in all directions. Its linear co-efficient is γ . The absolute level of the liquid outside the tube is kept constant. The tube is fixed where it meets the surface of the liquid, so that the top of the tube is not fixed. If now a

small change of temperature cause no change in the absolute height of the liquid within the tube, prove that

$$\alpha = \beta \times 4\gamma.$$

10. A cylindrical vessel with a moveable piston contains air at 0°C and normal pressure. Being too light to sink, it is forcibly but slowly sunk in the sea. Thus the piston is driven in. This process might conceivably continue till the vessel became of sufficient average specific gravity to remain where it was placed. If h be the height of the water barometer, the water is supposed to rise $n\delta$ in temperature for any depth nh below the surface whose temperature is 0°C . Under the counter influences of increased pressure and increased temperature, the material of the vessel is supposed to keep its density appreciably unchanged. Similarly for the water. V is the initial volume of air. γV is that volume of water whose weight equals that of the vessel and the air inside. μV is the volume of the material of the vessel. α is the co-efficient of air expansion. Show that, however deep the vessel be sunk, it cannot reach a position of equilibrium unless

$$\alpha \delta < \lambda - \mu$$

Instead of having a cylinder and piston, we may suppose the air to be inside a thin spherical shell of flexible metal. Slight anomalies in the expansion of water near 0°C are neglected.

[Full marks given for an adequate treatment of any eight of the above ten questions.]

HEAT AND MOLECULAR PHYSICS.

SECOND PAPER.

Examiner—MR. J. ELIOT, M. A.

1. Give a sketch of the reasoning by which it can be shown, that the efficiency of any heat engine working between the freezing

and boiling points of water can never exceed $\frac{100}{273}$

2. What is entropy? Prove that the entropy of a system tends to a maximum. State and discuss briefly the principle of the dissipation or degradation of energy.

Two bodies of equal and constant thermal capacities c are at different temperatures θ_1 and θ_2 . Find the amount of their heat energy which could be utilized by means of perfect heat engines in their reduction to a common temperature.

3. Answer fully one of the following:

(a) Give an account of the more important phenomena of capillarity. State the mathematical principles underlying the treatment of the subject by the method of surface tension. Employ them to prove that the rise of liquid in a capillary tube is inversely proportional to the diameter of the tube.

(b) Give a sketch of the molecular theory of gases, stating the most important results deduced from the theory. Employ it to

prove the formula connecting pressure, density and mean square velocity of a gas $\left(v^2 = \frac{3p}{\rho}\right)$.

(c) Prove, by Rankine's method, the formula $v^2 = \frac{c}{\rho}$

for the propagation of waves in a medium, stating fully the conditions that are assumed to be fulfilled.

4. Prove the following properties :

(a) Elasticity of constant temperature

Elasticity of constant entropy

$$= \frac{\text{Specific heat of constant volume}}{\text{Specific heat of constant pressure}} \quad (\text{for all substances}).$$

(b) $\delta\theta = \frac{\alpha\theta}{K\rho} \delta p$ (for solids and liquids)

where θ = absolute temperature

ρ = density

α = real coefficient of expansion under constant pressure

K = specific heat at constant pressure

and $\delta\theta$ and δp corresponding variations of temperature and pressure for an adiabatic change of the state of the body.

(c) The intrinsic energy of a perfect gas is a function of the temperature only.

5. Explain fully the method of measuring temperature absolutely, and independently of the nature of the substance used. Also explain (without entering into mathematical details) how absolute temperature can be determined with approximate exactness.

6. Prove either by geometrical or analytical methods the following relation which holds for change of state of substances.

$$L = (v_2 - v_1) \times \theta \times \frac{\delta p}{\delta \theta}$$

where L is the latent heat of change of state at temperature θ

v_2 is the specific volume in the higher state

and v_1 the specific volume in the lower state.

Employ this relation to discuss briefly the effect of pressure on the melting point of solids, taking for examples (a) ice, as in glaciers, (b) Stone as in the interior of the earth.

7. If L be the latent heat of evaporation of a liquid at absolute temperature θ , and s the specific heat of the liquid at the point of saturation, prove that

$$\frac{d}{d\theta} \cdot \frac{mL}{\theta} + \frac{s}{\theta} = 0.$$

where the liquid and vapour are contained in a non-conducting cylinder, and are allowed to expand by means of a piston, and m is the ratio of the mass of vapour to the whole mass.

8. Explain in full detail the method by which Rankine first determined the specific heat of air at constant pressure (2378) by the application of thermodynamical principles and methods.

9. Give an account of the additions made by Davy, Count Rumford, Rankine and Watt to our theoretical knowledge of the principles of heat or thermodynamics.

PRACTICAL EXAMINATION IN ELECTRICITY AND MAGNETISM.

Examiner—MR. J. ELIOT, M. A.

A. Perform one of the following experiments.

(1). Determine the resistance of the given galvanometer.
(2). Find the value of H (the intensity of the horizontal component of the earth's magnetic force) by the galvanic method.

(3). Find the relative electric chemical equivalents of silver and copper.

(4). Find the E. M. F. of the given cells by Poggendorf's method.

(5). Find the E. M. F. of the given cells by means of Thomson's Potential Galvanometer.

(6). Find the resistance of the given electrolyte (a tube fill d with sulphate of copper solution).

(7). Find the relative strengths of the magnetic fields due to the earth and the given magnet by the given apparatus.

(8). Find the constant of the given galvanometer.

B. Describe fully the parts and adjustments of any one of the following instruments.

(a). Thomson's Quadrant Electrometer.

(b). Ruhmkorff's Coil.

(c). Ladd's dynamo-magnetic machine.

(d). Telegraphic receiving instrument.

(e). Thomson's high resistance galvanometer.

(f). Voss Induction machine.

PRACTICAL EXAMINATION ON HEAT.

Examiner—MR. J. ELIOT, M. A.

Perform two of the following experiments.

1. Determine the amount of aqueous vapour in a cubic foot of air in the room.

2. Find the latent heat of fusion of ice.

3. Determine the specific heat of iron.

4. Ascertain the error of the freezing and boiling points of the given thermometer.

5. Determine the relative specific heats of mercury and water by means of the rate of cooling.

(a.) Write down all the words in extracts (1) and (2) in which final "e" is sounded, and explain its various uses.

(b.) Name the Tales from which the two extracts are taken.

3. Divide the English Language into periods, as regards its development, up to the middle of the 15th century, and enumerate the chief grammatical characteristics of each period. What is meant by the "New English"?

4. Point out, and account for, the principal points of difference between Chaucer and Langland as poets. Draw a picture of English Society in their days, such as we gather it to have been from their poems.

5. "Spenser in affecting the ancients writ in no language."

"Spenser to me, whose deep conceit is such

As passing all conceit, needs no defence."

Explain and illustrate these two statements. Did the "affectation" extend to the "conceit" of the Faery Queene as well?

ENGLISH.

Examiner—MR. H. M. PERCIVAL, M. A.

1. (a.) Trace in outline the growth of Shakspeare's "Mind and Art." Into what periods have his plays been divided in this light? Does this division differ from the chronological order of the plays? What are the chief Tests for determining that order?

(b.) What influence did Shakspeare and Ben Jonson severally exert upon the English Drama? Can either of them be looked upon as the founder of a Dramatic "School"?

(c.) Compare Marlowe's character of *Edward II* with Shakspeare's *Richard II*.

2. Trace the successive phases through which British Lyric Poetry has passed since its dawn. Characterise Shakspeare, Milton, Wordsworth and Burns as lyric poets, pointing out how far they represent these phases. Wherein lies the peculiar charm of the Early Ballad poetry of England and Scotland? Illustrate with quotations.

3. "Tennyson is the representative poet of the Victorian Age;" "Browning's poetry is the poetry of the Future." Examine these two dicta and contrast, from their point of view, the genius of

the two poets. What is *Pre-Raphaelitism* in English poetry? Did it influence these two poets?

4. Indicate the scope and character of each of the following poems, and write a critical analysis of any one of them:—*Comus*. *Essay on Man*. *The Prelude*. *Prometheus Unbound*. *The Princess*. *Aurora Leigh*.

5. (a.) Name the works in which the following characters and personages occur; and sketch any one character:—

Belpheobe, Matthew Merrygrooke, Amoret, Prince Prettyman, Subtle, Jaques, Sidrophel, Cordelia, Zimri, Constance, Dorothea, King Cibber, Lady Bountiful, Birdofredum Sawin, Dr. Hornbook, The Heir of Linne.

(b.) In what plays and poems, and under what names, have the characters of a *Braggart* and of a *Devoted Wife* been drawn?

6. Explain, with notes where necessary, the following passages. Name the work from which each passage is taken, and point out the connection with the context in each case:—

(a.) The airy spirits play with falling stars,
And mount the sphere of fire, to kiss the moon;
While she sits reading by the glow-worm's light
Or rotten wood, o'er which the worm hath crept,
The baneful schedule of her nocent charms,
And binding characters, through which she wounds
Her puppets, the *sigilla* of her witchcraft.

What other poets have described Witches and their doings?

Do the defects conspicuous in the author's other writings, show themselves in the work from which the above is an extract?

(b) (1). Wife, mother, child, I know not. «My affairs
Are servanted to others: though I owe
My revenge properly, my remission lies
In Volscian breasts.

Refer to other instances in English literature depicting the struggle between Duty and Affection.

(2). For new-made honour doth forget men's names;
'Tis too respective and too sociable
For your conversion. Now your traveller,
He and his toothpick at my worship's mess,
And when my knightly stomach is sufficed,
Why then I suck my teeth and catechize
My picked man of countries.

Refer to contemporary opinion regarding the fruits of Foreign Travel in Elizabeth's time.

(3). *Mal.* 'Tis his main hope:
For where there is advantage to be given,
Both more and less have given him the revolt,
And none serve with him but constrained things
Whose hearts are absent too.

Mac. Let our just censures
Attend the true event, and put we on
Industrious soldieryship.

Discuss the various readings proposed in extract (3).

- (c.) What recks it them? What need they? They are sped;
And when they list, their lean and flashy songs
Grate on their scrannel pipes of wretched straw;
The hungry sheep look up and are not fed;

* * *

Besides what the grim wolf with privy paw
Daily devours apace, and nothing sed;
But that two-handed engine at the door
Stands ready to smite once, and smite no more.

Quote or refer to other passages in the author's works breathing similar sentiments.

- (d.) Call Tibbald Shakspear, and he'll swear the nine,
Dear Cibber! never matched one ode of thine.
Lord! how we strut thro' Merlin's Cave, to see
No poets there, but Stephen, you and me.

What poet has described a *Cave of Merlin*?

- (e.) He know what's what, and that's as high
As metaphysic wit can fly.
In school-divinity as able
As he that hight *Irrefragable*;
A second Thomas or at once
To name them all, another Dunce.

* * *

For he a rope of sand could twist
As tough as learned Sorbonist;
And weave fine cobwebs, fit for skull
That's empty when the moon is full.

What aspects of English Satire do extracts (d) and (e) represent? Has the popularity of Satire of this nature declined in our own days? If so, why?

- (f.) The Holy One will hear!
And what 'mid silence deep, with faith sincere,
Ye, in your low and undisturbed estate,
Shall simply feel and purely meditate
Of warnings—from the unprecedented night,
Which, in our time the impious have disclosed;
And of more arduous duties thence imposed
Upon the future advocates of right;
Of mysteries revealed,
And judgments unrepealed,—
Of earthly revolution,
And final retribution,—
To his omniscience will appear
An offering not unworthy to find place,
On this high day of thanks before the throne of Grace.

What side of the writer's genius do these lines illustrate? What is their subject? What was Byron's attitude on the same subject?

7. Explain the following expressions occurring in Shakspeare:—
Venus of wit. Lined soul. The melancholy of Moorditch. Vile

besonian. Good broken music. Pigeon-egg of discretion. Humorous sadness. A vice of kings. Nook-shotten isle of Albion. Unquestionable spirit.

1. "There is no pure style in prose writing till Hobbes began to write in English." Test the accuracy of this statement by a review of the styles of Hooker and Bacon.

2. "The Historian who is also an Artist." Explain this expression. Criticise Gibbon, Macaulay and Carlyle as "artistic historians," illustrating your remarks by references to well-known passages in their works.

3. Compare Johnson with Addison as Moralists; taking the former's conversation in *Boswell's Life*, and the latter's papers in *the Spectator*, as the basis of the comparison.

4. Indicate the general character of each of the following works, and write a critical analysis of any one of them:—*The Paston Letters. Letters on Toleration. Areopagitica. Thoughts on the Cause of the Present Discontents. Footprints of the Creator. Culture and Anarchy.*

5. (a.) Name the works in which the following characters and personages occur; and sketch any one character:—

Musidorus, Raphael Hythloday, Mr. Interpreter, Morgan le Fay, Lord Peter, Uncle Toby, Tom Bowling, Burley, Mr. Foker, Fanny, Lady Castlewood, Dorothea Brooke, Fanny Price, Sir Lucius O'Trigger, Mrs. Gamp, Mr. Pecksniff.

(b.) Trace the literary pedigree of the last three characters.

6. Explain, adding notes where necessary:—

(a.) Thou alleadgest thy youth and allowest thy wisdom, the one not apt to know the impressions of love, the other suspicious not to believe them. Truly Camilla, I have heard, that young is the goose yāt wil eate no oates, and a very ill cocke that will not crow before he be olde, and no right lyon, that will not feede on hard meat, before he tast sweet milke, and a tender virgin God knowes it must be, that measureth hir affections by hir age, when as naturally they are enclyned (which thou particularly putttest to our countrey) to play the brides, before they be able to dresse their heades.

(b.) Fow for similitudes, in certaine printed discourses, I think all herbarists, all stories of beasts, foules, and fishes are rifled up, that they come in multitudes, to waite upon any of our conceits; which certainly is as absurd a surfet to the eares, as is possible; for the force of a similitude, not being to proove anything to a contrary disputer, but onely to explaine to a willing hearer, when that is done, the rest is a most tedious prating.

What light do these two passages throw upon the prevailing literary style of the time? Where are they taken from?

(c.) Impossible it is but that they should fall into a number of gross errors, who only take such laws for positive as have been made or invented of men, and holding this position hold also, that all laws natural do

always bind ; laws positive not so, but only after they have been expressly and wittingly imposed.

What is Hooker's line of argument for proving the necessity of Supernatural Law? In what relations does he make this law stand to Natural and Positive Law respectively?

(d.) (1.) If a man deal with another upon conditions, the start or first performance is all ; which a man cannot reasonably demand, except either the nature of the thing be such, which must go before ; or else a man persuade the other party, that he shall still need him, in some other thing ; or else that he be counted the honestest man.

(2.) To the nature of the mind of all men it is consonant for the affirmative or active to affect more than the negative or privative. So that a few times hitting or presence, countervails oft-times failing or absence.

Bacon says of the *Essay* : " the word is late, but the thing is ancient." Explain this.

(e.) So that they having but newly left those grammatic flats and shallows where they stuck unreasonably to learn a few words with lamentable construction, and now on the sudden transported under another climate to be tost and turmoiled with their unballasted wits in fathomless and unquiet deeps of controversy, do for the most part grow into contempt and hatred of learning, mocked and deluded all this while with ragged notions and babblements, while they expected worthy and delightful knowledge.

Against what system of Education is this a protest? What is the nature of the Reform Milton proposes?

(f.) The tragical exits and unexpected periods of some eminent persons cannot but amuse considerate observers ; wherein notwithstanding most men seem to see by extramission, without reception or self-reflexion, and conceive themselves unconcerned by the fallacy of their own exemption : whereas the mercy of God hath singled out but few to be the signals of his justice, leaving the generality of mankind to the pædagogy of example.

Sir T. Browne's egotism " is the egotism of a melancholy mind." Explain this.

(g.) A poor relation is the most irrelevant thing in nature—a piece of impertinent correspondency,—an odious approximation—* * *—a blot on your 'scutcheon,—a rent in your garment,—a death's-head at your banquet,—Agathocles' pot,—a Mordecai in your gate,—a Lazarus at your door,—a lion in your path,—a frog in your chamber,—a fly in your ointment,—a mote in your eye,—* * *—the one thing not needful,—the hail in harvest,—the ounce of sour in your pound of sweet.

What effect had the study of the Elizabethan Drama upon Lamb's genius?

Characterise Lamb's Humour.

(c.) Social Reform in India.

PSYCHOLOGY.

Examiner—P. K. RAY, D. Sc.

1. What is meant by a mental faculty? How many mental faculties are there? How do you reconcile the unity of the mind with a multiplicity of faculties?

2. What is meant by Localization of Sensations? Is it original or acquired? Where is a sensation originally felt? Why are some sensations referred to the organism and others to extra-organic objects? Is there any sensation referred neither to the organism nor to any extra-organic object?

3. Are there any unconscious mental states? Discuss this question from both physical and psychical sides, noticing differences of opinion.

4. How would you settle the question between Realism and Idealism? Distinguish the different forms of Realism and analyse the arguments by which each of them is established. Defend the form which appears to you to be true or the least objectionable.

5. Give a critical estimate of Mill's system of Psychology.

6. Have we any idea of the Infinite? Discuss this question, noticing differences of opinion among philosophers and giving your own view with reasons.

ETHICS.

Examiner—P. K. RAY, D. Sc.

1. Give a critical account of Aristotle's Ethical System.

2. Compare Ancient Hedonism with Utilitarianism.

3. Explain and examine Kant's reconciliation of Free Will with Causation. What is Mill's position in the Free-Will controversy?

4. Explain Sidgwick's classification of the Methods of Ethics. State and examine the objections to Hedonism.

5. Explain Martineau's classification of Ethical systems and give an account of his own system.
6. What is the relation of Ethics to Theology ?

LOGIC.

Examiner—P. K. RAY, D. Sc.

1. Is Logic the science of the principles regulative of *all* knowledge or of *only inferential* knowledge ? Discuss this question as fully as you can.
2. Distinguish the elements of pure observation and of inference in the following :
 - (1) "I hear a man's voice."
 - (2) "I smell a rose."
 Reduce to logical forms the inferences involved in them.
3. Compare the views of Mill and Jevons, in regard to the nature and foundation of Induction.
4. Distinguish the Deductive method from the Hypothetical. Is verification necessary in both ? Can the Deductive method give us any new truth ? Discuss this question and estimate, in the light of the discussion, the value of the Syllogism.
5. Compare the conditions of a legitimate hypothesis with those of an induction.
6. What is the relation of Probability to Logic ? Explain the fundamental rules of inference in Probability.

HISTORY OF PHILOSOPHY.

1. Trace the development of Greek Thought from Socrates to Aristotle.
2. Give a critical estimate of Berkeley's system of Philosophy.
3. Trace the influence of Kant and Hegel upon British Philosophy.
4. Give an account of Hegel's Logic.
5. Trace the history of the doctrine of Causation from Locke down to the present time, distinguishing and examining the leading views.

GREECE AND ROME.

Examiner—MR. W. T. WEBB, M. A.

1. Give an historical sketch of the Peloponnesian War, and examine its moral and political effects upon the Greek nationalities.
2. Write a short essay on Greek Colonization, giving an account of the principal Greek Colonies, and pointing out the political in-

fluence of their establishment upon Greece proper. Mention examples of this influence.

3. Write brief historical notes on the following :—

(a.) The Battle of Egospotami, the peace of Antalcidas, the battle of Coronea, the battle of Leuctra, the battle of Platæa, the battle of the Alia, the battle of Ipsus, the battle of Munda, the battle of Mylæ.

(b.) The Achaean League, the Amphictyonic Council, the Court of Areopagus, the Voyage of Nearchus, the Thirty Tyrants, the Prætorian Cohorts, the Canuleian Law.

(c.) Ostracism, the Rhapsodists, the Sportula, the Roman Censors, the Triclinium, the Vestal Virgins, the Lupercales, the Spolia Opima.

4. Give a complete account of the various Greek Schools of Philosophy, and examine the influence of the Greek Philosophy upon Roman society and morals. How was the literature of Rome affected by her intercourse with Greece?

5. Relate the chief events of the struggle between the Aristocratic and the Democratic parties at Rome from the year 88 B. C. to the battle of Philippi. Point out the general result of that struggle.

6. Write a brief historical essay on Slaves and Slavery in Rome throughout her history, and describe the results flowing from the institution.

ENGLAND AND INDIA.

Examiner—MR. W. T. WEBB, M. A.

1. Trace the rise and development of Parliamentary government in England from 1265 to 1689. Give some account of the different Reform Bills down to that of 1867.

2. Draw a parallel between the careers of Thomas Cromwell and Lord Strafford, elucidating their political aims. Give some account of the "Strafford Letters."

3. Write an historical sketch of the American War of Independence. Describe clearly the position and views of Burke with reference to this subject.

4. Describe the condition of Ireland at the beginning of the 16th century, and the policy of Henry VIII in dealing with her. Trace the causes that led to the concession of legislative independence to Ireland in 1782, and discuss how far the results of that measure justify the present proposal to grant a separate Parliament for Irish affairs to that country.

5. Enumerate (in chronological order) and characterise the chief political measures and events in the history of India between the year 1858 and the present time.

6. Illustrate the territorial changes that took place in India during the century dating from the end of 1757 to the end of 1857 by two maps representing India at either date. Explain the causes that led up to the various extensions of British territory.

MODERN EUROPE.

Examiner—MR. W. T. WEBB, M. A.

1. Briefly sketch the career of Peter the Great, and trace the subsequent development of the power of Russia and of her influence upon European politics.

2. Write a short life of Luther, and point out the political and other causes of the success of the Reformation in Germany.

3. Give a brief sketch of the history of the Seven Years' War. Was England a gainer or a loser by the struggle?

4. Write a summary of the progress of the French Revolution down to the establishment of the Directory. Point out how that Revolution differed from the English Revolution of 1648 in the causes, guiding principles, and results of both.

5. Describe the political position of the various European States after the restoration of peace in Europe in 1815. How were English politics affected by the peace?

6. Write brief historical notes on the following :—

The Peace of Belgrade; the Berlin Decree; the Peace of Carlowitz; the Convention of Cintra; the Spanish Fury; the Convention of Gastein; the Hundred Days; the Peace of Jassy; the Massacre of St. Bartholomew; the Peace of Ryswick; the Golden Bull; the League of Smalkald; the Peace of Tilsit; the Council of Trent; the Massacre of Vassy; the Vehm-gericht; the Siege of Zutphen.

POLITICAL ECONOMY.

Examine—MR. W. T. WEBB, M. A.

1. Analyse Cost of Production in relation to Wages and Profits, and explain clearly the theory of Value with reference to all classes of commodities.

2. What is Ricardo's theory of Rent? Is it to be accepted with any modifications? Show exactly how Rent is affected by (a) Agricultural Improvements, (b) Variations in rates of Wages and Profits, (c) Increase in Population. How should considerations of Rent affect legislation relating to the Land?

3. Enumerate the general principles that should govern Taxation. Discuss the incidence, under all conditions, of the following taxes: a corn-tax, a land-tax, a house-tax, an income-tax. What are the advantages or disadvantages of the last in the case of a country like India?

4. State what are the ordinary functions of Government, and examine the question of the proper extent and limits of State Intervention.

5. Examine and discuss the economic position of India at the present time with special reference to (a) Public Works Expenditure, (b) Famines, (c) the Opium Revenue, (d) Import Duties.

6. Write a short essay on Bimetallism, giving a synopsis of the arguments for and against it. State what you consider to be the right conclusion on the subject.

This chief of the Dánavas and Daityas, and enhancer of their
renown, has conquered unconquerable delusion ; though dispirited,
he is not bewildered. Having lost his prosperity, fallen from his
place, cast down and bound by his enemies, abandoned by his
relations, and involved in suffering, reprehended and cursed by
his preceptor, still, faithful to his obligation, he has not abandoned
truth. Though duty has been inculcated by me in a deceitful
fashion, this truthful being doth not swerve from it.

2. Some philosophers say that the idea of gods or superhuman beings arose in the mind of man from his awe and wonder at the elemental forces ; others again maintain that ancestors of an age long past, who, when living, were renowned for extraordinary qualifications, such as valour, skill, wisdom, and so forth, were raised to the rank of divinities. Which of the two views would you be inclined to adopt, regard being had to what you have studied of the Vedic literature.

3. Give a brief exposition of the pantheistic doctrine, as it is propounded in the Upanishad, noticing, if there are any, the references to the said doctrine to be found in the Sanhitā portion of the Veda.

4. What are the Prātisākhyas ? Why were they so called ? Name the authors of the principal Prātisākhyas, and give such accounts of their lives as are obtainable.

5. Who were Sāyana and Mādhava ? How do they define the characteristics of the Veda, and argue in support of its authority ? Notice the objections urged against their views, and the answers which they have given to the said objections.

6. Write an account in Sanscrit of Paraśurāma, such as it may be gathered from both the Rāmāyaṇa and the Mahābhārata, and describe his character in accordance with the conception that may be formed of it, from the brief portraiture given by Kālidāsa in his Raghuvansha.

COMPARATIVE PHILOLOGY.

Examiner—A. F. R. HOERNLE, PH. D.

1. Sketch the origin and history of the modern science of Comparative Philology. Mention any early attempts at it and account for their failures. Define the relation of Comparative Philology to the Science of Language and to Comparative Grammar; and distinguish between Comparative Grammar and Historical Grammar.

2. Explain the terms Phonology, Morphology, Sematology, Glottology. Define their mutual relations and limitations as well as their relative importance in Comparative Philology. What is meant by the "Philosophy of speech" and "Linguistic Metaphysics"?

3. Language has been said to be an "organism." Explain clearly the view of the nature of language embodied in that term, and distinguish it from the opposite view. Discuss the relative propriety of the two views, and point out the elements of truth in each of them. Mention the chief supporters on each side. Are the views of the ancients as to existence of language by "nature or convention," identical with these?

4. Explain clearly the question of the "Unit" of language and show the importance of its bearing on the classification of languages. Which are the two rival theories on the subject? Discuss their relative correctness.

5. What are the different means at the disposal of man for the outward representation and communication of his thoughts? Discuss their comparative utility and universality. Which of them are supposed to have been the factors in the origination of spoken language, and to what relative extent?

6. Enumerate the three great causes of change in language. Define the sphere of action of each and illustrate by examples. What is meant by "dialectic regeneration" and by "phonetic decay"? Which are the great counteracting factors of stability in language?

7. "Language is no test of race, only of social contact." "Language is the outward expression of the mind and history of a nation." Explain clearly these two statements, and illustrate their truth by a reference to the Aryan race, and the English and Hindu nations.

8. Show that language advances both from complexity to simplicity, and from multiplicity to unity. Illustrate from the three points of view of phonology, morphology and sematology.

COMPARATIVE PHILOLOGY.

Examiner—A. F. R. HOERNLE, PH. D.

1. Explain clearly the classification of languages into polysynthetic, isolating, incorporating, agglutinative, inflectional and analytic. Give instances of each kind. Is there any justification for looking upon this classification as representing any advance from a

lower to a higher stage? Show that there is a corresponding geographical distribution of languages.

2. What is the physiological definition of breath, voice, vowel, consonant, nasal, trill, glide? Define and distinguish the chief varieties of vowels and consonants, both phonetically and physiologically. Describe the successive changes of position in the mouth-organs while pronouncing the word "*Premchand*."

3. Show that true etymology must obey the physiological laws of speech. Illustrate by examples of true and false etymologies. What were the rules of etymology accepted among the Greeks? Show their fallaciousness.

4. What are the "roots" of language? Where and how were they first discovered? Mention and discuss the various theories held regarding them. What are primary and secondary, predicative and demonstrative roots?

5. Enumerate and explain the various modes adopted by language for denoting the relations of grammar. Give examples.

6. Explain the nature and meaning of inflexion. Compare and contrast it as occurring in the Aryan and Semitic languages respectively. "Inflexion is nothing but a device for turning a noun into an adjective or adverb." Explain and illustrate this statement.

7. Distinguish clearly between tone, stress, and quantity of a syllable; also between syllable-tone, word-tone, and sentence-tone. Define and illustrate from the Sanskrit and Greek their respective functions in the economy of language.

8. "Mythology is not so much a disease of language as a misunderstanding of its metaphors and a misconception of the analogical reasoning of our early forefathers." Explain clearly the theories of mythology referred to in this passage and illustrate them by examples.

COMPARATIVE PHILOSOPHY.

Examiner—A. F. R. HOERNLE, PH. D.

1. Draw up a list of the Indo-European languages in a tabular form, showing their descent as commonly understood. Note any important differences of opinion on the subject. State briefly the evidence on which they are accepted as constituting one "family."

2. State fully the grounds on which Sanskrit is accepted as having preserved the most antique form among all the members of the Indo-European group of languages, and Lithuanian among the European members of it. Show that occasionally other members of the group have preserved more primitive forms than either of those two languages. Give examples.

3. State briefly the conclusions which have usually been drawn from the results of a comparative study of the Indo-European languages with regard to the original home, the wanderings, and the state of culture of the primitive Aryan race. What objections can be made to these conclusions? What is the most recent theory on the subject of the origin of the Aryan race?

4. The Indo-European group of languages occupies an exceptional position among the languages of the world. Explain clearly wherein that exceptional position consists, and discuss the respec-

tive merits of the three theories put forward to account for it, viz., those of agglutination, evolution, and adaptation.

5. What is "Grimm's Law"? Show that the apparent exceptions to it in reality prove the infallibility of the phonetic laws of language. Illustrate your remarks by the words *hail, care, brother, father, seren, eight, hundred*.

6. What is the meaning of *guna* and *vridhhi*? What are the phenomena thus called? Show that similar phenomena may be observed in other Indo-European languages. May they be properly classed as constituting inflexion?

7. Explain and illustrate by examples the processes called Assimilation, Swarabhakti, Metathesis, Epenthesis, Umlaut.

8. Show that the processes of agglutination, isolation, and incorporation have occasionally been active in the formation of the modern Indo-European languages.

COMPARATIVE PHILOLOGY.

Examiner—A. F. R. HOERLNE, PH. D.

1. Write a sketch of the origin and growth of the English language, marking distinctly the different epochs, and tracing the changes in grammar and vocabulary characterising each epoch. Mention the Germanic dialects nearest in affinity to the Anglo-Saxon.

2. Prove from such words as *telegraphically, atonement, disbelief, forbearance*, both that the modern English language is historically a composite structure, and yet practically one homogeneous tongue. What languages have contributed to the formation of those words? Mention a few other examples of contribution from the Celtic, Danish, French, Greek and Latin.

3. Illustrate, from a comparison of the modern English with the previous Anglo-Saxon, the action of the principle of analogy in the formation of the modern genitive, plural and preterite.

4. (a.) Explain the origin and the exact logical signification of the phrases "*I will go*," "*I shall go*," "*I have to go*," "*I am to go*."

(b.) Trace the historical facts embodied in the words *pagan, romantic, Kaiser, money, mannmüt*.

5. Write a sketch of the history of philological science among the early Hindus. Point out the great importance of the labours of the Sanskrit Grammarians for the modern science of Comparative Philology.

6. Explain the meaning of the names Sanskrit, Prākṛit and Pāli. Define the relation to each other of the languages known under those names, and explain the reason, why they are so called.

7. Trace the origin and descent of the Gaudīan (or Modern Aryan) languages of India. State their number, names and geographical distribution.

8. Show that in the formation of the modern Indian languages the same or similar phonetic and morphologic laws have been active, as those in the modern languages of Europe. Illustrate by English *frail, nail*, Hindi *nair, rain*; English *makership*, Hindi *karanehār*. Give other examples.
